

## CONTENTS.

	Par.
Series XIX. § 26. On the magnetization of light and the illumination of magnetic lines of force ...	2146
— ¶ 1. Action of magnets on light .....	2146
— ¶ 2. Action of electric currents on light...	2189
— ¶ 3. General considerations .....	2221
Series XX. § 27. On new magnetic actions, and on the magnetic condition of all matter .....	2243
— ¶ 1. Apparatus required .....	2245
— ¶ 2. Action of magnets on heavy glass ..	2253
— ¶ 3. Action of magnets on other substances acting magnetically on light .....	2275
— ¶ 4. Action of magnets on metals generally	2287
— — Revulsive phænomena .....	2309
Series XXI. § 27. ( <i>Continued.</i> )	
— ¶ 5. Action of magnets on the magnetic metals and their compounds .....	2343
— ¶ 6. Action of magnets on air and gases	2400
— ¶ 7. General considerations.....	2417
Series XXII. § 28. On the crystalline polarity of bismuth (and other bodies), and on its relation to the magnetic form of force .....	2454
— ¶ 1. Crystalline polarity of bismuth .....	2457
— ¶ 2. Crystalline polarity of antimony.....	2508
— ¶ 3. Crystalline polarity of arsenic .....	2532
— ¶ 4. Crystalline condition of various bodies	2535
— ¶ 5. Nature of the magnecrystallic force, and general observations.....	2550
— ¶ 6. On the position of a crystal of sulphate of iron in the magnetic field .....	2615
Series XXIII. § 29. On the polar or other condition of diamagnetic bodies .....	2640
Series XXIV. § 30. On the possible relation of gravity to electricity .....	2702
Series XXV. § 31. On the magnetic and diamagnetic condition of bodies .....	2718
— ¶ 1. Non-expansion of gaseous bodies by magnetic force .....	2718
— ¶ 2. Differential magnetic action .....	2757
— ¶ 3. Magnetic characters of oxygen, nitrogen, and space .....	2770

	Par.
Series XXVI. § 32. Magnetic conducting power .....	2797
— ¶ 1. Magnetic conduction .....	2797
— ¶ 2. Conduction polarity .....	2818
— ¶ 3. Magneocrystallic conduction .....	2836
§ 33. Atmospheric magnetism .....	2847
— ¶ 1. General principles .....	2847
Series XXVII. § 33. ¶ 2. Experimental inquiry into the laws of atmospheric magnetic action, and their application to particular cases	2969
Royal Institution Proceedings (Report) ...p.	323
Series XXVIII. § 34. On lines of magnetic force; their definite character; and their distribution within a magnet and through space.....	3070
Series XXIX. § 35. On the employment of the induced mag- neto-electric current as a test and mea- sure of magnetic forces .....	3177
— ¶ 1. Galvanometer .....	3178
— ¶ 2. Revolving rectangles and rings...	3192
§ 36. On the amount and general disposition of the forces of a magnet when associated with other magnets .....	3215
§ 37. Delineation of lines of magnetic force by iron filings.....	3234
On the lines of magnetic force (R. I.) .....	402
On the physical character of the lines of magnetic force .....	3243
	Page
On the physical lines of magnetic force (R. I.) .....	438
On the magnetic relations and characters of the metals .....	444
Thoughts on ray-vibrations.....	447
On the magnetic affection of light (repeated reflections) .....	453
On the distinctions between the ferro-magnetic and diamagnetic conditions of matter.....	457
On the diamagnetic conditions of flame and gases .....	467
On the use of gutta percha in electrical insulation .....	494
Observations on the magnetic force—law of distance (R. I.)...	497
On electric induction—associated cases of current and static effects (R. I.) .....	508
On subterraneous electro-telegraph wires.....	521
On magnetic hypotheses (R. I.).....	524
On some points of magnetic philosophy .....	528
The same—and on the nature of force (R. I.).....	566
Further observations on associated cases of current and static effects .....	575
