Preface	xii
-------------------	-----

Part 1. Conference Summary

Conference Summary	3
<i>J. Binney</i>	

Part 2. Introduction to Dark Matter in Galaxies

Alternatives to Dark Matter (?)	17
<i>A. Aguirre</i>	
What is the Evidence for Dark Matter?	27
<i>J. A. Sellwood</i>	
Dark Matter in Galaxies: Observational overview	39
<i>A. Bosma</i>	

Part 3. Central Density Cusps, Thin Disks, and Dark Halo Substructure

Summary talk: How serious are the problems faced by CDM: cusps, thin disks, and halo substructure	53
<i>J. R. Primack</i>	
The Inner Density Cusp of Cold Dark Matter Halos	61
<i>J. F. Navarro</i>	
CDM in LSB Galaxies: Toward the Optimal Halo Profile	69
<i>W. J. G. de Blok</i>	
The Kinematics in the Cores of Low Surface Brightness Galaxies	77
<i>R. A. Swaters, M. A. W. Verheijen, M. A. Bershady and D. R. Andersen</i>	
Lensing Diagnostics of Halo Substructure	85
<i>S. Mao</i>	
Small-scale Substructure in Dark Matter Haloes: Where Does Galaxy Formation Come to an End?	91
<i>J. E. Taylor, J. Silk and A. Babul</i>	
Inner Structure of Dark Matter Halos	99
<i>T. Fukushige, A. Kawai and J. Makino</i>	

Part 4. Lensing

The dark matter content of lensing galaxies at $1.5 R_e$	103
P. L. Schechter and J. Wambsganss	
Determining the Properties of Galaxy 2237+0305 using Gravitational Lensing	109
C. Trott and R. Webster	
Decomposition of the Visible and Dark Matter Mass Profiles in the Einstein Ring 0047–2808	115
S. Dye and S. Warren	
Evidence for Halo Microlensing from a Survey of M31	121
A. P. S. Crotts, R. R. Uglesich, E. A. Baltz, J. de Jong, R. P. Boyle and C. J. Corbally	
MEGA: Microlensing Exploration of the Galaxy and Andromeda	127
D. R. Alves, E. A. Baltz, A. P. S. Crotts, A. Bergier, P. Cseresnjes and A. Gersch	
Lighting up the dark and dim in the Andromeda Galaxy	129
E. Kerins	
The EROS2 Microlensing Study of the Galaxy	131
C. Hamadache	
On Planetary-Mass Compact Objects as Dark Matter	133
E. Zackrisson, C. Persson and N. Bergvall	
Astrometric study of MACHO halo distribution in our Galaxy	135
K. Ohnishi, M. Hosokawa and T. Fukushima	
Astrometric Microlensing by Finite-size Lenses	137
R. Takahashi	
Direct Mapping of Massive Compact Objects in Extragalactic Dark Halos	139
K. T. Inoue and M. Chiba	
Quasar Mesolensing as a Probe of CDM Substructures	141
A. Yonehara, M. Umemura and H. Susa	
Gravitational Lens Statistics as a Probe of Halo Profiles	143
M. Oguri	
Mass-to-Light Ratios of Early- and Late-Type Galaxies	145
T. G. Brainerd and M. A. Specian	

Part 5. Clusters and Ellipticals

X-Ray Constraints on Dark Matter in Galaxy Clusters and Elliptical Galaxies: A View from Chandra and XMM	149
D. A. Buote	
The dark matter halos of spheroidal galaxies and clusters of galaxies	159
T. Treu, L. V. E. Koopmans, D. J. Sand, G. P. Smith and R. S. Ellis	
Elliptical Galaxies: Darkly Cloaked or Scantly Clad?	165
A. J. Romanowsky, N. G. Douglas, K. Kuijken, M. R. Merrifield, M. Arnaboldi, N. R. Napolitano, H. Merrett, M. Capaccioli, K. C. Freeman and O. Gerhard	

Early-type Galaxy Halo Dynamics inferred using the PN Spectrograph	171
N. G. Douglas, A. J. Romanowsky, K. Kuijken, M. R. Merrifield, N. R. Napolitano, M. Arnaboldi, K. C. Freeman, M. Capaccioli and O. Gerhard	
Is there a dichotomy in the Dark Matter as well as in the Baryonic Matter properties of ellipticals?	173
N. R. Napolitano, M. Capaccioli, M. Arnaboldi, M. R. Merrifield, N. G. Douglas, K. Kuijken, A. J. Romanowsky and K. C. Freeman	
The Halo Mass Distribution of Field and Cluster Early-Type Galaxies	175
M. P. Bergmann, A. Forestell, K. Gebhardt and I. Jørgensen	
The dark halo in the elliptical galaxy NGC 3108	177
G. I. G. Józsa, T. A. Oosterloo, R. Morganti and D. Vergani	
Orbital structure of triaxial galaxies	179
G. van de Ven, E. Verolme, M. Cappellari, P. T. de Zeeuw	
ERO R1 in the field of CL0939+4713 – Evidence for an S0-like galaxy at $z \sim 1.5$	181
M. Iye, N. Kashikawa, M. Imanishi, T. Kodama, M. Chiba, K. Shimasaku, S. Okamura, S. Miyazaki, C. Simpson, N. Kobayashi, H. Terada, M. Goto and F. Iwamuro	
1.2 mm emission from Cen A	183
Z. Banhidi, R. Chini and M. Albrecht	
Directions of cosmic anisotropies	185
K. Bajan, P. Flin and V. N. Pervushin	
Part 6. The Galaxy	
Dark Matter Constraints from the Sagittarius Dwarf and Tail System	189
S. R. Majewski, D. R. Law, K. V. Johnston, M. F. Skrutskie and M. D. Weinberg	
The Mass of the Galaxy from Large Samples of Field Horizontal-Branch Stars in the SDSS Early Data Release	195
T. C. Beers, M. Chiba, T. Sakamoto, R. Wilhelm, C. Allende Prieto, J. Sommer-Larsen, H. J. Newberg, B. Yanny, B. Marsteller and J. R. Pier	
Galactic Disk Surface Density in the Solar Neighbourhood	201
W. F. van Altena, V. I. Korčagin, T. M. Girard, D. I. Dinescu and T. V. Borkova	
Search for cool white dwarfs with GSC2	207
D. Carollo, A. Spagna, M. G. Lattanzi, R. L. Smart, S. T. Hodgkin, L. Terranegra and B. McLean	
Mapping the Remote Milky Way Halo using BHB stars at $70 < r < 130$ kpc	209
L. Clewley, S. J. Warren, P. Hewett, M. Wilkinson and N. W. Evans	
Rotation curve of our Galaxy and field galaxies	211
D. Russeil, O. Garrido, P. Amram and M. Marcelin	
Mass of the Milky Way	213
O. I. Wong, M. J. Drinkwater, J. B. Jones, M. D. Gregg and K. C. Freeman	

Using Globular Clusters to Test Newton's Law of Gravity	215
R. Scarpa, G. Marconi and R. Gilmozzi	
Part 7. Baryonic Dark Matter	
Galaxy Formation and Baryonic Dark Matter	219
F. Combes	
Cosmic Matter Distribution: Cosmic Baryon Budget Revisited	227
M. Fukugita	
The visible matter – dark matter coupling	233
R. Sancisi	
Cold Molecular Gas as Baryonic Dark Matter	241
D. Pfenniger	
Cold Molecular Gas as a Possible Component of Dark Matter in the Outer Parts of Disk Galaxies	249
R. J. Allen and R. Diaz-Miller	
Molecular hydrogen as dark mass in dwarf galaxies	251
P. R. Williams, C. Marzok, S. Myers and A. H. Nelson	
Part 8. Bars	
Bars and the connection between dark and visible matter	255
E. Athanassoula	
The dark matter density problem in massive disk galaxies	265
B. J. Weiner	
Fast bars in SB0 galaxies	271
E. M. Corsini, J. A. L. Aguerrí and V. P. Debattista	
Boxy isophotes in face-on views of barred galaxies	273
P. A. Patsis, C. Skokos and E. Athanassoula	
Formation of inner rings in 3D potentials of barred galaxies	275
P. A. Patsis, C. Skokos and E. Athanassoula	
The Dark Matter Content of Barred Spiral Galaxies	277
G. Petitpas, M. Das, P. Teuben and S. Vogel	
Part 9. Disks	
Properties of Dark Matter Halos in Disk Galaxies	281
R. S. de Jong, S. Kassin, E. F. Bell and S. Courteau	
The mass distribution in early type disk galaxies	287
E. Noordermeer, T. van der Hulst, R. Sancisi and R. Swaters	
Rotating Halos and Heavy Disks: The Case of NGC 2915	293
F. S. Masset and M. Bureau	
Evolution of Galaxies in Triaxial Halos with Figure Rotation	299
K. Bekki and K. C. Freeman	
SAURON dynamical modeling of NGC 2974	305
D. Krajnović, M. Cappellari, E. Emsellem, R. McDermid and P. T. de Zeeuw	

Radial Distributions of Dark and Luminous Matter in Bright Spiral Galaxies	307
S. A. Kassin, R. S. de Jong and R. W. Pogge	
The stellar Mass-to-Light ratio in disc galaxies	309
L. Portinari, J. Sommer-Larsen and R. Tantalo	
Cores vs. Cusps: Dark Matter Density Profiles in Spirals	311
G. Gentile, U. Klein, P. Salucci and D. Vergani	
Amplitude of Spiral Arms and Dark Matter	313
P. Grosbøl	
Nuclear Spirals and Supermassive Black Holes	315
H. B. Ann and P. Thakur	
Tracing the relation between black holes and dark haloes	317
P. Buyle, M. Baes and H. Dejonghe	
High-resolution CO Survey of Virgo Spirals at Nobeyama — Massive Cores inferred from Central Rotation Curves	319
Y. Sofue, H. Nakanishi, S. Onodera, J. Koda and K. Kohno	
Mass Determination in the Late-Type Spiral NGC 5457	321
I. Puerari, M. Valdez-Gutiérrez and M. Rosado	
The Opacity of Spiral Galaxies from Counts of Distant Background Galaxies	323
B. W. Holwerda, R. A. González, R. J. Allen and P. C. van der Kruit	
Bulge Formation in Late-type Galaxies — Cuspy- vs Soft-core Dark Matter Density Profiles	325
J.-H. Huang, Z.-G. Deng and Y.-N. Fu	
Dark Matter Distribution in Nearby Galaxies	327
O. Garrido, P. Amram, C. Carignan, S. Blais-Ouellette, M. Marcelin and D. Russeil	
Dynamical Modeling using Evolutionary Algorithms	329
A. Mathieu	
Part 10. Low Surface Brightness Galaxies	
A 3D Optical Spectroscopy Study of Low Surface Brightness Galaxies	333
L. Chemin, P. Amram, C. Carignan, C. Balkowski, W. van Driel, V. Cayatte, O. Hernandez, J. Boulesteix and M. Marcelin	
The Central Dynamics of Blue Low Surface Brightness Galaxies	335
E. Zackrisson and N. Bergvall	
Central DM density cuspiness in LSB's: a stellar kinematics approach	337
A. Pizzella, E. M. Corsini, F. Bertola, L. Coccato, J. Magorrian, M. Sarzi and J. G. Funes	
The $\sigma_c - V_{circ}$ correlation in high and low surface brightness galaxies	339
A. Pizzella, E. Dalla Bontà, E. M. Corsini, L. Coccato and F. Bertola	
A search for LSB dwarf galaxies in various environments	341
S. Roberts, J. Davies and S. Sabatini	
Dust and the observed dark matter content of galaxies	343
M. Baes, H. Dejonghe and J. I. Davies	

Part 11. Dwarf Galaxies	
Kinematics of Extremely Faint Dwarf Galaxies	347
<i>A. Begum and J. N. Chengalur</i>	
Dark Matter in Dwarf Galaxies: High Resolution Observations	353
<i>A. D. Bolatto, J. D. Simon, A. Leroy and L. Blitz</i>	
Extreme Dark Matter Dominated Dwarfs	359
<i>M. I. Wilkinson, J. T. Kleyna, N. W. Evans and G. F. Gilmore</i>	
Evidence for Light-weight Local Group Dwarf Spheroidal Galaxies	365
<i>J. R. Kuhn and D. Kocevski</i>	
A Radial Velocity Dispersion Profile for the Fornax Dwarf Spheroidal Galaxy	367
<i>M. G. Walker, M. Mateo, E. W. Olszewski, M. Woodroffe, X. Wang and J. Joyce</i>	
H _I Rotation of Dwarf Galaxies with Unusually High H _I Mass-to-Light Ratios	369
<i>B. E. Warren, H. Jerjen and B. S. Koribalski</i>	
Inner Halo Shapes of Dwarf Galaxies: Resolving the Cusp/Core Problem	371
<i>K. Spekkens and R. Giovanelli</i>	
A high-resolution rotation curve of NGC 6822	373
<i>W. J. G. de Blok, D. T. F. Weldrake and F. Walter</i>	

Part 12. Dark and Visible Matter Scaling Relations

Scaling Laws for Dark Matter Halos in Late-Type and Dwarf Spheroidal Galaxies	377
<i>J. Kormendy and K. C. Freeman</i>	
The Relationship between Stellar and Halo Masses of Disk Galaxies at $z = 0.2 - 1.2$	399
<i>C. J. Conselice, K. Bundy, R. S. Ellis, J. Brinchmann and N. Vogt</i>	
Polar Ring Galaxies and the Tully-Fisher relation: implications for the dark halo shape	405
<i>M. Arnaboldi, E. Iodice, F. Bournaud, F. Combes, L. S. Sparke, W. van Driel and M. Capaccioli</i>	
Tully-Fisher Relations from an HI-Selected Sample	411
<i>M. J. Meyer, M. A. Zwaan, R. L. Webster and S. E. Schneider</i>	
The Tully-Fisher Relation for Hickson Compact Groups	413
<i>P. Amram, C. Mendes de Oliveira, H. Plana and C. Balkowski</i>	
The Tully-Fisher Relation in Cl0024+1654 at $z=0.4$	415
<i>A. J. Metevier and D. C. Koo</i>	
Galaxy Scaling Relations as a Result of Secular Evolution	417
<i>X. Zhang</i>	

Part 13. The Shapes and Extents of Dark Halos	
The shapes of simulated dark matter halos	421
<i>V. Springel, S. D. M. White and L. Hernquist</i>	

The Galactic Halo and CDM	431
<i>M. R. Merrifield</i>	
Properties of galaxy dark matter halos from weak lensing	439
<i>H. Hoekstra, H. K. C. Yee and M. D. Gladders</i>	
Observational Constraints on the Physical Parameters of Dark Matter Halos	447
<i>C. Carignan</i>	
What X-rays tell us about dark matter halos	455
<i>Y. P. Jing</i>	
Measuring Dark Matter Halos by Modeling Interacting Galaxies	461
<i>C. Theis</i>	
Orbit Evolution of Satellite Galaxies in Dark Matter Haloes	463
<i>A. Just</i>	

Part 14. Angular Momentum

The Origin and Distribution of Angular Momentum in Galaxies	467
<i>J. R. Primack</i>	
Angular Momentum in Groups from Cosmological Simulations	477
<i>J. Bailin and M. Steinmetz</i>	
On the angular momenta of galaxy structures	479
<i>P. Flin, W. Godlowski and M. Szydlowski</i>	

Part 15. Direct Detection of Elementary Particles

WIMP direct detection and halo structure	483
<i>A. M. Green</i>	
Accurate (In)Direct Detection Rates for Neutralinos	489
<i>M. Schelke, J. Edsjö and P. Ullio</i>	
Study on Neutron-induced Background in the CRESST Experiment	491
<i>H. Wulandari, F. von Feilitzsch, M. Huber, T. Jagemann, J. Jochum, T. Lachenmaier, J.-C. Lanfranchi, W. Potzel, W. Rau, M. Stark and S. Waller</i>	
CRESST Detectors for Nonbaryonic Cold Dark Matter Particles	493
<i>T. Jagemann</i>	
Dark Matter Search Experiments At Boulby Mine	495
<i>S. M. Paling</i>	
Can quantum theory explain dark matter?	497
<i>A. D. Ernest</i>	

Author Index	499
