Foreword	ix
The Structure of Symposium 204	1
<i>M. Harwit</i>	
Introductory Remarks	5
<i>P. J. E. Peebles</i>	
Physical Modeling of the Zodiacal Dust Cloud	17
<i>L. M. Ozerney</i>	
The Diffuse Near- and Mid-Infrared Emission from the Galaxy	35
<i>M. Cohen</i>	
Galactic Far-Infrared Diffuse Emission	47
<i>F. Boulanger, J. Bernard, G. Lagache, and B. Stepnik</i>	
Dust in Clusters of Galaxies and the Sunyaev Zel'dovich Effect	57
<i>M. Giard</i>	
Intracluster Dust and Far Infrared Emission	67
<i>C. C. Popescu, R. J. Tuffs, J. Fischer, and H. Völk</i>	
Investigation of the Local Universe by Means of IRAS Galaxies	69
<i>A. M. Mickaelian</i>	
The Optical Extragalactic Background Light from Resolved Galaxies	71
<i>L. Pozzetti and P. Madau</i>	
Observations of the Near-Infrared Extragalactic Background Light	87
<i>T. Matsumoto</i>	
The Far Infrared and Submillimeter Diffuse Extragalactic Background	101
<i>M. G. Hauser</i>	
K-band Extragalactic Background Light from Deep Galaxy Counts in the Subaru Deep Field	119
<i>T. Totani, Y. Yoshii, F. Iwamuro, T. Maihara, K. Motohara, H. Terada, M. Gotou, J. Iwai, H. Tanabe, T. Taguchi, T. Hata, and S. Oya</i>	
Detection of a Far IR Excess with DIRBE at 60 and 100 Microns	121
<i>D. P. Finkbeiner, M. Davis, and D. Schlegel</i>	
The Extragalactic Background at Ultraviolet, X-ray and Gamma Ray Energies	123
<i>S. Bowyer</i>	
TeV Gamma-Ray Absorption and the Intergalactic Infrared Background	135
<i>F. W. Stecker</i>	
Study of Galaxy Evolution Using VHE γ -ray Observations with Ground-based Čerenkov Telescopes	151
<i>A. Konopelko</i>	

Evolution of the Extragalactic Infrared-to-Ultraviolet Background and Gamma-Ray Attenuation	153
<i>T. M. Kneiske and K. Mannheim</i>	
Toward the Monitoring of Blazars at Abastumani	155
<i>O. M. Kurtanidze</i>	
Fitting Zodiacal Models	157
<i>E. L. Wright</i>	
Star Forming Galaxies: Properties and Implications for the Extragalactic Infrared Background	161
<i>G. Helou</i>	
The Nature of Ultraluminous Infrared Galaxies	179
<i>E. Sturm</i>	
The Optical Spectroscopic Properties of Seyfert 1 Galaxies Selected from Ultraluminous Infrared Galaxies	193
<i>X. Y. Xia, X. Z. Zheng, and Z. G. Deng</i>	
The Near-Infrared κ -Space of Early and Late Type Galaxies	195
<i>D. Pierini, G. Gavazzi, P. Franzetti, M. Scodéglio, and A. Boselli</i>	
The Two Micron All-Sky Survey: Removing the Infrared Foreground	197
<i>J. E. Gizis and M. F. Skrutskie</i>	
The Sloan Digital Sky Survey	209
<i>D. W. Hogg</i>	
A Population of Distant Luminous Infrared Galaxies Revealed by $15\mu\text{m}$ ISOCAM Deep Surveys	211
<i>C. J. Cesarsky</i>	
2MASS Star Counts and Galactic Structure	213
<i>D. K. Ojha</i>	
New Wide Field J- and K-band Galaxy Counts and the Extragalactic Background	215
<i>P. Väistönen, E. V. Tollestrup, S. P. Willner, and M. Cohen</i>	
Gravitational Lensing and Deep Infrared Surveys	217
<i>L. Metcalfe, B. McBreen, J.-P. Kneib, and B. Altieri</i>	
Far-Infrared Source Counts and the Diffuse Infrared Background	233
<i>J. L. Puget and G. Lagache</i>	
ISOPHOT Surveys and the Extragalactic Background	247
<i>D. Lemke, P. Ábrahám, M. Haas, P. Héraudeau, S. Hotzel, C. Kiss, U. Klaas, O. Krause, C. Leinert, K. Meisenheimer, M. Stickel, L. V. Tóth, M. Juvela, K. Mattila, R. Chini, S. A. H. Müller, M. J. D. Linden-Vørnle, and H. U. Nørgaard-Nielsen</i>	

Far Infrared Extragalactic Background Radiation: Source Counts with ISOPHOT	261
<i>M. Juvela, K. Mattila, and D. Lemke</i>	
Cosmic Far-Infrared Background Fluctuations revealed by the FIRBACK Observing Program	263
<i>G. Lagache and J.-L. Puget</i>	
Models for Infrared and Submillimetre Counts and Backgrounds	265
<i>M. Rowan-Robinson</i>	
Galaxy Evolution in the Optical and Submillimeter	281
<i>S. Lilly</i>	
The Source Populations Producing the Cosmic IR Background	283
<i>A. Franceschini</i>	
Constraints on Far-Infrared Source Counts in the Lockman Hole using a Power Spectrum Analysis	301
<i>H. Matsuhara, K. Kawara, Y. Sofue, Y. Taniguchi, Y. Sato, H. Okuda, T. Matsumoto, K. Wakamatsu, L.L. Cowie, R.D. Joseph, and D.B. Sanders</i>	
Galaxy Evolution in the Infrared: Number Counts and Cosmic Infrared Background	303
<i>T. T. Takeuchi, H. Hirashita, T. T. Ishii, and K. Yoshikawa</i>	
General Discussion on Source Counts	305
Metallicity Evolution of Damped Lyman- α Systems	307
<i>S. Savaglio</i>	
The Chemical Evolution of the Universe	323
<i>A. Songaila and L. L. Cowie</i>	
The Oldest Stars as Tracers of Heavy Element Formation at Early Epochs	333
<i>J. W. Truran</i>	
X-ray Astronomy and the IR Background	335
<i>R. Mushotzky</i>	
Evidence for Galaxy Formation at High Redshift	347
<i>T. Shanks, N. Metcalfe, D. Fong, H. McCracken, A. Campos, and D. Thompson</i>	
Extragalactic Background Light, MACHOs, and the Cosmic Stellar Baryon Budget	359
<i>P. Madau, F. Haardt, and L. Pozzetti</i>	
Searching for the Reionization Epoch	373
<i>P. A. Shaver</i>	
Star Formation and Chemical Evolution of Lyman-Break Galaxies	385
<i>C. Shu</i>	

Evidence for a Morphological Evolution of Spiral Galaxies	387
<i>Y. Dutil and J.-R. Roy</i>	
The Role of Dust in Producing the Cosmic Infrared Background	389
<i>E. Dwek</i>	
Global Evolution Models and the Extragalactic Background Light	401
<i>S. M. Fall</i>	
Metallicities and Dust in High- z Galaxies	413
<i>C. S. Möller, U. Fritze-v. Alvensleben, D. Calzetti, and K. J. Fricke</i>	
Cosmic Star Formation Rate at $z \sim 3$ — Metallicity Effect	415
<i>H. Hirashita, A. K. Inoue, and H. Kamaya</i>	
Star Formation and Chemical Evolution of Damped Ly- α Systems	417
<i>J. Ma</i>	
Evolution of Abundance Gradients along the Galactic Disk	419
<i>J. L. Hou, N. Prantzos, and S. Boissier</i>	
General Discussion on Chemical Abundances	421
The Impact of Galaxy Formation on the Diffuse Background Radiation .	423
<i>J. Silk and J. Devriendt</i>	
Formation of Very Early Galaxies ($z > 5$)	437
<i>M. D. Suran and N. A. Popescu</i>	
Studies of the Cosmic Infrared Background with the Space Infrared Telescope Facility (SIRTF)	439
<i>M. W. Werner, W. T. Reach, and M. Rieke</i>	
The ASTRO-F (IRIS) Mission	455
<i>H. Shibai</i>	
The Next Generation Space Telescope	467
<i>H. S. Stockman and J. C. Mather</i>	
The MAP Mission	475
<i>E. L. Wright</i>	
The FIRST ESA Cornerstone Mission	481
<i>G. L. Pilbratt</i>	
The Planck Mission	493
<i>J. A. Tauber</i>	
The Extragalactic Infrared Background and its Cosmological Implications — Impressions and Reflections	505
<i>M. S. Longair</i>	
Acronyms	521
