

Table of Contents

Chapter 1 Introduction

1.1 Basic Properties of a Superconductor.....	1
1.2 Occurrence of a Superconductor.....	8
1.3 Theoretical Background.....	10
1.4 Elements of Kinetic Theory.....	14

Chapter 2 Superconducting Transitions

2.1 Three Phase Transitions.....	19
2.2 Pairons Move as Massless Particles.....	21
2.3 The Bose-Einstein Condensation.....	23

Chapter 3 Bloch Electrons

3.1 Bloch Theorem.....	27
3.2 Fermi Liquid Model.....	30
3.3 The Fermi Surface.....	32
3.4 Heat Capacity; The Density of States.....	37
3.5 Equations of Motion for a Bloch Electron.....	39

Chapter 4 Phonon Exchange Attraction

4.1 Phonons and Lattice Dynamics.....	45
4.2 Electron-Phonon Interaction.....	49
4.3 Phonon-Exchange Attraction.....	54

Chapter 5 Quantum Statistical Theory

5.1 Theory of Superconductivity.....	59
5.2 The Bardeen-Cooper-Schrieffer Theory.....	61
5.3 Remarks.....	63

Chapter 6 Cooper Pairs (Pairons)

6.1 The Cooper Problem.....	65
6.2 Moving Pairons.....	67
6.3 Energy-Eigenvalue Problem for a Quasiparticle.....	70
6.4 Derivation of the Cooper Equation.....	73

Chapter 7 Superconductors at 0 K	
7.1 The Generalized BCS Hamiltonian.....	77
7.2 The Ground-State.....	82
7.3 Discussion.....	88
Chapter 8 Quantum Statistics of Composites	
8.1 Ehrenfest-Oppenheimer-Bethe's Rule.....	95
8.2 Two-Particle Composites.....	96
8.3 Discussion.....	102
Chapter 9 Bose-Einstein Condensation	
9.1 Free Massless Bosons Moving in 2D.....	107
9.2 Free Massless Bosons in 3D.....	111
9.3 B-E Condensation of the Pairons.....	114
9.4 Discussion.....	115
Chapter 10 The Energy Gap Equations	
10.1 Introduction.....	123
10.2 Energies of Quasi-electrons at 0 K.....	124
10.3 Energy Gap Equations at 0 K.....	126
10.4 Temperature-Dependent Gap Equations.....	128
10.5 Discussion.....	130
Chapter 11 Pairon Energy Gaps and Heat Capacity	
11.1 The Full Hamiltonian.....	133
11.2 Pairons Energy Gaps.....	135
11.3 Density of Condensed Pairons.....	138
11.4 Heat Capacity.....	141
11.5 Discussion.....	143
Chapter 12 Quantum Tunneling	
12.1 Introduction.....	147
12.2 Quantum Tunneling in S-I-S Systems.....	148
12.3 Quantum Tunneling in S_1 -I- S_2	156
12.4 Discussion.....	161
Chapter 13 Flux Quantization	
13.1 Ring Supercurrent.....	163
13.2 Phase of a Quasi-Wavefunction.....	167
13.3 London's Equation. Penetration Depth.....	170
13.4 Quasi-Wavefunction and its Evolution.....	175
13.5 Discussion.....	177

Chapter 14 Ginzburg-Landau Theory	
14.1 Introduction	181
14.2 Derivation of the G-L Equation	183
14.3 Condensation Energy	185
14.4 Penetration Depth	189
Chapter 15 Josephson Effects	
15.1 Josephson Effects and Supercurrent Interference	193
15.2 Equations Governing a Josephson Current	197
15.3 ac Josephson Effect and Shapiro Steps	200
15.4 Discussion	204
Chapter 16 Compound Superconductors	
16.1 Introduction	207
16.2 Type II Superconductors	208
16.3 Optical Phonons	213
16.4 Discussion	216
Chapter 17 Lattice Structures of Cuprates	
17.1 Introduction	217
17.2 Layered Structures and 2-D Conduction	217
17.3 Selected Cuprate Superconductors	221
Chapter 18 High- T_c Superconductors Below T_c	
18.1 The Hamiltonian	227
18.2 The Ground State	231
18.3 High Critical Temperature	233
18.4 The Heat Capacity	235
18.5 Two Energy Gaps; Quantum Tunneling	236
Chapter 19 Doping Dependence of T_c	
19.1 Introduction	241
19.2 Critical Temperature T_c	242
19.3 Doping Dependence of T_c	245
Chapter 20 Transport Properties Above T_c	
20.1 Introduction	249
20.2 Simple Kinetic Theory	250
20.3 Data Analysis	255
20.4 Discussion	257

Chapter 21 Out-of-Plane Transport	
21.1 Introduction	259
21.2 Theory	260
21.3 Data Analysis	265
21.4 Discussion	266
Chapter 22 Seebeck Coefficient (Thermopower)	
22.1 Introduction	269
22.2 Theory	272
22.3 Discussion	275
22.4 Seebeck Coefficients in Metals	277
22.5 In-Plane Seebeck Coefficient S_{ab}	279
22.6 Out-of-Plane Seebeck Coefficient S_c	280
22.7 Discussion	283
Chapter 23 Magnetic Susceptibility	
23.1 Introduction	285
23.2 Theory	287
23.3 Discussion	292
Chapter 24 Infrared Hall Effect	
24.1 Introduction	295
24.2 Theory and Experiments for Au	298
24.3 Theory for $\text{YBa}_2\text{Cu}_3\text{O}_7$	302
24.4 Data Analysis and Discussion	303
Chapter 25 d-Wave Cooper Pairs	
25.1 Introduction	307
25.2 Phonon-Exchange Attraction	307
25.3 d-Wave pairon Formation	309
25.4 Discussion	310
Chapter 26 Connections with Other Theories	
26.1 Gorter-Cassimir's Two Fluid Model	311
26.2 London-London's Theory	312
26.3 Ginzburg-Landau Theory	313
26.4 Electron-Phonon Interaction	314
26.5 The Cooper Pair	315
26.6 BCS Theory	315
26.7 Bose-Einstein Condensation	318

26.8 Josephson Theory	319
26.9 High Temperature Superconductors	320
26.10 Quantum Hall Effect	321
Chapter 27 Summary and Remarks	
27.1 Summary	325
27.2 Remarks	329
Appendix A Second Quantization	
A.1 Boson Creation and Annihilation Operators	333
A.2 Observables	337
A.3 Fermions Creation and Annihilation Operators	339
A.4 Heisenberg Equation of Motion	341
References	345
Bibliography	355
Index	359
