

## CONTENTS

<b>Preface .....</b>	vii
<b>Sponsors of the XXII. ICPIG .....</b>	ix
<b>ICPIG Committees.....</b>	x
<b>UV/VUV High Sensitivity Absorption Spectroscopy for Diagnosing Lighting and Processing Plasmas and for Basic Data (Penning Prize Lecture) .....</b>	
J. E. Lawler, M. A. Childs, K. L. Menningen, L. W. Anderson, S. D. Bergeson, and K. L. Mullman	1
<b>Ion—Plasma Interaction .....</b>	
C. Deutsch, C. Fleurier, D. Gardès, and G. Maynard	12
<b>Surface-Wave Sustained Plasmas: Toward a Better Understanding of RF and Microwave Discharges .....</b>	
M. Moisan, C. M. Ferreira, J. Hubert, J. Margot, and Z. Zakrzewski	25
<b>The Present State and Development Trends of Discharges. Physics and Chemistry of Plasmas.....</b>	
A. A. Ivanov	41
<b>Fundamental Electron Collision Processes Relevant to Low-Temperature Plasmas .....</b>	
K. H. Becker	75
<b>Low Frequency Oscillations and Chaos in Plasmas .....</b>	
A. Piel and T. Klinger	90
<b>H.F. Emission Related to Particle Beams Injected into Ionospheric Plasma from Spacecraft.....</b>	
Z. Kłos	105
<b>Different Aspects of Self-Consistent Modeling of Non-Equilibrium Discharges .....</b>	
M. Capitelli, C. Gorse, D. Iasillo, and S. Longo	121
<b>Formation and Evolution of the Cathode Sheath on the Streamer Arrival.....</b>	
M. Černák	136
<b>On the Use of the Plasma in III-V Semiconductor Processing .....</b>	
G. Bruno, P. Capezzuto, and M. Losurdo	146
<b>Breakdown and Discharges in Dense Gases Governed by Runaway Electrons.....</b>	
L. P. Babich	156
<b>Magnetic and Electric Probe Diagnostics in Inductive Plasmas .....</b>	
V. Godyak, R. Piejak, and B. Alexandrovich	166
<b>Numerical and Analytical Kinetic and Fluid Models for RF Discharges.....</b>	
C.-H. Wu, F. Dai, C. Li, F. F. Young, and J. Tsai	176
<b>Physics of High-Power Electron Beam-Plasma Interaction .....</b>	
V. S. Koidan	192
<b>Progress in the Understanding of Non-1D Glow Discharges: Experiment and Theory .....</b>	
J. Derouard and L. Pitchford	204

<b>External Magnetic Field Influence on Properties of High-Power Laser-Produced Plasma</b> .....	<b>214</b>
J. Wołowski, A. Kasperczuk, and T. Pisarczyk	
<b>Air Ions and Aerosol Science</b> .....	<b>224</b>
H. Tammet	
<b>Molecular Beam Studies of Collisional Autoionization Processes</b> .....	<b>234</b>
B. Brunetti, S. Falcinelli, and F. Vecchiocattivi	
<b>The Propagation of Positive Streamers in Air and at Air/Insulator Surfaces</b> ...	<b>247</b>
N. L. Allen	
<b>Microwave Discharges used as Excitation Sources for Spectro-Chemical Analysis</b> .....	<b>257</b>
A. Gamero	
<b>The Bloch–Elwert Structure as a Universal Manifestation of the Rate of “Soft” Inelastic Collisions in Plasmas: Bremsstrahlung, Electrical Conductivity, Ionization Loss</b> .....	<b>267</b>
V. I. Kogan	
<b>Arc Spot Ignition on Cold Electrodes in an Ambient Gas Atmosphere</b> .....	<b>278</b>
J. Mentel, R. Bayer, J. Schein, and M. Schumann	
<b>Tomography for Discharge Plasmas</b> .....	<b>289</b>
N. Iwama	
<b>Thin Film Deposition on Internal Walls of Cavities and Complex Hollow Substrates</b> .....	<b>299</b>
L. Soukup, M. Šícha, L. Jastrábík, and M. Novák	
<b>Atmospheric Pressure Dielectric Controlled Glow Discharges: Diagnostics and Modelling</b> .....	<b>306</b>
F. Massines, R. B. Gadri, P. Decamps, A. Rabehi, P. Séguir, and C. Mayoux	
<b>Capacitively Coupled Radio Frequency Discharges</b> .....	<b>316</b>
J. E. Allen	
<b>Corona Physics and Diagnostics</b> .....	<b>332</b>
R. S. Sigmund	
<b>Discharge Physics Issues in the Scaling of High Power CO<sub>2</sub> Lasers.</b> .....	<b>345</b>
E. Desoppe and C. Leys	
<b>Nonlinear Surface Waves in Plasmas</b> .....	<b>355</b>
S. M. Vuković, N. B. Aleksić, and D. V. Timotijević	
<b>Optical and Probe Diagnostics of RF Discharges</b> .....	<b>363</b>
V. Kapička, M. Šícha, and A. Brablec	
<b>Cluster Lamp—A New Kind of Light Generation Mechanism</b> .....	<b>373</b>
R. Scholl and G. Natour	
<b>Author Index</b> .....	<b>383</b>
