

## CONTENTS

CONTRIBUTORS . . . . .	vii
PREFACE . . . . .	ix
FUTURE CONTRIBUTIONS . . . . .	xi

### High-Speed Electron Microscopy

O. BOSTANJOGLO

I. Introduction . . . . .	1
II. High-Speed Techniques . . . . .	2
III. Time-Resolving Microscopes . . . . .	6
IV. Conclusions . . . . .	45
References . . . . .	46

### Applications of Transmission Electron Microscopy in Mineralogy

P. E. CHAMPNESS

I. Introduction . . . . .	53
II. Analytical Electron Microscopy of Minerals . . . . .	55
III. Phase Separation (Exsolution) . . . . .	59
IV. HRTEM and Defect Structures . . . . .	81
V. Concluding Remark . . . . .	87
References . . . . .	87

### Three-Dimensional Fabrication of Miniature Electron Optics

A. D. FEINERMAN AND D. A. CREWE

I. Introduction . . . . .	91
II. Scaling Laws for Electrostatic Lenses . . . . .	93
III. Fabrication of Miniature Electrostatic Lenses . . . . .	94
IV. Fabrication of Miniature Magnetostatic Lenses . . . . .	118
V. Electron Source . . . . .	119
VI. Detector . . . . .	124
VII. Electron-Optical Calculations . . . . .	126
VIII. Performance of a Stacked Einzel Lens . . . . .	132
IX. Summary and Future Prospects . . . . .	140
References . . . . .	141

**A Reference Discretization Strategy for the Numerical Solution  
of Physical Field Problems**

CLAUDIO MATTIUSI

I. Introduction . . . . .	144
II. Foundations . . . . .	147
III. Representations . . . . .	183
IV. Methods . . . . .	222
V. Conclusions . . . . .	273
VI. Coda . . . . .	275
References . . . . .	276

**The Imaging Plate and Its Applications**

NOBUFUMI MORI AND TETSUO OIKAWA

I. Introduction . . . . .	281
II. Mechanism of Photostimulated Luminescence (PSL). . . . .	282
III. Imaging Plate (IP) . . . . .	288
IV. Elements of the IP System . . . . .	290
V. Characteristics of the IP System . . . . .	294
VI. Practical Systems. . . . .	302
VII. Applications of the IP . . . . .	305
VIII. Conclusion . . . . .	330
References . . . . .	330

INDEX . . . . .	333
