

Preface

I. General Plenary Session

Overview of Laser Fusion Research in Asia
 T. Yamanaka 3

Inertial fusion and high-energy-density science in the United States
 C.B. Tarter 9

Progress Towards Inertial Fusion
 R. Pellat 17

High Power Laser Applications in the EU
 M.H.R. Hutchinson 22

Prospects of the high power laser applications in the 21st century
 C. Yamanaka 30

II. Edward Teller Medal Lecture

A survey of studies on ignition and burn inertially confined fuels
 S. Atzeni 45

Problems and solutions in the design and analysis of early laser driven high energy density and ICF target physics experiments
 M.D. Rosen 53

A. Physics of Inertial Fusion

III. Implosion Hydrodynamics and Hydro-Instability

Modeling on nonlinear growths of hydrodynamic instabilities in laser implosion
 K. Nishihara, T. Ikegawa, Y. Fukuda, C. Matsuoka, M. Murakami, A.R. Piriz, J.G. Wouchuk, and V.V. Zhakhovskii 65

Studies in the nonlinear evolution of hydrodynamic instabilities and their role in inertial confinement fusion
 D. Shvarts, U. Alon, L. Arazi, G. Ben-Dor, Y. Elbaz, G. Hanoach, R. Kishony, D. Kartoon, L.A. Levin, D. Oron, A. Rikanati, O. Sadot, E. Sarid, Y. Srebro, Y. Yedvab, and A. Yosef-Hai 71

On RT and RM single-mode solutions
 M. Tricottet, N.A. Inogamov, A.M. Oparin, and S. Bouquet 76

Hydrodynamic instability experiments conducted at the GEKKO/HIPER laser facility	
H. Azechi, M. Nakai, H. Shiraga, K. Shigemori, N. Miyanaga, M. Nishikino, T. Sakaiya, H. Nishimura, H. Nagatomo, A. Sunahara, K. Nishihara, and H. Takabe	80
Recent results at Los Alamos National Laboratory of radiation hydrodynamics and turbulence experiments in cylindrical geometry	
G.R. Magelssen, S.H. Batha, C.W. Barnes, R.D. Day, A.M. Dunne, N.E. Elliott, R.L. Holmes, J. M. Scotts, S. Rothman, D.L. Tubbs, D.L. Youngs, T.R. Boehly, and P. Jaanimagi	84
High-density, direct-drive implosions on OMEGA	
S.P. Regan, J.A. Delettrez, B. Yaakobi, V.A. Smalyuk, F.J. Marshall, R. Epstein, V.Yu. Glebov, P.A. Jaanimagi, D.D. Meyerhofer, P.B. Radha, W. Seka, S. Skupsky, J.M. Soures, C. Stoeckl, R.P.J. Town, D.A. Haynes, C.F. Hooper Jr., C.K. Li Jr., R.D. Petrasso, and F.H. Séguin	89
Direct-drive implosions on SG-II and the SG-III project	
H.S. Peng, Z.J. Zheng, X.M. Zhang, Y.J. Tang, X.F. Wei, Y.K. Ding, B.H. Zhang, D.Y. Fan, and Z.Q. Lin	96
Effects of initial disturbances of converging shock waves on heavy/light interfacial instability	
S.H.R. Hosseini, K. Takayama	101
Molecular dynamics simulation on stability of converging shocks	
V. Zhakhovskii, K. Nishihara, and M. Abe	106
Evolution of the mixing zone between gases of different densities in a field of variable acceleration	
S.G. Zaytsev, V.V. Krivets, I.M. Mazilin, S.N. Titov, E.I. Chebotareva, V.V. Nikishin, V.F. Tishkin, S. Bouquet, and J.F. Haas	111
The modeling and understanding of LMJ implosions	
P.A. Holstein, M. Bonnefille, P. Cargo, F. Chaland, C. Cherfils, E. Dattolo, E. de Prandières, D. Galmiche, J. Giorla, B. Huguenin, M.C. Monteil, Y. Saillard, D. Vanderhaegen, and F. Wagon	116
The effect of a fine bandwidth on the weakly nonlinear ablative Rayleigh-Taylor instability	
T. Ikegawa, K. Nishihara, and A.R. Piriz	121
OMEGA direct-drive cryogenic target physics	
R.P.J. Town, V.N. Goncharov, P.W. McKenty, J.A. Delettrez, R. Epstein, and R.L. McCrory	126
Hydrodynamical deceleration phase of shell implosion	
Y. Saillard	132
Diagnostics of electron temperature and density gradients in laser imploded core plasmas	
Y. Ochi, K. Fujita, M. Fukao, A. Sunahara, H. Nishimura, H. Shiraga, M. Nakai, N. Miyanaga, H. Azechi, T. Yamanaka, I. Golovkin, R.C. Mancini, R. Butzbach, I. Uschmann, E. Foerster, R.W. Lee, and L. Klein	136

Analysis of hydrodynamic instabilities in implosion using high-accuracy integrated implosion code	
H. Nagatomo, N. Ohnishi, K. Mima, K. Sawada, K. Nishihara, and H. Takabe	140
Implosion nonuniformity smoothing effect by radiation in a density valley formed by a heavy ion beam in inertial confinement fusion	
J. Sasaki, T. Nakamura, T. Someya, K. Shimizu, M. Shitamura, and S. Kawata	143
NIF ignition physics ablator characterization experiments	
R.J. Leeper, R.E. Olson, G.A. Chandler, T. Archuletta, J. Faulkner, A. Nobile, J. Oertel, K. Loughman, V. Rekow, R. Turner, R. Wallace, J. Knauer, G. Pien, and S. Morse	147
Experimental study on laser imprinting at GEKKO XII	
M. Nakai, Y. Kanai, H. Azechi, N. Miyanaga, K. Shigemori, T. Kawasaki, T. Nagaya, M. Nishikino, D. Ohnuki, H. Shiraga, H. Nishimura, T. Norimatsu, O. Maegawa, R. Ishizaki, K. Nishihara, and T. Yamanaka	154
Uniform target acceleration by high power KrF laser	
I. Matsushima, E. Takahashi, Y. Matsumoto, I. Okuda, S. Kato, and Y. Owadano	158
Perturbation transfer between front and rear surfaces of laser-irradiated targets	
K. Shigemori, H. Azechi, M. Nakai, K. Nishihara, T. Nagaya, and T. Yamanaka	162
Target internal perturbation caused by shine through of incident laser light	
M. Nishikino, H. Shiraga, K. Fujita, S. Fujioka, Y. Ochi, Y. Tamari, T. Sakaiya, K. Shigemori, N. Miyanaga, K. Nagai, M. Nakai, H. Azechi, H. Nishimura, S. Nakai, and T. Yamanaka	166
Penumbral imaging for ablation density measurement	
S. Fujioka, H. Shiraga, M. Nishikino, M. Heya, K. Shigemori, M. Nakai, H. Azechi, and T. Yamamaka	170
Observation of ablative Rayleigh-Taylor growth at short wavelength with Moiré Interferometry	
T. Sakaiya, H. Azechi, M. Matsuoka, N. Izumi, M. Nakai, K. Shigemori, A. Sunahara, and T. Yamanaka	174
Growth of short wavelength perturbation at x-ray ablation front	
W.H. Ye, X.T. He	178
Deceleration phase Rayleigh-Taylor instability of igniting ICF targets	
S. Atzeni, M. Temporal, and J.J. Honrubia	182
IV. Ignition and High Gain Pellet Design	
Ignition target physics at CEA	
S. Jacquemot	186

Implosion theory and ignition threshold of ICF targets	
Y. Saillard	192
Stagnation pressure of imploding shells and ignition energy scaling of ICF targets	
J. Meyer-ter-Vehn, A. Kemp, and S. Atzeni	197
Prospects of the ICF target symmetrical compression by a small number of the irradiating beams or beam clusters	
V.B. Rozanov, S. Yu. Guskov, R.V. Stepanov, V.V. Nikishin, V.F. Tishkin, N.V. Zmitrenko, N.G. Kovalskiy, A. Caruso, and C. Strangio	202
Update on NIF indirect drive ignition target design	
S.W. Haan, T. Dittrich, S. Hatchett, D. Hinkel, M. Marinak, D. Munro, O. Jones, S. Pollaine, and L. Suter	207
Progress toward ignition with non-cryogenic double-shell capsules	
N.D. Delamater, R.G. Watt, W.S. Varnum, D. Wilson, G. Pollak, A. Nobile, P. Amendt, R. Turner, V. Glebov, J. Soures, J. Colvin, C. Stoeckl, P. Walsh, and S. Evans	212
Hohlraum-driven noncryogenic double-shell ignition target designs for the National Ignition Facility	
P.A. Amendt, J. Colvin, M.J. Edwards, O.L. Landen, K. Mkaelian, D. Rowley, L.J. Suter, R.E. Tipton, and W. Varnum	217
Two-dimensional transport code for alpha-particles in ICF plasmas	
Y. Nakao, Y. Kuroki, and T. Johzaki	222
Numerical study for the LMJ target 2D design	
S. Laffite, M. Bonnefille, P. Cargo, F. Chaland, J. Giorla, T. Hedde, Y. Saillard, and G. Schurtz	227
Target design modeling and inertial fusion considerations for safety, environment and materials	
G. Velarde, J.M. Perlado, M. Alonso, E. Dominguez, J.G. Rubiano, J.M. Gil, J. Gomez del Rio, D. Lodi, J. Marian, P. Martel, J.M. Martinez-Val, E. Minguez, M. Piera, F. Ogando, R. Rodriguez, S. Reyes, M. Salvador, J. Sanz, P. Sauvan, M. Velarde, and P. Velarde	231
Alpha-particle diffusion code for multi-dimensional ICF simulations	
T. Johzaki, Y. Nakao, and Y. Kuroki	236
High-gain, direct-drive target designs for the National Ignition Facility	
S. Skupsky, R. Betti, V.N. Goncharov, R.L. McCrory, P.W. McKenty, and R.P.J. Town	240
New fabrication technology of novel construction of ICF targets	
O.N. Krokhin, E.R. Koresheva, and Yu.A. Merkulov	246
Implosion simulations of foam-buffered target for ignition experiments	
T. Takeda, K. Mima, H. Nagatomo, and A. Nishiguchi	250

V. Laser Plasma Interaction

Modification of the coherence properties of a laser beam by a plasma	
C. Labaune, J. Fuchs, S. Depierreux, H. Bandulet, P. Michel, and H.A. Baldis	255
Photon condensation and soliton turbulence in relativistic laser-plasma interaction	
Lj. Hadzievski, M.S. Jovanovic, M.M. Skoric, and K. Mima	261
Experimental investigation of megagauss magnetic fields in self-focused plasma channels and accelerated plasma blocks	
N.I. Vogel	266
Evolution of nonlinear laser filaments in plasmas	
W. Rozmus, A.V. Maximov, R.L. Berger, V.T. Tikhonchuk, D. Pesme, and C.E. Capjack	271
Direct numerical solution of collision term in the Fokker-Planck equation toward a laser-plasma interaction	
Y. Uchida, T. Nakamura, K. Shimizu, M. Shitamura, and S. Kawata	276
Paraxial propagation of smoothed laser beams in long plasmas in indirect drive fusion studies	
G. Bonnaud, F. Walraet, G. Riazuelo, D. Mourenas, and O. Bertrand	281
Characterization of laser-produced plasma and interaction processes in experiments with porous low-density targets	
A.E. Bugrov, I.N. Burdonskiy, V.V. Gavrilov, A.Yu. Goltsov, V.N. Kondrashov, N.G. Kovalskiy, S.F. Medovchshikov, M.I. Pergament, V.P. Petryakov, and E.V. Zhuzhukalo	286
Laser-plasma interactions in high temperature hohlraums	
D.E. Hinkel, A.B. Langdon, and L.J. Suter	291
Temporal incoherence induced upon a high-intensity beam by plasma propagation	
J. Fuchs, C. Labaune, S. Depierreux, H. Bandulet, P. Michel, and H.A. Baldis	296
AMR method for the simulation of laser plasma interaction with full non-linear hydrodynamics	
J.L. Feugeas, M. Casanova, and R. Sentis	301
Constrained interpolation profile scheme for solving the hyper-dimensional Vlasov-Maxwell system in laser-plasma interaction	
T. Nakamura, M. Shitamura, Y. Uchida, and S. Kawata	306
Dependence of high-energy proton production on a slab plasma density illuminated by a high-power short-pulse laser and origin of protons	
T. Nakamura, S. Kawata, J. Sasaki, M. Shitamura, Y. Uchida, and T. Someya	311
Radiation drive in hohlraums heated by 1.053 μm laser	
Y. K. Ding, T.X. Huang, K.X. Sun, S.E. Jiang, W.Y. Miao, Z.J. Zheng, and H.S. Peng	315

Experimental study of anomalous absorption and scattering in laser-irradiated burnthrough foils and porous targets V.N. Kondrashov, I.N. Burdonskiy, I.K. Fasakhov, N.G. Kovalskiy, V.M. Petryakov, and G.M. Yankovskii	319
X-ray measurements of plasma parameters in laser-irradiated low-density porous targets A.Ya. Faenov, I.K. Fasakhov, V.V. Gavrilov, A.Yu. Goltsov, S.N. Koptyaev, A.I. Magunov, T.A. Pikuz, and I.Yu. Skobelev	323
Stochastic analysis on electron acceleration by intense laser field T. Nakamura, S. Kato, and T. Kato	327
The features of craters formation on the target under the action of powerful laser pulse A.A. Rupasov, E.A. Bolkhovitinov, I.Ya. Doskach, A.A. Erokhin, S.I. Fedotov, L.P. Feoktistov, S.Yu. Guskov, B.V. Kruglov, M.V. Osipov, V.N. Puzirev, V.B. Rozanov, A.S. Shikanov, V.B. Studenov, B.L. Vasin, and O.F. Yakushev	331
Self-organization in a high intensity laser plasma interaction Lj. Nikolic, S. Ishiguro, H. Takamaru, M. Skoric, and T. Sato	335
Thomson scattering measurement of gold plasmas produced with 0.351μm laser light Jian Zheng, Bo Bai, Wandong Liu, C.X. Yu, Xiaohua Jiang, Xiaodong Yuan, Wenhong Li, Z.J. Zheng, and K.A. Tanaka	339
Recent results on the role of kinetic effects and wave-wave interactions in stimulated raman backscattering in long-scale plasmas J.C. Fernandez, D.S. Montgomery, R.J. Focia, B. Bezzerides, J.A. Cobble, D.F. DuBois, H.A. Rose, and H.X. Vu	343
Temporal evolution of self-generated magnetic fields in intense femtosecond laser solid interactions A.S. Sandhu, P.P. Rajeev, A. Dharmadhikari, and G.R. Kumar	349
Absorption of high intensity femtosecond laser pulses by coupling to surface modes S.S. Gupta, P.K. Kaw, and A. Satsangi	353
 VI. Fast Ignition	
Studies of energy transport by relativistic electrons in the context of fast ignition M.H. Key, F. Amirano, C. Andersen, D. Batani, S.D. Baton, T. Cowan, N. Fisch, R. Freeman, L. Gremillet, T. Hall, S. Hatchett, J. Hill, J. King, J. Koch, M. Koenig, B. Lasinski, B. Langdon, A. MacKinnon, E. Martinolli, P. Norreys, P. Parks, E. Perelli-Cippo, M. Rabec Le Gloahec, M. Rosenbluth, C. Rousseaux, J.J. Santon, F. Scianitti, R. Snavely, and R. Stephens	357

Review of fast ignition related research at ILE Osaka University K.A. Tanaka, R. Kodama, Y. Kitagawa, H. Fujita, M. Heya, N. Izumi, T. Jitsuno, K. Mima, N. Miyanaga, H. Nishimura, T. Norimatsu, Y. Sentoku, K. Shigemori, A. Sunahara, S. Akamatsu, T. Matsusita, T. Miyakoshi, F. Otani, T. Shozaki, M. Tanpo, S. Tohyama, T. Yamanaka, P.A. Norreys, and M. Zepf	362
Acceleration of ultrashort, dense and quasi-monoenergetic electron bunches in laser-plasma cavities A. Pukhov, J. Meyer-ter-Vehn	367
Three-dimensional particle-in-cell simulations of energetic electron generation and transport with relativistic laser pulses in overdense plasmas Y. Sentoku, K. Mima, M. Honda, Z.M. Sheng, P. Kaw, K. Nishihara, and K. Nishikawa	370
Study of fast electron transport in ultra-intense laser pulse interaction with solid S.D. Baton, J. Santos, E. Martinolli, F. Amirano, L. Gremillet, M. Koenig, M. Rabec, C. Rousseaux, D. Batani, E. Perelli, F. Scianitti, T. Hall, C. Andersen, R. Freeman, J. King, R. Snavely, S. Hatchett, M. Key, J.A. Koch, A.J. MacKinnon, T.E. Cowan, and R.B. Stephens	375
Fast ignition simulations with collective PIC code H. Sakagami, K. Mima	380
Targets for fast ignition by laser generated fast proton beams S. Atzeni, T.E. Cowan, J.J. Honrubia, J. Meyer-ter-Vehn, A. Pukhov, J. Ramirez, R. Ramis, M. Roth, H. Ruhl, and M. Temporal	384
Auxiliary heating scheme for ICF ignition Shensheng Han, Yanqing Wu, Jing Cheng, Yuhui Tang, Cheng Wang, Changxue Zhang, Xiandong Li, and Zhizhan Xu	388
One step high compression inertial confinement fusion at low temperatures H. Hora, P. Touns, P. Evans, F. Osman, R. Castillo, K. Mina, M. Murakami, S. Nakai, K. Nishihara, C. Yamanaka, and T. Yamanaka	392
Giant emission of laser driven ion source and picosecond interaction H. Hora, R. Hopfl, J. Badziak, P. Parys, E. Woryna, J. Wolowski, F.P. Boody, K. Jungwirth, J. Ullschmied, B. Kralikova, J. Krasa, L. Laska, M. Pfeifer, K. Rohlena, J. Skala, and V. Perina	396
Relativistic self-focusing for the conditions of the fast ignitor F. Osman, M. Collins, R. Castillo, and H. Hora	400
Study on energy transport and deposition in ultra-intense laser plasma interactions by Kα line spectroscopy H. Nishimura, T. Kawamura, Y. Ochi, R. Matsui, W. Miao, M. Fukao, S. Okihara, S. Sakabe, Y. Yoshizumi, Y. Sentoku, F. Koike, I. Uschmann, E. Foerster, R. Kodama, Y. Kitagawa, K.A. Tanaka, and K. Mima	405
Optimizing the structure of fast ignition targets R.B. Stephens, S. Hatchett	409

Nonlocal sausage like instability of a two component relativistic electron MHD current filament K. Mima, M. Honda, A. Das, and P. Kaw	413
Back-scattered light spectrum from stimulated Raman instability driven by ultra-intense laser in underdense plasma T. Miyakoshi, K.A. Tanaka, R. Kodama, T. Kawasaki, M.S. Jovanovic, Y. Sentoku, A.O. Enberger, Y. Kitagawa, and K. Mima	417
Neutron yield in conic targets with additional laser fuel heating I.G. Lebo	421
Hot electron characterization from solid-laser interaction up to 10^{20} W/cm² intensity level K. Yasuike, R.A. Snavely, S.P. Hatchett, and M.H. Key	425

VII. Radiation Hydrodynamics

Target designs for an inertial fusion energy power plant driven by heavy ions D.A. Callahan-Miller, M. Tabak	429
LMJ hohlraum design: status of our studies (Indirect Drive) J. Giorla, M. Bonnefille, P. Cargo, F. Chaland, C. Charpin, M. Clanet, E. Dattolo, T. Hedde, B. Huguenin, S. Laffite, C. Leromain, M.C. Monteil, F. Poggi, and Y. Saillard	434
Robustness of the LMJ target versus experimental uncertainties F. Poggi, J. Giorla	439
Direct experimental determination of spatial temperature, density, and mix for LTE implosions G. Pollak	443
Interaction of soft x-ray thermal radiation with foam layered targets D. Batani, T. Desai, Th. Lower, T. Hall, W. Nazarov, M. Koenig, and A. Benuzzi	447
X-ray absorption of radiatively heated Al/Ni multilayered foils C. Chenais-Popovics, F. Thais, F. Gilleron, J.C. Pain, T. Blenski, M. Fajardo, J.C. Gauthier, W. Fösner, and K. Eidman	451

B. Laser, Particle Beams and Fusion Technology

VIII. High Power Laser and Ignition Facilities

Activation of the Mercury laser system: A diode-pumped solid-state laser driver for inertial fusion A.J. Bayramian, R.J. Beach, C. Bibeau, A. Ebberts, B.L. Freitas, V.K. Kanz, K.I. Schaffers, K.M. Skulina, S.A. Payne, L.K. Smith, and J.B. Tassano	459
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

KrF laser program at AIST

Y. Owadano, I. Okuda, I. Matsushima, Y. Matsumoto, E. Takahashi, S. Kato, and E. Mimura	465
-----------------------------------------------------------------------------------------	-----

Status of laser fusion research in China

X.T. He	470
---------	-----

Petawatt laser for fast ignitor and laser matter interaction researches

Y. Kitagawa, H. Fujita, R. Kodama, H. Yoshida, T. Jitsuno, S. Sakabe, K.A. Tanaka, H. Nishimura, Y. Izawa, K. Mima, and T. Yamanaka	475
-------------------------------------------------------------------------------------------------------------------------------------	-----

The Vulcan petawatt interaction facility

C.N. Danson, J.L. Collier, C.B. Edwards, M.H.R. Hutchinson, D. Neely, and B. Wyborn	479
-------------------------------------------------------------------------------------	-----

LIL: status and commissioning

F. Kovacs	484
-----------	-----

Successful operation of 8 beam SG-II laser facility at both $1\omega_0$ and $3\omega_0$ output in Shanghai

Z. Lin, S. Wang, D. Fan, Y. Gu, Z. Zheng, J.Q. Zhu, J. Zhu, G. Huang, and Y. Yang	490
-----------------------------------------------------------------------------------	-----

Electra: A krypton fluoride laser for fusion energy

J. Sethian, M. Friedman, J. Giuliani, R. Lehmbert, M. Myers, S. Obenschain, F. Hegeler, and S. Swanekamp	495
----------------------------------------------------------------------------------------------------------	-----

Technological issues for krypton fluoride IFE drivers: e-beam transport and optics stability

V.D. Zvorykin, S.V. Arlantsev, V.G. Bakaev, N.V. Morozov, O.V. Rantsev, P.B. Sergeev, G.V. Sychugov, and A.Yu. Tserkovnikov	500
-----------------------------------------------------------------------------------------------------------------------------	-----

Diode-pumped solid-state laser driver (HALNA) development

T. Kawashima, T. Kanabe, Y. Tamaoki, T. Kurita, Y. Kato, M. Yamanaka, M. Nakatsuka, Y. Izawa, S. Nakai, H. Furukawa, T. Kanzaki, and H. Kan	505
---------------------------------------------------------------------------------------------------------------------------------------------	-----

A new regime of plasma-electrode pockels cell operation for the Laser Megajoules project

J. Gardelle, E. Pasini, and B. Birel	510
--------------------------------------	-----

Large continuous phase plate design, manufacturing and control

J. Néauport, X. Ribeyre, L. Videau, D. Valla, V. Beau, J. Flamand, G. De Vilette, F. Bonnemason, and Y. Jossierand	514
--------------------------------------------------------------------------------------------------------------------	-----

Comparison of debris shield impacts for two possible NIF experiments

M.T. Tobin, D. Eder, M. Shaw, and B. MacGowan	518
-----------------------------------------------	-----

Gain measurement of Nd-doped-silica-glass for high power lasers

Y. Fujimoto, M. Nakatsuka	524
---------------------------	-----

Progress of plasma electric pockels cell research in China

K.X. Zheng, J.P. Lu, X.M. Zhang, X.F. Wei, J.G. Zheng, Y. Dong, and B. Feng	528
-----------------------------------------------------------------------------	-----

Investigations of x-ray transport and materials heating on 'Iskra5' laser V. Afanasieva, A. Bazin, A. Bessarab, E. Vasina, V. Vatulin, V. Gaidach, G. Eliseev, N. Zhidkov, V. Izgorodin, G. Kirillov, V. Murugov, S. Petrov, A. Pinegin, A. Senik, O. Suraeva, N. Suslov, and A. Kharitonov	532
Final optics assembly design for the Laser Megajoule A.C.L. Boscheron, L. Delpierre, A. Dulac, F. Gauldt, O. Bonville, F. Malka, and E. Journot	536
Technical advances in the continuous melting of phosphate laser glass T. Suratwala, C. Thorsness, J. Campbell, K. Takeuchi, K. Suzuki, K. Yamamoto, J. Cimino, A. Thorne, and J. Hayden	540
Analysis of thermal effects on laser-diode pumped zig-zag slab solid state lasers for inertial fusion energy H. Furukawa, T. Kuroda, Y. Kato, T.Kawashima, M. Yamanaka, Y. Izawa, S. Nakai, and C. Yamanaka	544
Multi-pass forward Raman pulse compression experiments by using D₂ gas medium Y. Matsumoto, E. Takahashi, K. Kuwahara, I. Matsushima, I. Okuda, and Y. Owadano	548
Development of a high-repetition-rate electron-beam-pumped KrF laser I. Okuda, E. Takahashi, I. Matsushima, Y. Matsumoto, S. Kato, and Y. Owadano	552
The Laser Megajoule power balance from a statistical point of view B.J. Le Garrec, J.M. Di-Nicola, and H. Dudmont	556
Laser irradiance profile smoothing by three directional spectral dispersion implemented into the GEKKO XII G. Miyaji, S. Matsuoka, S. Urushihara, A. Morimoto, T. Kobayashi, and N. Miyanaga	560
Status of the technical integration line X.F. Wei, X.M. Zhang, F. Jing, Z.H. Sui, W.G. Zheng, H.S. Peng, D.Y. Fan, and X.T. He	564
Development of probe laser system Y.B. Chen, X.D. Yuan, J. Tang, J.G. Chen, L.F.Guo, J.B. Zhang, W. Deng, X.D. Wang, X. M. Zeng, B. Xu, C.Z. Zhao, Y. Xiang, Y.F. Wang, and D.M. Li	568
PALS - the first year of operation J. Ullschmied, A. Cejnarova, L. Juha, K. Jungwirth, B. Kolman, M. Kozlova, B. Kralikova, J. Krasa, E. Krousky, P. Krupickova, P. Kubat, L. Laska, K. Masek, T. Mocek, M. Pfeifer, A. Präg, O. Renner, K. Rohlena, B. Rus, J. Skala, P. Straka, and H. Turcicova	572
High power ceramic laser J. Lu, K. Ueda, H. Yagi, T. Yanagitani, Y. Akiyama, and A.A. Kaminskii . . .	576
Wave front correction for high power laser chains using a phase modulator or a deformable mirror B. Wattelier, J. Fuchs, H. Bundulet, P. Michel, J.C. Chanteloup, and S. Pepierreut	580

PHELIX, a Petawatt high energy laser for heavy-ion experiments T. Kuehl, J. Alvarez, B. Becker-de Mos, R. Bock, S. Borneis, H. Brand, D. Browning, C. Bruske, K. Brück, J. Caird, E. Dewald, C. Haefner, D.H.H. Hoffmann, H.J. Kluge, D. Marx, P. Neumayer, M. Perry, H. Powell, I. Reinhard, M. Roth, W. Seelig, A. Tauschwitz, and R. Wilcox	584
Front-end system using a broadband high-gain OPCPA for chirped pulse amplification H. Yoshida, E. Ishii, K. Sawai, R. Kodama, H. Fujita, Y. Kitagawa, S. Sakabe, N. Miyanaga, Y. Izawa, T. Yamanaka, and M. Fujita	588
IX. Heavy Ion Beam Driver and its Interactions with Matter	
Perspectives of the GSI accelerator complex for fusion driver studies P. Spiller, K. Blasche, O.B. Frankenheim, I. Hoffmann, and N. Tahir	592
Energy loss of 6MeV/u56 Fe ions in Z-pinch helium plasma as a function of charge state and plasma density M. Ogawa, J. Hasegawa, K. Sakai, N. Yokoya, M. Yoshida, M. Kojima, Y. Oguri, N. Nakajima, and K. Horioka	597
Creation of high-energy-density matter using intense beams of energetic heavy ions N.A. Tahir, A. Kozyreva, D.H.H. Hoffmann, A. Shutov, and P. Spiller	602
Space resolved charge state distribution of fast ions inside matter O.N. Rosmej, J. Wieser, M. Geißel, E. Brambrink, C. Niemann, A. Blazevic, M. Roth, E. Dewald, D.H.H. Hoffmann, A. Golubev, V. Turtikov, A. Fertman, A. Borisenko, and V.P. Shevelko	607
Beam final transport and focusing in heavy ion beam inertial confinement fusion T. Someya, T. Nakamura, J. Sasaki, and S. Kawata	612
Beam-plasma interaction study with laser plasma induced from solid hydrogen M. Kojima, K. Nishigori, T. Mitomo, J. Hasegawa, Y. Oguri, and M. Ogawa	616
Magnetized cylindrical targets for heavy ion fusion A.J. Kemp, M.M. Basko, and J. Meyer-ter-Vehn	619
Beam-plasma experiments at RIKEN A. Sakumi, T. Katayama, T. Nishimoto, K. Shibata, and Y. Oguri	623
Repetitive induction module for ion acceleration K. Horioka, M. Nakajima, M. Watanabe, M. Honda, E. Hotta, M. Shiho, M. Ogawa, J. Hasegawa, J. Kishiro, and K. Takayama	627
Simulation of recent and future experiments on heating of rare gas solid by heavy ions A. Kozyreva, N.A. Tahir, D. Varentsov, P. Spiller, A. Shutov, and D.H.H. Hoffmann	631

Charge-changing processes of low-energy heavy ions in a dense non-hydrogenic plasma Y. Oguri, K. Tsubuku, K. Shibata, T. Nishimoto, J. Hasegawa, and M. Ogawa	635
Development of high brightness ion sources using moderate power lasers J. Hasegawa, M. Yoshida, S. Fukata, Y. Oguri, and M. Ogawa	639
Induction beam buncher for relativistic heavy ion beams T. Kikuchi, M. Nakajima, and K. Horioka	643
Simple calculation of surface layer thickness of various IFE reactor candidate material ablated by high fluence x-ray K. Kinoshita, K. Kasuya	647
Hydro processes in high temperature dense plasma under the impact of intense ion beams E.G. Vasina, V.S. Afanasieva, G.M. Eliseev, O.A. Vinokurov, S.I. Skrypnik, A.M. Gorbunov, A.V. Kharitonov, N.A. Ryabikina, and V.V. Vatulin	651
X. Z-pinch and Pulse Power Technology and Their Interactions with Matter	
ICF experiments in the Kurchatov Institute	
A. Kingsep, Yu. Bakshaev, N. Barinov, A. Bartov, P. Blinov, S. Danko, G. Dolgachev, A. Fedotkin, Yu. Kalinin, V. Korolev, V. Mizhiritsky, D. Maslennikov, A. Shashkov, and V. Smirnov	655
Soft x-ray emission from a plasma focus discharge with wire and liner as a load P. Kubes, J. Kravarik, M. Paduch, K. Tomaszewski, M. Scholz, L. Ri'c, L. Juha, J. Krasa, A. Szydłowski, and V. Romanova	660
Parameter dependence of multi-arc gap J. Irisawa, S. Furuya, and S. Takano	665
Ignition from a hot spot in an inertially confined Z-pinch J.G. Linhart, L. Bilbao	669
New mechanism for the reversed current in a Z-pinch plasma K. Lee, Y.H. Cha, Y. Rhee, J.M. Han, D. Kim, and S.H. Kim	673
Study of XUV emission during the wire-array implosion at S-300 machine P. Kubes, J. Kravarik, L. Juha, J. Krasa, Y.L. Bakshaev, P.I. Blinov, A.S. Chernenko, S.A. Dan'ko, V.D. Korolev, A.Y. Shashkov, V.I. Tumanov, A.V. Chesnokov, M.I. Ivanov, and D. Klir	677
Radiation symmetry in Z-pinch driven systems for inertial confinement fusion R.A. Vesey, D.L. Hanson, M.E. Cuneo, G.R. Bennett, J.L. Porter, T.A. Mehlhorn, J.H. Hammer, R.G. Adams, L.E. Ruggles, and W.W. Simpson	681

Inhomogeneity of currents in a wire array during its exploding phase Y. Teramoto, S. Kohno, N. Shimomura, S. Katsuki, and H. Akiyama	685
------------------------------------------------------------------------------------------------------------------------------------------------------	-----

XI. IFE Reactor

Issues and opportunities for IFE based on fast ignition W.R. Meier, S.P. Hatchett, W. Hogan, M. Key, J. Latkowski, J. Perkins, S. Reyes, D. Goodin, R. Stephens, and K.A. Tanaka	689
Issues and new concepts of IFE liquid wall chamber Y. Kozaki, K. Yamamoto, H. Furukawa, T. Jitsuno, S. Nakai, and T. Yamanaka	696
Assessment of chamber concepts for inertial fusion energy fusion power plants - The ARIES-IFE study F. Najmabadi, R. Raffray, M. Tillack, D. Goodin, D. Haynes, C. Olson, and the ARIES Team	701
ZP-3, a Power plant utilizing Z-pinch fusion technology G.E. Rochau, G.L. Benavides, M.S. Derson, C.L. Olson, R.E. Olson, A.R. Parker, G.A. Rochau, S.A. Shultz, K.W. Struve, P. Pankuch, C. Gibson, C. Morrow, P. Peterson, J. DeGroot, H. Tran, E. Mogahed, I. Golovkin, G. Kulcinski, R. Peterson, I. Sviatoslavsky, and M. Sawan	706
Microstructure characterization of radiation damage of SiC, and metals under pulse irradiation, by using multiscale modeling J.M. Perlado, D. Lodi, M. Salvador, J. Marian, J. Prieto, M.J. Caturla, T. Diaz de la Rubia, and L. Colombo	712
Damage threats and response of final optics for laser-fusion power plants M.S. Tillack, S.A. Payne, N.M. Ghoniem, M.R. Zaghoul, and J.F. Latkowski	717
Simulation on interactions of x-ray and charged particles with first wall of IFE reactor H. Furukawa, K. Yamamoto, T. Johzaki, and Y. Kozaki	722
A comparison of HT and HTO doses from Hylife II inertial fusion reactors M. Velarde, J.M. Perlado	726
Design considerations for a laboratory condensation chamber to investigate issues of IFE liquid walls P. Calderoni, A. Ying, T. Sketcheley, and M.A. Abdou	730
Dry chamber wall thermo-mechanical behavior and lifetime under IFE cyclic energy deposition A.R. Raffray, D. Haynes, R. Peterson, M.S. Tillack, X. Wang, and M. Zaghoul	734
Simulation study on ablation of the first wall material in laser fusion reactor chamber K. Yamamoto, H. Furukawa, T. Johzaki, and Y. Kozaki	738

Surface thickness of IFE reactor candidate material ablated with intensive proton beam	
P.Y. Lee, A. Kasamatsu, Y. Kinoshita, T. Kamiya, T. Shimomura, T. Norimatsu, and K. Kasuya	742

XII. Target Fabrication

Progress towards demonstrating IFE target fabrication and injection	
D.T. Goodin, A. Nobile, N.B. Alexander, and R.W. Petzoldt	746
Foam insulated direct-drive cryogenic target	
T. Norimatsu, K. Nagai, T. Takeda, and T. Yamanaka	752
Target alignment process on the LIL target chamber	
B. Cathala, E. Nolot, and D. Desenne	757
Extention of Free Standing Target Technologies on IFE Requirements	
I.V. Aleksandrova, S.V. Bazdenkov, V.I. Chtcherbakov, E.R. Koresheva, and I.E. Osipov	762
The issue of homogeneous solid H₂-layers formation inside free-standing microshells	
E.R. Koresheva, I.E. Osipov, T.P. Timasheva, and L.S. Yaguzinskiy	767
Beryllium and lithium deuterides in direct and indirect laser targets	
Yu.E. Markushkin, A.A. Akunets, N.G. Borisenko, A.S. Vorontsov, V.V. Gorlevsky, A.I. Gromov, S.Yu. Guskov, V.M. Dorogotvtsev, A.V. Zabrodin, O.N. Krokhin, Yu.A. Merkulev, N.A. Chirin, and A.K. Shikov	772
Preparation of silicon doped ultra-low density CH foams	
Z. Lin, L. Xuan, and Du. Kai	777
Experiments on cooling-induced deformation of polymer shells-effects of heat treatment-	
N. Kobayashi, M. Yasuda, T. Endo, and Y. Fujima	782
Experiments on cooling-induced deformation of polymer shells-observation of deformation process-	
T. Endo, N. Kobayashi, M. Yasuda, K. Shibata, Y. Fujima, and T. Norimatsu	786
Fabrication of polystyrene hollow pellet with high Z metal oxide micro particles on inner surface	
R. Tsuji	790
Production of higher strength thin walled glow discharge polymer shells for cryogenic experiments at OMEGA	
A. Nikroo, D. Czechowicz, E. Castillo, and J. Pontelandolfo	794
Organic functional materials for IFE target	
K. Nagai, T. Norimatsu, and T. Yamanaka	798
Thermal control techniques for improved DT layering of indirect drive IFE targets	
J.E. Pulsifer, M.S. Tillack, D.T. Goodin, and R.W. Petzoldt	802

LMJ cryogenic target positioner, the “scale 1” cryostat demonstrator	
B. Cathala, D. Brisset, and D. Desenne	806
A device for cryotarget rep-rate delivery in IFE target chamber	
I.E. Osipov, E.R. Koresheva, G.D. Baranov, I.D. Timofeev, V.G. Kapralov, and B.V. Kuteev	810
A setup for target manipulation and filling them with a diagnostic gas	
A.V. Veselov, V.M. Izgorodin, G.V. Komleva, V.I. Kundikov, V.V. Intyapin, A.V. Zakharov, and S.I. Sedov	815
Non-contacting support systems for laser fusion pellets	
Y. Sakagami, H. Yoshia, R. Itou, T. Terasawa, and A. Shimamura	819
Magnetic suspension system “MINO” for fusion target experiments	
H. Yoshida, Y. Sakagami, Y. Hasegawa, and T. Fuseya	823
Reducing the costs of targets for inertial fusion energy	
D.T. Goodin, G.E. Besenbruch, J.P. Dahlburg, K.R. Schultz, A. Nobile, and E.M. Campbell	827

XIII. Short Pulse Laser

Ultraintense lasers and their applications	
G.A. Mourou, T. Tajima	831
Higher damage threshold and efficiency gratings for laser pulse compression	
B. Touzet, J. Flamand, F. Bonnemason, Pr. Neviéle, A. Reichart, N. Blanchot, B. Wattelier, J.P. Zou, C. Sauteret, and A. Migus	846

XIV. Plasma Diagnostics

Neutrons diagnostics developments for the LMJ	
L. Disdier, M. Houry, A. Rouyer, A. Fedotoff, and C. Bayer	851
LIL and LMJ traget diagnostics status	
J.P. Le Breton, E. Alozy, J. Baggio, J.L. Bourgade, J.Y. Boutin, G. Charles, A. Estadiou, D. Gontier, P. Miller, J. Raimbourg, C. Reverdin, R. Rosch, B. Villette, and R. Wrobel	856
Laser diagnostic setup for the LIL start-up and qualification	
A. Boscheron, H. Graillot, D. Lebeaux, Ph. Gibert, D. Bretheau, T. Chies, C. Feral, O. Lubin, X. Julien, C. Rajchenbach, and F. Mariotte	863
Space resolved high density probe based on 1s3x3y-satellite emission	
F.B. Rosmej, A. Sasaki, D.H.H. Hoffmann, M. Geißel, A.Ya. Faenov, and T.A. Pikuz	867
High-resolution Fresnel zone plate imaging	
Y. Tamari, H. Azechi	871

Advanced x-ray diagnostics for large scale dense plasmas for heavy ion beam interaction experiment at GSI F.B. Rosmej, D.H.H. Hoffmann, W. Süß, M. Geißel, A.Ya. Faenov, and T.A. Pikuz	875
Experimental investigation on x-ray redistribution in gold cylindrical cavity W. Miao, Y. Ding, K. Sun, D. Lai, Z. Chen, H. Wang, J. Cheng, Z. Zheng, and H. Peng	879

C. Science and Technology of Applications

XV. Relativistic Laser Plasma Physics

Relativistic whistle: High harmonic generation by ultra-intense laser pulse inside hollow fiber S.V. Bulanov, T.Zh. Esirkepov, N.M. Naumova, and I.V. Sokolov	885
Second harmonic generation in exciting laser wakefield M. Mori, E. Takahashi, T. Shiraishi, S. Taki, and K. Kondo	890
Generation and propagation of hot electron in laserplasmas J. Zhang, P. Zhang, T.J. Liang, L. Wang, L.Z. Zhao, Z.Y. Wei, Y.T. Li, Q.L. Dong, X.Y. Tang, and Z.H. Sheng	895
A three dimensional sub-cycle relativistic electromagnetic solution in a collisionless plasma T. Esirkepov, K. Nishihara, S. Bulanov, and F. Pegoraro	901
Numerical simulation of electron-positron formation at high-intensity laser-matter interaction V.A. Lykov, G.V. Baydin, and I.A. Litvinenko	905
The behavior of solutions of nonlinear paraxial equation due to laser atom interactions F. Osman, H. Hora	909
Particle-in-cell simulations of anomalous absorption of linearly and circularly polarized intense ultrashort laser light in steep density gradient plasma S. Kato, T. Nakamura, T. Kato, and Y. Owadano	914
Laser nuclear physics T. Shioya, K. Nakashima, S. Yamada, and H. Takabe	918
Numerical simulation of tearing and merging processes of relativistic electron beam in high density plasmas T. Taguchi, T.M. Antonsen Jr., C.S. Liu, and K. Mima	922

Ion beam generation and nuclear reaction production from multi-TW laser pulse interaction with solid target A. A. Andreev, V.G. Borodin, A.V. Charukchev, V.N. Chernov, O.N. Gilev, A.L. Zapisov, V.V. Ilin, V.M. Komarov, A.V. Malinov, V.M. Migel, and N.V. Nikitin	926
Nuclear physics with powerful laser pulses G. Malka, M.M. Aléonard, J.F. Chemin, G. Claverie, M. Harston, J.N. Scheurer, V. Tikhonchuk, S. Fritzer, V. Malka, P. Balcou, G. Grillion, S. Moustazis, L. Notebeart, M. Pittman, E. Lefebvre, and V. Meot	930
Nonlinear one dimensional laser envelope solitons in overdense plasma P.K. Kaw, S. Poornakala, A. Sen, and A. Das	934
Heating and acceleration of electrons in colliding laser fields in underdense plasma Z.M. Sheng, K. Mima, Y. Sentoku, M. Jovanovic, J. Zhang, and J. Meyer-ter-Vehn	938
Hard x-ray generation and nonthermal ion and electron emission by femtosecond laser irradiation on the metal target Y. Hironaka, Y. Okano, K.G. Nakamura, K. Kondo, Y. Oishi, T. Nayuki, and K. Nemoto	942

XVI. Hot Dense Plasma Atomic Processes

Helioseismic studies of dense plasmas W. Däppen	946
Quantum simulation of hot dense plasmas H. Totsuji, Y. Nishii, C. Totsuji, K. Tsuruta, I. Fukumoto, J. Chihara, M. Yamagiwa, and T. Tajima	952
Plasma induced line shifts and line merging in hot, dense plasmas M. Gunderson, C.F. Hooper Jr., D.A. Haynes Jr., and N.D. Delamater	957
X-ray spectroscopic measurements of laser-produced gas-jet plasmas supported by Thomson scattering diagnostics J.C. Gauthier, C. Chenais-Popovics, V. Malka, S. Gary, M. Rabec le Gloahec, O. Peyrusse, and I. Matsushima	962
The Opacity code in the integrated laser fusion code S. Yamada	967
Numerical analysis of photoionized plasmas in steady state and in time evolving stage Y. Morita, S. Yamada, and H. Takabe	971
Scaling law of radiative opacities for inertial fusion targets E. Minguez, P. Martel, J.M. Gil, J.G. Rubiano, and R. Rodriguez	975
Analytical parametric potentials for opacity calculations E. Minguez, P. Martel, J.M. Gil, J.G. Rubiano, R. Rodriguez, and R. Florido	979

ArFIT: A detailed model of Ar K-shell emission from high energy density plasmas	
D.A. Haynes, R.R. Peterson, I.E. Golvkin, and C.F. Hooper Jr.	983
Collisional-radiative model including dielectronic states – Contributions of dielectronic capture resonances	
N. Yamamoto, T. Kato, and T. Fujimoto	987
Density effect on emission lines in ionizing plasma and recombining plasma	
T. Kato, M. Kato, and R. More	991
The dependence of spectral diagnostics on atomic kinetics treatments	
H.A. Scott, H.E. Dalhed	995
Simple atomic model based on the plasma microfield	
T. Nishikawa	999

XVII. Laboratory Astrophysics

High energy density astrophysics in the laboratory	
B.A. Remington	1003
The radiative shock: Theory, laser experiments and interpretation	
X. Fleury, S. Bouquet, C. Stehle, M. Koenig, P. Barroso, D. Batani, A. Benuzzi-Mounaix, B. Cathala, J.P. Chiéze, N. Grandjouan, J. Grenier, T. Hall, E. Henry, J.P.J. Lafon, S. Leygnac, V. Malka, B. Marchet, H. Merdji, C. Michaut, L. Polés, and F. Thais	1029
Radiatively cooled supersonic plasma jets generated in wire array Z-pinches	
S.V. Lebedev, J.P. Chittenden, F.N. Beg, S.N. Bland, A. Ciardi, D. Ampleford, S. Hughes, M.G. Haines, A. Frank, E.G. Blackman, and T. Gardiner	1034
Numerical analysis of relativistic jets, the morphology and dynamics	
A. Mizuta, S. Yamada, and H. Takabe	1039
Magnetic field generation in the auroral zones with kilometer radiation	
T. Okada, S. Chou	1044
Numerical study of positron creation based on the relativistic Fokker-Planck equation	
K. Nakashima, H. Takabe	1048
Solve the spectral discrepancy between the x-ray astronomical observations and the existing ionization codes (~ 1 keV Fe L-shell lines)	
M. Nishiuchi, K. Yasuike, T. Kawachi, H. Daido, and K. Koyama	1052
Study of high energy phenomena with the ARWEN code	
F. Ogando	1056

XVIII. Laser Material Processing

Study of dense-low temperature plasmas generated during laser shock processing of metallic materials in a water confined regime	
A. Sollier, L. Berthe, E. Bartnicki, P. Peyre, and R. Fabbro	1060
Simulation on femto-second laser ablation	
H. Furukawa, M. Hashida	1065
Cluster ion control by simultaneous irradiations femtosecond laser and nanosecond laser pulse	
H. Kamada, Y. Hiratani, and K. Toyoda	1069
Numerical analysis on the nanosecond and femtosecond laser processing and comparison with experimental results	
Ch. Baasandash, J. Maehara, Y. Kondoh, and T. Yabe	1073
UV Laser ablation of polymers: hydrodynamic model	
Yu.V. Afanasiev, V.A. Issakov, and I.N. Zavestovskaia	1077
Ablation of metal targets irradiated by femtosecond laser radiation	
A. Di Bernardo, D. Batani, T. Desai, C. Courtios, B. Cros, and G. Mattheussent	1081

XIX. Shock and Condensed Matter Physics

Phase transitions and radiative proton-capture nuclear processes in metallic hydrogen	
S. Ichimaru	1085
Precision shock physics capabilities for inertial fusion studies using the Z Accelerator current drive	
D.L. Hanson, M.D. Knudson, J.R. Asay, J.E. Bailey, R.W. Lemke, J.P. Davis, R.B. Spielman, B.V. Oliver, and D.B. Hayes	1091
Low-entropy compression of frozen deuterium using intense beams of energetic heavy ions	
N.A. Tahir, A. Kozyreva, A. Shutov, P. Spiller, D.H.H. Hoffmann, and V.E. Fortov	1096
Generation of high quality shock waves for the measurement of the Equation of state of materials	
D. Batani, E. Henry, M. Koenig, A. Benuzzi-Mounaix, T. Hall, and Th. Lower	1100
Hugoniot measurement of fluoro-polyimide	
K. Takamatsu, K.A. Tanaka, N. Ozaki, K. Fujita, T. Ono, M. Nakano, Y. Yamauchi, M. Yoshida, K. Okada, E. Takahashi, H. Takenaka, and K. Kondo	1104
Laser shock tube for the study of supersonic gas flows and the development of hydrodynamic instabilities in layered media	
I.G. Lebo, V.D. Zvorykin	1108

Hugoniot measurement of deuterated polyethylene	
N. Ozaki, K. A. Tanaka, M. Nakano, Y. Yamauchi, K. Takamatsu, T. Ono, Y. Sasatani, K. Fujita, K. Okada, M. Yoshida, E. Takahashi, Y. Owadano, I. Matsushima, and K. Kondo	1112

XX. Laser Accelerator

Laser acceleration of electrons in vacuum: accuracy principle of nonlinearity and the capture acceleration scenario (CAS)	
J.X. Wang, H. Hora, M. Hoelss, W. Scheid, Y.K. Ho, F. Osman, and R. Castillo	1116
Relativistic electron beam acceleration by cascading nonlinear Landau damping of electromagnetic waves in a plasma	
R. Sugaya, T. Maehara and M. Sugawa	1121
High energy ion production from short-laser-pulse interaction with solid density plasmas and its applications	
Y. Sentoku, V.Yu. Bychenkov, K. Mima, K. Flippo, A. Maksimchuk, G. Mourou, Z.M. Sheng, and D. Umstadter	1126
Laser induced quasistatic magnetic field causes ion acceleration	
T. Esirkepov, S. Bulanov, K. Nishihara, A. Kuznetsov, and F. Kamenets	1131
Cross-field plasma acceleration and potential formation by electromagnetic waves	
R. Sugaya	1136
Acceleration of ultrafast, dense, and quasi-monoenergetic electron bunches in laser plasma cavities	
A. Pukhov, J. Meyer-ter-Vehn	1140
The high-energy electron beam emission by the guided laser pulse in the plasma	
K. Koyama, N. Saito, S. Kato, and M. Tanimoto	1144
On the generation of GeV potential in an electron-positron plasma by short and intense laser radiation	
U.A. Mofiz, A. Sen	1148
Generation of high-amplitude plasma waves by cross-modulated laser wake fields	
Z.M. Sheng, K. Mima, Y. Sentoku, and K. Nishihara	1152
Observation of proton rear emission and possible gigagauss scale magnetic fields from ultra-intense laser illuminated plastic target	
Y. Murakami, Y. Kitagawa, Y. Sentoku, M. Mori, R. Kodama, K.A. Tanaka, K. Mima, and T. Yamanaka	1156

XXI. X-ray Laser

Gain saturation of nickel-like silver and tin x-ray lasers by use of a traveling wave pumping	
T. Kawachi, M. Tanaka, N. Hasegawa, S. Namba, M. Kado, P. Lu, A.V. Kilpio, K. Sukegawa, K. Nagashima, K. Takahashi, H. Tang, M. Kishimoto, R. Tai, M. Koike, H. Takenaka, H. Fiedorowicz, H. Daido, and Y. Kato	1159
Numerical modeling of table-top x-ray lasers	
V.N. Shlyaptsev, J. Dunn, S. Moon, A.L. Osterheld, J.J. Rocca, F. Detering, W. Rozmus, J.P. Matte, H. Fiedorowicz, A. Bartnik, and M. Kanouff	1164
Characteristics of radiation trapping in capillary discharge pumped neon-like Kr-laser	
M. Masnavi, T. Kikuchi, M. Nakajima, and K. Horioka	1170
Charge transfer processes in ion-ion collisions	
S. Suzuki, T. Shirai, A. Sasaki, K. Moribayashi, S. Namba, T. Kawachi, and N. Shimakura	1174
Z-scaling for the H-like recombination laser in the capillary discharge	
K. Lee, J.M. Han, Y. Rhee, and D. Kim	1178
Short wavelength x-ray emission from inner-shell excited states generated by high intensity laser irradiation on Kr, Xe clusters	
K. Moribayashi, A. Zhidkov, A. Sasaki, K. Suto, and S. Suzuki	1182
High-average-power laser-plasma x-ray source	
T. Mochizuki, A. Shimoura, S. Amano, S. Miyamoto, and K. Fukugaki	1186

XXII. Cluster Plasma

Hot electron generation from atomic clusters irradiated by intense femtosecond laser pulses	
L.M. Chen, J.J. Park, K.H. Hong, I.W. Choi, J.Y. Kim, and C.H. Nam	1190
Fragmentation and ion-scattering in collision of fast ion with cluster	
F. Sato, T. Kagawa, S. Sakabe, K. Imasaki, and T. Iida	1195
Coulomb explosion of benzene and C60 molecules with intense femtosecond lasers	
S. Shimizu, S. Sakabe, N. Nakashima, K. Nishihara, V. Zhakhovskii, J. Kou, S. Okihara, and F. Sato	1199
Effect of laser wavelength on the dynamics of clusters	
T. Desai, D. Batani, and A. Bernardinello	1203

XXIII. Other Applications

Numerical and experimental investigation of laser-driven rocket and micro-airplane	
T. Yabe, C. Phipps, R. Nakagawa, M. Yamaguchi, K. Aoki, C. Baasandash, H. Abe, N. Yoshida, Y. Ogata, M. Nakagawa, E. Fujiwara, K. Yoshida, A. Nishiguchi, K. Ochi, and I. Kajiwara	1207

Three fusion sources	
T. Kenmotsu, T. Nishikawa, and R. More	1212
X-ray free-electron laser radiation as a new source for plasma physics	
Th. Tschentscher	1219
Laser-produced plasma experiments and PIC-simulations to study direct conversion processes in ICF-thrust with dipole-like magnetic field	
Y.P. Zakharov, H. Nakashima, A.V. Melekhov, and V.G. Posukh	1224
Observation of short pulse radiation from interaction between short pulse laser and magnetized plasma	
D. Dorrnian, T. Higashiguchi, N. Yugami, S. Sakai, K. Takahashi, H. Kawakami, M. Hosaka, H. Ito, and Y. Nishida	1228
Short microwave pulse generation via laser-produced ionization front	
T. Higashiguchi, N. Yugami, H. Gao, D. Dorrnian, Kenji Takahashi, S. Sakai, M. Hosaka, H. Kawakami, H. Ito, and Y. Nishida	1232
Extaracted heavy ion beams from RIKEN laser ion source	
T. Takeuchi, T. Katayama, M. Okamura, K. Yano, R. A. Jameson, T. Hattori, N. Hayashizaki, S. Okada, S. Kondrashev, and B. Sharkov	1236
Simulations of a hydrogen-filled capillary discharge waveguide	
A.A. Esaulov, N.A. Bobrova, J.I. Sakai, P.V. Sasorov, D.J. Spence, A. Butler, S.M. Hooker, and S.V. Bulanov	1240
Investigation of monochromatic x-ray radiation from a vacuum diode with a laser irradiated cathode	
A.S. Shikanov, Yu.V. Korobkin, A.S. Kishinets, I.V. Romanov, V.M. Romanova, and A.A. Rupasov	1244
Air pollution levels in Kathmandu valley as measured by nephelometer and particulate monitor	
D.N. Kafle, B.K. Sapkota	1248
Study on a high brightness x-ray source from a laser produced plasma	
M. Suzuki, F. Matsuoka, A. Nishimura, R. Rakowsk, A. Bartnik, M. Szczurek, H. Fiedorowicz, K. Mima, T. Arisawa, and H. Daido	1252
Experimental study on ultrashort intense laser produced plasmas	
K. Takahashi, Y. Hayashi, P. Lu, T. Oketa, S. Orimo, E. Sato, M. Suzuki, K. Sato, A. Sasaki, M. Aoyama, A. Akahane, H. Nakano, A. Sagisaka, K. Yamakawa, T. Kawachi, N. Hasegawa, T. Sukegawa, K. Nagashima, H. Daido, and Y. Kato	1256
Laser plasma guiding discharge for laser-triggered lightning	
Y. Shimada, A. Ogata, S. Uchida, T. Yamanaka, H. Ishida, and C. Yamanaka	1260
Interactions of intense femtosecond laser with low density foam matters	
S. Okihara, T. Esirkepov, K. Nagai, S. Shimizu, T. Iida, T. Norimatsu, K. Nishihara, and S. Sakabe	1264
Author index	1267
