Section I. Opening address

Behind the scene of experimental physics controls
A. Daneels 1

Section II. Status and system architecture reports

II(a). New projects and systems being commissioned

Controls for RHIC, a progress report
D.S. Barton 6
Status of the Advanced Photon Source and its accelerator control system
W. McDowell, M. Knott and M. Kraimer 13
Controls for the Tesla test facility status and future plans
M. Clausen 16
Cryogenic controls for the TESLA test facility
M. Clausen, Chr. Gerke, U. Knopf, S. Rettig and B. Schoeneburg 19
Experience with a Standard Model '91 based control system at the ESRF
A. Götz, W.-D. Klotz, C. Hervé, E. Taurel, J. Meyer, P. Mäkijärvi, T. Mettälä, J.-M. Chaize, G. Pepellin and F. Epaud 22
COSY Control Status. First results with rapid prototyped man–machine interface for accelerator control
U. Hacker, Ch. Haberbosch, K. Henn and A. Weinert 28
Computer control and instrumentation system at the SRRC
G.J. Jan, J.S. Chen, C.J. Wang, J. Chen, T.F. Lin, K.T. Pan, G. Lin, C.H. Kuo, G. Huang, K.Y. Kuo, K.H. Hu, K.T. Hsu, T.S. Ueng and G.H. Luo 33
The HIMAC synchrotron control system
E. Takada, K. Sato, T. Kohno, M. Kumada, K. Noda, A. Itano, M. Kanazawa, M. Sudo, S. Hashimoto, T. Nakayama, H. Tanaka, E. Hishitani and N. Tsuzuki 40
Design of the central control system for the Large Helical Device (LHD)
K. Yamazaki, H. Kaneko, S. Yamaguchi, K.Y. Watanabe, Y. Taniguchi, O. Motojima and LHD group 43
Software architecture of the SSC accelerator systems string test
V. Corker, N. Kallas, S. Lee, D. Murray, J. Wang and J. Zatopek 47
The SSCL process control system
T. Moore, R. Bork, J. Heefner and S. Basiti 50
Beam transport system for the new IUCF polarized ion source
W.P. Jones, T. Ellison, J. Collins, P. Schwandt and D. DuPlantis 53
Present status of the UNK control system at IHEP
A. Sytin 56
Control system for a linear resonance accelerator of intense electron beams
V.N. Boriskin, N.I. Aizatsky, Yu.I. Akchurin, V.A. Gurin, N.V. Demidov, A.N. Dovbnya, A.V. Zavada, V.A. Kushnir, S.P. Levandovsky, V.V. Mitrochenko, A.N. Savchenko, Yu.D. Tur and V.L. Uvarov 61

Status and prospects of the ELETTRA control system
D. Bulfone 63
The Elettra beam line control system
M. Mignacco, A. Abrami and Z. Dequal 67
Commissioning and operation of the control system of the LISA superconducting linac
L. Catani, G. Di Pirro, C. Milardi, A. Stecchi and L. Trasatti 71
Concept design of a control system for the SUBARU Telescope
T. Sasaki, Y. Chikada, R. Ogasawara, S. Ichikawa, W. Tanaka, T. Noguchi and K. Okita 75
The TR13 control system for automatic isotope production
D.J. Dale, T. Ewert, D. Harrison, J. Lam and R. Keitel 79
The tandem Tritron control system, a status report
L. Rohrer, H. Schnitter, A. Cazan, E. Jakubowska and B. Walchshäusl 82

II(b). System upgrades and rejuvenation

The New CERN PS control system overview and status
F. Perriollat and C. Serre 86
The new CERN PS timing system
J. Lewis and V. Sikolenko 91
NODAL – The second life of the accelerator control language
G. Cuisinier, F. Perriollat, P. Ribeiro, A. Kagarmanov and V. Kovaltsov 94
The new accelerator control system of GANIL
T.T. Luong, L. David, P. Duneau, P. De Saint Jores, E. Lécorché, E. Lemaître, P. Lermine, J.M. Loyant, C. Maugeais, F. Régnault, J.F. Rozé, A. Souf and M. Ulrich 96
An object-oriented linac control system
J.M. Chaize, F. Barale, L. Claustre and P. Pinel 103
Update on the TRIUMF Central Control System
M.M. Mouat, D.A. Diel, P.A. Grant, E. Klassen, K.S. Lee, G.A. Ludgate, J.E. Richards, P.J. Yogendran and S.G. Kadantsev 107
Status report on the Advanced Light Source control system, 1993
J. Young, W. Brown, Jr., C. Cork, K. Fowler, T. Gimpel, S. Lewis, M. McEvoy, D. Meaney, P. Molinari, D. Peterson, G. Portmann, A. Robb and C. Timossi 112
NSLS control system upgrade
J.D. Smith, S. Ramamoorthy and Y.N. Tang 114
The CEBAF accelerator control system: migrating from a TACL to an EPICS based system
W.A. Watson III, D. Barker, M. Bickley, P. Gupta and R.P. Johnson 118
Upgrading the telescope control system of the Nobeyama Radio Observatory
K.-I. Morita and T. Takahashi 122
VME and network applications for the JT-60U control system
T. Kimura 125
The rejuvenation status of TRISTAN accelerator control system
T. Mimashi, A. Akiyama, S. Araki, K. Kudoh, I. Komada, T. Kawamoto, S. Kurokawa, T. Naitoh, S. Takeda, J. Urakawa, T. Takashima, K. Furukawa, J. Navratil, K. Oide and N. Yamamoto 128
New control system with VME and workstations for the KEK e^-/e^+ linac
N. Kamikubota, K. Furukawa, K. Nakahara and I. Abe 131
Magnet power supplies and beam line control for the KEK experimental halls
Y. Suzuki, M. Takasaki, M. Minakawa, H. Ishii, Y. Kato, M. Ieiri, K.H. Tanaka, H. Noumi and Y. Yamanoi 135
How to upgrade a control system for a tokamak
W. Tenten, U. Dohms, L. Fuß, H. Huppertz, J. Lerch, K.D. Müller, P. Reinhart and F. Rongen 137

Object oriented design in the AGSDCS alarm system
J.T. Morris 141
The new control system for the LEP Pretzel separators
V. Mertens, A. Aimar, P. Bobbio, E. Carlier, J.H. Dieperink, B. Goddard, M. Laffin and H. Verhagen 144
An inexpensive analog function generator in VME standard
W. Heinze and R. Maccaferri 147

II(c). Progress reports

Status report of the PSI accelerator control system, the tools provided for operation of the accelerator
T. Blumer, D. Aničić, I. Jirousek, A. Mezger, L. Sekolec and Z. Šoštarić 150
Status of the BEPC control system
J. Zhao, Y. Yan, M. Zhan, Y. Yu, H. Luo, Y. Wang and X. Geng 158
Control system of the synchrotron radiation source SIBERIA
S. Kuznetsov, A. Kadnikov, Yu. Krylov, Yu. Yupinov and E. Levichev 161
Gracefully-degraded operationable control system for the UVSOR synchrotron radiation source and its operational experience
N. Kanaya, H. Hama, J.-i. Yamazaki, O. Matsudo and G. Isoyama 166
Evolution of the SPS and LEP communication control network for the SPS and LEP accelerators
P. Lienard 170
The control system for the LEP beam dump
E. Carlier, A. Aimar, J.L. Bretin, A. Marchand, V. Mertens and H. Verhagen 173
Computer-aided system for cryogenic research facilities
V.P. Gerasimov, M.V. Zhelamsky, I.V. Mozin and S.S. Repin 176

II(d). System architecture (hardware and software issues)

The experimental physics and industrial control system architecture: past, present, and future
L.R. Dalesio, J.O. Hill, M. Kraimer, S. Lewis, D. Murray, S. Hunt, W. Watson, M. Clausen and J. Dalesio 179
Accelerator devices at persistent software objects
L.T. Hoff and J.F. Skelly 185
Use of small stand-alone Internet nodes as a distributed control system
R.W. Goodwin, M.J. Kucera and M.F. Shea 189
Steering and timing system solutions at the COSY accelerator facility
N. Bongers, U. Hacker, K. Henn, M. Simon, T. Vashegyi and A. Weinert 193
The data driven alarm system for the CERN PS accelerator complex
J.-M. Bouche, J. Cuperus and M. Lelaizant 196
Controlling the UNK transfer line beam diagnostics
V. Gotsev, V. Gres, A. Dunaitsev, L. Kim, V. Komarov, S. Lapitsky, M. Matveev, V. Seleznev, P. Shevtsov, F. Solodovnik, A. Sytin and V. Terekhov 199
Survey of hardware supported by the control system at the Advanced Photon Source
K.J. Coulter and G.J. Nawrocki 201
Object oriented device control using the CAN bus
G. v. Egan-Krieger, T. Stein and J. Rahn 204
Gun trigger system for the ATF
J. Urakawa, T. Naito, H. Hayano, T. Mimashi, S. Araki, T. Kawamoto and Y. Otake 207
One-way data transfer for PLC to VME status reporting at the Advanced Photon Source
S.J. Stein 210
Real-time UNIX in HEP data acquisition
S. Buono, I. Gaponenko, R. Jones, L. Mapelli, G. Mornacchi, D. Prigent, E. Sanchez-Corral, M. Skiadelli, A. Toppers, P.Y. Duval, D. Ferrato, A. Le Van Suu, Z. Qian, C. Rondot, G. Ambrosini, G. Fumagalli, M. Aguer and M. Huet 213

Class structure of the Injector Linac control system of SPring-8
H. Yoshikawa, Y. Itoh, K. Tamezane, Y. Sakaki, M. Kodera and H. Yokomizo 216
EPICS communication loss management
J.O. Hill 218
A VXI message based communications driver and resource manager for EPICS
J.O. Hill 221
Sharing limited Ethernet resources with a client–server model
D.M. Brownless and P.D. Burton 224
VME image acquisition and processing using standard TV CCD cameras
F. Epaud and P. Verdier 226
DEC TURBOchannel to CAMAC executive crate interface
W.R. Roberts, K.S. Lee, M.M. Mouat, E. Klassen, P.W. Wilmshurst and D.A. Diel 232
Development of an autonomous 32-bit intelligent device controller
D. Bishop, G. Waters, D. Dale, T. Ewert, D. Harrison, J. Lam and R. Keitel 236
Radiation effects on optical fiber links at the SSC
S. Hunt, S. Crivello and N. Mokhov 239
Controls and informatics – the integration issue
R. Billinge and G. Shering 244

II(e). Experimental physics control systems (large detectors)

The new slow control system for the ALEPH experiment at LEP
P. Mato, A. Engelhardt, J. Harvey, G. Mourouvapin, M. Saich, W. Tejessy, W. Cameron, M. Cattaneo, R. Fantechi, E. Mannelli, E. Veitch and O. Callot 247
Control and monitoring of the DØ detector
S. Ahn, J.F. Bartlett, N. Denisenko, S. Fuess, A. Jonckheere, S. Krzywdzinski, L. Paterno, H. Prosper, R. Raja, J. Featherly, B. Gibbard and L. Rasmussen 250

Section III. Distributed processing

BUBBANET – The SSC accelerator controls network
S. Hunt, P. Banta, K. Low and D. Mathieson 254
Operating telescopes remotely
A. Wallander 258
Remote procedure calls for accelerator control at CERN. Current status and future trends
K. Kostro 262
Control protocol: large scale implementation at the CERN PS complex – a first assessment
H. Abie, G. Benincasa, G. Coudert, Y. Davydenko, C. Dehavay, R. Gavaggio, G. Gelato, W. Heinze, M. Legras, H. Lustig, L. Merard, T. Pearson, P. Strubin and J. Tedesco 265
Control protocols for the UNK control system
A. Elin, L. Kopylov, A. Matyushin, M. Mikheev, E. Scherbakov, N. Trofimov, V. Yourpalov and S. Zelepoukin 271
The equipment access software for a distributed UNIX-based accelerator control system
N. Trofimov, S. Zelepoukine, E. Zharkov, P. Charrue, C. Gareyte and H. Poirier 274
RT/OS – realtime programming and application environment for the COSY control system
A. Weinert, U. Hacker, Ch. Haberbosch, K. Henn and M. Simon 277
The DELPHI distributed information system for exchanging LEP machine related information
M. Dönszelmann and C. Gaspar 280
A bus controller for MIL-1553B and Multibus II
V. Kotov, L. Dubovik and K. Rybaltchenko 283
The data exchange between LEP machine and its experiments – Recent developments
P.J. Brummer 285

Access control and security for a distributed control system
J. Meyer, A. Götz and W.D. Klotz 289

Section IV. Databases

Virtual data
E. Bjorklund 293
LEP accelerator logging system using on-line database
R. Billen, F. Bordry, C. Delamare, E. Hatziangeli and F. Roeber 296
The design schemes of graphic user interface database and intelligent local controller in the SRRC control system
C.J. Wang, J. Chen, J.S. Chen and G.J. Jan 300

Section V. High level controls

Smart feedback loops
A.S. Chepurnov, I.V. Gribov, K.A. Gudkov, A.V. Shumakov and V.I. Shvedunov 306
Adaptive optimization and control using neural networks
W.C. Mead, S.K. Brown, R.D. Jones, P.S. Bowling and C.W. Barnes 309
Glish: a software bus for high-level control
V. Paxson 316
High level controls at RHIC
S. Peggs, C. Saltmarsh, T. Satogata and M. Fryer 322
A knowledge based control method: application to accelerator equipment setup
G. Daems, V. Filimonov, V. Homutnikov, F. Perriollat, Yu. Ryabov and P. Skarek 325
A rule-based expert system for generating control displays at the Advanced Photon Source
K.J. Coulter 329
Simulation facility for development of high level control code at the SSC
G. Bourianoff, B. Cole, M. Botlo, S. Hunt, A. Romero, N. Malitsky and A. Reshetov 333
Conditioning of high voltage radio frequency cavities by using fuzzy logic in connection with rule based programming
S. Perreard and E. Wildner 336
A digital feedback system for transverse orbit stabilization in the NSLS rings
A. Friedman and E. Bozoki 339

Section VI. Man–machine interfaces and machine operation

An integrated set of UNIX based system tools at control room level
F. Potepan, C. Scafuri, C. Bortolotto and G. Surace 342
The operator interface to the equipment of the CERN PS accelerators
J. Cuperus, F. Di Maio and C.H. Sicard 346
Performance of the high level application software during LEP operation
R. Bailey, P. Collier and M. Lamont 350
The graphics operator interface to control MAMI
H.-J. Kreidel, C. Klümper and K.W. Nilles 354
Installation and management of the SPS and LEP control system computers
A. Bland 357
Visual observation of digitalised signals by workstations
J. Navratil, A. Akiyama and T. Mimashi 361

The AmPS magnet control system
R.G.K. Hart, W.P.J. Heubers, J.B. van der Laan and A. Schimmel 366
Program recording of user actions and its use in the Fermilab accelerator control system
B. Hendricks 368

Section VII. Software engineering

VII(a). Software management and toolkits

Controlling software development
C. Mazza 370
Fundamentals of object-oriented information systems specification and design: the OBLOG/TROLL approach
H.-D. Ehrich 375

VII(b). Software engineering applications

Object-oriented software construction at ALS
H. Nishimura 379
Software engineering techniques and CASE tools in RD13
S. Buono, I. Gaponenko, R. Jones, A. Khodabandeh, L. Mapelli, G. Mornacchi, D. Prigent, E. Sanchez-Corral, M. Skiadelli, A. Toppers, P.Y. Duval, D. Ferrato, A. Le Van Suu, Z. Qian, C. Rondot, G. Ambrosini, G. Fumagalli, G. Polesello, M. Aguer and M. Huet 383
Software engineering for ESO's VLT project
G. Filippi 386
A development environment for the SSC control system
D. Murray, G. Martinsen and J. Wang 390
RF control at SSCL – an object oriented design approach
D.A. Dohan, E. Osberg, R. Biggs, J. Bossom, K. Chillara, R. Richter and D. Wade 393
Device access using C + + on VAX/OpenVMS
J.E. Richards, B. Davison, P.A. Grant, K.S. Lee, M.M. Mouat and S. Wong 398
Shell software for smart subsystems with front-end capabilities
B. Lublinsky 403
Modern design of a fast front-end computer
Z. Šoštarić, D. Aničić, L. Sekolec and J. Su 407
Experience with the State Notation Language and Run-Time sequencer
A.J. Kozubal, D.M. Kerstiens and R.M. Wright 411
Experience with case tools in the design of process-oriented software
O. Novakov and C.-H. Sicard 415
Experience of CAD application for the software design of a control and measuring system with changeable configuration
V.I. Zaitsev, Yu.V. Papazyan and V.N. Savochkin 418
Toolkit for UNK equipment controllers development
Yu. Bardik, A. Dunaitsev, E. Kallistratov, L. Kim, V. Komarov, V. Kovaltsov, A. Lukyantsev, A. Machnachev, A. Matyushin, G. Obukhov, V. Soloviev, A. Sytin, Yu. Tchernoousko, G. Tishin, N. Trofimov and P. Vetrov 421
Tools for man–machine interface development in accelerator control applications
L. Kopylov, M. Mikhev, N. Trofimov and V. Yurpalov 424
A simple generic software tool kit for distributed controls applications
V. Mertens, A. Aimar and E. Carlier 427
Development of the LEP high level control system using ORACLE as an online database
R. Bailey, A. Belk, P. Collier, M. Lamont, G. de Rijk and M. Tarrant 430

Three Object-Oriented enhancement for EPICS
E.A. Osberg, D.A. Dohan, R. Richter, R. Biggs, K. Chillara, D. Wade and J. Bossom 434

Section VIII. Commercial products for control systems

VIII(a). Vendor presentations

Graphical object-oriented programming with LabVIEW
R. Jamal 438
The status of Vsystem
P. Clout 442
Application of the object-oriented paradigm for scientific experiment monitoring & control
T. Racaud and P. Assis-Arantes 447

VIII(b). Applications integrating commercial products

Using LabVIEW for the design and control of digital signal processing systems. Simulation of the ultra slow extraction at COSY
G. Heinrichs, H. Rongen and R. Jamal 449
DANTE: control system for DAΦNE based on Macintosh and LabVIEW
G. Di Pirro, C. Milardi, A. Stecchi and L. Trasatti 455
On the use of the VAXELN toolkit for the cryogenic controls at DESY
M. Clausen, G. Csuka, G. Grygel, P. Shevtsov 458
Equipment industrially controlled
R. Saban, P. Ciriani, A. Guiard-Marigny, H. Laeger, M. Rabany and A. Swift 461
Integrating a commercial industrial control system to the accelerator control system: a case study
F. Momal, J. Brahy, R. Saban and P. Sollander 464
Specification, installation and commissioning of a large industrial control system for the LEP2 cryogenics
H.K. Kuhn, A.C. Juillerat, M. Rabany and J.C. Wollès 467
The ISOLDE control system
I. Deloose and A. Pace 471
The use of industrial type control and monitoring components for a large fusion experiment
O.N. Hemming, G. Manduchi, A. Luchetta, V. Schmidt and S. Vitturi 476
Laboratory use of industrial control systems
A. Rijllart, L. Avot, D. Brahy, D. Jégou and R. Saban 480

VIII(c). Panel discussion

Summary of session We-K Panel discussion on the topic: should we buy not build a control system?
P. Lucas, H.U. Bohn, C.-N. Duc, C. Mazza, F. Potepan and S. Trieste 484

Section IX. Software sharing

EPICS: A control system software co-development success story
M. Knott, D. Gurd, S. Lewis and M. Thuot 486
The Cortex project. A quasi-real-time information system to build control systems for high energy physics experiments
R. Barillere, H. Cabel, B. Chan, I. Goulas, J.M. Le Goff, L. Vinot, C. Willmott, H. Milcent and P. Huuskonen 492
Virtual accelerator and fundamental guidelines towards sharable software for accelerator control systems
N. Kanaya 497

Panel session on software sharing
B. Kuiper, M. Clausen, P. Clout, A. Guiard-Marigny, W. Jones, S. Lewis, P. Lucas, W. McDowell, F. Perriollat and R. Saban 501

Section X. Looking back

A LAMPF controls retrospective : the good, the bad, and "it seemed like a good idea at the time"
S.C. Schaller 516
Small can be beautiful
S. Albrand and J.-C. Ravel 521
Conference closing remarks
P. Clout 525

List of abbreviations and trademarks 527
List of participants 529
Addresses of institutes represented 532
Author index 535
