FUTURE CONTRIBUTIONS xi

Statistical Experimental Design for Quantitative Atomic Resolution Transmission Electron Microscopy
S. VAN AERT, A. J. DEN DEKKER, A. VAN DEN BOS, AND D. VAN DYCK

I. Introduction 2
II. Basic Principles of Statistical Experimental Design 13
III. Statistical Experimental Design of Atomic Resolution Transmission Electron Microscopy Using Simplified Models . 27
IV. Optimal Statistical Experimental Design of Conventional Transmission Electron Microscopy 58
V. Optimal Statistical Experimental Design of Scanning Transmission Electron Microscopy 104
VI. Discussion and Conclusions 143
References 157

Transform-Based Image Enhancement Algorithms with Performance Measure
ARTYOM M. GRIGORYAN AND SOS S. AGAIAN

I. Introduction 165
II. Transforms with Frequency Ordered Systems 170
III. Tensor Method of Image Enhancement 218
References 240

Image Registration: An Overview
MARIA PETROU

I. Introduction 243
II. Similarity Measures 246
III. Deriving the Transformation Between the Two Images 266
IV. Feature Extraction 276
V. Literature Survey 282

VI. Conclusions 287
References 288
