Spectroscopy in the Terahertz Spectral Region

Frank C. De Lucia	39
-----------------------------	----

1	Introduction	39
1.1	Radiation and Matter	40
1.2	What Phenomena Fall in this Energy Range?	40
1.3	Gases	41
1.4	Liquids and Solids	43
1.5	Applications and Impact of Terahertz Spectroscopy	43
2	Theoretical Underpinnings	45
2.1	Absorption Strengths	45
2.2	Energy Levels and Transitions Frequencies	47
2.3	The Character of Rotational Spectra	47
2.4	Rotation–Vibration Spectra	49
3	Spectroscopic Techniques and Results	51
3.1	Harmonic Generation	53
3.2	Sources Based on Mixing of Optical Sources	61
3.3	Tunable Sideband Sources	65
3.4	Electron Beam Sources	68
3.5	Femtosecond Sources	73
4	Applications	76
4.1	Atmospheric Spectroscopy	76
4.1.1	Microwave-Like Instruments	78
4.1.2	Infrared-Like Instruments	85
4.2	Astronomical Spectroscopy	87
4.2.1	Some Telescope Facilities	90
4.2.2	Two Representative THz Telescopes	90
4.2.3	Examples of Other Results	99

Terahertz Imaging

Daniel Mittleman	117
1 Introduction	117
2 Key Components of a THz Imaging System	118
2.1 The Femtosecond Laser Source	119
2.2 Optical Delay Line	119
2.3 Terahertz Optoelectronic Switches	120
2.4 Terahertz Beam Optics	123
2.5 Polarization of the THz Beam	128
2.6 Signal Acquisition	129
2.7 Data Processing	130
3 Imaging with THz-TDS	131
3.1 Amplitude and Phase Imaging	132
3.2 Terahertz Imaging of Liquid Water	137
3.3 Processing for Amplitude and Phase Imaging	139
3.4 Reflection Imaging	139
3.5 Burn Diagnostics	141
3.6 Terahertz Tomography: The Third Dimension	143
3.7 Interferometric Tomography	145
4 Future Prospects	149
References	149

Free-Space Electro-Optic Techniques

Zhiping Jiang and Xi-Cheng Zhang	155
1 Introduction	155
2 Generation	155
3 Detection	159
3.1 Measurement Principle	161
3.2 Measurement of Coherent Mid-Infrared Fields	165
3.3 Parallel Measurement: Chirped-Pulse Measurement	165
3.4 Parallel Measurement: Terahertz Streak Camera	168
3.5 Parallel Measurement: 2D Imaging	171
3.6 Near-Field Terahertz Imaging	174
3.7 Detection Geometry and Working Conditions	175
3.8 Comparison Between Photoconductive Sampling and EO Sampling	177
3.9 EO Sampling for Continuous-Wave Terahertz Beams	178
4 Applications	178
4.1 Dynamics of Interaction of Lattice with Infrared Photons ..	178
4.2 Spatiotemporal Coupling of Few-Cycle Pulses	180
4.3 Point Scanning Terahertz Imaging	182
4.4 Electro-Optic Terahertz Transceiver	185
4.5 Compact System	186
References	187

Photomixers for Continuous-Wave Terahertz Radiation

Sean M. Duffy, Simon Verghese and K. Alex McIntosh	193
1 Introduction	193
1.1 Demonstrated CW Technology for Terahertz Generation ...	194
2 Photomixers: Principle of Operation	194
2.1 Overview of Operation	195
2.2 Lifetime of Carriers	198
2.2.1 Lifetime Modified by Electric Field Profile	201
2.3 External Quantum Efficiency	202
2.4 Thermal Limits	205
2.4.1 Improved Thermal Designs: Thin LTG GaAs on AlAs	207
2.4.2 Improved Thermal Designs: Optically Resonant Cavity (DBR)	208
2.5 Trade-offs for Enhanced Output Power	209
2.6 Proven High-Power Methods	211
3 Planar Antennas and Circuitry	213
3.1 Electrode Capacitance	213
3.2 Log-Spiral	215
3.3 Single Full-Wave Dipoles	215
3.4 Dual-Antenna Elements	216
3.4.1 Dual-Dipole Elements	216
3.4.2 Graphical Design Procedure	218
3.4.3 Dual-Slot Elements	220
3.5 Distributed Photomixers	221
4 Hyperhemisphere Lens	222
5 Photomixer Design and Examples	224
5.1 Dual-Dipole Results	224
5.2 Practical Measurement Issues and Power Calibration Difficulties	226
5.3 Maximum Power Limitations	227
6 Applications	230
6.1 Local Oscillators	230
6.2 Transceivers	230
Acknowledgments	233
References	233

Applications of Optically Generated Terahertz Pulses to Time Domain Ranging and Scattering

R. Alan Cheville, Matthew T. Reiten, Roger McGowan, and Daniel R. Grischkowsky	237
1 Introduction	237
1.1 Perspective	237
1.2 Theory	238

1.3	Measurements	241
1.4	Outline	244
2	Experiment	244
2.1	Overview of Experimental Configurations	244
2.2	Generation and Detection of Terahertz Electromagnetic Transients	246
2.3	Terahertz Beam Optics for Target Illumination	251
2.4	Targets	254
2.5	Scattered Radiation	255
2.6	Bistatic Range	256
3	Theory	257
3.1	Scaling of Maxwell's Equations in Terahertz Impulse Ranging	258
3.2	Transfer Function Description of Terahertz Impulse Ranging System	259
3.3	Calculation in Time and Frequency	262
3.4	Calculation of Scattering Coefficients	264
3.4.1	Cylinders	264
3.4.2	Spheres	265
4	Measurements	267
4.1	Conducting and Dielectric Cylinders	267
4.2	Dielectric Spheres	272
4.3	Data Analysis and the Geometrical Optics Model	273
4.4	Angularly Resolved Scattering Measurements	281
4.5	Gouy Phase Shift	285
4.6	Realistic Targets	287
5	Summary and Future Directions	289
