Meetings in This Series	xii

I. APPLICATIONS OF ATOMIC AND MOLECULAR DATA

A. Radiation Physics

The Use of Atomic Data in Applications Involving Ionizing Radiation	5
<i>P. M. Bergstrom, Jr.</i>	
Application of Radiation Track in Radiation Biophysics and Dosimetry	14
<i>H. Nikjoo and S. Uehara</i>	
Laboratory Data Needs and Applications for Assessing Radiation Effects in Biological Materials	23
<i>L. H. Toburen and J. L. Shinpaugh</i>	

B. Lighting

Physical Aspects of Mercury-Free High Pressure Discharge Lamps	35
<i>M. Born</i>	
The Physics of Fluorescent Lamps: Do We Understand the Atomic Processes?	48
<i>G. G. Lister</i>	

C. Etching, Plasma Displays, and Plasma Processing

Modeling of Moderate Pressure Microwave Plasmas Used for Diamond Deposition: Collisional Data Required for Process Simulation	61
<i>K. Hassouni and A. Gicquel</i>	
Ultraviolet Production Efficiency of AC-PDPs and Ways to Increase It	75
<i>K. Suzuki, N. Uemura, S. Ho, and M. Shiiki</i>	
Atomic and Molecular Data Needs in Thermal Plasmas	85
<i>P. Fauchais, V. Rat, J. Aubreton, and M. F. Elchinger</i>	
New Gas Chemistry for High-Performance SiO₂ Patterning in Sub-0.1 μm ULSIs	95
<i>S. Samukawa</i>	

*Italicized names indicate the authors who presented the papers.

D. Atmospheres

Atmospheric Pollutant Removal by Non-Thermal Plasmas: Basic Data Needs for Understanding and Optimization of the Process.....	111
<i>S. Pasquiers, M. Cormier, and O. Motret</i>	

E. Astrophysics

The Effect of High-Lying Configurations and Ionization and Recombination Processes on Analyses of Solar and Stellar Coronal Spectra	125
<i>R. Doron, E. Behar, G. A. Doschek, and U. Feldman</i>	
Atomic and Molecular Data Needs for Astrophysics.....	134
<i>R. L. Kurucz</i>	
Charge Transfer Data Needs for Cometary X-Ray Emission Modeling	144
<i>P. C. Stancil, J. G. Wang, M. J. Raković, D. R. Schultz, and R. Ali</i>	
Interstellar Molecules: The New Frontiers for Molecular Data.....	154
<i>L. M. Ziurys and A. J. Apponi</i>	

F. Fusion Energy

Atomic and Molecular Processes for Heat and Particle Control in Tokamaks	161
<i>H. Kubo</i>	
Atomic Physics Processes Important to the Understanding of the Scrape-Off Layer of Tokamaks.....	171
<i>W. P. West, B. Goldsmith, T. E. Evans, and R. E. Olson</i>	

II. ATOMIC AND MOLECULAR PHYSICS AND DATA

A. Atomic and Molecular Physics

Atomic Processes in Plasmas—An Overview	185
<i>H. R. Griem</i>	
Benchmark Calculations for Electron Collisions with Complex Atoms	192
<i>K. Bartschat</i>	
Experimental Data for Electron-Ion Collisions	202
<i>A. Müller</i>	
Electron-Molecule Collisions in the Static-Exchange Correlation-Polarization Approximation.....	213
<i>R. R. Lucchese and F. A. Gianturco</i>	
Theoretical Atomic Data: Universality and Precision	221
<i>Z. R. Rudzikas</i>	

*Italicized names indicate the authors who presented the papers.

Electron Collision Data for Polyatomic Molecules in Plasma Processing and Environmental Processes	233
<i>H. Tanaka, M. Kitajima, and H. Cho</i>	
Developing Cross Section Sets for Fluorocarbon Etchants.....	241
<i>C. Winstead and V. McKoy</i>	

B. Atomic and Molecular Databases

Spectr-W³ Online Database on Atomic Properties of Atoms and Ions	253
<i>A. Y. Faenov, A. I. Magunov, T. A. Pikuz, I. Y. Skobelev, P. A. Loboda, N. N. Bakshayev, S. V. Gagarin, V. V. Komosko, K. S. Kuznetsov, S. A. Markelenkov, S. A. Petunin, and V. V. Popova</i>	
Electron-Molecule Cross Section Data for Hydrogen Plasma Applications	263
<i>R. Celiberto, A. Laricchiuta, R. K. Janev, and M. Capitelli</i>	
Atomic and Molecular Databases for Fusion Divertor Plasma	277
<i>P. S. Krstić and D. R. Schultz</i>	
Participants	287
Author Index	291

*Italicized names indicate the authors who presented the papers.
