

Contents

Introduction		<i>page</i> iv
Chapter I	The British nuclear power programme	i
II	The Calder Hall type reactor and its economics	3
III	The manufacture and export of power reactors and ancillary equipment	10
IV	The supply of natural uranium fuel elements for gas-cooled reactors	15
V	Reactor safety and siting	19
VI	Insurance of reactors constructed overseas	22
	Research Reactors	
VII	Research and materials testing reactors supplied by British firms	24
	Other Reactors	
VIII	Some other British industrial organisations in the reactor field	30
	Isotopes	
IX	Radioisotopes and stable isotopes	32
	Nucleonics	
X	British nucleonic instruments and equipment	35
	Training and Information	
XI	Training facilities offered by the United Kingdom Atomic Energy Authority	40
XII	Information on the applications of atomic energy	45
Appendix A	The organisation of the United Kingdom Atomic Energy Authority	53
B	The United Kingdom Atomic Energy Authority's principal establishments engaged on civil work	56
