<b>Preface</b>	ix
<b>Part 1: Particle Analysis and General Cleaning-Related Topics</b>	
Applying surface analysis techniques for particle identification <i>W.F. Stickle</i>	3
Total reflection and grazing emission X-ray fluorescence spectrometry: Assessment of the size of contaminant particles on silicon wafer surfaces <i>H. Schwenke, P.A. Beaven and J. Knoth</i>	11
Development of a particle deposition meter <i>D. Semleit, A. Trampe and H. Fissan</i>	27
Reduction of cleaning and verification times for an aqueous based process by on-line monitoring <i>A.J. Pervan, J. Grilly, S.L. Lim and R. Kaiser</i>	41
Implementation of the IMEC-cleaning in advanced CMOS manufacturing <i>M. Meuris, S. Arnauts, I. Cornelissen, K. Kenis, M. Lux, S. de Gendt, P.W. Mertens, I. Teerlinck, R. Vos, L. Loewenstein, M.M. Heyns and K. Wolke</i>	57
Cleaning, rinsing and drying issues in post-Cu CMP cleaning: A case study <i>W. Fyen, R. Vos, E. Vrancken, J. Grillaert, M. Meuris and M. Heyns</i>	69
Aging effects in test silicon wafers prepared for wafer cleaning process evaluation <i>N. Narayanswami, G. Thomes, J. Weygand, J. Butterbaugh, S.-H. Yoo, B. Liu, D. Paul, J. Scherer, L. Davis and K. Childs</i>	97

**Part 2: Particle Adhesion and Removal**

- Adhesion of small particles and innovative methods for their removal  
*R. Kohli* 113
- Effects of surface roughness on van der Waals and electrostatic contributions to particle-particle interactions and particle adhesion  
*J.Y. Walz and N. Sun* 151
- Effect of surface hydrophobicity on the detachment of particles from surfaces  
*M.M. Sharma and A.M. Freitas* 171
- Adhesion and removal of particles from charged surfaces under a humidity-controlled air stream  
*P. Schmitz and J. Cardot* 189
- Adhesion measurements by AFM and surface energy characteristics by IGC of xerographic toner particles under different mechanical and environmental conditions  
*L.H.G.J. Segeren, F.G. Karssenbergh, J.P. Pickering, J.W.A. van den Berg and G.J. Vancso* 197
- Measurements of adhesion forces in pharmaceutical powder-polymer systems by atomic force microscopy  
*E. Beach, J. Drelich and R. Han* 219
- Direct adhesion measurements between pharmaceutical materials  
*F.M. Etzler, T.H. Ibrahim, T.R. Burk and R.D. Neuman* 235
- Laser assisted particle removal  
*S.D. Allen and K. Imen* 253
- Laser removal of particles from solid surfaces  
*Y.F. Lu, W.D. Song, L. Zhang, B. Luk'yanchuyk, Y.W. Zheng, W.J. Wang, Y. Zhang, M.H. Hong and T.C. Chong* 261
- Laser assisted particle removal from silicon wafers  
*M. Mosbacher, H.-J. Münzer, M. Bertsch, V. Dobler, N. Chaoui, J. Siegel, R. Oltra, D. Bäuerle, J. Boneberg and P. Leiderer* 275
- Laser cleaning of silicon membrane stencil masks  
*W. Zapka, C. Gollasch, R. Lilischkis, A. Ehrmann and K.F. Zapka* 295
- Transient laser-based surface acceleration simulations for particle removal  
*C. Li, C. Wu and C. Cetinkaya* 309

- Particle removal from semiconductor substrates using the PLASMAX technology  
*J.B. Bailey, J.J. Festa and A.S. Geller* 325
- Particle removal with ultrasonics and megasonics  
*S.B. Awad* 341
- Influence of temperature and dissolved air on megasonic particle removal  
*T.H. Kuehn, C.H. Yang and D.B. Kittelson* 355
- A study of particle removal based on Monte Carlo simulation of ion interactions  
*F. Tardif, I. Constant, R.J.-M. Pellenq and A. Delville* 377
- Removal of fibrin coated particles from surfaces  
*S. Lorthois and P. Schmitz* 395
- Enhancement of particle removal and modification of interfacial phenomena using surfactants  
*M.L. Free and D.O. Shah* 405
- The enhancement of particle removal by adding Valtron SP2200 surfactant into SC1 solution  
*L. Liu and S. Verhaverbeke* 419
- Optimization of particle removal performance of dHF-based cleaning recipes  
*R. Vos, I. Cornelissen, K. Xu, W. Fyen, P. Mertens, M. Meuris and M. Heyns* 427
- Spray cleaning with hydrofluorocarbon solutions  
*R. Kaiser, R.S. Miller and J.T. Cardin* 443
