

Table of Contents

1. Introduction (T. Miyazaki)	1
1.1 Atom Tunneling Phenomena	1
1.2 Aim of the Book	4
1.3 Outline of the Book	7
References.....	11

Part 1 Atom Tunneling in Physics

2 Theory of Atom Tunneling Reactions in the Gas Phase.....	15
(T. Takayanagi)	
2.1 Introduction	15
2.2 What is Tunneling in Chemical Reactions?.....	16
2.3 Quantum Mechanical Methods for Calculating Rate Constants	18
2.4 Low Temperature Behavior of Rate Constants:	
Wigner Threshold Law	20
2.5 Effect of van der Waals Interactions on Tunneling Reactions.....	21
2.6 H + H ₂ Tunneling Reaction in Solid Phase:	
Application of Gas-Phase Models	24
2.7 Tunneling in the F + H ₂ , D ₂ , and HD Reactions	26
2.8 Conclusion and Future Development	28
References.....	29
3 Theory of Atom Tunneling Reactions in the Solid Phase.....	33
(L. I. Trakhtenberg)	
3.1 Introduction	33
3.2 Description of Low Temperature Chemical Reactions.....	36
3.3 Experimental Data on H-Atom Tunneling and Fitting	
by One Dimensional Model.....	42
3.4 Effect of Promotive Modes on the Rate Constant of Atom Tunneling..	43
3.4.1 Relaxation Processes	44
3.4.2 Time of Tunneling Transition.....	44
3.4.3 Double Adiabatic Approximation	45
3.4.4 Modified Theory of Radiationless Transitions	46
3.4.5 Comparison of Theory with Experimental Data.....	48
3.5 Mechanisms of Temperature and Pressure Dependencies	
of the Rate Constant	49

3.5.1	Role of Medium Reorganization in D-Transfer in an Irradiated HD Crystal	50
3.5.2	H-atom Tunneling in the Fluorene–Acridine System.....	52
3.6	Conclusion and Future Development	54
	References	55
4	Atom Tunneling Reactions in Quantum Solid Hydrogen	59
	(T. Miyazaki)	
4.1	Introduction. Classical Reactions and Tunneling Reactions.....	59
4.1.1	Temperature Dependence.....	60
4.1.2	Isotope Effect	62
4.2	ESR Measurement at Very Low Temperature.....	63
4.3	Conclusive Evidence for Atom Tunneling Reactions.....	64
4.3.1	Temperature Independence	65
4.3.2	Large Isotope Effect.....	66
4.3.3	Comparison of Experimental Rate Constants with Theoretical Values.....	68
4.4	Controlling Factors of Classical Reactions.....	70
4.5	Controlling Factors of Tunneling Reactions.....	70
4.5.1	Effect of Deformation of Crystalline Structure	70
4.5.2	Anomalous Temperature Effect on the Decay of H ₂ ⁻ Anions ..	74
4.5.3	Effect of Disorder and Energy Dissipation.....	77
4.5.4	Inverse Secondary Isotope Effect of Methyl Radical Reactions	85
4.6	Fascinating Quantum Properties of Solid Hydrogen	86
4.7	Conclusion and Future Development	87
	References	88
5	Atom Tunneling Phenomena in Quantum Solid and Liquid Helium	91
	(Y. Miura)	
5.1	Introduction. Quantum Nature of Helium Atoms.....	91
5.2	Nuclear Magnetic Ordering of Solid ³ He Arising from Tunneling of Atoms	92
5.3	Quantum Nucleation in Superfluid Helium by Tunneling.....	98
5.4	Tunneling Motion of Dislocation Lines in Solid ³ He.....	103
5.5	Conclusion and Future Development	108
	References	109
6	Quantum Tunneling Diffusion (R. Kadono)	111
6.1	Introduction	111
6.2	Quantum Tunneling Diffusion of Positive Muons and Muonium	112
6.3	Effect of Disorder and Superconductivity	115
6.4	Muonium in a Bloch State	117
6.5	Conclusion and Future Development	123
	References	123

Part 2 Atom Tunneling in Chemistry

7	Fascinating Aspects of Tunneling Reactions in Organic Substances	127
	(T. Miyazaki)	
7.1	Introduction	127
7.2	Selective Tunneling Reaction in Alkane Mixtures by H Atoms.....	128
7.2.1	Formation of H Atoms in Radiolysis of Alkane	128
7.2.2	Evidence for Tunneling Reaction	131
7.2.3	Selectivity in Tunneling Reaction.....	132
7.2.4	Local Motion and Selective Tunneling Reaction.....	135
7.3	Selective Tunneling Reaction in the Same Alkane by H Atoms	138
7.4	Instability of Molecules. Tunneling Elimination of H ₂ Molecule from Alkane Cation	140
7.5	Instability of Molecules. Tunneling cis–trans Isomerization of Formic Acid	144
7.6	Conclusion and Future Development	145
	References.....	145
8	Tunneling Insertion Reaction of Carbenes (H. Tomioka).....	147
8.1	Introduction	147
8.1.1	Dicoordinate Carbon Intermediate–Carbenes.....	147
8.1.2	Carbenes Have Two-Electronic States Singlet and Triplet Multiplicities	148
8.1.3	Singlet and Triplet States Show Different Reaction Patterns ..	149
8.1.4	How to Generate a Carbene.....	151
8.2	Reactions of Arylcarbenes with Alkenes at 77 K	152
8.3	Reactions of Arylcarbenes with Alcohols at 77 K.....	155
8.4	Tunneling C–H Insertion from Triplet Carbenes at Low Temperature.....	157
8.5	Why Can Only Triplets Find a Tunneling Pathway?.....	160
8.6	Tunneling Reactions of Carbene Having Intramolecular Reaction Channels	161
8.7	Tunneling in Intramolecular Reactions.....	164
8.8	Tunneling Reaction at Elevated Temperatures	166
8.9	Conclusion and Future Development	170
	References.....	171
9	Production of Interstellar Molecules and Amorphous Semiconductors by Atom Tunneling Reaction (K. Hiraoka).....	173
9.1	Introduction	173
9.2	Method.....	175
9.3	Laboratory Simulation of H-atom Tunneling Reactions in Interstellar Ices	177
9.3.1	Gas–Grain Processes for the Formation of NH ₃ , CH ₄ , and H ₂ O	178

9.3.2	Formation of Formaldehyde by the Tunneling Reaction of H with Solid CO at 10 K	182
9.3.3	Tunneling Reactions of H Atoms with Solid C ₂ H ₂ , C ₂ H ₄ , and C ₂ H ₆	184
9.3.4	Tunneling Reactions of D Atoms with C ₂ H ₂ , C ₂ H ₄ and C ₂ H ₆ : Isotope Effect	189
9.3.5	Negative Temperature Dependence of H-Atom Tunneling Reactions	190
9.4	Formation of Amorphous Semiconductor by H-Atom Tunneling Reactions.....	193
9.5	Conclusion and Future Development	197
	References	198
10	Atom Tunneling and Molecular Structure (H. Sekiya)	201
10.1	Introduction	201
10.2	Experimental Methods.....	201
10.3	Proton Tunneling in Molecules and Complexes.....	206
10.3.1	Proton Tunneling in Molecules	206
10.3.2	Proton Tunneling in Complexes.....	219
10.4	Conclusion and Future Development	227
	References	228
11	Atom Tunneling and Crystalline Structure (T. Matsuo)	233
11.1	Introduction	233
11.2	General Considerations on X-Ray and Neutron Diffraction, Crystal Structure and Phase Transitions	234
11.3	Proton Tunneling in Hydrogen-Bonded Crystals	237
11.4	Tunneling Energy Levels of Ammonium Ions in Ammonium Hexachlorometallates: Global and Local Rotation and Tunneling	245
11.5	Delocalization of H (D) Atoms. Structure of (NH ₄) ₂ PtCl ₆ , (NH ₄) ₂ SnCl ₆ and (ND ₄) ₂ SnCl ₆ by Neutron Diffraction	251
11.6	Other Compounds Possessing Strong Isotope-Dependent Properties..	257
11.7	Conclusion and Future Development	258
	References	258

Part 3 Atom Tunneling in Biology

12	Atom Tunneling Reaction of Vitamin C in Suppression of Mutation.....	263
	(T. Miyazaki and J. Kumagai)	
12.1	Introduction	263
12.1.1	Tunneling Reaction at Room Temperature	263
12.1.2	How to Study Tunneling Reactions in Biological Systems...	265
12.2	Long-Lived Radicals in γ -Irradiated Cells	267

12.2.1	Discovery of Long-Lived Radicals and Reactions with Vitamin C	267
12.2.2	Why Do Reactive Radicals Survive for a Long Time?	269
12.2.3	Assignment of Long-Lived Radicals	272
12.3	Reaction of Long-Lived Radicals with Vitamin C	275
12.4	Biological Effects of Tunneling Reaction of Long-Lived Radicals with Vitamin C	277
12.5	Tunneling Reaction of Long-Lived Radicals with Vitamin C	280
12.6	Conclusion and Future Development	282
	References.....	283
13	Atom Tunneling Reaction of Vitamin E in Antioxidant, Prooxidant and Regeneration Reactions (S. Nagaoka)	285
13.1	Introduction	285
13.2	Tunneling Antioxidant Reaction of Vitamin E.....	289
13.3	Prooxidant Reaction of Vitamin E.....	295
13.4	Tunneling Regeneration Reaction of Vitamin E.....	298
13.5	Conclusion and Future Development	301
	References.....	302
	Index.....	305
