

CONTENTS

Program Committee.....	viii
Preface	ix

CRITERIA FOR NEW PV CONCEPTS

Materials Availability for Thin Film Solar Cells	3
Y. Makita	
High-Volume Manufacturing Issues: Toxicity, Materials Supply, Yield Management, and Marketing.....	11
D. E. Carlson	
Feedstock for Crystalline Silicon Solar Cells	21
M. G. Mauk, P. E. Sims, and R. B. Hall	
Photovoltaics Characterization: Beyond the Horizon	29
L. L. Kazmerski	
A Learning Curve Approach to Projecting Cost and Performance for Photovoltaic Technologies	45
G. D. Cody and T. Tiedje	
Reliability and Lifetime Issues for New Photovoltaic Technologies	55
A. W. Czanderna	

ROLE OF GOVERNMENT, UNIVERSITIES, AND INDUSTRIES IN DEVELOPING AND FUNDING NEW IDEAS

Why Basic Energy Sciences is Funding Innovation.....	73
J. J. Smith	
Long-Range PV R&D and the Electric Utilities	85
T. M. Peterson	
Technology Development Versus New Ideas Development by Universities	93
T. W. F. Russell	
The Role of Universities in the DOE National Photovoltaics Program	101
R. D. McConnell and J. A. Mazer	
Pushing the Frontiers of Silicon PV Technologies: Novel Approaches to High-Efficiency, Manufacturable Silicon Cells	109
A. Rohatgi, P. Doshi, and T. Krygowski	

DYE-SENSITIZED PHOTOCHEMICAL SOLAR CELLS

Photoelectrochemical Solar Energy Conversion by Dye Sensitization	119
M. Grätzel	
Solid State Photoelectrochemical Cells Based on Dye Sensitization	129
B. O'Regan and D. T. Schwartz	
Electron Transfer in Sensitized TiO₂ Photoelectrochemical Cells	137
G. J. Meyer	

Photochemical Solar Cells Based on Dye Sensitization of Nanocrystalline TiO₂.....	145
A. J. Frank, B. A. Gregg, M. Grätzel, A. J. Nozik, A. Zaban, S. Ferrere, G. Schlichthörl, and S. Y. Huang	

SINGLE-CRYSTAL-LIKE FILMS ON LOW-COST SUBSTRATES

Ion-Assisted Deposition of Textured Thin Films on Low-Cost Substrates.....	157
R. H. Hammond, C. P. Wang, K. B. Do, M. R. Beasley, and T. H. Geballe	
Selective Nucleation-based Epitaxy (SENTAXY).....	163
T. Yonehara	
Low-Cost Metal Substrates for Films with Aligned Grain Structures	175
D. P. Norton, J. D. Budai, A. Goyal, D. H. Lowndes, D. M. Kroeger, D. K. Christen, M. Paranthaman, and E. D. Specht	
Inexpensive Approach to III-V Epitaxy for Solar Cells.....	183
M. G. Mauk, B. W. Feyock, R. B. Hall, K. D. Cavanaugh, and J. E. Cotter	
Requirements for a 20%-Efficient Polycrystalline GaAs Solar Cell	191
S. R. Kurtz and R. McConnell	
Thin Self-Supporting Polycrystalline Silicon Substrates—A New Role for EFG Cylinders	207
J. P. Kalejs	

INNOVATIVE CONCEPTS

Thermophotovoltaic Principles, Potential, and Problems.....	217
T. J. Coutts	
Photovoltaic Cells Based on Vacuum Deposited Molecular Organic Thin Films.....	235
V. Bulović, P. E. Burrows, D. Z. Garbuзов, M. E. Thompson, A. G. Tsekoun, and S. R. Forrest	
Thin-Film Filament-Based Solar Cells and Modules.....	243
J. R. Tuttle, E. D. Cole, T. A. Berens, J. Alleman, and J. Keane	
Photovoltaic Application of Resonance Light Absorption and Rectification	251
G. H. Lin and J. O'M. Bockris	
Field Effect Solar Cell	259
H. Fujioka, M. Oshima, C. Hu, G. Collins, M. Sumiya, M. Maruyama, M. Kawasaki, and H. Koinuma	
Photovoltaic Multiplicities.....	267
H. J. Queisser	

THE FUTURE ROLE OF SUPER-HIGH-EFFICIENCY SOLAR CELLS

Straight Talk about Concentrators	277
R. M. Swanson	
Low Cost High Power GaSb ThermoPhotovoltaic Cells.....	285
L. M. Fraas, H. X. Huang, S.-Z. Ye, J. Avery, and T. Ballantyne	

NEW MATERIALS AND DEVICE ARCHITECTURES FOR PV

A CdSe Nanocrystal/MEH-PPV Polymer Composite Photovoltaic	295
N. C. Greenham, X. Peng, and A. P. Alivisatos	
Lateral Superlattice Solar Cells	303
A. Mascarenhas, Y. Zhang, J. M. Millunchick, R. D. Tweten, and E. D. Jones	
Hot Carrier Solar Cells.....	309
M. C. Hanna, Z. Lu, and A. J. Nozik	
Photovoltaic Cells Made with Organic Composites.....	317
G. Yu, J. Gao, C. Yang, and A. J. Heeger	
Novel Material Architectures for Photovoltaics	325
S. K. Deb	

POSTER SESSION

A Thin-Film Si Solar Cell: Deposition, Fabrication, and Design.....	337
W. A. Anderson, B. Jagannathan, and R. Wallace	
Synthesis of Large-Grained Poly-Ge Templates by Selective Nucleation and Solid Phase Epitaxy for GaAs Solar Cells on Soda-Lime Glass	345
H. A. Atwater, J. C. M. Yang, and C. M. Chen	
Simplification of Process Technology for High-Efficiency Solar Cells.....	355
A. W. Bett, S. W. Glunz, J. Knobloch, R. Schindler, and W. Wetling	
Energizing the Future: New Battery Technology a Reality Today	367
H. Chase, J. Bitterly, and A. Federici	
Refractive Spectrum Splitting Optics for Use with Photovoltaic Cells: A Research Plan and Qualitative Demonstration	373
A. K. Converse	
Low Cost, Single Crystal-like Substrates for Practical, High Efficiency Solar Cells	377
A. Goyal, D. P. Norton, M. Paranthaman, E. D. Specht, Q. He, F. A. List, D. M. Kroeger, D. K. Christen, and J. D. Budai	
Formulation of a Self-Consistent Model for Quantum Well pin Solar Cells	395
S. Ramey and R. Khoie	
Next Generation CIGS for Solar Cells	403
A. Rockett, R. Birkmire, D. Morel, S. Fonash, J.-Y. Hou, M. Marudachalam, J. D'Amico, P. Panse, S. Zafar, and D. J. Schroeder	
Pathways to High-Efficiency GaAs Solar Cells on Low-Cost Substrates	411
R. Venkatasubramanian, E. Siivola, B. O'Quinn, B. Keyes, and R. Ahrenkiel	
List of Participants.....	419
Author and Subject Index.....	429
