

## *CONTENTS*

<b>I</b>	<b>INTRODUCTION</b>	
	General	1
	The Basic Process of Detection	2
	Interaction of Particles with Matter	3
	Detection Media and Detectors	4
<b>II</b>	<b>THE INTERACTION OF NUCLEAR RADIATION WITH MATTER</b>	
	Neutrons	10
	Electromagnetic Radiation	16
	Interaction of Charged Particles with Matter	21
<b>III</b>	<b>DETECTION MEDIA</b>	
	Introduction	37
	Phosphors	38
	Ionization Media	50
<b>IV</b>	<b>THE EFFICIENCY OF DETECTORS</b>	
	Geometrical Relations	74
	Photons and Neutrons	81
	Mean Level Detectors	89
	The Sensitivity of Detectors	96
<b>V</b>	<b>SECONDARY EMISSION AND SCINTILLATION COUNTERS</b>	
	Secondary Emission Multipliers	101
	Phosphor-photomultiplier Arrangements	113
	Mean Level Scintillation Detectors	127
<b>VI</b>	<b>IONIZATION DEVICES</b>	130
	D.C. Ionization Chambers	131
	Pulse Ion Chambers and Conduction Counters	138
	Gas Multiplication and Proportional Counters	145
	Geiger Counters	158
	<b>INDEX</b>	181
