

<b>Session ICP – Innovative Concepts (Thursday, 22 October)</b>	<b>1135</b>
(ICP/01) Exploration of Spherical Torus Physics in the NSTX Device . . . . .	1135
(ICP/02) Globus-M Experiment at the Final Stage of Preparations . . . . .	1139
(ICP/03) Spherical Tokamak without External Toroidal Fields . . . . .	1143
(ICP/04) Sustained Spheromak Physics Experiment . . . . .	1147
(ICP/05) A Paramagnetic Nearly Isodynamic Compact Magnetic Confinement System . . . . .	1151
(ICP/06) Physics Issues in the Design of a High $\beta$ Quasi-Axisymmetric Stellarator	1155
(ICP/07) Design Studies of Low-Aspect Ratio Quasi-Omnigenous Stellarators . .	1159
(ICP/09) Plasma Confinement in a Magnetic Dipole . . . . .	1165
(ICP/11) Fast Heating of a Dense Plasma by High-Power Electron Beam at the GOL-3-II Facility . . . . .	1169
(ICP/12) An Accelerated Beam-Plasma Neutron/Proton Source and Early Application of a Fusion Plasma . . . . .	1173
<b>Session FT – Fusion Technology 1 (Tuesday, 20 October)</b>	<b>1177</b>
(FT1/5) European Contributions to the Beam Source Design and R&D of the ITER Neutral Beam Injectors . . . . .	1177
(FT1/D) Discussions of Session FT1 . . . . .	1185
<b>Session FT – Fusion Technology 2 (Friday, 23 October)</b>	<b>1191</b>
(FT2/2) Development of Key Fusion Technologies at JET . . . . .	1191
(FT2/3) Anisotropic Radiation Damage by Charge Exchange Neutrals under the High Ion Temperature Discharges in TRIAM-1M . . . . .	1199
(FT2/4) Suitability and Feasibility of the International Fusion Materials Irradiation Facility (IFMIF) for Fusion Materials Studies . . . . .	1203
(FT2/5) Progress in the U.S. Program to Develop Low-Activation Structural Materials for Fusion . . . . .	1211
(FT2/6) Study on Dynamic Behavior of Fusion Reactor Materials and their Response to Variable and Complex Irradiation Environment . . . . .	1219
(FT2/D) Discussions of Session FT2 . . . . .	1227
	<b>Volume 4</b>
<b>Session FTP – Fusion Technology (Wednesday, 21 October)</b>	<b>1235</b>
(FTP/01) Power Balance in Stellarator Reactors . . . . .	1235
(FTP/02) Coil System of a Helias Reactor . . . . .	1239
(FTP/04) Science and Technology of the 10-MA Spherical Tori . . . . .	1243
(FTP/05) Fusion Technology Applications of the Spherical Tokamak . . . . .	1247
(FTP/06) A low aspect ratio tokamak transmutation system . . . . .	1251
(FTP/07) Potential of Incineration of Long-Life Fission Products from Fission Energy System by D-T and D-D Fusion Reactors . . . . .	1255

(FTP/09) Design of Tokamak Plasma with High Tc Superconducting Coils . . .	1259
(FTP/10) Feasibility Study for Very High Aspect Ratio Tokamak Fusion Reactor	1263
(FTP/13) Advanced Tokamak Burning Plasma Experiment . . . . .	1267
(FTP/14) Recent Results Relevant to Ignition Physics and Machine Design Issues	1273
(FTP/15) The Aspect Ratio and Plasma Elongation Dependencies of Tokamak-Reactor Parameters . . . . .	1279
(FTP/16) Design Activities of a Fusion Experimental Breeder . . . . .	1283
(FTP/18) Design Windows of Laser Fusion Power Plants and Conceptual Design of Laser-Diode Pumped Slab Laser . . . . .	1287
(FTP/21) Steady State Heating Technology Development for the LHD . . . . .	1293
(FTP/22) Advanced ICH Antenna Designs for Heating and Current Drive on ITER and NSTX . . . . .	1297
(FTP/24) Development of 1 MW Output Power Level Gyrotron for ITER ECRH System . . . . .	1301
(FTP/26) Conceptual Design of Pebble Drop Divertor . . . . .	1305
(FTP/27) Design, Calculation and Experimental Studies for Liquid Metal System Main Parameters in Support of the Liquid Lithium Fusion Reactor . . . . .	1309
(FTP/28) 3-D Electromagnetic Transient Characteristics of In-Vessel Components in Tokamak Reactor . . . . .	1313
(FTP/34) Hydrogen Isotope Inventories in Plasma Facing Components of ASDEX Upgrade . . . . .	1317
(FTP/40) Evaluation of CO <sub>2</sub> Emissions in the Life Cycle of Tokamak Fusion Power Reactors . . . . .	1321
(FTP/41) A Survey on Publications in Fusion Research and Technology Science and Technology Indicators in Fusion R&T . . . . .	1331
<b>Session TH1 – Theory 1 (Tuesday, 20 October)</b>	<b>1343</b>
(TH1/1) Simulation of Ion-Temperature-Gradient Turbulence in Tokamaks . . .	1343
(TH1/3) Flux Driven Turbulence in Tokamaks . . . . .	1351
(TH1/5) Self-Consistent Computation of Transport Barrier Formation by Fluid Drift Turbulence in Tokamak Geometry . . . . .	1359
(TH1/6) Formation and Collapse of Internal Transport Barrier . . . . .	1367
(TH1/D) Discussions of Session TH1 . . . . .	1375
<b>Session TH2 – Theory 2 (Thursday, 22 October)</b>	<b>1383</b>
(TH2/1) 5D Simulation Study of Suprathermal Electron Transport in Non-Axisymmetric Plasmas . . . . .	1383
(TH2/3) High and Low Frequency Alfvén Modes in Tokamaks . . . . .	1391
(TH2/4) Collective Phenomena with Energetic Particles in Fusion Plasmas . . .	1399
(TH2/5) Control of Neoclassical Tearing Modes in Large Tokamaks . . . . .	1407
(TH2/D) Discussions of Session TH2 . . . . .	1415

<b>Session TH3 – Theory 3 (Saturday, 24 October)</b>	<b>1421</b>
(TH3/1) Dynamics of Zonal Flows and Self-Regulating Drift-Wave Turbulence . . . . .	1421
(TH3/2) Influence of the Plasma Edge on Tokamak Performance . . . . .	1429
(TH3/4) 3D MHD Simulations of Pellet Injection and Disruptions in Tokamak Plasmas . . . . .	1437
(TH3/5) Boundary Plasma Control with the Ergodic Divertor . . . . .	1445
(TH3/7) Theory for Angular Momentum Generation and the Problem of Poloidal Rotation . . . . .	1453
(TH3/D) Discussions of Session TH3 . . . . .	1461
<b>Session THP1 – Theory 1 (Friday, 23 October)</b>	<b>1469</b>
(THP1/03) Ideal and Resistive Interchange Instabilities in Negative Shear Tokamaks and Currentless Heliotron Plasmas . . . . .	1469
(THP1/04) Internal Disruptions in Stellarators . . . . .	1473
(THP1/05) Dimensionless Energy Confinement Scaling in W7-AS . . . . .	1477
(THP1/06) Optimisation of Stellarator Systems: Possible Ways . . . . .	1481
(THP1/07) MHD Stability Calculations of High- $\beta$ Quasi-Axisymmetric Stellarators	1485
(THP1/10) Theoretical Studies on the Role of Flows and Currents in the RFP . . . . .	1489
(THP1/13) The “Positive” Magnetic Islands Conception and its Applications to T-11M Experiments . . . . .	1493
(THP1/15) Influence of External Toroidal Flux on Low-Aspect-Ratio Toroidal Plasma . . . . .	1497
(THP1/16) Two-Point Boundary Value and Cauchy Formulations in an Axisymmetrical MHD Equilibrium Problem . . . . .	1501
<b>Session THP2 – Theory 2 (Transport) (Friday, 23 October)</b>	<b>1505</b>
(THP2/01) The L-H Transition and the Stability of the Edge Pedestal . . . . .	1505
(THP2/02) Electromagnetic $\eta_i$ mode turbulence at the plasma edge . . . . .	1513
(THP2/03) Turbulence Studies in Tokamak Boundary Plasmas with Realistic Divertor Geometry . . . . .	1517
(THP2/04) Edge and Coupled Core/Edge Transport Modelling in Tokamaks . . . . .	1521
(THP2/05) Test of the Predictive Capability Of B2-Eirene on ASDEX-Upgrade . . . . .	1525
(THP2/06) Nonlinear Full Torus Calculations of Resistive Pressure-Gradient-Driven Turbulence and Ion-Temperature-Gradient-Driven Turbulence in Toroidal Geometry . . . . .	1529
(THP2/07) Long-Range Correlations and Universality in Plasma Edge Turbulence	1533
(THP2/09) Resistive edge modes, a scenario for the L-H transition due to heat flux	1537
(THP2/10) Impact of Edge Electric Fields on Particle Transport and Dynamics in Tokamaks . . . . .	1541
(THP2/11) Time-Dependent One Dimensional Model of MARFES, Detached Plasmas in Divertor Scrape-Off Layer of a Tokamak . . . . .	1545

(THP2/13) Theory of Enhanced Core Confinement Regimes in Tokamaks . . . . .	1549
(THP2/14) Evolution of Thermal Ion Transport Barriers in Reversed Shear / Optimised Shear Plasmas . . . . .	1553
(THP2/15) Interpretation of Transport Barriers and of Subneoclassical Transport in the Framework of the Revisited Neoclassical Theory . . . . .	1557
(THP2/17) Verification of Canonical Profiles and Semi Empirical Transport Models Against JT-60U Plasmas . . . . .	1561
(THP2/18) Predictive Simulations of High Performance and Dimensionless Scaling Experiments on JET . . . . .	1565
(THP2/19) Improving the Theoretical Foundations of the Multi-Mode Transport Model . . . . .	1569
(THP2/21) Linear and Nonlinear Study of Fast Particle Excitation of Alfvén Eigenmodes . . . . .	1573
(THP2/22) Kinetic-Magnetohydrodynamic Simulation Study of Fast Ions and Toroidal Alfvén Eigenmodes . . . . .	1577
(THP2/23) Global Alfvén Eigenmodes Stability in Thermonuclear Tokamak Plasmas . . . . .	1581
(THP2/24) Stability Analysis of Energetic Ion Alfvén Mode and Kinetic Ballooning Mode in Tokamaks . . . . .	1585
(THP2/25) Behavior of MeV Ions in the Presence of Sawtooth Oscillations in TFTR and JET . . . . .	1589
(THP2/26) Simulation Study on Avoiding Runaway Electron Generation by Magnetic Perturbations . . . . .	1593
(THP2/27) Modelling of Ripple Loss of Partially Thermalized Charged Fusion Products in TFTR . . . . .	1597
(THP2/28) Numerical and Theoretical Studies of Turbulence and Transport with $E \times B$ Shear Flows . . . . .	1601
(THP2/29) Intrinsically Steady-State Tokamaks . . . . .	1605
(THP2/30) Effect of Rotation on Ideal and Resistive MHD Modes . . . . .	1611
(THP2/31) Improvement of MHD Stability in Negative/Weak Shear Configurations for a Steady State Tokamak . . . . .	1615
(THP2/32) Flow Shear Stabilization of Hybrid Electron-Ion Drift Mode in Tokamaks . . . . .	1619
(THP2/33) Instability Threshold of Neoclassical Tearing Mode, Double Tearing Mode and Off-Axis Sawteeth Crash in Tokamaks . . . . .	1623
(THP2/34) Generation of Plasma Rotation by ICRH in Tokamaks . . . . .	1627
(THP2/35) Effect of the Radial Electric Field, Induced by Alfvén Waves, on Transport Processes in Tokamaks . . . . .	1631
(THP2/36) Self-Consistent Calculations of the Power Deposition and Velocity Distribution during ICRH Including Finite Orbit Widths, Spatial RF-Induced Drift and Diffusion . . . . .	1635
(THP2/37) Self-Consistent Quasilinear Fokker-Planck - Maxwell Modelling of Ion Cyclotron Resonance Heating in Tokamak Plasmas . . . . .	1639

(THP2/38) Fast Responses in L/H Transition . . . . .	1643
<b>Session S – Summaries (Saturday, 24 October)</b>	<b>1647</b>
(S/2) Non-Tokamak Experiments . . . . .	1647
(S/3) Theory Summary . . . . .	1655
(S/5) ITER EDA and Technology . . . . .	1665
<b>Post Deadline Papers</b>	<b>1681</b>
(PDP/01) Fast Potential Changes at H-Mode Transition in the JFT-2M Tokamak	1681
(PDP/02) Current Drive Experiments on the HIT-II Spherical Torus . . . . .	1685
(PDP/03) Core Density Fluctuations in Reverse Magnetic Shear Plasmas with In- ternal Transport Barrier on JT-60U . . . . .	1689
<b>Paper Index</b>	<b>1695</b>
<b>Author Index</b>	<b>1699</b>
