Optimal and Adaptive Design of Logical Granulometric Filters

EDWARD R. DOUGHERTY AND YIDONG CHEN

I. Introduction	1
II. Euclidean Granulometries	3
III. Logical Granulometries	6
IV. Adaptive Single-Parameter Disjunctive Granulometric Filters	12
V. Adaptation in a Multiparameter Disjunctive Model.	24
VI. Granulometric Bandpass Filters.	39
VII. Logical Structural Filters	56
References	69

Dyadic Warped Wavelets

GIANPAOLO EVANGELISTA

I. Introduction	74
II. Warped Wavelets in Brief	77
III. Multiresolution Approximation	79
IV. From WMRA and Warped Scaling Functions to Warped QMFs	90
V. From Warped QMF to Warped Scaling Functions and WMRA	104
VI. Warped Wavelets.	118
VII. Construction of Iterated Warping Maps	129
VIII. Computation of the Dyadic Warped Wavelet Transform.	161
IX. Conclusions	169
References	170

Recent Developments in Stack Filtering and Smoothing

JOSÉ L. PAREDES AND GONZALO R. ARCE

I. Introduction	174
II. Threshold Decomposition and Stack Smoothers	175
III. Mirrored Threshold Decomposition and Stack Filters.	179
IV. Integer Domain Filters of Linearly Separable PBFs	183
V. Analysis of WM Filters Using Threshold Logic	189

VI. Recursive Weighted Median Filters and Their Nonrecursive WM Filter Synthesis	195
VII. Weighted Median Filters with N Weights.	200
VIII. Stack Filter Optimization	205
IX. Applications of Stack Filters	223
X. Conclusion	237
References	238

Resolution Reconsidered—Conventional Approaches and an Alternative

A. VAN DEN BOS AND A. J. DEN DEKKER

I. Introduction	242
II. Classical Resolution Criteria	245
III. Other Resolution Criteria	248
IV. Modeling and Parameter Estimation	264
V. Elements of Singularity Theory.	277
VI. Singularity of Likelihood Functions	292
VII. Singularity and Resolution.	325
VIII. Summary and Conclusions.	353
References	355
