- ix *Conference Committee*
- xi *Introduction*

## SESSION 1 SPACE INTERFEROMETRY

---

- 2 **POINTS: an astrometric spacecraft with multifarious applications (Invited Paper) [2200-01]**  
R. D. Reasenberg, R. W. Babcock, M. A. Murison, M. C. Noecker, J. D. Phillips, Smithsonian Astrophysical Observatory; B. L. Schumaker, J. S. Ulvestad, Jet Propulsion Lab.
- 18 **Newcomb: a scientific interferometry mission at low cost [2200-02]**  
R. D. Reasenberg, R. W. Babcock, J. D. Phillips, Smithsonian Astrophysical Observatory;  
K. J. Johnston, U.S. Naval Observatory; R. S. Simon, National Radio Astronomy Observatory
- 27 **Metrology for spatial interferometry [2200-05]**  
Y. Gürsel, Jet Propulsion Lab.
- 35 **Solar interferometry: space and ground instrumental prospects (Invited Paper) [2200-06]**  
L. Damé, Service d'Aéronomie du CNRS (France)
- 51 **Sensitivity limits on an image-plane fiber interferometer at low light levels [2200-61]**  
S. Prasad, Univ. of New Mexico

## SESSION 2 PROGRESS REPORTS ON GROUND SYSTEMS I

---

- 62 **Progress on the Big Optical Array (BOA) (Invited Paper) [2200-07]**  
J. T. Armstrong, Universities Space Research Association and U.S. Naval Observatory
- 71 **Baseline metrology system of the U.S. Naval Observatory Astrometric Interferometer [2200-08]**  
N. M. Elias II, U.S. Naval Observatory
- 76 **Hybrid design for a six-way beam combiner [2200-09]**  
D. Mozurkewich, Naval Research Lab.
- 81 **U.S. Naval Observatory Astrometric Interferometer [2200-10]**  
D. J. Hutter, U.S. Naval Observatory
- 89 **ASEPS-0 Testbed Interferometer (Invited Paper) [2200-11]**  
M. M. Colavita, M. Shao, B. E. Hines, J. K. Wallace, Y. Gürsel, F. Malbet, J. W. Yu, H. Singh,  
C. A. Beichman, Jet Propulsion Lab.; X. P. Pan, T. Nakajima, S. R. Kulkarni, California Institute  
of Technology
- 98 **ASEPS-0 Testbed Interferometer control system [2200-12]**  
B. E. Hines, Jet Propulsion Lab.

---

**SESSION 3    PROGRESS REPORTS ON GROUND SYSTEMS II**

---

- 112    **COAST: its current status, operation, and results (Invited Paper)** [2200-13]  
J. E. Baldwin, R. C. Boysen, G. C. Cox, C. A. Haniff, J. Rogers, P. J. Warner, D. M. A. Wilson, Mullard Radio Astronomy Observatory (UK); C. D. Mackay, Univ. of Cambridge Institute of Astronomy (UK)
- 118    **Design and performance of COAST** [2200-14]  
J. E. Baldwin, R. C. Boysen, G. C. Cox, C. A. Haniff, J. Rogers, P. J. Warner, D. M. A. Wilson, Mullard Radio Astronomy Observatory (UK); C. D. Mackay, Univ. of Cambridge Institute of Astronomy (UK)
- 129    **CHARA Array (Invited Paper)** [2200-15]  
H. A. McAlister, W. G. Bagnuolo, Jr., T. ten Brummelaar, W. I. Hartkopf, N. H. Turner, CHARA/Georgia State Univ.; A. K. Garrison, W. G. Robinson, Georgia Institute of Technology; S. T. Ridgway, National Optical Astronomy Observatories
- 140    **CHARA beam combiner design** [2200-16]  
T. ten Brummelaar, W. G. Bagnuolo, Jr., CHARA/Georgia State Univ.
- 152    **Current status of the IOTA interferometer (Invited Paper)** [2200-17]  
N. P. Carleton, W. A. Traub, M. G. Lacasse, P. Nisenson, M. R. Pearlman, R. D. Reasenber, X. Xu, C. M. Coldwell, A. Panasyuk, Smithsonian Astrophysical Observatory; J. A. Benson, C. Papaliolios, Harvard Univ.; R. Predmore, F. P. Schloerb, Univ. of Massachusetts/Amherst; H. M. Dyck, Univ. of Wyoming; D. M. Gibson, MIT Lincoln Lab.

---

**SESSION 4    PROGRESS REPORTS ON GROUND SYSTEMS III**

---

- 168    **Interferometric mode of the ESO Very Large Telescope (Invited Paper)** [2200-18]  
O. von der Lühe, D. Ferrand, B. Koehler, European Southern Observatory (FRG); N. Zhu, Shanghai Observatory (FRG); T. Reinheimer, European Southern Observatory and Max-Planck-Institut für Radioastronomie (FRG)
- 180    **Engineering aspects of the environmental factors affecting the VLTI performance** [2200-19]  
B. Koehler, O. von der Lühe, European Southern Observatory (FRG)
- 195    **LAMP: a concept for the ESO VLTI fringe sensor** [2200-20]  
J. Gay, Y. Rabbia, Observatoire de la Côte d'Azur (France)
- 204    **Prototype for the ESO VLTI fringe sensor** [2200-21]  
Y. Rabbia, S. Menardi, J. Gay, P. M. Boursolon, P. Antonelli, M. Dugué, J. Marchal, Observatoire de la Côte d'Azur (France); F. Reynaud, IRCOM (France); M. Faucherre, European Southern Observatory (Chile); N. Hubin, European Southern Observatory (FRG)
- 216    **Spectrally resolved interferometry with the Grand Interféromètre à 2 Télescopes: results and prospects** [2200-22]  
F. Vakili, D. Bonneau, P. R. Lawson, G. Merlin, D. Mourard, P. Stee, I. Tallon-Bosc, F. Vallée, Observatoire de la Côte d'Azur (France)
- 222    **Active phase stabilization at the I2T: implementation of the ASSI table** [2200-23]  
S. Robbe, Observatoire de la Côte d'Azur (France); B. Sorrente, F. Cassaing, ONERA (France); Y. Rabbia, Observatoire de la Côte d'Azur (France); G. Rousset, ONERA (France); L. Damé, Service d'Aéronomie du CNRS (France); P. Cruzalèbes, G. Schumacher, Observatoire de la Côte d'Azur (France)

- 231 **Progress in commissioning the Sydney University Stellar Interferometer (SUSI) (Invited Paper)** [2200-24]  
J. Davis, W. J. Tango, A. J. Booth, R. A. Minard, S. M. Owens, R. R. Shobbrook, Univ. of Sydney (Australia)
- 242 **Progress report on the construction of the Navy Prototype Optical Interferometer at the Lowell Observatory** [2200-25]  
N. M. White, R. L. Millis, O. G. Franz, J. M. Loven, Lowell Observatory; D. J. Hutter, K. J. Johnston, J. Armstrong, U.S. Naval Observatory; D. Mozurkewich, Naval Research Lab.
- 248 **Strategy for interferometry with the Large Binocular Telescope** [2200-55]  
J. M. Hill, Steward Observatory/Univ. of Arizona
- 260 **A thousand and one nights of seeing on Mt. Wilson** [2200-57]  
D. F. Buscher, Universities Space Research Association and U.S. Naval Observatory

---

**SESSION 5 HETERODYNE INTERFEROMETRY**

---

- 274 **University of California/Berkeley Infrared Spatial Interferometer: recent system upgrades and analysis of atmospheric fluctuations** [2200-26]  
M. Bester, W. C. Danchi, Univ. of California/Berkeley; C. G. Degiacomi, Univ. zu Köln; P. R. Bratt, Hughes Santa Barbara Research Ctr.
- 286 **Analysis of visibility data from the University of California/Berkeley Infrared Spatial Interferometer: radiative transfer modeling and results on fifteen stars** [2200-27]  
W. C. Danchi, M. Bester, Univ. of California/Berkeley; L. J. Greenhill, Smithsonian Astrophysical Observatory; C. G. Degiacomi, Univ. zu Köln; C. H. Townes, Univ. of California/Berkeley
- 304 **Circumstellar envelope of VX Sgr resolved with long-baseline interferometry at millimeter and mid-infrared wavelengths** [2200-28]  
L. J. Greenhill, J. M. Moran, Harvard-Smithsonian Ctr. for Astrophysics; D. C. Backer, M. Bester, W. C. Danchi, Univ. of California/Berkeley
- 316 **Toward 10-milliarcsecond infrared astrometry** [2200-29]  
R. N. Treuhaft, S. T. Lowe, Jet Propulsion Lab.; M. Bester, W. C. Danchi, C. H. Townes, Univ. of California/Berkeley
- 325 **LATOR: laser astrometric test of relativity** [2200-30]  
J. W. Yu, M. Shao, Y. Gürsel, R. Hellings, Jet Propulsion Lab.
- 335 **Smithsonian Submillimeter Wavelength Array (Invited Paper)** [2200-31]  
J. M. Moran, P. T. P. Ho, Harvard-Smithsonian Ctr. for Astrophysics
- 347 **Design and test of submillimeter array (SMA) chopping subreflector** [2200-33]  
P. Cheimets, Smithsonian Astrophysical Observatory

---

**SESSION 6 APPLICATIONS**

---

- 360 **Binary star astronomy with optical interferometry** [2200-34]  
X. Pan, California Institute of Technology; M. Shao, M. M. Colavita, Jet Propulsion Lab.
- 372 **Simulation of stellar speckle imaging** [2200-35]  
E. M. Johansson, D. T. Gavel, Lawrence Livermore National Lab.

- 384 **Investigation of some peculiarities in the structure of large-scale atmospheric turbulence** [2200-36]  
V. P. Lukin, Institute of Atmospheric Optics (Russia)
- 396 **Modeling atmospheric turbulence effects on a ground-based interferometer** [2200-37]  
L. W. Bradford, S. M. Flatté, Univ. of California/Santa Cruz; C. E. Max, Lawrence Livermore National Lab.
- 407 **Atmospheric phase fluctuation measurement: interferometric results from the WHT and COAST telescopes** [2200-38]  
C. A. Haniff, J. E. Baldwin, P. J. Warner, Mullard Radio Astronomy Observatory (UK); T. R. Scott, Univ. of Cambridge Institute of Astronomy (UK)
- 418 **Temporal power spectra of Zernike coefficients** [2200-39]  
T. ten Brummelaar, CHARA/Georgia State Univ.
- 422 **Atmospheric limitations on speckle astrometry with large telescopes** [2200-40]  
R. G. Dekany, Optical Sciences Ctr. and Steward Observatory/Univ. of Arizona; M. Cheselka, E. K. Hege, Steward Observatory/Univ. of Arizona; J. R. P. Angel, Optical Sciences Ctr. and Steward Observatory/Univ. of Arizona; J. W. Beletic, Georgia Technical Research Institute
- 433 **Application of multiframe iterative blind deconvolution for diverse astronomical imaging** [2200-56]  
J. C. Christou, Air Force Phillips Lab. and Steward Observatory/Univ. of Arizona; E. K. Hege, Steward Observatory/Univ. of Arizona; S. M. Jefferies, Univ. of Delaware; C. U. Keller, National Solar Observatory

---

**SESSION 7 DEVICES AND INSTRUMENTATION FOR INTERFEROMETRY**

---

- 446 **Optical design for interferometry with the Large Binocular Telescope** [2200-41]  
P. L. Byard, The Ohio State Univ.; D. Bonaccini, Osservatorio Astrofisico di Arcetri (Italy)
- 458 **Recent results from the imaging beam combiner simulator COSI at the Max-Planck-Institut für Extraterrestrische Physik** [2200-42]  
A. Eckart, T. Böker, R. Hofmann, R. O. Katterloher, A. Quirrenbach, Max-Planck-Institut für Extraterrestrische Physik (FRG); M. Löwe, Univ.-Sternwarte Jena (FRG); P. Cruzalèbes, Observatoire de la Côte d'Azur/URA CNRS (France)
- 469 **Design and construction of the Max-Planck-Institut für Extraterrestrische Physik beam combiner simulator COSI** [2200-43]  
R. O. Katterloher, T. Böker, A. Eckart, R. Hofmann, G. Jakob, A. Quirrenbach, Max-Planck-Institut für Extraterrestrische Physik (FRG); M. Löwe, Univ.-Sternwarte Jena (FRG)
- 479 **Optical interferometer with two coudé telescopes of 25-cm aperture** [2200-44]  
K. Sato, S. Kuji, National Astronomical Observatory of Japan (Japan)
- 487 **Passive interspectroscopy II: observational tests** [2200-45]  
K. W. Kamper, David Dunlap Observatory/Univ. of Toronto (Canada); W. G. Bagnuolo, Jr., Georgia State Univ.; S. Chew, David Dunlap Observatory/Univ. of Toronto (Canada)
- 494 **Use of electro-optical devices for optical path-length (OPL) compensation** [2200-46]  
S. R. Restaino, E. L. Gates, Univ. of New Mexico; R. A. Carreras, Air Force Phillips Lab.; R. C. Dymale, Rockwell Power Systems Co.; G. C. Loos, Air Force Phillips Lab.

- 501 **Franco-Mexican Differential Speckle Interferometer** [2200-60]  
S. Cuevas, Instituto de Astronomía-UNAM (Mexico); R. G. Petrov, Univ. de Nice-Sophia Antipolis (France); A. Chelli, Observatoire de Grenoble (France); S. Lagarde, A. Couve, Univ. de Nice-Sophia Antipolis (France); S. Tinoco, Instituto de Astronomía-UNAM (Mexico); L. Sanchez, Univ. de Nice-Sophia Antipolis (France)
- 512 **New approach for a correlation tracker for imaging application** [2200-62]  
S. R. Restaino, Univ. of New Mexico; N. Clark, R. R. Radick, Air Force Phillips Lab.

---

**SESSION 8 IMAGING TECHNIQUES**

---

- 516 **Optical array interferometry: imaging through the atmosphere** [2200-48]  
V. L. Gamiz, D. M. Payne, Rockwell International Corp.
- 528 **Synthetic images from simulations of long-baseline 2D optical interferometers** [2200-49]  
R. W. Conley, Air Force Phillips Lab.; D. M. Payne, Rockwell Power Systems Co.; S. R. Restaino, G. C. Loos, Air Force Phillips Lab.
- 541 **Diffraction-limited imaging on large telescopes** [2200-50]  
J. Rogers, D. M. A. Wilson, Mullard Radio Astronomy Observatory (UK); C. D. Mackay, Univ. of Cambridge Institute of Astronomy (UK)
- 546 **Closure phase imaging with low-order adaptive optics** [2200-51]  
C. A. Haniff, Mullard Radio Astronomy Observatory (UK); R. W. Wilson, Royal Greenwich Observatory (UK)
- 558 **Conception of adaptive multimodular wide-field telescopes with super-large Fresnel number** [2200-52]  
S. A. Rodionov, V. S. Korepanov, D. N. Yeskov, B. B. Bondstedt, V. V. Reznichenko, S.I. Vavilov State Optical Institute (Russia)
- 570 **Holographic diffraction structure's application to inspect synthetic apertured telescopes phasing** [2200-53]  
S. N. Koreshev, S.I. Vavilov State Optical Institute (Russia)
- 581 **Laser interferometric control problems in adaptive astronomical telescope** [2200-54]  
V. V. Anistchenko, S. N. Koreshev, V. A. Parfenov, V. I. Podoba, A. G. Seregin, V. I. Sidorov, S.I. Vavilov State Optical Institute (Russia)
- 593 **REGAIN: a new optical beam combiner for the G12T** [2200-58]  
D. Mourard, A. Blazit, D. Bonneau, D. Merlin, I. Tallon-Bosc, F. Vakili, S. Menardi, S. Rebattu, Observatoire de la Côte d'Azur (France); L. Hill, K. Rousselet, J. L. Boit, J. Le Merrer, G. Lasselin-Waultier, M. Saisse, D. Pouliquen, M. Joubert, Lab. d'Astronomie Spatiale (France)

- 599 **GAIA: global astrometric interferometer for astrophysics [2200-59]**  
L. Lindegren, Lund Observatory (Sweden); M. A. C. Perryman, ESTEC (Netherlands); U. Bastian, Astronomisches Rechen-Institut (FRG); J. C. Dainty, Blackett Lab. (UK); E. Høg, Copenhagen Univ. Observatory (Denmark); F. van Leeuwen, Royal Greenwich Observatory (UK); J. Kovalevsky, Observatoire de la Côte d'Azur (France); A. Labeyrie, Observatoire de Calern (France); S. Loiseau, CNES (France); F. Mignard, Observatoire de la Côte d'Azur (France); J. E. Noordam, Netherlands Foundation for Research in Astronomy; R. S. Le Poole, Sterrewacht Leiden (Netherlands); P. Thejll, Niels Bohr Institute (Denmark); F. Vakili, Observatoire de Calern (France)
