

CONTENTS

Preface.....	xxi
CEC Awards.....	xxii
Board of Directors	xxvii
Sponsors	xxviii

PART A

ACCELERATORS

Advanced Superconducting Technology for Global Science:	
The Large Hadron Collider at CERN.....	3
P. Lebrun	
Spallation Neutron Source (SNS).....	15
M. M. White, for the SNS Project	
Physics with the Rare Isotope Accelerator	25
M. Thoennessen	
The Role of Superconductivity and Cryogenics in the	
Neutrino Factory.....	34
M. A. Green, E. L. Black, R. C. Gupta, M. A. Iarocci, V. Lebedev,	
J. R. Miller, R. B. Palmer, H. S. Padamsee, B. L. Parker, S. Prestemon,	
and R. J. Weggel	

LARGE SCALE CRYOGEN SYSTEMS

Performance of a Proximity Cryogenic System for the ATLAS	
Central Solenoid Magnet.....	47
Y. Doi, A. Yamamoto, Y. Makida, Y. Kondo, M. Kawai, K. Aoki,	
T. Haruyama, T. Kondo, S. Mizumaki, Y. Wachi, S. Mine, F. Haug,	
N. Delruelle, G. Passardi, and H. ten Kate	
Cryogenic System for KSTAR Tokamak.....	55
D. L. Kim, Y. K. Oh, Y. S. Jung, C. H. Choi, J. M. Lee, Y. S. Kim,	
Y. M. Park, and G. S. Lee	
AHF Magnetic Lens Cryosystems	60
J. P. Kelley and G. T. Mulholland	
AHF Beam Transport Lattice Cryosystems	68
J. P. Kelley and G. T. Mulholland	
Update of Cooldown and Warmup Study for the Large	
Hadron Collider	76
L. Liu, G. Riddone, and L. Tavian	
Thermal Performance of the Tevatron Magnets under Higher Energy	
Operating Conditions.....	84
A. L. Klebaner and J. C. Theilacker	

Thermal Modeling of the Tevatron Magnet System	90
J. C. Theilacker and A. L. Klebaner	
A Large-Scale Test Facility for Heat Load Measurements Down to 1.9 K.....	98
L. Dufay, C. Policella, J.-M. Rieubland, and G. Vandoni	
The Test Facility for Short Prototypes of the LHC Superconducting Magnets	106
W. Venturini Delsolaro, A. Arn, L. Bottura, C. Giloux, R. Momo, A. Siemko, and L. Walckiers	
Cryogenics for the HOMER II-High Field Magnet-Test Facility at the Forschungszentrum Karlsruhe	114
H. Lahn, W. Lehmann, M. Stamm, and M. Stüber	
A Pressurized He II Cryogenic System for the Superconducting Magnet Test Facility at KEK	123
N. Kimura, H. Ohhata, M. Iida, K. Tanaka, K. Tsuchiya, A. Ajima, N. Higashi, T. Nakamoto, K. Nakamoto, N. Ohuchi, T. Ogitsu, T. Shintomi, S. Sugawara, N. Takahashi, A. Terashima, Y. Wachi, and A. Yamamoto	
Cryogenic Testing of By-Pass Diode Stacks for the Superconducting Magnets of the Large Hadron Collider at CERN	131
A. della Corte, A. Gharib, D. Hagedorn, S. Turtù, G. L. Basile, A. Catitti, S. Chiarelli, E. Di Ferdinando, G. Taddia, M. Talli, L. Verdini, and R. Viola	
Development of a LNe Test Facility.....	139
U. P. Trociewitz, H. J. N. van Eck, D. C. van der Laan, S. H. Thompson, A. Mbaruku, H. Weijers, and J. Schwartz	
He II Heat Exchanger Test Unit for the LHC Inner Triplet	147
C. Darve, E. Blanco, Y. Huang, T. Nicol, T. Peterson, and R. van Weelderen	
The Proximity Cryogenic System for the ATLAS Toroidal Magnets	155
F. Haug, G. Passardi, R. Pengo, H. ten Kate, E. Baynham, T. Bradshaw, G. Brown, D. Cragg, M. Crook, A. H. Orlowska, J. Rochford, D. Sole, and C. Mayri	
Cryogenics for the Rare Isotope Accelerator Project	161
J. R. Specht and W. C. Chronis	
The Cryogenic System for the SLAC E158 Experiment.....	171
J. G. Weisend II, R. Boyce, W. Burgess, A. Candia, R. Carr, J. Gao, K. Gustafsson, C. Jones, W. Kaminskas, G. Oxoby, R. McKeown, H. Quack, A. Scott, and T. Weber	
Acceptance Test and Operation of the Southwire Company 30-Meter High-Temperature Superconducting Cable Cryogenic System.....	180
J. A. Demko, J. W. Lue, M. J. Gouge, J. P. Stovall, Z. Butterworth, R. L. Hughey, D. Lindsay, M. Roden, and U. Sinha	
Cooling of HTS Applications in the Temperature Range of 66 K to 80 K	188
U. Fleck, D. Vogel, and B. Ziegler	

LARGE SCALE REFRIGERATORS AND LIQUEFIERS

Fermilab's Central Helium Liquefier Capacity Upgrade	199
M. G. Geynisman and J. N. Makara	
Cryogenic System Upgrade for the National Superconducting Cyclotron Laboratory.....	207
A. McCartney, V. Ganni, H. Laumer, D. Arenius, J. Creel, W. Chronis, and K. Davidson	
50 Years of Helium Liquefaction at the MIT Cryogenic Engineering Laboratory.....	213
J. L. Smith, Jr.	
Air Liquide 1.8 K Refrigeration Units for CERN LHC Project	225
B. Hilbert, G. M. Gistau-Baguer, and A. Caillaud	
The Helium Cryogenic Plant for the CMS Superconducting Magnet.....	232
G. Perinić, A. Caillaud, F. Dagut, P. Dauguet, and P. Hirel, Conclusions on 8 Years Operation of the LEP 4.5 K Refrigeration System at CERN.....	239
N. Bangert, S. Claudet, P. Gayet, and M. Sanmarti	
Conclusions from 12 Years Operational Experience of the Cryoplants for the Superconducting Magnets of the LEP Experiments.....	247
K. Barth, J.-P. Dauvergne, D. Delikaris, and G. Passardi	
Conceptual Design of a High Efficiency Large Capacity Hydrogen Liquefier.....	255
H. Quack	
EXPANDERS, PUMPS, AND COMPRESSORS	
Cryogenic Scroll Expander for Claude Cycle with Cooling Power of 10 to 100 Watts at 4.2 K	267
J. Manzagol, P. d'Harboullé, G. Claudet, and G. G. Baguer	
A New Helium Gas Bearing Turboexpander	275
L. Y. Xiong, C. Z. Chen, L. Q. Liu, Y. Hou, J. Wang, and M. F. Lin	
More Effective Wet Turboexpander for the Nuclotron Helium Refrigerators	280
N. N. Agapov, V. I. Batin, A. B. Davydov, H. G. Khodzhibagian, A. D. Kovalenko, G. A. Perestoroin, I. I. Sergeev, V. L. Stulov, and V. N. Udu	
Design, Fabrication, Commissioning, and Testing of a 250 G/S, 2-K Helium Cold Compressor System.....	288
V. Ganni, D. M. Arenius, B. S. Bevins, W. C. Chronis, J. D. Creel, and J. D. Wilson, Jr.	
Cold Neutron Source Supercritical, Variable Speed, Magnetic Bearing Circulator.....	305
W. D. Batton, J. E. Dillard, T. Lucas, and K. T. Sundset	
The Design and Performance of a Superfluid ^3He-^4He Compressor.....	312
F. K. Miller and J. G. Brisson	

LOW TEMPERATURE SUPERCONDUCTING MAGNETS

Closed Flux Windings for SMES	323
E. Y. Klimenko and E. P. Polulyakh	
Development and Test of a Nb ₃ Sn Racetrack Magnet Using the React and Wind Technology.....	329
G. Ambrosio, N. Andreev, E. Barzi, P. Bauer, R. Carcagno, D. Chichili, K. Ewald, S. Feher, L. Imbasciati, V. V. Kashikhin, P. Limon, I. Novitski, D. Orris, Y. Pischalnikov, C. Sylvester, M. Tartaglia, J. Tompkins, S. Yadav, and A. V. Zlobin	
High-Gradient Magnetic Superconducting Separator for Feebly Magnetic Compounds.....	337
V. B. Yuferov, Y. V. Kholod, O. V. Chernyi, E. I. Skibenko, L. G. Sorokovoy, N. A. Kosik, V. O. Illichova, E. V. Mufel, and V. F. Malets	
Coal Products Dressing by High-Gradient Superconducting Magnetic Separator	342
A. Y. Laptienko, N. V. Taryanik, G. F. Temerty, O. V. Chernyi, and V. B. Yuferov	
Superconducting Solenoids for Muon Cooling in the Neutrino Factory.....	348
M. A. Green, J. R. Miller, and S. Prestemon	
Superconducting Magnets for Induction Linac Phase Rotation in a Neutrino Factory.....	356
M. A. Green and S. Yu	
Pressure Drop Analysis in the CS Insert Coil.....	364
R. Zanino, C. Y. Gung, K. Hamada, and L. Savoldi	
Thermal Contraction Measurements of the Superconducting Coil of the Main Magnets for the Large Hadron Collider	372
P. Ferracin, E. Todisco, D. Tommasini, and W. Scandale	
Elastic Modulus Measurements of the LHC Dipole Superconducting Coil at 300 K and at 77 K.....	377
K. Couturier, P. Ferracin, E. Todisco, D. Tommasini, and W. Scandale	
Testing of Superfluid-Cooled 920 MHz NMR Cryostat.....	383
F. Matsumoto, A. Sato, T. Kiyoshi, H. Nagai, H. Wada, S. Ito, T. Miki, M. Yoshikawa, M. Hamada, Y. Kawate, and S. Fukui	
LHC Interaction Region Quadrupole Cryostat Design.....	391
T. H. Nicol, C. Darve, Y. Huang, and T. M. Page	
Design of the LHC US ATLAS Barrel Cryostat.....	399
M. L. Rehak, R. Alforque, Y. Farah, R. Grandinetti, T. Muller, S. Norton, and J. Sondericker	
Experimental Results of Pressure Drop Measurement in ITER CS Model Coil Tests	407
K. Hamada, T. Kato, K. Kawano, E. Hara, T. Ando, H. Tsuji, K. Okuno, R. Zanino, and L. Savoldi	
Inductively Driven Transients in the CS Insert Coil (I): Heater Calibration and Conductor Stability Tests and Analysis.....	415
R. Zanino, E. Carpaneto, A. Portone, E. Salpietro, and L. Savoldi	

Inductively Driven Transients in the CS Insert Coil (II): Quench Tests and Analysis.....	423
L. Savoldi, E. Salpietro, and R. Zanino	
Conductor Analysis of the ITER FEAT Poloidal Field Coils during a Plasma Scenario	431
S. Nicollet, P. Hertout, J. L. Duchateau, A. Bleyer, and D. Bessette	

HIGH TEMPERATURE SUPERCONDUCTING MAGNETS

Superconducting Flux Pump for High-Temperature Superconductor Insert Coils of NMR Magnets.....	441
S. Jeong, H. Lee, and Y. Iwasa	
Quench Dynamics in Silver Coated YBCO Tapes	449
R. C. Duckworth, J. M. Pfotenhauer, J. W. Lue, M. J. Gouge, D. F. Lee, and D. M. Kroeger	
Quench Tests of a 20-cm-Long RABiTS YBCO Tape	457
J. W. Lue, M. J. Gouge, R. C. Duckworth, D. F. Lee, D. M. Kroeger, and J. M. Pfotenhauer	
Numerical Analysis of a New Hybrid Superconducting Magnetic Bearing Flywheel System.....	465
J. R. Fang, L. Z. Lin, and L. G. Yan	
1 atm Subcooled Liquid Nitrogen Cryogenic System with GM-Refrigerator for a HTS Power Transformer.....	473
S. Yoshida, K. Ohashi, T. Umeno, Y. Suzuki, Y. Kamioka, H. Kimura, K. Tsutsumi, M. Iwakuma, K. Funaka, T. Bhono, and Y. Yagi	
Stability and Quench Development in HTS Magnets: Influence of Cooling and Material Parameters	481
V. S. Vysotsky, Y. A. Ilyin, and A. L. Rakhmanov	
Magnet/Cryocooler Integration for Thermal Stability in Conduction-Cooled Systems	489
H.-M. Chang and K. B. Kwon	

SUPERCONDUCTING RF SYSTEMS

On Intrinsic Thermal Limitations of Superconducting Cavities: Kapitza Resistance	499
J. Amit, C. Z. Antoine, M. X. François, and H. Safa	
ADTF Spoke Cavity Cryomodule Concept	507
J. P. Kelley, P. L. Roybal, R. P. LaFave, R. C. Gentzlinger, J. A. Waynert, D. L. Schrage, E. Schmieder, F. Krawczyk, R. W. Garnett, and T. Tajima	
Design and Test of Superconducting RF Cavity Prototypes for High Intensity Proton Accelerators	515
T. Junquera, J. L. Biarrotte, H. Saugnac, H. Gassot, J. Lesrel, G. Olry, S. Bousson, H. Safa, J. P. Charrier, and G. Devanz	

Superconducting RF Cavity Stiffening with Thick Plasma Sprayed Copper Coating.....	523
T. Junquera, M. Fouaidy, H. Gassot, J. Lesrel, S. Bousson, J. C. Lescornet, M. Jeandin, and V. Guipont	
Spallation Neutron Source Cryomodule Heat Loads and Thermal Design.....	531
E. F. Daly, V. Ganni, C. H. Rode, W. J. Schneider, K. M. Wilson, and M. A. Wiseman	
Experimental Heat Leak Measurements on the APT 210 kW CW RF Power Coupler	540
J. A. Waynert, P. E. Blumenfeld, F. C. Prenger, J. P. Kelley, S. A. Currie, and J. A. Stewart	
SUPERCONDUCTING POWER LEADS AND CABLES	
Study of Materials and Adhesives for Superconducting Cable Feedthroughs.....	551
A. Perin, R. Macias Jareño, and L. Metral	
A Novel Concept for a Modular Helium-Vapor-Cooled Lead Pair	559
J. Miller, G. Miller, and D. Richardson	
HTS Leads in the Tevatron.....	567
J. Brandt, S. Feher, T. J. Peterson, and W. M. Soyars	
Quench Propagation and Heating in the Superconducting 600 A Auxiliary Busbars of the LHC	575
R. Herzog, M. Calvi, and F. Sonnemann	
Quench Propagation in the Superconducting 6 kA Flexible Busbars of the LHC.....	583
R. Herzog, M. Calvi, F. Sonnemann, and J. M. Pelegrin-Carcelen	
Operating Experience with the Southwire 30-m High-Temperature Superconducting Power Cable	591
J. P. Stovall, J. W. Lue, J. A. Demko, P. W. Fisher, M. J. Gouge, R. A. Hawsey, J. W. Armstrong, R. L. Hughey, D. T. Lindsay, M. L. Roden, U. K. Sinha, and J. C. Tolbert	
Performance Tests of an HTS Power Transmission Cable Splice	599
J. A. Demko, J. W. Lue, M. J. Gouge, P. W. Fisher, J. P. Stovall, J. Tolbert, D. Lindsay, M. Roden, U. Sinha, and R. L. Hughey	
Electrical Tests of a Triaxial HTS Cable Prototype.....	606
J. W. Lue, J. A. Demko, J. C. Tolbert, U. K. Sinha, R. Grabovickic, G. C. Barber, M. J. Gouge, D. Lindsay, and R. L. Hughey	
PULSE TUBE, G-M, AND STIRLING CRYOCOOLERS	
Counterflow Pulse-Tube Refrigerators.....	617
A. T. A. M. de Waele and J. C. H. Zeegers	

Two-Stage Pulse Tube Cooler for Operation of a Josephson Voltage Standard Near 4 K.....	625
L. M. Qiu and G. Thummes	
4 K Pulse Tube Refrigerator and Excess Cooling Power	633
S. Zhu, M. Ichikawa, M. Nogawa, and T. Inoue	
Development of 4 K Pulse Tube Cryorefrigerators at Cryomech	641
C. Wang and P. E. Gifford	
A Two-Stage Pulse Tube Cryo-Cooled MRI Magnet.....	649
P. S. Thompson, R. A. Ackermann, and R. A. Hedeon	
Qualification and Test Results of a 5 Watt Commercial Stirling Cryocooler	654
S. W. K. Yuan, D. T. Kuo, and T. Lody	
Pulse Tube Cryocoolers for Industrial Applications	662
J. L. Martin and C. M. Martin	
A Single-Stage Pulse Tube Cryorefrigerator and Its Application	670
C. Wang, R. Dausman, and P. E. Gifford	
A Large Cooling Capacity Single Stage Coaxial Pulse Tube Cooler.....	677
J. M. Poncet, T. Trollier, and A. Ravex	
IGC-APD Advanced Two-Stage Pulse Tube Cryocoolers	683
J. L. Gao	
Helium Compressor for GM and Pulse-Tube Expanders	691
R. C. Longsworth	
Flexure Bearing Cryocoolers at Thales Cryogenics.....	699
M. Meijers, A. A. J. Benschop, and J. C. Mullié	
Analysis and Performance Prediction of a Stirling Cryogenerator.....	707
R. Ghosh, M. D. Atrey, and K. G. Narayankhedkar	
A Numerical Model of a 4K Two-Stage Pulse Tube Cooler with Mixed Eulerian-Lagrangian Method	715
Y. L. Ju	
The Effect of the Regenerator and Tube Volume on the Performance of High Frequency Miniature Pulse Tube Refrigerators.....	723
Y. K. Hou, Y. L. Ju, L. W. Yan, Y. Zhou, and J. T. Liang	
Experimental Study on a High Frequency Miniature Pulse Tube Refrigerator with Inertance Tube.....	731
Y. K. Hou, Y. L. Lu, L. W. Yan, J. T. Liang, and Y. Zhou	
Reliability Test Results of LGE Pulse Tube Cryocooler	739
S-Y. Kim, W-S. Chung, J-J. Park, D-K. Hwang, and H-K. Lee	
Medium-Size Pulse Tube Coolers with Linear Compressor	745
L. W. Yang and G. Thummes	
Investigation of Energy Transport within a Pulse Tube	753
A. Waldauf, T. Schmauder, M. Thürk, and P. Seidel	
Numerical Simulation and Experimental Verification of A G-M Type Double Inlet Pulse Tube Refrigerator	760
G. Q. Lu and P. Cheng	
Visualization of Oscillatory Flow Phenomena in Tapered Pulse Tube Refrigerators	768
M. Shiraishi, T. Ikeguchi, M. Murakami, A. Nakano, and T. Iida	

A Five-Watt G-M/J-T Refrigerator for LHe Target at BNL	776
L. X. Jia, L. Wang, L. Addessi, G. Miglionico, D. Martin, J. Leskowicz, M. McNeill, B. Yatauro, and T. Tallerico	
Experimental Study on GM/PT Hybrid Refrigerator	782
S. G. Wang, L. H. Gong, L. Q. Liu, and L. Zhang	

THERMOACOUSTIC CRYOCOOLERS

An Analysis on the Refrigeration Mechanism of a Compressible Flow Oscillating in a Tube	791
G. Q. Lu and P. Cheng	
Experimental Study on Work Flow in the Pulse Tube Refrigerator	799
T. Ikeguchi, M. Shiraishi, M. Murakami, A. Nakano, and T. Iida	
External Acoustic Load on the Performance of a Travelling-Wave Thermoacoustic Engine	807
H. Liu, E. Luo, and J. Wu	
Experimental Study on Thermoacoustic Refrigerators Driven by a Travelling-Wave Thermoacoustic Engine	815
E. Luo, H. Liu, Y. Sun, and J. Wu	
A New Thermoacoustic Engine with Its Resonant Frequency Freely Controlled by a Metallic-Bellow Unit	822
E. Luo, H. Liu, and J. Wu	
Thermoacoustic Simulator for Regenerative Machines	828
E. Luo, J. Wu, J. Yang, and J. Xiao	
Cryogenic-Temperature Thermoacoustically Driven Pulse Tube Refrigerator	836
T. Jin, G. B. Chen, Y. Shen, Y. H. Huang, and Z. H. Wu	

MIXTURE CRYOCOOLERS

An Experimental Investigation on Pulse Tube Refrigeration with Mixture Fluids	847
Z. H. Gan, G. B. Chen, G. Thummes, and C. Heiden	
Investigation of a Near-63K Isothermal in a Pulse Tube Refrigerator with He-N₂ Mixtures	855
G. B. Chen, Y. L. Jiang, and Z. H. Gan	
Performance of Throttle-Cycle Coolers Operating with Mixed Refrigerants Designed for Industrial Applications in a Temperature Range of 110 to 190 K	863
O. Podtcherniaev, M. Boiarski, and K. Flynn	
Thermodynamic Design Principle of Mixed-Gases Kleemenko Refrigeration Cycles	873
M. Q. Gong, E. C. Luo, J. F. Wu, and Y. Zhou	
Research on the Change of Mixture Compositions in Mixed-Refrigerant Joule-Thomson Cryocoolers	881
M. Q. Gong, J. F. Wu, E. C. Luo, Y. F. Qi, Q. G. Hu, and Y. Zhou	

A New Type Mixture Refrigeration Auto-Cascade Cycle with Partial Condensation and Separation Reflux Exchanger and Its Preliminary Experimental Test	887
J. F. Wu, M. Q. Gong, J. L. Liu, E. C. Luo, Y. F. Qi, and Q. G. Hu	
Design of Oil-Free Simple Turbo Type 65K/6kW Helium and Neon Mixture Gas Refrigerator for High Temperature Superconducting Power Cable Cooling	893
N. Saji, H. Asakura, S. Yoshinaga, T. Ishizawa, A. Miyake, M. Obata, and S. Nagaya	

LOSS MECHANISMS IN PULSE TUBE CRYOCOOLERS

Investigations to the Long-Term Operational Behavior of GM-Pulse Tube Cryocoolers	903
A. Siegel and H. U. Häfner	
DC Flow in Pulse Tube Coolers	911
A. Hofmann	
DC Flow in Pulse Tube Cryocoolers—Role of the Bypass Valve	918
L. Fang, P. Mayzus, X. Deng, O. W. Fauvel, and L. Bauwens	
Analysis of the Shuttle Heat Loss Mechanism in GM Type Pulse Tube Refrigerators	926
J. H. Baik and J. M. Pfotenhauer	
Three-Dimensional Pulse Tube Simulations	934
D. W. J. Willems and J. A. M. Dam	
On the Heat Conduction Losses of Pulse Tube and Regenerator at Temperature Range of 300–4K	942
Y. L. Ju	
Real Gas Features on the Performance of Pulse Tube Cryocoolers	950
Y. L. Ju	

REGENERATORS

Regenerator Behavior at 4 K: Effect of Volume and Porosity	961
R. Radebaugh, A. O'Gallagher, and J. Gary	
Pressure Gradients in Oscillating Flows in Regenerators—Analysis and Application to Pulse-Tube Refrigerators	969
P. Mayzus, L. Fang, X. Deng, and L. Bauwens	
Experimental Study on the Regenerator under Actual Operating Conditions	977
K. Nam and S. Jeong	
Performance of a New Regenerator Material in a Pulse Tube Cooler	985
A. Kashani, B. P. M. Helvensteijn, J. R. Maddocks, P. Kittel, J. R. Feller, K. A. Gschneidner, V. K. Pecharsky, and A. O. Pecharsky	

MAGNETIC REFRIGERATORS

Design of an Active Magnetic Regenerator Test Apparatus	995
A. M. Rowe and J. A. Barclay	
Static and Dynamic Force Balancing in Reciprocating Active Magnetic Refrigerators	1003
A. M. Rowe and J. A. Barclay	
Fabrication and Testing on Monolithic Single Bin Bed by Low Temperature Epoxy Bonding	1011
E. Luo, J. A. Barclay, P. G. Reedeker, and T. W. Wysokinski	
High Temperature Superconducting Magnetic Refrigeration	1019
P. E. Blumenfeld, F. C. Prenger, A. Sternberg, and C. Zimm	
Development of Magnetic Refrigerator for Room Temperature Application.....	1027
N. Hirano, S. Nagaya, M. Takahashi, T. Kuriyama, K. Ito, and S. Nomura	

PART B

AEROSPACE CRYOCOOLERS

Overview of NASA Space Cryocooler Programs	1037
R. F. Boyle and R. G. Ross, Jr.	
The Ball 12 K Stirling Cryocooler	1045
W. J. Gully and D. Glaister	
TES Cryocooler System Design and Development.....	1053
S. A. Collins, J. I. Rodriguez, and R. G. Ross, Jr.	
A Low Temperature Turbo-Brayton Cryocooler for Space Applications	1061
W. L. Swift, J. A. McCormick, and M. V. Zagarola	
On the Development of Co-Axial Miniature Pulse Tube Coolers for Space Applications	1069
Y. Zhou, J. T. Liang, W. Q. Zhu, J. H. Cai, and Y. L. Ju	
High Efficiency Cryocooler	1077
E. Tward, C. K. Chan, R. Colbert, C. Jaco, T. Nguyen, R. Orsini, and J. Raab	
Off-State Conductance Measurements of the NIST/Lockheed Martin Miniature Pulse Tube Flight Cryocooler: Laboratory vs. Space	1085
D. R. Ladner, R. Radebaugh, and P. Bradley	
Blind Vortex Tube as Heat-Rejecting Heat Exchanger for Pulse Tube Cryocooler	1093
M. P. Mitchell, D. Fabris, and R. O. Sweeney	
Current and Future Air Force Space Cryogenic Technology Development	1101
B. J. Tomlinson, T. M. Davis, S. D. Hill, and C. H. Bruninghaus	

Performance Characterization of the Astrium 10K Developmental Cryocooler	1109
C. H. Y. Bruninghaus, J. P. Kallman, B. J. Tomlinson, Jr., and E. Myrick	
The Next Generation Ball 35 K Cryocooler	1117
E. D. Marquardt, W. J. Gully, D. S. Glaister, and G. P. Wright	
Thermodynamic Optimization of Multi-Stage Cryogenic Systems	1123
C. S. Kirkconnell and D. G. T. Curran	
Suppression of Cryocooler Induced Microphonics in Infrared Imagers.....	1133
A. M. Veprik, V. I. Babitsky, N. Pundak, and S. V. Riabzev	
Technical Diagnostics of Linear Split Stirling Cryocooler through the Analysis of Self-Induced Forces	1141
S. V. Riabzev, A. M. Veprik, and N. Pundak	
Model for Two-Stage Pulse Tube Cold Head Parasitic Heat Load	1149
D. R. Lardner	
Optimization of Cold Head for Miniature Stirling Cryocooler	1157
H. K. Agrawal and K. G. Narayankhedkar	

AEROSPACE MAGNETIC COOLERS

Heat Switch Limitations on Multi-Stage Magnetic Refrigeration	1167
P. Kittel	
Passive Gas-Gap Heat Switches for Use in Adiabatic Demagnetization Refrigerators	1175
P. J. Shirron, E. R. Canavan, M. J. DiPirro, M. Jackson, J. Panek, and J. G. Tuttle	
A Magnetoresistive Heat Switch for the Continuous ADR	1183
E. R. Canavan, M. J. Dipirro, M. Jackson, J. Panek, P. J. Shirron, and J. G. Tuttle	
Rare-Earth Garnets and Perovskites for Space-Based ADR Cooling at High T and Low H	1191
T. T. King, B. A. Rowlett, R. A. Ramirez, P. J. Shirron, E. R. Canavan, M. J. DiPirro, J. S. Panek, J. G. Tuttle, R. D. Shull, and R. A. Fry	

AEROSPACE SORPTION COOLERS

Performance Prediction of the Planck Sorption Cooler and Initial Validation	1201
M. Prina, P. Bhandari, R. C. Bowman, L. A. Wade, D. P. Pearson, and G. Morgante	
Characterization and Lifecycle Testing of Hydride Compressor Elements for the Planck Sorption Cryocooler	1209
D. Pearson, R. C. Bowman, Jr., M. E. Schmelzel, M. Prina, P. Bhandari, C. G. Paine, and L. A. Wade	
Cryogenic System Design for a Hydrogen Sorption Cooler	1217
A. Sirbi, R. C. Bowman, Jr., L. A. Wade, and D. S. Barber	

Low-Power, Zero-Vibration 5 K Sorption Coolers for Astrophysics Instruments	1225
L. A. Wade and C. A. Lindensmith	
SoCool: A 300 K–0.3 K Pulse Tube/Sorption Cooler	1233
L. Duband, L. Clerc, and A. Ravex	

CRYOGENIC SPACE APPLICATIONS

Operational Cryogenic Experience with the Gravity Probe B Payload	1241
M. A. Taber, D. O. Murray, J. R. Maddocks, and K. M. Burns	
A Cryogenic Platform for Space-Borne Instruments with Nanokelvin Stability	1249
W. Holmes, R. Bamford, T. C. P. Chui, J. Craig, S. Elliott, S. Galloway, J. Gannon, S. Park, P. Rentz, and J. Thomassen	
Performance, Reliability, and Life Issues for Components of the Planck Sorption Cooler	1260
R. C. Bowman, Jr., M. Prina, M. E. Schmelzel, C. A. Lindensmith, D. S. Barber, P. Bhandari, A. Loc, and G. Morgante	
Demonstration of an Efficient Cooling Approach for SBIRS-Low	1268
S. J. Nieczkoski and E. A. Myers	
Large Scale Demonstration of Liquid Hydrogen Storage with Zero Boiloff	1276
A. Hedayat, L. J. Hastings, C. Bryant, and D. W. Plachta	
Modeling and Test Data Analysis of a Tank Rapid Chill and Fill System for the Advanced Shuttle Upper Stage (ASUS) Concept	1284
R. H. Flachbart, A. Hedayat, and K. A. Holt	
Ultra-Light Flexible Temperature and Liquid Level Sensing Probe for Cryogenic Propellant Mass Gauging Systems	1292
M. S. Haberbusch	

HELIUM II

Subcooled He II Heat Transport in the Channel with Abrupt Contractions/Enlargements	1303
R. Maekawa, A. Iwamoto, S. Hamaguchi, and T. Mito	
He II Co-Current Two Phase Flow at High Vapor Velocities	1311
B. Rousset, B. Jager, E. di Muoio, L. Puech, P. Thibault, R. Vallcorba, R. van Weelderen, and P. E. Wolf	
Sloshing of Superfluid Helium in a Viscous Damping Matrix	1319
H. A. Snyder	
Experiments of Highly Transient Thermo-Fluid Dynamic Phenomena in He II Induced by Gas Dynamic Shock Wave Impingement	1327
H. Nagai, H. S. Yang, Y. Ueta, K. Yanaka, and M. Murakami	
A Study on the Temperature Dependent Drag Coefficient on a Sphere in Flowing Helium II	1335
Y. S. Choi, M. R. Smith, and S. W. Van Sciver	

Observation of Cavitation in Superfluid Helium	1343
K. Nishigaki, M. Takeda, and N. Inoue	
Integral Method for Transient He II Heat Transfer in a Semi-Infinite Domain	1349
B. Baudouy	
Transient Heat Transfer on a Flat Plate at One End of a Duct with an Orifice in Pressurized He II	1356
M. Shiotsu, K. Hata, K. Hama, H. Tatsumoto, and Y. Shirai	
Critical Heat Fluxes on a Flat Plate Pasted on One End of a Rectangular Duct with an Orifice in Pressurized He II	1364
H. Tatsumoto, K. Hata, K. Hama, Y. Shirai, and M. Shiotsu	
Application of PIV to Counterflow in He II	1372
D. Celik, T. Zhang, and S. W. Van Sciver	
Study of Thermal Shock Wave in Shock-Compressed He II Induced by Gas Dynamic Shock Wave Impingement	1380
H. S. Yang, Y. Ueta, H. Nagai, M. Murakami, and K. Yanaka	
Study of Evaporation from He II Free Surface Induced by Thermal Shock Wave	1388
M. Murakami, M. Maki, J. Fujiyama, and T. Furukawa	

FLUID MECHANICS AND HEAT TRANSFER

A Cryogenic High-Reynolds Turbulence Experiment at CERN	1399
A. Bézaguet, J.-P. Dauvergne, S. Knoops, P. Lebrun, M. Pezzetti, O. Pirotte, J.-L. Bret, B. Chabaud, G. Garde, C. Guttin, B. Hébral, S. Pietropinto, P. Roche, J.-P. Barbier-Neyret, C. Baudet, Y. Gagne, C. Poulaïn, B. Castaing, Y. Ladam, and F. Vittoz	
Thermal Oscillations in Liquid Helium Targets	1407
L. Wang and L. X. Jia	
Numerical Simulation of Cavitating Flow of Liquid Helium in a Pipe Using Multi-Fluid Model	1413
J. Ishimoto, M. Oike, and K. Kamijo	
Temperature Measurement and Visualization Study of Liquid Helium Cavitation Flow through Venturi Channel	1421
T. Ishii and M. Murakami	
Performance Tests of Industrial Prototype Subcooling Helium Heat Exchangers for the Large Hadron Collider	1429
P. Roussel, A. Bézaguet, H. Bieri, R. Devidal, B. Jager, R. Moracchioli, P. Seyfert, and L. Tavian	
Single-Phase Helium Recooling in a Tevatron Spool Piece	1437
A. L. Klebaner and J. C. Theilacker	
Quick Cooling and Filling through a Single Port for Cryogenic Transfer Operations	1445
J. R. Jones and J. E. Fesmire	
An Experimental Study of Cold Helium Dispersion in Air	1452
M. Chorowski, G. Konopka, and G. Riddone	

Critical Heat Flux on a Flat Plate in a Pool of Subcooled Liquid Helium	1460
K. Hata, H. Nakagawa, H. Tatsumoto, Y. Shirai, and M. Shiotsu	
Short Profile Rectangular Helium Cryostat Made from Nickel-Iron Alloy	1468
R. A. Rucinski	
Performance of Thermal Shields of LHD Cryostat Cooled by Gaseous Helium with Parallel Paths	1475
S. Imagawa, H. Tamura, N. Yanagi, H. Sekiguchi, T. Mito, and T. Satow	
Study on the Overall Heat Transfer Coefficient for the Tube-in-Tube Heat Exchanger Used in Mixed-Gases Coolers	1483
M. Q. Gong, J. F. Wu, E. C. Luo, Y. F. Qi, Q. G. Hu, and Y. Zhou	
Development of Small 2K Cryocooler (II)—High Efficient and Low Pressure Drop Heat Exchanger	1491
H. Nagai, A. Sato, S. Nimori, K. Numasawa, M. Maeda, F. Matsumoto, M. Takahashi, K. Ohsemochi, T. Kuriyama, T. Fujioka, K. Kitagawa, and T. Okamura	
Boiling Heat Transfer Characteristics of Liquid Xenon	1499
T. Haruyama	
Experimental Study on the Limit of Superheat of Normal-Hydrogen and Para-Hydrogen	1507
K. Nishigaki, M. Takeda, and N. Takagi	
Heat and Mass Transfer in Two-Phase HE I Thermosiphon Flow	1514
B. Baudouy	
 THERMAL INSULATION	
Thermal Insulation Performance of Flexible Piping for Use in HTS Power Cables	1525
J. E. Fesmire, S. D. Augustynowicz, and J. A. Demko	
Overall Thermal Performance of Flexible Piping Under Simulated Bending Conditions	1533
J. E. Fesmire, S. D. Augustynowicz, and J. A. Demko	
Aerogel Beads as Cryogenic Thermal Insulation System	1541
J. E. Fesmire, S. D. Augustynowicz, and S. Rouanet	
Thermal Conductivity Measurements of Aerogel-Impregnated Shuttle Tile at Cryogenic Temperatures	1549
B. P. M. Helvensteijn, J. R. Maddocks, L. J. Salerno, P. R. Roach, P. Kittel, and S. M. White	
Analytical Modeling of Variable Density Multilayer Insulation for Cryogenic Storage	1557
A. Hedayat, L. J. Hastings, and T. Brown	
Lightweight Multilayer Insulation to Reduce the Self-Compression of Insulation Films	1565
T. Ohmori, M. Nakajima, A. Yamamoto, and K. Takahashi	

The Effect of Non-Zero Thermal Radiation Transmissivity of the Aluminized Mylar Film on the Thermal Performance of Super-Insulation	1573
T. Ohmori, A. Yamamoto, and M. Nakajima	

CRYOGENIC INSTRUMENTATION AND CONTROLS

Electronic Components and Systems for Cryogenic Space Applications	1585
R. L. Patterson, A. Hammoud, J. E. Dickman, S. Gerber, M. E. Elbuluk, and E. Overton	
Thermal Valves for Cryogenic Temperature Control	1592
G. E. McIntosh and G. D. Mordhorst	
Non-linear Advanced Control of the LHC Inner Triplet Heat Exchanger Test Unit	1597
E. Blanco Viñuela, J. Casas-Cubillos, C. de Prada Morago, and S. Cristea	
Adaptive Vibration Reduction Controls for a Cryocooler with a Passive Balancer	1605
G. Kopasakis, J. E. Cairelli, and R. M. Traylor	
A Miniature Palladium–Iron Thermometer for Temperatures down to 0.05 Kelvin	1613
J. G. Tuttle, M. J. DiPirro, E. R. Canavan, P. J. Shirron, E. Kunes, and T. P. Hait	
A New Cryogenic Diode Thermometer	1620
S. S. Courts, P. R. Swinehart, and C. J. Yeager	
Magnet Options for Sensors for the Pulp and Paper Industry	1628
M. A. Green, P. J. Barale, C. G. Fong, A. Luft, J. A. Reimer, and M. S. Yahnke	
Long-Term Stability of a Cryogenic Diode Thermometer	1636
S. S. Courts and P. R. Swinehart	
Thermal Resistance of Cryogenic Thermometers at Ultra-Low Temperatures	1644
C. J. Yeager, S. S. Courts, and W. E. Davenport	
A Low Noise, High Thermal Stability, 0.1 K Test Facility for the Planck HFI Bolometers	1651
C. G. Paine, J. J. Bock, V. V. Hristov, and A. E. Lange	
Towards the Invisible Cryogenic System for Magnetic Resonance Imaging	1659
F. Steinmeyer, P. W. Retz, K. White, A. Lang, W. Stautner, P. N. Smith, and G. Gilgrass	
Void Fraction Measurement in Two-Phase Helium Flow with Electron Energy Attenuation Detector	1667
L. Augyrond, P. Ageron, H. Blumenfeld, P. Bredy, and J.-C. Lugol	
Optical Investigations of HE II Two Phase Flow	1675
E. di Muoio, B. Jager, L. Puech, B. Rousset, P. Thibault, R. van Weelderen, and P. E. Wolf	

Probing the Wetted Perimeter in a He II Two-Phase Pipe-Flow Experiment Using a Capacitive Sensor	1683
P. Thibault, E. di Muoio, L. Puech, B. Rousset, and P. E. Wolf	
BaBar Helium Liquefier and Superconducting Magnet Control System	1691
W. W. Craddock, A. Angelov, P. L. Anthony, R. Badger, M. Berndt, W. Burgess, A. Candia, G. Oxoby, and C. Titcomb	
In-Situ and Post Irradiation Behavior of Cryogenic Temperature Sensors under Fast Neutron Fluence	1700
Y. P. Filippov, V. V. Golikov, E. N. Kulagin, V. M. Miklayev, and A. K. Sukhanova	

NOVEL CONCEPTS

Magnetically Levitated Space Elevator to Low-Earth Orbit	1711
J. R. Hull, T. M. Mulcahy, and R. C. Niemann	
Efficient Two-Level Cryogenic Power Distribution System	1719
O. M. Mueller and E. K. Mueller	
Modular Low Temperature Laser Scanning Microscope for High Magnetic Fields	1726
M. Peschka, P. Mühlischlegel, and R. Kleiner	
Neutrino Mass Measurements with Cryogenic Microcalorimeters	1734
F. Gatti	

CRYOGENIC SAFETY

Accidents with Cryogenic Fluids and What Can We Learn from Them.....	1743
F. J. Edeskuty	
Safety Issues of Space Liquid-Helium and Solid-Cryogen Systems.....	1759
P. V. Mason	
Simulations of Liquid Argon Accidents in the ATLAS Cavern	1768
M. Vadon, B. P. Solano, and F. Balda	
Open Channel Helium Flow during Rupture Event	1776
W. M. Sogars and J. L. Schiller	
Investigation of Personal and Fixed Head Oxygen Deficiency Hazard Monitor Performance for Helium Gas.....	1784
D. Arenius, D. Curry, A. Hutton, K. Mahoney, S. Prior, and H. Robertson	
Equations for Gas Releasing Process from Pressurized Vessels in ODH Evaluation	1792
L. X. Jia and L. Wang	
Author Index	A1
Subject Index	S1
