

CONTENTS

CONTRIBUTORS	vii
PREFACE	ix
FUTURE CONTRIBUTIONS	xi

Magnetic Resonance Imaging and Magnetization Transfer

JOSEPH C. MCGOWAN

I. Introduction	2
II. Magnetic Resonance Imaging	12
III. Development of Magnetization Transfer Theory	21
IV. Magnetization Transfer Imaging	53
V. Application in Human Studies	65
VI. Conclusions	77
Appendix I: Solution of the Complete Coupled Bloch Equations for Two-Site Chemical Exchange	78
References	80

Noninterferometric Phase Determination

DAVID PAGANIN AND KEITH A. NUGENT

I. Introduction and Overview	86
II. Methods of Phase Imaging	87
III. A New Approach to Phase	93
IV. Propagation-Based Phase Recovery	99
V. Experimental Demonstrations	108
VI. Conclusion	122
References	123

Recent Developments of Probes for Scanning Probe Microscopy

EGBERT OESTERSCHULZE

I. Introduction	129
II. Atomic Force Microscopy	130
III. Near-Field Optics	151
References	191

Morphological Image Enhancement and Segmentation

IVAN R. TEROL-VILLALOBOS

I. Introduction	208
II. Some Basic Tools in Mathematical Morphology	210
III. Morphological Nonincreasing Filters Using Gradient Criteria (Morphological Slope Filters)	214
IV. A Sequential Family of MSFs	229
V. Image Segmentation using MSFs	235
VI. Nonlinear Multiscale Approach Using a Sequential Family of MSFs	248
VII. Conclusion	271
References	272
INDEX	275
