General Introduction

vii

Section 1. Atoms in Weak Broadband Quasiresonant Light Fields. Light Shifts — Linear Superpositions of Atomic Sublevels

- *1.1. Théorie quantique du cycle de pompage optique.
Vérification expérimentale des nouveaux effets prévus
Ann. Phys. (Paris) **7**, 423 (1962)
- 1.2. Observation d'un déplacement de raie de résonance
magnétique causé par l'excitation optique 8
C.R. Acad. Sci. **252**, 394 (1961)
- 1.3. Experimental study of Zeeman light shifts in weak
magnetic fields 12
(with J. Dupont-Roc)
Phys. Rev. **A5**, 968 (1972)
- 1.4. Pompage optique en champ magnétique faible 30
(with J.-C. Lehmann)
C.R. Acad. Sci. **258**, 4463 (1964)
- 1.5. Detection of very weak magnetic fields (10^{-9} Gauss)
by ^{87}Rb zero-field level crossing resonances 35
(with J. Dupont-Roc and S. Haroche)
Phys. Lett. **A28**, 638 (1969)
- 1.6. Detection of the static magnetic field produced by the
oriented nuclei of optically pumped ^3He gas 38
(with J. Dupont-Roc, S. Haroche, and F. Laloë)
Phys. Rev. Lett **22**, 758 (1969)

Section 2. Atoms in Strong Radiofrequency Fields. The Dressed Atom Approach in the Radiofrequency Domain

- 2.1. Optical pumping and interaction of atoms with the
electromagnetic field 46
Cargèse Lectures in Physics, Vol. 2, ed. M. Lévy
(Gordon and Breach, 1968), p. 347

*The paper has been removed in this second edition. The interested reader can find it in the first edition.

- 2.2. Modified Zeeman hyperfine spectra observed in H^1 and Rb^{87} ground states interacting with a nonresonant rf field 93
(with S. Haroche, C. Audoin, and J. P. Schermann)
Phys. Rev. Lett. **24**, 861 (1970)
- 2.3. Resonant transfer of coherence in nonzero magnetic field between atomic levels of different g factors 99
(with S. Haroche)
Phys. Rev. Lett. **24**, 974 (1970)
- 2.4. Transverse optical pumping and level crossings in free and “dressed” atoms 105
Fundamental and Applied Laser Physics, eds.
M. S. Feld, A. Javan, and N. Kurnit
(John Wiley, 1973), p. 791

Section 3. Atoms in Intense Resonant Laser Beams. The Dressed Atom Approach in the Optical Domain

- 3.1. Atoms in strong resonant fields 136
Frontiers in Laser Spectroscopy, eds. R. Balian,
S. Haroche, and S. Liberman
(North-Holland, 1977), p. 1
- 3.2. Dressed-atom approach to resonance fluorescence 238
(with S. Reynaud)
Multiphoton Processes, eds. J. H. Eberly and
P. Lambropoulos
(John Wiley, 1978), p. 103
- 3.3. Discrete state coupled to a continuum. Continuous transition between the Weisskopf–Wigner exponential decay and the Rabi oscillation 255
(with P. Avan)
États Atomiques et Moléculaires Couplés à un Continuum. Atomes et Molécules Hautement Excités
Colloques Internationaux du CNRS, No. 273 (1977),
p. 93
- 3.4. Effect of a non-resonant irradiation on atomic energy levels — Application to light-shifts in two-photon spectroscopy and to perturbation of Rydberg states 270
Metrologia **13**, 161 (1977)

- 3.5. Experimental evidence for compensation of Doppler broadening by light shifts 277
(with S. Reynaud, M. Himbert, J. Dupont-Roc, and H. H. Stroke)
Phys. Rev. Lett. **42**, 756 (1979)
- 3.6. Observation of Ramsey's interference fringes in the profile of Doppler-free two-photon resonances 282
(with M. M. Salour)
Phys. Rev. Lett. **38**, 757 (1977)

Section 4. Photon Correlations and Quantum Jumps. The Radiative Cascade of the Dressed Atom

- 4.1. Atoms in strong light-fields: Photon antibunching in single atom fluorescence 292
(with S. Reynaud)
Phil. Trans. R. Soc. Lond. **A293**, 223 (1979)
- 4.2. Time correlations between the two sidebands of the resonance fluorescence triplet 308
(with A. Aspect, G. Roger, S. Reynaud, and J. Dalibard)
Phys. Rev. Lett. **45**, 617 (1980)
- 4.3. Single-atom laser spectroscopy. Looking for dark periods in fluorescence light 313
(with J. Dalibard)
Europhys. Lett. **1**, 441 (1986)
- 4.4. Photon statistics and quantum jumps: The picture of the dressed atom radiative cascade 322
(with S. Reynaud and J. Dalibard)
IEEE J. Quantum Electron. **24**, 1395 (1988)

Section 5. Atoms in High Frequency Fields or in the Vacuum Field. Simple Physical Pictures for Radiative Corrections

- 5.1. Effect of high frequency irradiation on the dynamical properties of weakly bound electrons 336
(with P. Avan, J. Dupont-Roc, and C. Fabre)
J. Phys. (Paris) **37**, 993 (1976)
- 5.2. Physical interpretations for radiative corrections in the non-relativistic limit 354
(with J. Dupont-Roc and C. Fabre)
J. Phys. **B11**, 563 (1978)

- 5.3. Vacuum fluctuations and radiation reaction: Identification of their respective contributions 372
(with J. Dalibard and J. Dupont-Roc)
J. Phys. (Paris) **43**, 1617 (1982)

- 5.4. Fluctuations in radiative processes 395
Physica Scripta **T12**, 19 (1986)

Section 6. Atomic Motion in Laser Light

- 6.1. Deflection of an atomic beam by a laser wave: Transition between diffractive and diffusive regimes 410
(with C. Tanguy and S. Reynaud)
J. Phys. **B17**, 4623 (1984)

- 6.2. Proposals of stable optical traps for neutral atoms 430
(with J. Dalibard and S. Reynaud)
Opt. Commun. **47**, 395 (1983)

- 6.3. Dressed-atom approach to atomic motion in laser light: The dipole force revisited 437
(with J. Dalibard)
J. Opt. Soc. Am. **B2**, 1707 (1985)

- 6.4. Cooling atoms with stimulated emission 452
(with A. Aspect, J. Dalibard, A. Heidmann, and C. Salomon)
Phys. Rev. Lett. **57**, 1688 (1986)

- 6.5. Channeling atoms in a laser standing wave 457
(with C. Salomon, J. Dalibard, A. Aspect, and H. Metcalf)
Phys. Rev. Lett. **59**, 1659 (1987)

- 6.6. Atomic motion in a laser standing wave 462
(with J. Dalibard, C. Salomon, A. Aspect, H. Metcalf, and A. Heidmann)
Laser Spectroscopy VIII, eds. W. Persson and S. Svanberg
(Springer-Verlag, 1987), p. 81

- 6.7. Mechanical Hanle effect 469
(with R. Kaiser, N. Vansteenkiste, A. Aspect, and E. Arimondo)
Z. Phys. **D18**, 17 (1991)

- 6.8. Cesium atoms bouncing in a stable gravitational cavity 478
 (with C.G. Aminoff, A.M. Steane, P. Bouyer, P. Desbiolles,
 and J. Dalibard)
Phys. Rev. Lett. **71**, 3083 (1993)

Section 7. Sisyphus Cooling and Subrecoil Cooling

- 7.1. New mechanisms for laser cooling 488
 (with W. D. Phillips)
Phys. Today **43**, 33 (1990)
- 7.2. Laser cooling below the Doppler limit by polarization 498
 gradients: Simple theoretical models
 (with J. Dalibard)
J. Opt. Soc. Am. **B6**, 2023 (1989)
- 7.3. The limits of Sisyphus cooling 523
 (with Y. Castin and J. Dalibard)
*Light Induced Kinetic Effects on Atoms, Ions
 and Molecules*, eds. L. Moi, S. Gozzini,
 C. Gabbanini, E. Arimondo, and F. Strumia
 (ETS Editrice, Pisa, 1991), p. 5
- 7.4. Dynamics and spatial order of cold cesium atoms in a 544
 periodic optical potential
 (with P. Verkerk, B. Lounis, C. Salomon, J.-Y. Courtois,
 and G. Grynberg)
Phys. Rev. Lett. **68**, 3861 (1992)
- 7.5. Sisyphus cooling of a bound atom 549
 (with D. J. Wineland and J. Dalibard)
J. Opt. Soc. Am. **B9**, 32 (1992)
- 7.6. Laser cooling below the one-photon recoil energy by 562
 velocity-selective coherent population trapping
 (with A. Aspect, E. Arimondo, R. Kaiser, and
 N. Vansteenkiste)
Phys. Rev. Lett. **61**, 826 (1988)
- 7.7. Laser cooling below the one-photon recoil energy by 568
 velocity-selective coherent population trapping:
 Theoretical analysis
 (with A. Aspect, E. Arimondo, R. Kaiser, and
 N. Vansteenkiste)
J. Opt. Soc. Am. **B6**, 2112 (1989)

7.8.	Review on fundamental processes in laser cooling (with F. Bardou and A. Aspect) <i>Laser Spectroscopy X</i> , eds. M. Ducloy, E. Giacobino, and G. Camy (World Scientific, 1992), p. 3	582
7.9.	Two-dimensional subrecoil laser cooling (with J. Lawall, F. Bardou, B. Saubamea, K. Shimizu, M. Leduc, and A. Aspect) <i>Phys. Rev. Lett.</i> 73 , 1915 (1994)	595
7.10.	Three-dimensional laser cooling of helium beyond the single-photon recoil limit (with J. Lawall, S. Kulin, B. Saubamea, N. Bigelow, and M. Leduc) <i>Phys. Rev. Lett.</i> 75 , 4194 (1995)	600
7.11.	Coherent manipulation of atomic wave packets by adiabatic transfer (with S. Kulin, B. Saubamea, E. Peik, J. Lawall, T. W. Hijmans, and M. Leduc) <i>Phys. Rev. Lett.</i> 78 , 4185 (1997)	605
7.12.	Direct measurement of the spatial correlation function of ultracold atoms (with B. Saubamea, T. W. Hijmans, S. Kulin, E. Rasel, E. Peik, and M. Leduc) <i>Phys. Rev. Lett.</i> 79 , 3146 (1997)	610
Section 8. Lévy Statistics and Laser Cooling		
8.1.	Subrecoil laser cooling and Lévy flights (with F. Bardou, J. P. Bouchaud, O. Emile, and A. Aspect) <i>Phys. Rev. Lett.</i> 72 , 203 (1994)	620
8.2.	Raman cooling of cesium below 3 nK: New approach inspired by Lévy flight statistics (with J. Reichel, F. Bardou, M. Ben Dahan, E. Peik, S. Rand, and C. Salomon) <i>Phys. Rev. Lett.</i> 75 , 4575 (1995)	625
8.3.	Experimental investigation of nonergodic effects in subrecoil laser cooling (with B. Saubamea and M. Leduc) <i>Phys. Rev. Lett.</i> 83 , 3796 (1999)	630

Section 9. Bose–Einstein Condensation

- 9.1. Wave functions, relative phase and interference for atomic
Bose–Einstein condensates
(with C. Robilliard)
C.R. Acad. Sci. Paris **2**, Série IV, 445 (2001)

640
- 9.2. Bose–Einstein condensation of metastable helium
(with F. Pereira Dos Santos, J. Léonard, J. Wang, C. J. Barrelet,
F. Perales, E. Rasel, C. S. Unnikrishnan, and M. Leduc)
Phys. Rev. Lett. **86**, 3459 (2001)

674
- 9.3. Giant helium dimers produced by photoassociation of ultracold
metastable atoms
(with J. Léonard, M. Walhout, A. P. Mosk, T. Müller,
and M. Leduc)
Phys. Rev. Lett. **91**, 073203-1 (2003)

679

Section 10. A Few Review Papers

- 10.1. Manipulating atoms with photons
Lex Prix Nobel 1997 (Almquist & Wiksell International), p. 99

688
- 10.2. Linear superpositions of states in radiative processes
Physica Scripta **T70**, 79 (1997)

720
- 10.3. The Zeeman effect: A tool for atom manipulation
Atomic Physics **15**, eds. H. B. Van Linden van den Heuvell,
J. T. M. Walraven, and W. M. Reynolds (World Scientific,
Singapore, 1997), p. 237

730
