CHAPTER	PAGE
FOREWORD	vii
PREFACE	ix
PART I: NORMAL REACTOR AND CHEMICAL PLANT OPERATIONS	
1. RADIATION EXPOSURE EXPERIENCE WITHIN REACTOR PLANTS	3
Experience at Chalk River	4
Experience at the Hanford Works	8
Experience with the U.K. Research Reactor BEPO	16
2. RADIATION EXPOSURE OUTSIDE REACTOR PLANTS	25
Expected Hazards	25
Mechanisms of Damage Around Separations Plants	27
Sample Distribution Patterns	29
Liquid Disposal Hazards	36
3. RADIOCHEMICAL PLANT PROBLEMS	38
Preoperational Surveys	38
Safety Criteria in the Atomic Energy Industry	41
Health Protection in Radiochemical Processing Plants	45
Criticality Safety in Atomic Plants	54
PART II: THE DEVELOPMENT OF RADIATION SAFETY CRITERIA	
4. BIOLOGICAL FACTORS	65
Introduction	65
The Development of Standards	65
The ICPR Standards of Maximum Permissible Exposure	75
Philosophy of Radiation Protection	80

CHAPTER	PAGE
5. RADIOISOTOPE CONCENTRATION STANDARDS	83
Maximum Permissible Concentration of Radioisotopes in Air and Water for Short-Period Exposure	83
Validity of Maximum Permissible Standards for Internal Exposure	111
6. APPLICATION OF SAFETY CODES	114
Radiological Safety in the USSR	114
Administrative and Legal Problems	124
Handbooks on Radiation Protection	130
PART III: REACTOR ACCIDENTS AND THEIR CONSEQUENCES	
7. NUCLEAR DISASTER EFFECTS	135
Reactor Safety	135
Environmental Effects of a Reactor Disaster	151
Radiological Hazards from an Escape of Fission Products	160
8. RADIATION DISPERSION AND MONITORING	168
Meteorological Considerations	168
Radiation from Clouds of Reactor Debris	180
Radiological Monitoring	195
PART IV: SUPERCRITICAL REACTOR EXPERIENCE	
9. THE SELF-REGULATION AND SAFETY OF WATER-MODERATED REACTORS	203
Experiments with Homogeneous Reactors	205
Experiments on Solid Fuel Reactors	209
INDEX	231
