

CONTENTS

- v Conference Organization
- vi Financial Sponsors and Exhibitors
- vii Endorsing Organizations and Societies
- ix Preface / *Erik Storm, Michael Campbell, Arnold Migus, Kunioki Mima, Bruce Hammel, David Meyerhofer, Juergen Meyer-ter-Vehn, Hiroshi Azechi*
- x A Note from the Retiring IFSA Founders / *William J. Hogan, E. Michael Campbell*

Chapter I: General Plenary Session

- 3 Progress in Inertial Confinement Fusion in the United States / *R. L. McCrory*
- 9 Present Status and Future Prospects of IFE and High Power Laser Researches in Asia / *Kunioki Mima*
- 15 Inertial Fusion Science in Europe / *J. Tassart*

Chapter II: Edward Teller Medal Lectures

- 23 Prospects for High-Gain, High Yield NIF Targets Driven by 2ω (Green) Light / *L. J. Suter et al.*
- 35 Hydrodynamic Instability, Integrated Code and Laboratory Astrophysics / *Hideaki Takabe*

A. Physics of Inertial Fusion

Chapter III: Ignition and Implosion Hydrodynamics

- 55 Update on Indirect Drive Ignition Target Design for NIF / *S. W. Haan et al.*
- 61 Advanced Direct-Drive Target Designs for the NIF / *S. Skupsky et al.*
- 65 Progress in Target Physics for LMJ at CEA / *P. A. Holstein et al.*
- 70 Theory of Hot Spot Formation and Thermonuclear Burn for ICF Targets / *Yves Saillard*
- 75 Direct Drive Pellet Designs and Performance / *Andrew J. Schmitt et al.*

- 80 Hohlräum-Driven Ignition-Like Double-Shell Implosion Experiments on Omega: Analysis and Interpretation / *Peter Amendt et al.*
- 85 An Assessment of Proton-Boron 11 Fusion in ICF Targets Triggered by DT Sparks / *Mireia Piera, Pablo T. León, Shalom Eliezer, José M. Martínez-Val*
- 88 Target Ignition by Jet Interaction / *P. Velarde, F. Ogando, S. Eliezer, M. Saule*
- 92 High-Gain, Direct-Drive Foam Target Designs for the National Ignition Facility / *T. J. B. Collins et al.*
- 96 Symmetry Tuning of NIF Ignition Targets / *O. S. Jones et al.*
- 100 Shock Timing Techniques for Ignition Capsules on the NIF / *David Munro, Steven Haan, Gilbert Collins, Peter Celliers*
- 104 NIF Capsule Sensitivity to Drive Asymmetry / *S. Pollaine et al.*
- 107 Wavelets, Curvelets and Multiresolution Analysis Techniques Applied to Implosion Symmetry Characterization of ICF Targets / *Bedros Afeyan, Kirk Won, Jean Luc Starck, Michael Cuneo*

Chapter IV: Implosion Hydrodynamics and Hydro-Instabilities

- 115 Rayleigh-Taylor Instability and Its Reduction in Laser-Accelerated Targets / *H. Shiraga et al.*
- 121 Mixing in Double Shell Capsules / *D. C. Wilson et al.*
- 126 An Assessment of Mix in OMEGA Double Shell Capsule Implosions / *Warren Garbett, P. Graham, A. M. Dunne*
- 131 Fresnel Phase Zone Plates for Rayleigh-Taylor Instability and Implosion Diagnostics / *H. Azechi, Y. Tamari, H. Shiraga*
- 135 Laser-Driven Hydrodynamic Experiments in the Turbulent Plasma Regime: From Omega to NIF / *H. F. Robey, A. R. Miles, J. F. Hansen, B. E. Blue, R. P. Drake*
- 140 Richtmyer-Meshkov Mixing in Directly Driven Cylindrically Convergent Systems / *N. E. Lanier et al.*
- 145 The Effect of a Short Wavelength Mode on the Nonlinear Evolution of a Long Wavelength Perturbation Driven by a Strong Blast Wave / *A. R. Miles, M. J. Edwards, H. F. Robey*
- 150 Generation of Magnetic Field in an Imploded High Density Plasma / *A. Hata et al.*
- 154 Studies of Indirect Drive IFE Capsules in Two and Three Dimensions / *A. E. Koniges, M. M. Marinak, M. Tabak, M. C. Herrmann*
- 158 Asymmetry and Mix in Direct-Drive ICF Experiments / *C. R. Christensen et al.*
- 162 Experimental Investigation of the Effect of M-Band Preheating in Indirectly-Driven Double-Shell Implosions / *H. F. Robey et al.*

- 166 Modeling of Indirect-Drive ICF Implosions Using 1D Hydrodynamics Code with Inline Collisional-Radiative Atomic Kinetics / *I. E. Golovkin et al.*
- 170 Iodine Laser Interactions with Porous Matter / *J. Limpouch et al.*
- 174 Short-Wavelength Perturbation Growth Studies for NIF Double-Shell Ignition Target Designs / *J. L. Milovich, P. Amendt, M. Marinak, H. Robey*
- 178 Linear Stability of Heat Conducting and Magnetohydrodynamic Flows in ICF / *M. Olazabal-Loumé, G. Schurtz, D. Hateau, P.-A. Raviart*
- 182 Two-Dimensional Ablation Density Measurement Relevant to Rayleigh-Taylor Instability with Fresnel Phase Zone Plate / *Yohei Tamari et al.*
- 186 Reduction of the Rayleigh-Taylor Instability Growth with Multi-Color Laser Irradiation / *K. Shigemori et al.*
- 190 Progress with Double Shell Target Implosions on Omega / *N. Delamater et al.*
- 193 Kink Like Instability in Electron-Magnetohydrodynamics / *Neeraj Jain, Amita Das, Predhiman Kaw, Sudip Sen Gupta*
- 197 High Resolution Numerical Study of the Deceleration-Phase Rayleigh-Taylor Instability of Inertial Fusion Shells / *Stefano Atzeni, Mauro Temporal*
- 201 Linear Study of the Rayleigh-Taylor Instability in a Compressible Magnetized Fluid / *Stéphane Liberatore, Serge Bouquet*

Chapter V: Laser and Beam Plasma Interactions

- 207 Progress in Long Scale Length Laser-Plasma Interactions / *S. H. Glenzer et al.*
- 213 Kinetic Electrostatic Electron Nonlinear (KEEN) Waves and their Interactions Driven by the Ponderomotive Force of Crossing Laser Beams / *Bedros Afeyan et al.*
- 218 Experimental Studies of Simultaneous 351 nm and 527 nm Laser Beam Interactions in a Long Scalelength Plasma / *J. D. Moody et al.*
- 223 Blue and Green Light? Wavelength Scaling for NIF / *William Krueer et al.*
- 228 Plasma-Induced Incoherence and Beam Smoothing of a Laser Beam Propagating Through a Plasma / *C. Lobaune et al.*
- 233 A Reduced Model of Kinetic Effects Related to the Saturation of Stimulated Brillouin Scattering / *L. Divol, E. A. Williams, B. I. Cohen, A. B. Langdon, B. F. Lasinski*
- 237 Effects of Radiation Damping on Charged Particle Motion in the Field of a Strong Electromagnetic Wave / *James Koga, Alexei Zhidkov, Akira Sasaki, Mituru Uesaka*
- 242 Filamentation, Deflection, Scatter, and Crossed Beam Energy Transfer in High Temperature Hohlräume / *D. E. Hinkel et al.*

- 247** Suprathermal Electron Generation in a Coronal Plasma and Associated Preheating of Direct Drive Fusion Targets / *E. Lefebvre, B. Canaud, A. Siquin*
- 252** Crossed Beam Energy Transfer in the NIF ICF Target Design / *E. A. Williams, D. E. Hinkel, J. A. Hittinger*
- 256** Influence of Long Wavelength Ion Acoustic Waves on the Growth of Stimulated Brillouin Scattering in an Underdense Performed Plasma / *H. C. Bandulet et al.*
- 261** A New Numerical Treatment of Hohlraum Boundaries for ALE Rad/Hydro Codes / *A. E. Koniges, R. Tipton, M. M. Marinak*
- 264** Optical Mixing Controlled Stimulated Scattering Instabilities: Suppression of SRS by the Controlled Introduction of Ion Acoustic and Electron Plasma Wave Turbulence / *Bedros Afeyan et al.*
- 268** Wake Generation and Energy Transfer Relating to the Transport of Intense Relativistic Particle Beams in an Underdense Plasma / *B. E. Blue et al.*
- 272** Raman Generated Magnetic Fields in Laser Light Speckles / *B. F. Lasinski, C. H. Still, A. B. Langdon, D. E. Hinkel, E. A. Williams*
- 276** Self Thomson Scattering in Laser Produced Plasmas / *C. Niemann et al.*
- 280** Stimulated Brillouin Scattering from Helium-Hydrogen Plasmas / *D. H. Froula et al.*
- 283** Experimental Study of Laser Interaction with Low-Density Materials of Different Internal Structure in Context of Advanced ICF Target Designs / *A. E. Bugrov et al.*
- 287** Simulations of Ion Beam Neutralization in Support of the Neutralized Transport Experiment / *D. R. Welch, D. V. Rose, S. S. Yu, E. Henestroza*
- 291** Comparison of Different Smoothing Techniques in the LIL/LMJ Context / *Gilles Riazuelo, François Walraet*
- 295** Nonlinear Hydrodynamic Simulations of Laser-Plasma Interaction for Mono- and Multi-Speckle Configurations / *S. Weber, P. Michel, G. Riazuelo, V. Tikhonchuk, G. Bonnaud*
- 299** Suppression of Instabilities and Stochastic Pulsation at Laser Plasma Interaction / *F. Osman, H. Hora*
- 303** Population Kinetics Modeling for Non-LTE and Non-Maxwellian Plasmas Generated in Finite Temperature Dense Matter Experiments Arising from Short Pulse X-Ray Sources / *H.-K. Chung, W. L. Morgan, R. W. Lee*
- 307** 2D Lagrangian Code “ATLANT-HE” for Simulation of Laser-Plasma Interaction with Allowance for Hot Electron Generation and Transport / *I. G. Lebo et al.*
- 311** Propagation and Filamentation of a Single Hot Spot in a Laser-Produced Plasma / *K. Lewis et al.*

- 315 Research Using Intense Ion and Laser Beams at GSI / *M. Roth et al.*
- 319 Magnetic Confinement of an Expanding Laser-Produced Plasma / *M. S. Tillack, S. S. Harilal, F. Najmabadi, J. O'Shay*
- 323 2ω Laser Propagation and Raman Backscatter in Underdense Gasbag Plasmas / *N. B. Meezan et al.*
- 327 A Laser-Plasma Interaction Code for ICF / *S. Weber, R. Loubère, V. Tikhonchuk, J. Ovadia, G. Bonnaud*

**Chapter VI: Fast Ignition and High Intensity
Laser Plasma Interactions**

- 333 Fast Heating with a PW Laser as a Step to Ignition / *Ryosuke Kodama, FI Consortium*
- 339 X-Ray Emission from Subpicosecond Laser-Generated Homogeneous Plasmas / *J.-C. Gauthier et al.*
- 344 Experimental Investigation of the Transport of Electron Beams Generated by the Vulcan Petawatt Laser / *R. D. Edwards et al.*
- 349 Proton Beam Focusing and Heating in Petawatt Laser-Solid Interactions / *R. A. Snavely et al.*
- 353 Studies of Electron Transport and Isochoric Heating and Their Applicability to Fast Ignition / *M. H. Key et al.*
- 359 Study of Z-Pinch-Driven Hemispherical Capsule Implosions for Fast Ignition / *David L. Hanson et al.*
- 364 Ignition Thresholds for Deuterium-Tritium Mixtures Contaminated by High-Z Material / *A. Caruso, C. Strangio*
- 369 Forced Laser Wakefield Acceleration: Production of a Low-Emittance Electron Beam Up to 200 MeV with a Table-Top Laser / *E. Lefebvre, S. Fritzler, V. Malka*
- 373 Radiological Characterisation of Petawatt Laser Interactions / *D. Neely et al.*
- 378 Laser Acceleration of Deuterons and Protons from the Front and the Rear Surfaces of Thin Foils / *Y. Sentoku et al.*
- 383 Hydrodynamics of Direct Drive Reentrant Cone Targets for Fast Ignition / *R. B. Stephens et al.*
- 387 Petawatt Laser Direct Heating of Imploded Plasmas and Thermal Neutron Enhancement / *Yoneyoshi Kitagawa et al.*
- 394 Kinetic Transport Model for Core Plasma Heating by Relativistic Electrons / *Y. Nakao, T. Yokota, T. Johzaki, K. Mima*
- 398 Hybrid Simulation of Energetic Electron Beam Propagation in Solid Density Aluminum / *D. R. Welch, B. V. Oliver, J. J. MacFarlane, R. B. Campbell, T. A. Mehlhorn*

- 402** Ion Acceleration with High Intensity Lasers: PIC Simulations and Application to Isotope Production / *E. d'Humières, E. Lefebvre, V. Malka, S. Fritzler*
- 406** High Intensity KrF Laser Plasma Interaction at 10^{19} W/cm² / *Eiichi Takahashi et al.*
- 410** Evidence of Femtosecond Electron Bunches Produced in Laser-Plasma Interaction at Relativistic Intensities / *F. Amiranoff et al.*
- 414** Laser Plasma Interaction for Application to Fusion Energy / *F. Osman, P. Evans, H. Hora*
- 418** Volume Ignition by a Plasma Block Ignitor / *G. H. Miley, H. Hora*
- 422** Hot Electron Measurement and Modeling for Short-Pulse Laser Plasma Interactions / *H. Chen, R. F. Heeter, H. S. McLean, P. K. Patel, S. C. Wilks*
- 426** Genuine Two-Fluid Computations of PW-PS Laser Interaction with Plasma for the Block Ignitor / *Y. Cang, F. Osman, H. Hora, J. Zhang*
- 430** High Energy $K\alpha$ X-Ray Source Generation by Short Pulse High Intensity Lasers / *Hye-Sook Park et al.*
- 434** Collective PIC Simulations on Interaction Between Ultrahigh Intense Laser and Realistic Plasma for Fast Ignition / *Hitoshi Sakagami, Kunioki Mima*
- 438** 10-ps X-Ray Imaging of Cone-Shell Target Implosion at OMEGA Laser / *H. Shiraga et al.*
- 441** Production of Intense Fast Ion Fluxes by Skin-Layer Picosecond Laser-Plasma Interaction / *J. Badziak et al.*
- 445** High Energy Protons and Magnetic Field in a Slab Plasma Illuminated by an Intense Short Pulse Laser / *Takashi Nakama, Shuji Miyazaki, Qing Kong, Nobuyoshi Okazaki, Shigeo Kawata*
- 449** Ti K-Alpha Radiography of Imploding Cu Doped CD Shells and Coned Shells / *J. A. King et al.*
- 453** Recent Progress Towards Understanding Langmuir Wave Nonlinearities for Stimulated Raman Backscatter in a Single Hot Spot / *J. L. Kline et al.*
- 457** Simulation of the Ionization Dynamics of Aluminum Irradiated by Intense Short-Pulse Lasers / *J. J. MacFarlane et al.*
- 461** Simulations of Petawatt Laser-Generated Electron Beams in Pre-Compressed Fast Ignition Hot-Spot Plasmas / *R. B. Campbell et al.*
- 465** What We Know Versus What We Speculate Concerning the Generation and Transport of Laser-Generated Fast Electrons in Dense Materials / *Richard R. Freeman et al.*
- 469** Relativistic Electron Beam Transport and Characteristics in Solid Density Plasmas / *R. A. Snavely et al.*
- 474** 2-D Analysis of Ignition and Burn Characteristics for Fast Ignition Targets / *T. Johzaki, K. Mima, Y. Nakao, H. Nagatomo, A. Sunahara*

- 478 Generation of Static Magnetic Field Along a Solid Surface Irradiated by an Intense Laser Field / *Tatsufumi Nakamura, Susumu Kato, Hideo Nagatomo, Kunioki Mima*

Chapter VII: Radiation Hydrodynamics

- 485 Transition to Turbulence in Plasma Jet Experiments / *Mark Taylor et al.*
- 490 Hydro-Coupling Effects on Compression Symmetry in Gas-Filled Hohlraum Experiments at the Omega Laser / *E. L. Dewald et al.*
- 494 Analytic ICF Hohlraum Energetics / *Mordecai D. Rosen, James H. Hammer*
- 498 X-UV Imaging of Indirectly Driven Foam-Foil Packages / *J. Pasley et al.*

B. Facilities, Lasers, Particle Beams, Z-Pinches and Fusion Technologies

Chapter VIII: Facility Focus Sessions

- 507 FIREX Petawatt Laser Development for Fast Ignition Research at ILE, Osaka / *N. Miyanaga et al.*
- 512 The Vulcan Petawatt Interaction Facility / *C. N. Danson et al.*
- 517 Development of Krypton Fluoride Lasers for Fusion Energy / *J. D. Sethian et al.*
- 523 Status of the LMJ Program / *Claude Cavaller, Noël Camarcat, Francis Kovacs, Michel Andre*
- 529 The National Ignition Facility: Experimental Capability / *George H. Miller*
- 535 The National Ignition Facility: Transition to a Target Shooter / *Edward I. Moses*

Chapter IX: High Power Laser Development and Ignition Facilities

- 543 Strengthened Laser Glass for Average Power ICF Driver / *V. M. Chernyak et al.*
- 548 Durability of KrF Laser Driver Windows in IFE Application / *V. D. Zvorykin et al.*
- 553 Study of Neutron Scattering in the NIF Chamber and Use of Neutron Activation as a Yield Diagnostic / *Mike Tobin, Peter Song*
- 558 The LIL Facility Start-Up: First High Power and High Energy Laser Experimental Results at 1053nm and 351nm / *J. M. Di-Nicola et al.*
- 563 Operation of the Mercury Laser; Testbed for DPSSL IFE Driver Technology / *A. J. Bayramian et al.*
- 568 HALNA-100 DPSSL Driver Project for Inertial Fusion Energy / *T. Kawashima et al.*

- 572 Simulation of Shrapnel to Aid in the Design of NIF/LMJ Target-Diagnostic Configurations / *D. Eder et al.*
- 576 Efficient Electron Beam Pumping of Repetitively Pulsed, High Energy Krypton Fluoride Lasers / *F. Hegeler et al.*
- 580 Orestes: A Kinetics Model for Electron Beam Pumped KrF Lasers / *J. L. Giuliani et al.*
- 584 Review on LMJ Target Area: Design and Processes / *Marc Geitzholz, Phillippe Jeanpierre, Catherine Lanternier, Arnaud Reichart*
- 588 Characterizing Shrapnel and Debris Produced in High Power Laser Experiments / *Mike Tobin et al.*
- 592 Electra as an Oscillator: A Repetitively Pulsed, 500 J, 100 ns, KrF Laser / *M. F. Wolford, F. Hegeler*
- 596 Analysis on Surface Damage Thresholds of a Diode-Pumped Nd: Glass Zig-Zag Slab Laser Amplifier / *O. Matsumoto et al.*

Chapter X: Short Pulse Lasers

- 603 Progress Towards Petawatt Level OPCPA / *J. L. Collier et al.*
- 608 The Petawatt Laser Glass Chain at LULI: From the Diode-Pumped Front End to the New Generation of Compact Compressors / *C. Le Blanc et al.*
- 612 Technical Challenges and Motivations for High Energy Petawatt Lasers on NIF / *C. P. J. Barty et al.*
- 616 Experimental Demonstration of Superradiant Amplification of Ultrashort Laser Pulses in a Plasma / *M. Dreher, M. Jost, D. Habs, K.-J. Witte*
- 621 The Coherent Addition of Gratings for Pulse Compression in High-Energy Laser Systems / *T. J. Kessler et al.*
- 626 Design of a 50 TW/20 J Chirped-Pulse Amplification Laser for High-Energy-Density Plasma Physics Experiments at the Nevada Terawatt Facility of the University of Nevada / *A. C. Erlandson et al.*
- 630 Advanced Compressor Designs for High Energy Petawatt Pulse Generation / *David N. Fittinghoff, Benoit Wattelier, C. P. J. Barty*
- 634 Design and Test of Advanced Multi-Layer Dielectric Gratings for High Energy Petawatt / *W. Molander et al.*
- 638 All Fiber Technology for High-Energy Petawatt Front End Laser Systems / *Jay W. Dawson et al.*
- 642 Technical Issues in the Multi-Petawatt Laser Facility Project on the Ligne d'Intégration Laser (LIL) / *N. Blanchot et al.*
- 646 Parametric Techniques for Extreme-Contrast, High-Energy Petawatt Pulses / *I. Jovanovic, B. Wattelier, C. P. J. Barty*
- 650 Enabling Technology for Fabrication of Meter-Scale Gratings for High-Energy Petawatt Lasers / *J. A. Britten et al.*

- 654 Diffraction Limited Focal Spots for Off-Thermal Equilibrium 100-TW Nd:Glass Laser Chain Using a Dielectric Coated Deformable Mirror / *B. Wattellier et al.*
- 658 Particle-In-Cell Simulations of Raman Laser Amplification in Performed Plasmas / *Daniel S. Clark, Nathaniel J. Fisch*
- 662 The High Intensity Laser Interaction with Near-Free Electron Metals / *J. T. Larsen, A. M. Komashko, A. M. Rubenchik*
- 666 Femtosecond Lasers and Chirped Pulse Phase Conjugation in Nonlinear Crystals / *A. Yu. Goltsov et al.*
- 670 Optical Parametric Chirped-Pulse Amplifier as the Front End for the OMEGA EP Laser Chain / *V. Bagnoud et al.*
- 674 The Design and Performance of OPCPA Based Terawatt and Petawatt Lasers / *B. Schmidt et al.*

Chapter XI: Particle Beams

- 679 Research Activities on Accelerator System for Heavy-Ion Fusion Drivers in Japan / *K. Horioka et al.*
- 684 Simulation of Chamber Transport for Heavy-Ion Fusion Drivers / *W. M. Sharp et al.*
- 689 New Capabilities for Modeling Intense Beams in Heavy Ion Fusion Drivers / *A. Friedman et al.*
- 694 Heavy Ion Beam Illumination Non-Uniformity / *Alexandar Ogoyski, Tetsuo Someya, Tohru Sasaki, Shigeo Kawata*
- 698 The Integrated Beam Experiment—A Next Step Experiment for Heavy Ion Fusion / *C. M. Celata et al.*
- 702 High Current Ion Source Development for Heavy Ion Fusion / *G. A. Westenskow, D. P. Grote, J. W. Kwan*
- 706 Influence of Grid Control on Beam Quality in Laser Ion Source Generating High-Current Low-Charged Copper Ions / *J. Hasegawa et al.*
- 710 Analysis of the Minimum Wobbler Rotation Frequency Required to Uniformly Irradiate a Heavy Ion Driven Cylindrical Target / *A. R. Piriz et al.*
- 714 Emittance Growth Due to Bunch Compression in Final Buncher for HIF / *Takashi Kikuchi, Mitsuo Nakajima, Kazuhiko Horioka, Takeshi Katayama*
- 718 Induction Voltage Modules for Heavy Ion Fusion / *M. Watanabe et al.*

Chapter XII: Z-Pinches and Pulsed Power

- 725 ALEGRA-HEDP Three Dimensional Simulations of Z-Pinch Related Physics / *Christopher J. Garasi*
- 730 Wire Array Z-Pinch Experiments at Imperial College / *S. V. Lebedev et al.*

- 735 XUV and Soft X-Ray Emission from Fast Z-Pinch Discharge / *D. Klir et al.*
- 739 Monochromatic X-Ray Backlighting of Experiments on the Sandia Z-Machine / *Daniel B. Sinars et al.*
- 743 X-Ray and Neutron Emission in Experiment with Al Wire in MA Plasma Focus Discharge / *J. Kravarik et al.*
- 747 Measurement of Hot Spot Brightness Temperature in Dynamic Hohlraum ICF Capsules on Z / *T. J. Nash et al.*

Chapter XIII: Target Fabrication and Injection

- 753 Cost-Effective Target Fabrication for Inertial Fusion Energy / *D. T. Goodin, A. Nobile, D. G. Schroen, J. L. Maxwell, W. S. Rickman*
- 758 Development of Beryllium-Copper Alloy Ignition Capsules / *A. Nobile et al.*
- 762 Demonstration of Symmetry Control of Infrared Heated Deuterium Layers in Hohlräume / *B. J. Kozioziemski, R. A. London, R. L. McEachern, D. N. Bittner*
- 766 Hydrodynamic Issues in PAMS Mandrel Target Fabrication / *B. W. McQuillan, R. Paguio, P. Subramanian, M. Takagi, A. Zebib*
- 770 Microencapsulation Studies for Mass Production of IFE Targets / *B. A. Vermillion et al.*
- 774 Pellet Tracking and Rotational Freezing for Laser-Fusion / *H. Yoshida, Y. Sakagami, T. Kondo, H. Senga, K. Ito*
- 778 Experimental Studies of Convection Effects in a Cryogenic NIF Ignition Target / *J. D. Moody et al.*
- 783 Evaluation of Low Density Materials for Use in Inertial Fusion Targets / *W. P. Steckle, Jr., K. V. Wilson, R. J. Sebring, A. Nobile*
- 787 Fabrication of Foam and Film Targets for ICF / *John Varadarajan et al.*
- 791 Michigan Target Fabrication Facility for Laboratory Astrophysics and High Energy Density Experiments / *K. K. Dannenberg et al.*
- 795 Single Molecular Membrane Glue Technique and Low-Density Foam Fabrication for Laser Plasma Experiments / *Keiji Nagai et al.*
- 799 Study of Non-Contact Suspension Technique of a Pellet for Laser Fusion / *Y. Sakagami et al.*

Chapter XIV: IFE Reactors

- 805 Behaviors of Chamber Wall Materials Exposed to X-Rays and Ions Under Target Implosions for Inertial Fusion Energy / *K. Kasuya et al.*
- 810 UV Laser-Induced Damage to Grazing Incidence Metal Mirrors / *M. S. Tillack, J. E. Pulsifer, K. Sequoia*

- 815** Experimental Target Injection and Tracking System Construction and Single Shot Testing / *R. W. Petzoldt et al.*
- 820** Assessment of Structural and Silica Materials Under Irradiation in Inertial Fusion Reactors: Comparison of Multiscale Modeling and Microscopy / *J. M. Perlado et al.*
- 825** Simulation of X-Ray Irradiation on Optics and Chamber Wall Materials for Inertial Fusion Energy / *S. Reyes, J. F. Latkowski, R. P. Abbott, W. Stein*
- 830** Study of the Hydrodynamics of Vortex Tubes for Use as Beamline Protection Elements in Heavy Ion Inertial Fusion Reactors / *A. Konkachbaev, N. B. Morley, M. A. Abdou*
- 834** Rep-Rated X-Ray Damage and Ablation Experiments for IFE and ICF Applications / *J. F. Latkowski et al.*
- 838** Optimizing Rotation of Injected IFE Pellet by Utilizing Precession / *M. Murakami, K. Nishihara, T. Norimatsu*
- 842** The Role of Organically Bound Tritium After Ingestion in Normal and Accidental Scenarios Caused by Releases from Inertial Fusion Reactors / *M. Velarde, J. M. Parlado, L. Sedano*
- 846** Technology Issues and Benefits of a Fast Ignition Power Plant with Cone Targets / *W. J. Hogan, W. R. Meier*
- 850** Simulation of IFE Chamber Dynamic Response by a Second Order Godunov Method with Arbitrary Geometry / *Zoran Dragojlovic, Farrokh Najmabadi*

Chapter XV: ICF/Plasma Diagnostics

- 857** Core Temperature and Density Profiles from Multispectral Imaging of ICF Plasmas / *J. A. Koch et al.*
- 862** Nonlocal Heat Wave Propagation in a Laser Produced Plasma / *G. Gregori et al.*
- 866** LIL Target Diagnostics / *J. P. Le Breton et al.*
- 871** Target Diagnostic Technology Research and Development for the LLNL ICF and HED Program / *Perry Bell et al.*
- 877** Results and Analysis of Direct Measurements of Neutron Yield Generation Time Delay in Indirect Drive Experiments with Controlled Asymmetry of X-Ray Field / *S. A. Bel'kov, A. V. Bessarab, G. G. Kochemasov, S. P. Martynenko*
- 881** CVD Diamond Detector Stability Issues for Operation at the National Ignition Facility / *G. J. Schmid et al.*
- 884** Experimental Results on the Effects of Line Merging in Spectral Line Data Analysis / *Mark A. Gunderson, Donald A. Haynes, Jr., Norman D. Delamater, Sean P. Regan*
- 888** Neutron Scintillators for Downscattered Neutron Imaging / *Michael J. Moran, Jeffrey Koch, Carlos A. Barrera, Edward C. Morse*

C. Fundamental High Energy Density Science and Other Applications of ICF Technology

Chapter XVI: Equation of State and Condensed Matter Physics

- 897** Recent Developments in High Pressure Physics Using Laser Driven Shocks / *M. Koenig et al.*
- 902** Electronic Structure Measurement of Solid Density Plasmas Using X-Ray Scattering / *G. Gregori et al.*
- 907** Applications of Intense Heavy Ion Beams to Studies of Thermophysical Properties of High-Energy-Density Matter / *N. A. Tahir et al.*
- 912** Dense Plasma Physics Studied with XFELS / *J. Meyer-ter-Vehn et al.*
- 917** Materials Science at the Extremes of Pressure and Strain Rate / *B. A. Remington et al.*

Chapter XVII: Laboratory Astrophysics

- 925** Collisionless Laboratory Experiments with Applications to Shock Physics / *N. C. Woolsey et al.*
- 930** Simulation and Modeling of Rayleigh-Taylor and Richtmyer-Meshkov Instabilities Relevant to Type II Supernovae / *M. Tricottet, S. Bouquet, N. Inogamov*
- 935** Prospects for Investigating Unusual Nuclear Reaction Environments Using the National Ignition Facility / *S. B. Libby et al.*
- 940** Hydrodynamic Instability of Ionization Fronts in HII Regions / *Akira Mizuta et al.*
- 945** A “Perfect” Hydrodynamic Similarity and the Effect of Small-Scale Vortices on the Large-Scale Dynamics / *D. D. Ryutov, B. A. Remington*
- 950** Collapsing Radiative Shocks in Argon Gas on the Omega Laser / *A. B. Reighard et al.*
- 954** Microscopic Aspects of Radiative Shock Structures / *C. Michaut, C. Stehlé, L. Boireau, S. Leygnac*
- 958** Characterization of Electron Densities and Temperatures in Radiative Shocks / *Sébastien Leygnac et al.*
- 962** Laboratory Simulations of Supernova Shockwave Propagation and ISM Interaction / *J. F. Hansen et al.*
- 966** Radiative Shocks in Low Pressure Gases / *L. Boireau, C. Clique, S. Bouquet*
- 970** Compressible Rayleigh-Taylor Instabilities Relevant to Astrophysics / *X. Ribeyre, V. T. Tikhonchuk, S. Bouquet*
- 974** Laboratory Simulation of the Dynamics and Instabilities of Space Plasma Clouds Exploding in Magnetized Background / *Yu. P. Zakharov et al.*

Chapter XVIII: Hot Dense Plasma Atomic Processes

- 981 Recent Developments in the Field of Atomic Physics in Hot Dense Plasmas / *O. Peyrusse*
- 987 Absorption of LTE Aluminum and Nickel at Different Densities / *S. Bastiani-Ceccotti et al.*
- 992 X-Ray Satellite Spectra of H-Like MG Ions / *T. Kano, R. More, N. Yamamoto, H. Nishimura, F. B. Rosmej*
- 997 A Comparative Study of Photoionization Cross Sections by Using Several Atomic Models / *R. Rodriguez et al.*
- 1002 Potential Energy Contributions to Temperature Relaxation in Dense Fusion Plasmas / *D. O. Gericke, M. S. Murillo*
- 1006 Calculation of Radiative Properties and Line Transitions of Dense Hot Low Z Plasmas Using Analytical Potentials / *J. M. Gil et al.*
- 1010 Effective Charge of Heavy Ions Interacting with a Dense Helium Plasma / *J. Hasegawa et al.*
- 1014 Radiation Leakage from Degenerate Plasmas in ICF Targets / *Shalom Eliezer, Pablo T. León, José M. Martínez-Val*
- 1018 Characterization of Non-LTE Gold Plasmas in Controlled Conditions with Finite T_r / *R. F. Heeter et al.*
- 1022 Kinetics Modeling of $K\alpha$ Emissions from Partially Ionized Chlorine Atoms in Ultra-Intensity Laser Plasmas / *T. Kawamura et al.*

Chapter XIX: Laser Acceleration

- 1029 Theoretical Perspectives on the Laser-Plasma Sources of Energetic Particles and Hard X-Rays / *A. Pukhov, S. Kiselev, I. Kostyukov, O. Shorokhov*
- 1035 Influence of Laser Pulse Duration on High Energy Ion Generation / *K. Nemoto et al.*
- 1040 Electron Acceleration Above 100 MeV and Trapping in Capillary Target / *Yoneyoshi Kitagawa et al.*
- 1045 Electron Bunch Acceleration by an Intense Short Pulse Laser / *Shuji Miyazaki, Qing Kong, Shigeo Kawata*
- 1049 Electron Acceleration by Intense Laser Field with Static Magnetic Field / *Tatsufumi Nakamura et al.*
- 1053 Maxwell Vlasov Simulation for Laser Electron Acceleration / *Takashi Nakamura, Mayumi Shitamura, K. Miyauchi, Shigeo Kawata*

Chapter XX: X-Ray Lasers, UV Radiation Sources and Other Applications

- 1059 Demonstration of a Soft X-Ray Laser with Full Spatial Coherence and Diffraction Limited Divergence / *Masaharu Nishikino et al.*

- 1064** Alternative Applications of Short Pulse Version of Mercury Fusion Laser Technology / *James Early*
- 1069** Theoretical Modeling of Laser-Produced Plasmas for Development of Extreme UV Radiation Source for Lithography / *K. Nishihara et al.*
- 1074** On a Phonon-Driven Solid-State X-Ray Laser / *G. H. Miley, A. G. Lipson, N. Luo, A. B. Karabut*
- 1077** Characterization of Extreme UV Radiation in Laser Produced Plasma for Use in Lithography / *H. Nishimura et al.*
- 1081** Numerical Study of Laser Target Experiments at Lebedev Physical Institute / *I. G. Lebo et al.*
- 1086** Laser Energy Transformation into Ultrashort K- α Pulses in Layered Targets / *J. Limpouch, O. Klimo, A. A. Andreev*
- 1090** Orion Revisited / *J. G. Linhart, J. Kravárik*
- 1094** Relativistic Nonlinear Thomson Scattering: As an Attosecond X-Ray Source / *K. Lee et al.*
- 1098** Relativistic Nonlinear Thomson Scattering: Harmonic Structures in Space and Time / *K. Lee et al.*
- 1102** The Analysis of Anomalous Isotopes Synthesized by Electron-Nucleus Collapse and a Model of Generation and Evolution of Stable Superheavy Nuclei / *S. V. Adamenko, V. I. Vysotskii*
- 1106** Laboratory Simulation of ICF-Energy and Plasma Momentum Conversions in a Laser Fusion Rocket with Dipole-Like Magnetic Field / *Yu. P. Zakharov*
- 1110** Magnetic Field Generation in Underdense Plasmas Due to Anisotropic Laser Heating / *B. Dubroca, M. Tchong, P. Charrier, V. Tikhonchuk, J.-P. Morreuw*
- 1115** Author Index
