

(EXP2/13) Investigation of Dimensionless Scaling Laws and Non Local Transport in TORE SUPRA . . . . .	805
(EXP2/14) Potential Turbulence in Tokamak Plasmas . . . . .	809
(EXP2/15) Comparative Studies of a Spherical Tokamak and a Conventional Tokamak: Magnetic Turbulence-Induced Transport . . . . .	813
(EXP2/17) Confinement Studies during LHCD and LHW Ion Heating on HL-1M	817
	<b>Volume 3</b>
<b>Session EXP3 – MHD Stability &amp; Alternate Confinement Systems (Friday, 23 October)</b>	<b>821</b>
(EXP3/01) MHD Studies in FTU Plasmas with Low and Negative Magnetic Shear	821
(EXP3/03) Observation of Neo-Classical Tearing Modes in JET . . . . .	825
(EXP3/04) Some Features of the Disruption Instability in Reversed Shear TFTR Plasmas . . . . .	829
(EXP3/05) Studies of the Disruption Prevention by ECRH at Plasma Current Rise Stage in Limiter Discharges / Possibility of an Internal Transport Barrier Producing under Dominating Electron Transport in the T-10 Tokamak . . .	833
(EXP3/06) Forecast of TEXT Plasma Disruptions Using Soft X-Rays as Input Signal in a Neural Network . . . . .	843
(EXP3/07) The Production and Confinement of Runaway Electrons with Impurity “Killer” Pellets in DIII-D . . . . .	847
(EXP3/09) Suppression of Magnetic Islands Through Synchronous and Asynchronous Application of Resonant Magnetic Fields . . . . .	851
(EXP3/10) Observation and Control of Resistive Wall Modes . . . . .	855
(EXP3/11) Characteristics of Halo Current in JT-60U . . . . .	859
(EXP3/13) Studies on Magnetic Dynamics in RFX . . . . .	863
(EXP3/14) Plasma-Wall Interactions in RFX . . . . .	867
(EXP3/15) Particle and Energy Transport in the RFX Experiment . . . . .	871
(EXP3/17) Experiments on High- $\beta$ Plasma Confinement in Gas Dynamic Trap .	875
(EXP3/18) Theoretical and Experimental Study for Possibility of Nuclear Burn Wave Initiation in Z-Pinch due to M=0 Instability Development . . . . .	879
(EXP3/19) Locked Modes and Plasma-Wall Interaction in a Reversed-Field Pinch with a Resistive Shell and Carbon First Wall . . . . .	883
(EXP3/20) Collisional Transport in Nonneutral Plasmas . . . . .	887
<b>Session EXP4 – Divertors &amp; Alternate Confinement Systems (Saturday, 24 October)</b>	<b>891</b>
(EXP4/02) Flux Dependence and Isotope Effect of the Chemical Erosion of Carbon under Tokamak Conditions . . . . .	891
(EXP4/03) Impurity Control Studies Using SOL Flow in DIII-D . . . . .	895
(EXP4/04) Heat Flux Exhaust in TORE SUPRA in Ergodic Divertor and Limiter Configurations . . . . .	899

(EXP4/05) Divertor Characteristics and Control on the W-Shaped Divertor with Pump of JT-60U . . . . .	903
(EXP4/06) Heat and Particle Transport of SOL/Divertor Plasma in the W-Shaped Divertor on JT-60U . . . . .	907
(EXP4/08) Characteristics of Hot Ions with a Strong RF Heating in the GAMMA 10 Tandem Mirror . . . . .	911
(EXP4/11) Divertor RFP Experiment on TPE-2M . . . . .	915
(EXP4/13) Control of RFP Dynamics with External Helical Fields . . . . .	919
(EXP4/14) Axial compression of an FRC plasma . . . . .	923
(EXP4/15) High-Power Initial Heating of Compact Torus by Means of Merging Effect . . . . .	927
<b>Session ITER – ITER EDA (Wednesday, 21 October)</b>	<b>931</b>
(ITER/1) ITER Physics Basis and Physics Rules . . . . .	931
(ITER/2) ITER In-Vessel System Design and Performance . . . . .	939
(ITER/3) Operation and Control of ITER Plasmas . . . . .	947
(ITER/4) The Integrated Design of the ITER Magnets and their Auxiliary Systems	957
(ITER/5) Remote Handling Maintenance of ITER . . . . .	965
(ITER/6) International Thermonuclear Experimental Reactor (ITER) Plant Layout and Site Services . . . . .	973
(ITER/D) Discussions of Session ITER . . . . .	981
<b>Session ITERP1 – ITER EDA 1 (Thursday, 22 October)</b>	<b>987</b>
(ITERP1/07) Latest Results from the ITER H-Mode Confinement and Threshold Databases . . . . .	987
(ITERP1/08) Tests of 1-D Transport Models, and their Predictions for ITER . .	991
(ITERP1/09) Assessment and Modeling of Inductive and Non-Inductive Scenarios for ITER . . . . .	995
(ITERP1/10) Energetic Particles and Runaway Electrons in ITER . . . . .	1001
(ITERP1/11) Neoclassical Islands, $\beta$ -Limits, Error Fields, and ELMs in Reactor-Scale Tokamaks . . . . .	1005
(ITERP1/12) Edge Database Analysis for Extrapolation to ITER . . . . .	1009
(ITERP1/13) 2D Modelling and Assessment of Divertor Performance for ITER .	1013
(ITERP1/15) Integration of Diagnostics into the ITER Machine . . . . .	1017
(ITERP1/16) Progress in RF Heating (IC, EC and LH) Design and R&D during ITER EDA . . . . .	1021
(ITERP1/17) ITER Neutral Beam System . . . . .	1025
(ITERP1/18) Nuclear Analysis for ITER . . . . .	1029
(ITERP1/20) Beryllium Interaction with Steam or Air in ITER under Accident Conditions . . . . .	1033

(ITERP1/21) ITER Central Solenoid Manufacturing R&D . . . . .	1037
(ITERP1/23) The ITER Toroidal Field Model Coil (TFMC) Development Programme . . . . .	1041
(ITERP1/24) Integration Test of ITER Full-Scale Vacuum Vessel Sector . . . . .	1045
(ITERP1/25) Progress and Achievements of the ITER L-4 Blanket Project . . . . .	1049
(ITERP1/26) The ITER Divertor Cassette Project . . . . .	1053
(ITERP1/28) The Divertor Remote Maintenance Project . . . . .	1057
<b>Session ITERP2 – ITER EDA 2 (Saturday, 24 October)</b>	<b>1061</b>
(ITERP2/04) The Development of Negative Ion Beam Plasma Neutraliser for ITER NBI . . . . .	1061
(ITERP2/05) Development of Tritium Fuel Processing System Using Electrolytic Reactor for ITER . . . . .	1065
(ITERP2/06) Improvement of Tritium Accountancy Technology for the ITER Fuel Cycle Safety Enhancement . . . . .	1069
(ITERP2/07) Summarized Results of the Cryosorption Panel Test Programme for the ITER Cryopumping System . . . . .	1073
(ITERP2/08) Test Facility TIMO for Testing the ITER Model Cryopump . . . . .	1077
(ITERP2/10) Direct Measurement of the Plasma Equilibrium Response to Poloidal Field Changes and $H_{\infty}$ Controller Tests in TCV . . . . .	1081
<b>Session IF – Inertial Fusion Energy (Wednesday, 21 October)</b>	<b>1085</b>
(IF/2) Inertial Confinement Fusion and Fast Ignitor Studies . . . . .	1085
(IF/5) Progress in Fast Ignitor Research with the NOVA Petawatt Laser Facility . . . . .	1093
(IF/D) Discussions of Session IF . . . . .	1101
<b>Session IFP – Inertial Fusion Energy (Thursday, 22 October)</b>	<b>1107</b>
(IFP/03) Laser Beam Smoothing and Backscatter Saturation Processes in Plasmas Relevant to National Ignition Facility Hohlraums . . . . .	1107
(IFP/05) Experimental Program to Elucidate and Control Stimulated Brillouin and Raman Backscattering in Long-Scale Plasmas . . . . .	1111
(IFP/12) Integrated Code Development and Analysis of Implosion and Hydrodynamic Experiments . . . . .	1115
(IFP/13) A Distributed Radiator, Heavy Ion Driven Inertial Confinement Fusion Target with Realistic, Multibeam Illumination Geometry . . . . .	1119
(IFP/14) Generating High-Brightness Light Ion Beams for Inertial Fusion Energy . . . . .	1123
(IFP/16) Cryogenic Deuterium Z-Pinch and Wire Array Z-Pinch Studies at Imperial College . . . . .	1127
(IFP/17) Filamentation and Networking of Electric Currents in Dense Z-Pinch Plasmas . . . . .	1131

<b>Session ICP – Innovative Concepts (Thursday, 22 October)</b>	<b>1135</b>
(ICP/01) Exploration of Spherical Torus Physics in the NSTX Device . . . . .	1135
(ICP/02) Globus-M Experiment at the Final Stage of Preparations . . . . .	1139
(ICP/03) Spherical Tokamak without External Toroidal Fields . . . . .	1143
(ICP/04) Sustained Spheromak Physics Experiment . . . . .	1147
(ICP/05) A Paramagnetic Nearly Isodynamic Compact Magnetic Confinement System . . . . .	1151
(ICP/06) Physics Issues in the Design of a High $\beta$ Quasi-Axisymmetric Stellarator	1155
(ICP/07) Design Studies of Low-Aspect Ratio Quasi-Omnigenous Stellarators . .	1159
(ICP/09) Plasma Confinement in a Magnetic Dipole . . . . .	1165
(ICP/11) Fast Heating of a Dense Plasma by High-Power Electron Beam at the GOL-3-II Facility . . . . .	1169
(ICP/12) An Accelerated Beam-Plasma Neutron/Proton Source and Early Application of a Fusion Plasma . . . . .	1173
<b>Session FT – Fusion Technology 1 (Tuesday, 20 October)</b>	<b>1177</b>
(FT1/5) European Contributions to the Beam Source Design and R&D of the ITER Neutral Beam Injectors . . . . .	1177
(FT1/D) Discussions of Session FT1 . . . . .	1185
<b>Session FT – Fusion Technology 2 (Friday, 23 October)</b>	<b>1191</b>
(FT2/2) Development of Key Fusion Technologies at JET . . . . .	1191
(FT2/3) Anisotropic Radiation Damage by Charge Exchange Neutrals under the High Ion Temperature Discharges in TRIAM-1M . . . . .	1199
(FT2/4) Suitability and Feasibility of the International Fusion Materials Irradiation Facility (IFMIF) for Fusion Materials Studies . . . . .	1203
(FT2/5) Progress in the U.S. Program to Develop Low-Activation Structural Materials for Fusion . . . . .	1211
(FT2/6) Study on Dynamic Behavior of Fusion Reactor Materials and their Response to Variable and Complex Irradiation Environment . . . . .	1219
(FT2/D) Discussions of Session FT2 . . . . .	1227
	<b>Volume 4</b>
<b>Session FTP – Fusion Technology (Wednesday, 21 October)</b>	<b>1235</b>
(FTP/01) Power Balance in Stellarator Reactors . . . . .	1235
(FTP/02) Coil System of a Helias Reactor . . . . .	1239
(FTP/04) Science and Technology of the 10-MA Spherical Tori . . . . .	1243
(FTP/05) Fusion Technology Applications of the Spherical Tokamak . . . . .	1247
(FTP/06) A low aspect ratio tokamak transmutation system . . . . .	1251
(FTP/07) Potential of Incineration of Long-Life Fission Products from Fission Energy System by D-T and D-D Fusion Reactors . . . . .	1255
