

## TABLE OF CONTENTS

## VOLUME 1

Preface .....	V
Industrial exhibitors.....	VII
Committee members .....	VIII

## Invited Talks

<b>The European Fusion Programme: Present status and prospects</b> <i>U. Finzi</i> .....	3
<b>Status of ITER , July 1998</b> <i>R. Aymar</i> .....	4
<b>Fusion Physics Progress on JET</b> <i>M. Keilhacker and the JET Team</i> .....	5
<b>Ten years of operation and developements on Tore Supra</b> <i>J. Paméla and Tore Supra Team</i> .....	6
<b>The CERN Large Hadron Collider Project</b> <i>L. Maiani</i> .....	7
<b>Socio-economic aspects of fusion : Research in the European context generation</b> <i>L. Ingelstam</i> .....	8
<b>Progress with heating and current drive technologies</b> <i>D.C. Robinson, M. Cox, B. Lloyd, M. Nightingale</i> .....	9
<b>RF and microwave tubes for fusion</b> <i>G. Faillon</i> .....	10
<b>The Ariane Project</b> <i>J.-M. Luton</i> .....	11
<b>ITER magnets design and R &amp; D</b> <i>N. Mitchell and the ITER Joint Central Team and Home Teams</i> .....	12

<b>Engineering design of the ITER Blanket and relevant R &amp; D results</b> <i>F. Elio, K. Ioki, L. Bruno, A. Cardella, Y. Gohar, M. Hechler, T. Kodama, A. Lodato, D. Loesser, D. Lousteau, N. Miki, K. Mohri, R.R. Parker, R. Raffray, R.T. Santoro, D. Williamson, M. Yamada, W. Daenner, R. Mattas, Y. Strebkov, H. Takatsu</i> .....	13
<b>Limitations on blanket performances</b> <i>S. Malang</i> .....	14
<b>Status of the IFMIF project</b> <i>T. Shannon, R. Jameson, H. Katsuta, H. Maekawa, M. Martone, A. Moeslang, V. Teplyakov</i> .....	15
<b>ITER Divertor, issues and R &amp; D</b> <i>R. Tivey, T. Ando, A. Antipenkov, S. Chiochio, G. Federici, C. Ibbot, R. Jakeman, G. Janeschitz, E. Martin, R. Raffray</i> .....	16
<b>Safety and environment aspects for a fusion power reactor</b> <i>G. Marbach</i> .....	17
<b>Tritium inventory issues for future reactors: choices, parameters, limits</b> <i>D.K. Murdoch, Ch. Day, P. Gierszewski, R.D. Penzhorn, C.H. Wu</i> .....	18
<b>Laser Mega Joule project and impact of the inertial fusion programme</b> <i>A. Bettinger, M. Decroisette</i> .....	19
<b>Design, construction and the first operation of LHD</b> <i>A. Iiyoshi, S. Imagawa and the LHD Group</i> .....	20
<b>The technological achievements and experience at JET</b> <i>M.A. Pick and the JET Team</i> .....	21
<b>Oral Presentations</b>	
<b>Active feedback control of steady-state improved confinement discharges in JT-60U</b> <i>T. Fukuda</i> .....	25
<b>Operation of the JET active gas handling system during and after DTE1</b> <i>R. Lässer, A.C. Bell, N. Bainbridge, D. Brennan, B. Grieveson, J.L. Hemmerich, G. Jones, D. Kennedy, S. Knipe, J. Lupo, J. Mart, A. Perevesentsev, N. Skinner, R. Stagg, J. Yorkshades, G.V. Atkins, L. Dörr, N. Green, M. Stead, K. Wilson</i> .....	26

<b>RF sources for fusion applications : design, development and performance</b> <i>E. Speth, P. Frank, B. Heinemann, W. Kraus, R. Riedl, R. Trainham, O. Vollmer, R. Wilhelm</i> .....	27
<b>New developments of the ASDEX Upgrade Tokamak microwave reflectometer</b> <i>A. Silva, L. Cupido, C. Loureiro, S. Vergamota, P. Varela, J. Santos, M. Manso, F. Serra, L. Meneses, M. Tavares, I. Nunes, B. Kurzan, W. Suttrop, V. Grossman</i> .....	28
<b>Next generation discharge control system for ASDEX upgrade</b> <i>G. Raupp, K. Behler, R. Cole, K. Lüddecke, G. Neu, W. Treutterer, V. Mertens, D. Zasche, T. Zehetbauer</i> .....	29
<b>The ITER toroidal field model coil (TFMC)</b> <i>E. Salpietro, R. Maix, G. Bevilacqua, G. Di Bartolo, H. Fillunger, N. Mitchell, B. Turck, P. Libeyre, A. Ulbricht, M. Spadoni, A. Della Corte, H. Bieder, D. Bresson, D. Krischel, G.E. Tardivelli</i> .....	30
<b>ITER reference breeding blanket design</b> <i>M. Ferrari, W. Dänner, A. Bianchi, G. Celentano, A. Gerber, W. Gulden, K. Ioki, S. Khomiakov, T. Kuroda, A. Lopatkin, X. Masson, R. Mattas, G. Mazzone, J. Mustoe, R.R. Parker, L. Petrizzi, A. Pizzuto, R. Plenteda, Y. Poitevin, R. Raffray, M. Roccella, Y. Strebkov, H. Takatsu, F. Scaffidi-Argentina, F. Zacchia</i> .....	31
<b>Objectives Feasibility Assessment of the WCLL Mock-up Testing in ITER</b> <i>L. Giancarli, B. Bielak, M.A. Futterer, O. Ogorodnikova, Y. Poitevin, J.F. Salavy, J. Szczepanski, Y. Severi, G. Marbach, G. Benamati, C. Nardi, J. Reimann</i> .....	32
<b>European development of the ITER divertor target</b> <i>G. Vieider, D. Duglue, M. Merola, H.D. Pacher, C.H. Wu, J.P. Bonal, Ph. Chappuis, F. Escourbiac, J. Schlosser, G. Le Marois, R. Duwe, M. Rödiger, M. Fèbvre, M. Grattarola, A. Peacock, A. Pizzuto, B. Riccardi, B. Riccardi, L. Plöchl, I. Smid, P. Tramier</i> .....	33
<b>Comparative thermal cyclic testing of different beryllium grades previously subjected to plasma disruption scenarios</b> <i>A. Gervash, V. Komarov, I.V. Mazul, N. Jablovkov, J. Linke, M. Roedig</i> .....	34
<b>The Ultimate Safety Margins of ITER: A Demonstration of the Safety Potential of Fusion</b> <i>D.A. Petti, H.W. Bartels</i> .....	35

<b>A report on the first remote handling operations at JET</b> <i>A. Rolfe, P. Brown, P. Carter, A. Gaberscik, L. Galbiati, B. Haist, R. Horn, M. Irving, D. Locke, A.B. Loving, P. Martin, S.F. Mills, R. Minchin, J. Palmer, S. Sanders, S.G. Sanders, R. Stokes</i> .....	36
<b>The mega AMP spherical tokamak</b> <i>M. Cox</i> .....	37
<b>The design of the KSTAR Tokamak</b> <i>G.S. Lee, J. Kim, C.S. Chang, H.Y. Chang, K. Kim, M.H. Cho, H.K. Park, G.H. Neilson, W.T. Reiersen, J. Schultz, L. Sevier, S.M. Hwang, D.K. Lee, D.I. Choi</i> .....	38
 <b>Contributed Papers</b>	
 <b>Section A : Plasma Facing Components</b>	
<b>Possibility of crack propagation in first wall by cyclic electromagnetic force</b> <i>T. Teramoto, Y. Utsugi, M. Saito</i> .....	41
<b>The effect of irradiation temperature and dose on the physical and mechanical properties of beryllium</b> <i>S.A. Fabritsiev, A.S. Pokrovsky</i> .....	45
<b>Beryllium armored mockups for fusion high flux application</b> <i>A. Gervash, R. Giniyatulin, I.V. Mazul, R. Watson</i> .....	47
<b>Non-destructive examination for Be/CuCrZr, W/Cu and Cu/CuCrZr joints</b> <i>E. Kretov, K. Pavros, B. Karev, R. Giniyatulin</i> .....	51
<b>Complex investigation of several silverless brazed Be/CuCrZr joints</b> <i>A. Komarov, A. Gervash, V. Komarov, I.V. Mazul, N. Litounovski, V. Fedotov, O. Sevrakov, A. Ganenko</i> .....	53
<b>Divertor experiment in the W7-AS stellarator</b> <i>D. Dorst, P. Grigull, J. Kisslinger, K. McCormick, H. Niedermeyer, F. Sardei, F. Wagner</i> .....	55
<b>Experimental study of material response on simulated plasma disruption load</b> <i>V.N. Litunovsky, V.E. Kuznetsov, I.B. Ovchinnikov, V.A. Titov</i> .....	59

<b>Alternative design proposal for CFC-monoblocks to be used in ITER high heat-flux components</b> <i>L. Giancarli, G. Le Marois, Y. Poitevin, P. Revirand, J.F. Salavy, J. Szczepanski</i> .....	63
<b>The first inspection of JT-60U W-shaped divertor after high power operation</b> <i>K. Masaki, K. Kodama, M. Morimoto, T. Sasajima, S. Takahashi, N. Hosogane, M. Saidoh</i> .....	67
<b>Development, Thermomechanical analysis, Fabrication and testing of a macroblock-divertor specimens</b> <i>M. Scheerer, H. Bolt, A. Gervash, J. Linke, R. Lison, I. Smid</i> .....	71
<b>Critical design issues of new semitransparent liner for ITER divertor cassette</b> <i>I.V. Mazul, C. Ibbot, R. Tivey, G. Federici, A. Makhankov, V. Odintsov, Ye. Kuzmin, V.M. Komarov, D. Serebrennikov, A. Zakharov, A. Gorodetsky, I. Markin</i> .....	75
<b>Manufacturing and testing of ITER divertor gas box liners</b> <i>I.V. Mazul, R. Giniyatulin, V.L. Komarov, V. Krylov, Ye. Kuzmin, A. Makhankov, V. Odintsov, A. Zhuk</i> .....	77
<b>Utilisation of resistive way for simulation surface thermal loading</b> <i>N.V. Litunovsky, V.L. Komarov, I.V. Mazul, V.I. Smirnov</i> .....	81
<b>Some engineering aspects of high heat flux components for volumetric neutron source based on spherical torus</b> <i>V.V. Filatov, M.D. Korolkov, I.V. Mazul</i> .....	83
<b>Thermal fatigue and thermal shock of carbon based divertor components under ITER relevant loading conditions</b> <i>J. Linke, R. Duwe, M. Rödiger, B. Wiechers</i> .....	87
<b>Development of A1-Ge thixotropic alloys for plasma facing components</b> <i>F.L. Saint-Antonin, J. Valer, P. Meneses, M. Suery, G. Le Marois</i> .....	89
<b>Carbon Fiber Reinforced Copper as Heat Sink Material for Divertor Applications</b> <i>R. Wörgötter-Plunger, J. Korab, M. Scheerer, W. Hohenauer, I. Smid, M. Anwänder, P. Sebo</i> .....	93
<b>Fabrication of a small-scaled first wall mock-up with beryllium armor hip bonded to DSCu/SS structure</b> <i>T. Haţano, T. Kuroda, T. Iwatachi, T. Osaki, M. Enoeda, H. Takatsu</i> .....	97

<b>Study of material destruction during powerful plasma exposure</b> <i>V.G. Belan, assanein A. , V.F. Levashov, V.S. Maynashev, A.D. Muzichenko, V.L. Podkovirov, A.M. Zitlukhin</i> .....	101
<b>Study of graphite erosion under lateral radiation from target plasma</b> <i>V. Safronov, N. Arkhipov, V. Bakhtin, S. Kurkin, D. Toporkov, S. Vasenin, A. Zhitlukhin, H. Wuerz</i> .....	105
<b>Erosion products in disruption simulation experiments</b> <i>V. Safronov, I. Arkhipov, N. Arkhipov, V. Bakhtin, V. Barsuk, S. Kurkin, E. Mironova, D. Toporkov, S. Vasenin, H. Werle, H. Wuerz, A. Zhitlukhin</i> .....	107
<b>Development of plasma facing components for fusion experimental reactors in JAERI</b> <i>K. Sato, S. Suzuki, K. Ezato, K. Nakamura, M. Araki, M. Akiba</i> .....	109
<b>Development of bonding techniques of W and Cu-alloys for plasma facing components of fusion reactor with HIP method</b> <i>S. Saito, K. Fukaya, S. Ishiyama, M. Eto, K. Sato, M. Akiba</i> .....	113
<b>The Tore Supra toroidal pump limiter supporting structure : manufacturing and installation</b> <i>L. Doceul, J.J. Cordier, F. Faisse, P. Garin, L. Garampon, D. Lafon</i> .....	117
<b>Infrared non destructive test of plasma facing components. Defect detection improvement</b> <i>A. Durocher, Ph. Chappuis, R. Mitteau, L. Moncel</i> .....	121
<b>Copper alloy-stainless steel bonds and recent developments for Tore Supra</b> <i>M. Lipa, Ph. Chappuis, R. Mitteau, L. Plöchl, T. Huber, G. Reindl</i> .....	125
<b>Heat flux deposition pattern on the inner first wall of Tore Supra</b> <i>R. Mitteau, M. Chantant, Ph. Chappuis, D. Guilhem, M. Lipa</i> .....	129
<b>Active metal casting technique in plasma facing components : characterisation</b> <i>L. Moncel, J. Schlosser, R. Mitteau, L. Plöchl</i> .....	133
<b>Thermal hydraulic testing for ITER high heat flux components</b> <i>J. Schlosser, F. Escourbiac, M. Merola, G. Vieider</i> .....	137
<b>The pumping system for the CIEL project on Tore Supra</b> <i>E. Tsitrone, Ph. Chappuis, F. Escourbiac, F. Faisse, C. Portafaix, D. Reiter, J. Schlosser</i> .....	141
<b>Release of Deuterium from a-C:D-layers by oxygen attack</b> <i>S. Alberici, H.-K. Hinssen, R. Moormann, C.H. Wu</i> .....	145

<b>Small and medium scale mock-ups of the ITER divertor wing</b> <i>M. Grattarola, M. Bet, M. Merola, G.B. Ottonello, L. Plöchl, B. Riccardi, A. Salito, G. Vieider, F. Zacchia</i> .....	149
<b>Tritium Experience in the Tokamak Fusion Test Reactor</b> <i>C.H. Skinner, W. Blanchard, J.N. Brooks, J. Hogan, J. Hosea, D. Mueller, A. Nagy</i> .....	153
<b>Thermal annealing of irradiated carbon fiber composites used as plasma facing materials</b> <i>J.P. Bonal, C.H. Wu</i> .....	157
<b>Disruption and erosion on plasma facing materials with Oarai hot-cell electron beam irradiating system (OHBIS)</b> <i>M. Uda, E. Ishitsuka, K. Sato, M. Akiba, C. Yamamura, S. Takebayashi, H. Kawamura</i> .....	161
<b>Numerical simulation of the internal stresses of thick tungsten coating deposited by vacuum plasma spraying on copper substrate</b> <i>A. Salito, M. Tului, F. Casadei</i> .....	165
<b>Design and testing of protective graphite shield for Tokamak-15 discharge chamber and moveable electrodes for glow discharge</b> <i>P.P. Khvostenko, E.V. Alexandrov, I.O. Anashkin, V.N. Garnov, V.A. Khrabrov, V.A. Kochin, V.M. Leonov, P.N. Orlov, I.A. Posadsky, A.N. Vertiporokh</i> .....	169
<b>The Effects of HIP Thermal Cycles and Neutron Irradiation on Metallurgy and Fracture Toughness of Cu/SS Joints</b> <i>M. Pyykkonen, S. Tahtinen, B.N. Singh, P. Toft</i> .....	173
<b>Fracture strength of DS-Cu/316SS HIP bonded structure</b> <i>M. Goto, M. Uno, M. Saito, T. Hatano</i> .....	177
<b>Effect of electromagnetic force on strength of bonded joint with interfacial crack</b> <i>S. Yamashita, T. Teramoto, M. Saito</i> .....	181
<b>Recent results of EU R&amp;D on removal of co-deposited layers and tritium</b> <i>C.H. Wu, A.A. Haasz, W. Jacob, R. Moormann, V. Philipps, J. Roth</i> .....	185
<b>High heat flux testing of a prototypical divertor component</b> <i>M. Merola, F. Escourbiac, L. Plöchl, R. Raffray, J. Schlosser, I. Smid, R. Vesprini, G. Vieider</i> .....	189
<b>Properties of beryllium as a high heat flux material before and after neutron irradiation</b> <i>M. Rödiger, R. Duwe, J. Linke, A. Lodato</i> .....	193

<b>The EU HT test programme of ITER primary wall small scale mock ups</b> <i>P. Lorenzetto, A. Cardella, Ph. Chappuis, W. Daenner, M. Fèbvre, G. Hofmann, H. Stamm, S. Tahtinen, G. Walsh</i> .....	195
<b>The ITER post limiter system</b> <i>A. Cardella, K. Ioki, G. Janeschitz, A. Lodato, H.D. Pacher, R.R. Parker, R. Raffray, V. Rozov, K. Skladnov</i> .....	199
<b>The attachment system of the ITER divertor plasma facing components</b> <i>S. Chiochio, A. Turner, G. Cerdan, H. Heidl, R. Jakeman, D. Maisonnier, A. Poggianti, M. Siuko, R. Tivey</i> .....	203
<b>Solid, castellated, lamellar, and brush-like armours for the high heat flux components of ITER</b> <i>R. Matera, V. Barabash</i> .....	207
<b>Effect of runaway electrons and VDE's on ITER first wall</b> <i>A.R. Raffray, M. Akiba, A. Cardella, K. Ezato, G. Federici, K. Ioki, R.R. Parker, L. Topilski</i> .....	211
<b>Joining technologies for the plasma facing components of ITER</b> <i>V. Barabash, G. Kalinin, R. Matera</i> .....	215
<b>Study of residual stresses in electron-beam welded F82H modified martensitic steel using X-ray and neutron diffraction</b> <i>R. Coppola, C. Braham, M. Ceretti, C. Nardi</i> .....	219
<b>Tungsten thick coatings for plasma facing components</b> <i>B. Riccardi, A. Pizzuto, A. Orsini, S. Libera, E. Visca, L. Bertamini, F. Casadei, E. Severini, R. Montanari, R. Vesprini, P. Varone, G. Filacchioni, N.V. Litunovsky</i> .....	223
<b>Thermal fatigue equipment to test joints of materials for high heat flux components</b> <i>E. Visca, S. Libera, A. Orsini, B. Riccardi, M. Sacchetti</i> .....	227
<b>Deuterium retention in beryllium exposed to a 60 kV deuterium beam - consequences for next step devices</b> <i>H.D. Falter, J.P. Coad, D. Ciric, D.J. Godden</i> .....	229
<b>Deposits/flakes in the JET MkII divertor - a major source of Tritium and Deuterium inventory</b> <i>A.T. Peacock, P.A. Andrew, J.P. Coad, R. Cusack, F.H. Hurd, S.F. Mills, R.D. Penzhorn, M. Pick</i> .....	233
<b>The recycling parameters of MANET exposed to deuterium plasma and a further evaluation of the tritium tracking at the DEMO-First Wall</b> <i>L.A. Sedano, J. Camposilvan, A. Perujo</i> .....	237

<b>High heat flux performance of mechanically jointed divertor plate for LHD</b> <i>Y. Kubota, N. Noda, S. Inagaki, R. Sakamoto, A. Sagara, S. Satoh, O. Motojima</i> .....	241
<b>Disruption simulation experiments and extrapolation to reactor conditions</b> <i>A.B. Hassanein, I. Konkashbaev</i> .....	245
<b>Development of divertor targets for Wendelstein 7-X</b> <i>H. Greuner, A. Herrmann, H. Renner, Ph. Chappuis, R. Mitteau</i> .....	249
<b>Thermal load calculations at TJ-11 vacuum vessel under NBI</b> <i>J. Guasp, M. Liniers, C. Fuentes, G. Barrera</i> .....	253
<b>Design of an improved first wall for RFX</b> <i>P. Zaccaria, W. Baker, S. Peruzzo, P. Sonato</i> .....	257
<b>Helium and tritium behaviour in neutron irradiated beryllium</b> <i>I.B. Kupriyanov, V.V. Vlasov</i> .....	261
<b>Non-Brazed Plasma Facing Component for high steady state heat flux</b> <i>B. Streibl, H. Greuner, A. Herrmann, S. Kötterl, S. Mukherjee, S. Schweizer, J. Simon-Weidner, H. Euringer, J. Linke, M. Sauer, M. Scheerer, R. Uhlemann, Ph. Chappuis, M. Lipa, R. Mitteau</i> .....	263
<b>Development and optimisation of tungsten armour geometry for ITER divertor</b> <i>A. Makhankov, I.V. Mazul, V. Safronov, N. Yablokov</i> .....	267
<b>A consistent 2D analysis of erosion of the ITER slot divertor</b> <i>H. Wurz, S. Pestchanyi, B. Bazylev, F. Kappler</i> .....	271
<b>Numerical simulation of brittle destruction and of carbon based materials due to pulsed plasma heating</b> <i>S.E. Pestchanyi, N.A. Usov, H. Wuerz</i> .....	275
<b>Evaluation of Tungsten and other refractory materials as a facing material for the ITER divertor and first wall</b> <i>A. Karasiov, S.A. Fabritsiev</i> .....	279
<b>Section B : Plasma Heating and Current Drive</b>	
<b>A design of an ECRH launcher for ITER</b> <i>O.G. Kruijt, P.R. Prins, A.G.A. Verhoeven, F.J. van Amerongen, W.A. Bongers, L. de Jong, R.P.J.J.M. Kruisbergen, M.A. Makowski, E. Woldberg</i> .....	283
<b>Feed back controls on Tore Supra ICRH antennae for High Power performances</b> <i>L. Ladurelle, C. Munnier, G. Agarici, B. Beaumont, S. Bremond, J.M. Delaplanche, G. Lombard, P. Mollard</i> .....	287

**Alfvén wave spectrum control in the heating and current drive experiments**

*L.F. Ruchko, E. Lerche, R.M.O. Galvao, E. Ozono, A.N. Fagundes, I.C. Nascimento* ..... 291

**Radiation induced power loss in insulating gases for ITER NBI systems**

*E.R. Hodgson, A. Morono* ..... 295

**ECRH system for the W7-X stellarator**

*V. Erckmann, T. Geist, H.P. Laqua, M. Weissgerber* ..... 299

**Design Characteristics of the Ion Cyclotron System for the KSTAR Tokamak**

*B.G. Hong, Y.D. Bae, C.K. Hwang, J.G. Kwak, M.H. Ju, D.W. Swain, P.M. Ryan, B.W. Riemer* ..... 303

**Neutral beam injection system for TJ-II**

*M. Liniers, J. Alonso, L. Martinez-Laso, J. Doncel, A. Garcia, M. Medrano, J. Guasp, C. Fuentes, C.C. Tsai, G.C. Barber, S.L. Milora, C. Alejaldre* ..... 307

**RF systems on SST1 tokamak**

*D. Bora, P.K. Sharma* ..... 311

**3MW, 110 GHz ECH system for the DIII-D tokamak**

*R.W. Callis, J. Lohr, D. Ponce, T.E. Harris, R.C. O'Neill, D.B. Remsen, R. Prater, T.C. Luce* ..... 315

**A steerable ECRF launcher for ITER**

*H.J. Grunloh, R. Prater, J.L. Doane, C.P. Moeller, M. Makowski* ..... 319

**RF circuit concept for a diacrode**

*C. Robert, G. Clerc, J.P. Ichac, A. Boussaton* ..... 323

**Coupling Characteristics of a Helicon Antenna in KAIST-Tokamak Plasma**

*S.J. Jeon, W. Choe, G.C. Kwon, J.H. Kim, H.S. Yi, W. Herr, H.Y. Chang, D.I. Choi* ..... 327

**Actively cooled guard limiters for Tore Supra ICRH and LHCD antennas**

*G. Agarici, B. Beaumont, Ph. Bibet, S. Bremond, J.M. Delaplanche, L. Garampon, T. Huber, L. Ladurelle, G. Lombard, P. Mollard, C. Patterlini, L. Plöchl* ..... 331

**The power measurement system of the Tore Supra ECRH transmitter at 118 GHz**

*G. Berger-By, J.P. Crenn, M. Pain, D. Roux* ..... 335

**Advanced launcher for lower hybrid current drive on Tore Supra**

*Ph. Bibet, F. Kazarian, G. Agarici, C. Deck, L. Doceul, Ph. Froissard, L. Garampon, M. Goniche, J. Mailloux, C. Portafaix, G. Rey, F. Samaille, J. Simoncini, G. Tonon, M. Durand, A. Vial, E. Rousset* ..... 339

**Vacuum tuner prototype development for ITER and Tore Supra ICRF launcher**

*S. Bremond, F. Durodie, G. Agarici, B. Beaumont, G. Bosia* ..... 343

**Beam optics of the SINGAP 1MeV 100 mA D- dc accelerator**

*J. Bucalossi, C. Desgranges, M. Fumelli, R.S. Hemsworth, P. Massmann, A. Simonin* ..... 347

**Lower hybrid heating and current drive design for ITER and application for present tokamaks**

*Ph. Froissard, G. Rey, Ph. Bibet, G. Bosia, L. Bruno, M. Goniche, F. Kazarian, S. Kuzikov, C. Portafaix, G. Tonon, F. Wasastjerna* ..... 351

**RF test of a TE30 hyperguide for a lower hybrid antenna**

*M. Goniche, P. Schild, Ph. Bibet, J. Plancoulaine, C. Portafaix, G. Rey, F.X. Söldner* ..... 355

**Testing of the 118 GHz-quasi CW gyrotron for the Tore Supra and TCV tokamaks**

*M. Pain, P. Garin, M.Q. Tran, S. Alberti, M. Thumm, E. Giguët, P. Thouvenin, C. Tran* ..... 359

**The drift source : a negative ion source module for DC multi-amperes ion beams**

*A. Simonin, G. Delogu, C. Desgranges, M. Fumelli* ..... 363

**Long pulse extraction of deuterium negative ion beams from the Kamaboko ion source**

*R. Trainham, C. Jacquot, Y. Fujiwara, Y. Okumura* ..... 367

**Operation of 15MW Negative-Ion-Based Neutral Beam Injection System For the Large Helical Device**

*Y. Oka, Y. Takeiri, K. Tsumori, O. Kaneko, M. Osakabe, E. Asano, T. Kawamoto, R. Akiyama* ..... 371

**A regulated High-Voltage Power Supply for ICRH Amplifiers in Class C Operation for ITER**

*J. Alex, P. Thomann* ..... 375

**Test of the quasi-optical ECRH launching system for Frascati Tokamak upgrade**

*A. Bruschi, R. Bozzi, S. Cirant, F. Gandini, G. Granucci, S. Mantovani, V. Mellerà, V. Muzzini, A. Nardone, A. Simonetto, C. Sozzi, N. Spinicchia* ..... 379

**Prototype design of the ITER ICRF vacuum transmission line dielectric window**

*J. Linden, L. Heikinheimo, J.A. Heikkinen, M. Kemppainen, S. Orivuori, M. Peräniitty, S. Saarelma, S. Tahtinen, F. Wasastjerna, G. Bosia* ..... 383

**Neutral Beam Injection on MAST**

*M.P.S Nightingale, S.E.V. Warder, D.C. Codling, R.T.C. Smith, M. Hill,  
S.J. Gee* ..... 387

**Progress of negative-ion based NBI system for JT-60U**

*M. Kuriyama, N. Akino, N. Ebisawa, L. Grisham, A. Honda, T. Itoh, M. Kawai,  
M. Kazawa, M. Kusaka, H. Liqueen, K. Mogaki, T. Ohga, K. Ohmori,  
K. Ohshima, Y. Okumura, H. Oohara, F. Satoh, H. Seki, anai, Y. Toyokawa,  
K. Usui, K. Watanabe, M. Yamaguchi, H. Yamazaki, T. Yamazaki* ..... 391

**Improvement of the ion source power supply for JT-60 negative-ion based NBI**

*K. Omori, K. Usui, K. Ohshima, T. Ohga, M. Kawai, K. Watanabe, T. Itoh,  
M. Kuriyama, Y. Ono, S. Kawashima* ..... 395

**Operation of the RF-System for the ECRH experiments on FTU tokamak**

*G. Granucci, C. Sozzi, B. Berardi, R. Bozzi, A. Bruschi, G. Ciccone, S. Cirant,  
S. Di Giovenale, F. Gandini, S. Lupini, V. Melleria, V. Muzzini, A. Nardone,  
A. Simonetto, N. Spinicchia, M. Zerbini* ..... 399

**Complex for ECRH and ECCD experiments on TJ-II**

*R. Martin, K. Likin, A. Fernandez, N.V. Matveev, J.R. Cepero* ..... 403

**The vacuum insulated beam source for the ITER neutral beam injection system**

*E. Di Pietro, P.L. Mondino, T. Inoue, A. Krylov, P. Bayetti, P. Massmann,  
E. Hodgson, Y. Okumura, Y. Watanabe, Y. Fujiwara, E. Murasaka* ..... 407

**Radiation analysis of the ITER neutral beam system**

*T. Inoue, K. Shibata, E. Di Pietro, Y. Fujiwara, R.S. Hemsworth, E.R. Hodgson,  
H. Iida, A. Krylov, P.L. Mondino, Y. Okumura, P. Bayetti, R.T. Santoro* ..... 411

**Development of high power gyrotron and transmission line for ECH/ECCD system**

*K. Takahashi, K. Sakamoto, A. Kasugai, M. Tsuneoka, Y. Ikeda, T. Imai,  
T. Kariya, Y. Mitsunaka* ..... 415

**Engineering issues of a 1000 S neutral beam ion source**

*P.K. Jayakumar, M.R. Jana, N. Bisai, M. Bajpai, N.P. Singh, U.K. Baruah,  
A.K. Chakraborty, M. Bandyopadhyay, C. Chakrapani, D. Patel, G.B. Patel,  
P.J. Patel, V. Prahlad, N.V.M. Rao, C. Rotti, V. Sreedhar, S.K. Mattoo* ..... 419

**Simulations and experiments on a multi-beam waveguide ECRH transmission system**

*G. Gantenbein, L. Empacher, V. Erckmann, F. Hollmann, W. Kasperek,  
M. Weissgerber, H. Zohm* ..... 423

**Ferrite hybrid system for generator matching in the ICRF**

*W. Arnold, J.S. De Grassie, D.B. Remsen, E. Pivitt, R. Russell, F. Braun* ..... 427

**Progress of the "Batman" RF source for negative hydrogen ions**

*P. Frank, J. Bucalossi, B. Heinemann, W. Kraus, F. Probst, E. Speth,  
R. Trainham, O. Vollmer* ..... 429

**Large-area, high-transparency extraction system for negative ions**

*B. Heinemann, J. Bucalossi, P. Frank, R. Riedl, A. Simonin, E. Speth,  
O. Vollmer* ..... 433

**Matching considerations in an ICRH-system with hybrid couplers**

*F. Hofmeister, F. Braun, H. Faugel, D. Hartmann, J.-M. Noterdaeme,  
F. Wesner* ..... 437

**An RF source optimized for low pressure operation**

*W. Kraus, P. Frank, B. Heinemann, R. Riedl, E. Speth, O. Vollmer* ..... 441

**An injection system for off-axis NBCD on ASDEX Upgrade**

*R. Riedl, A. Stäbler, B. Heinemann, J. Sielanko, E. Speth* ..... 445

**Commissioning and performance of the new ASDEX Upgrade neutral beam injector**

*O. Vollmer, A. Stäbler, E. Speth, M. Ciric, P. Franzen, B. Heinemann,  
W. Kraus, W. Melkus, R. Riedl, W. Schärlich* ..... 449

**High RF power test of a CFC antenna module for lower hybrid current drive**

*S. Maebara, M. Seki, Y. Ikeda, K. Kiyono, K. Sukanuma, T. Imai, M. Goniche,  
Ph. Bibet, rossaud J., ano V., F. Kazarian-Vibert, Ph. Froissard, G. Rey* ..... 453

**Radio frequency auxiliary heating systems design in ITER**

*M. Makowski, G. Bosia, C. Caroli, F. Elio, Ph. Froissard, T. Kodama, Y.U. Utin* ..... 457

**New design for the anode power supply of a gyrotron**

*D. Fasel, S. Alberti, A. Favre, A. Perez, J. Acero, D. Ganuza, I. Garcia,  
C. Lucia* ..... 461

**Toward an active passive waveguide array for lower hybrid application on ITER**

*F. Mirizzi, C. Gourlan, A. Marra, M. Roccon, A.A. Tuccillo, Ph. Bibet,  
Ph. Froissard, M. Goniche, F. Kazarian-Vibert, J. Mailloux, G. Rey,  
J. Simoncini* ..... 465

**Space and time resolved doppler spectroscopy of neutral beams**

*D. Ciric, H.D. Falter, D.J. Godden* ..... 469

**Operating experience with the JET tritium neutral beam injector**

*T.T.C. Jones, A.J. Bickley, C.D. Challis, S.J. Cox, H.P.L. De Esch, D.J. Godden, D. Stork, S.L. Svensson, D. Young* ..... 473

**Compensation for non-linear interaction between JET NBI deflection magnets for simultaneous D2/T2 beamline operation**

*H.P.L. De Esch* ..... 477

**Isotope exchange in high heat-flux components of the JET tritium neutral beam injector**

*D. Ciric, H.P.L. De Esch, H.D. Falter, T.T.C. Jones, L. Svensson* ..... 481

**Intervention to repair a tritiated JET neutral beam injector**

*M.J. Watson, A.C. Bell, A.J. Dines, F.H. Hurd, J.G. Lunquist, B.J. Macklin, J.C. Orchard, B. Patel* ..... 485

**Advanced high power gyrotrons for ECRH applications**

*M. Kuntze, E. Borie, O. Braz, G. Dammertz, S. Ily, G. Michel, A. Möbius, B. Piosczyk, M. Thumm* ..... 489

**Development of a 1 MeV H- beam accelerator for neutral beam injector**

*K. Watanabe, Y. Fujiwara, M. Hanada, T. Inoue, K. Miyamoto, N. Miyamoto, Y. Okumura, K. Satoh* ..... 493

**Initial tests of the ITER R&D prototype ion cyclotron antenna**

*D.W. Swain, R.H. Goulding, P.M. Ryan, J.B. Wilgen* ..... 497

**The fusion-FEM : 0,75 MW of mm-wave power**

*P.H.M. Smeets, W.A. Bongers, V.L. Bratman, S. Brons, M. Caplan, G.G. Denisov, C.A. Van \_der Geer, K.L. Lingier, P. Manintveld, J. Plomp, J. Pluygers, A.J. Poelman, A.V. Savilov, A.B. Sterk, A.A. Varfolomeev, A.G.A. Verhoeven, W.H. Urbanus* ..... 499

**Engineering issues for the design of the heat removal system and the cryo system for the 1000 s neutral beam injector for SST-1**

*P.K. Jayakumar, C. Chakrapani, N. Bisai, M. Bandyopadhyay, C. Rottii, B. Sreedhar, N.V.M. Rao, A.K. Chakraborty, M.R. Jana, V. Prahlad, U.K. Baruah, D. Patel, G.B. Patel, N.P. Singh, S.K. Mattoo* ..... 503

**Section C : Plasma Engineering and Control****ITER model reduction by Selective Modal Analysis**

*A. Beghi, D. Ciscato, M. Cavinato, G. Marchiori* ..... 507

**Implementation of advanced plasma control techniques for next-generation tokamaks**

*D.A. Humphreys, T.E. Evans, J.R. Ferron, A.W. Hyatt, A.G. Kellman, J.A. Leuer, B.G. Penafior, M.L. Walker, T.C. Jernigan, D.G. Whyte, R.S. Granetz, R.R. Khayrutdinov, V.E. Lukash, Y. Neyatani, R. Yoshino* ..... 511

**A systematic approach to error field analysis in ITER**

*J.A. Leuer, R.J. La Haye, A.G. Kellman, D.A. Humphreys, J.T. Scoville, Y. Gribov, J.C. Wesley, R. Buttery, T. Hender, N. Doinikov* ..... 513

**Application of Sequential Function Chart Methodology to ITER Control System**

*I. Yonekawa, J.Y. Journeaux, Y. Matsumoto* ..... 517

**Progress in shape control at ASDEX upgrade**

*W. Treutterer, O. Gruber, P.J. Mc Carthy, G. Raupp* ..... 521

**Control and communication system for plasma heating unit and power supply system of large helical device**

*C. Takahashi, R. Akiyama, T. Inoue, S. Takami, F. Shimbo, K. Haba, Y. Takita, E. Asano, G. Nomura, S. Ito, T. Komoto, Y. Taniguchi, H. Ogawa, N. Yamamoto, H. Chikaraishi, T. Mutoh, S. Kubo, H. Idei, Y. Takeiri, O. Kaneko, K. Watanabe, H. Yamada, S. Tanahashi, K. Yamazaki, K. Murai, T. Watari, O. Motojima* ..... 525

**ITER poloidal field system requirements for steady state reversed shear scenarios**

*V. Grandgirard, J.M. Ané, M.R. O'brien, X. Garbet, X. Litaudon, B. Lloyd, H. Lutfjens, D. Moreau, C. Roach, I. Voitsekhovitch, C. Warrick, M. Zabiego* ..... 529

**A long-period analog integrator for magnetic measurements in Tore Supra**

*M. Prou, E. Barth, B. Couturier, P. Ouvrier-Bufferet* ..... 533

**Automatic real-time protection reflexes to counteract instabilities**

*T. Zehetbauer, G. Neu, M. Maraschek, V. Mertens, G. Raupp, W. Treutterer, D. Zasche* ..... 537

**The Mast plasma control system**

*G.J. Mc Ardle, V.A. Belyakov, A. Kavin, P.J. Knight, A.W. Morris, D.A. Ovsyanikov, E.N. Rumyantsev, D.L. Trotman, E. Veremey, J. Waterhouse* ..... 541

**Reduction of toroidal magnetic field ripple in the advanced material tokamak experiment on JFT-2M**

*M. Sato, Y. Miura, H. Kimura, M. Yamamoto, T. Koike, T. Nakayama, M. Hasegawa, K. Urata* ..... 545

**Conceptual design of KSTAR plasma control system**

*Y.S. Hwang, M.C. Kim, B.J. Lee, M.C. Kyum, J.Y. Kim* ..... 549

**System of external windings for control of the plasma stability in tokamak T-10**

*P.V. Savrukhin, S.V. Tsaun* ..... 551

<b>Analysis of tolerances and error fields for the ITER magnet system</b> <i>C. Sborchia, E. Zapretalina, A. Alekseev, N. Doinikov, Y. Gribov, S. Krasnov, B. Mingalev, N. Mitchell, B. Stepanov, K. Yoshida</i> .....	555
<b>Plasma modelling for position and shape control in TCV</b> <i>P. Vyas, R. Albanese, G. Ambrosino, M. Ariola, I. Bandyopadhyay, A. Coutlis, D.J.N. Limebeer, J.B. Lister, F. Villone, J.P. Wainwright</i> .....	559
<b>The new FTU feedback control system : an approach oriented to the future plasma equilibrium configurations on FTU</b> <i>V. Vitale, G. Buceti, C. Centioli, S. Ciattaglia, F. Crisanti, G. D'Antona, G. Mazza, C. Neri, M. Riva</i> .....	563
<b>Control of the vertical instability in the high aspect ratio (A=5.5) elongated FTU plasmas</b> <i>M. Santinelli, W. Cocilovo, F. Crisanti, V. Riccardo</i> .....	567
<b>Interlock and protection systems for JET in-vessel cooling and cryogenic components</b> <i>D. Stork, P. Ageladarakis, A.C. Bell, T.A. Browne, T. Budd, P.R. Butcher, N. Dolgetta, C.G. Elsemore, S. Papastergiou, R.J.H. Pearce, D. Young</i> .....	571
<b>The JET level-1 software</b> <i>P.A. Mc Cullen, J.W. Farthing</i> .....	575
<b>Design and implementation of a real-time power control system at JET</b> <i>T. Budd, H. Brelen, Q. King, N. Zorning</i> .....	579
<b>Digital local control system of radial magnetic field errors in RFX : design, commissioning and first operation</b> <i>E. Gaio, A. Luchetta, G. Manduchi, G. Marchiori, V. Toigo</i> .....	583
<b>ITER scenario simulations with a non-linear MHD equilibrium code</b> <i>M. Cavinato, G. Marchiori, A. Beghi, D. Ciscato, A. Portone</i> .....	587
<b>Optimal design of the poloidal gap of a conductive shell for a RFP</b> <i>A. Masiello, G. Zollino</i> .....	591
<b>Plasma current, position and shape control for ITER</b> <i>P.L. Mondino, R. Albanese, G. Ambrosino, M. Ariola, A. Beghi, D. Ciscato, E. Coccoresse, Y. Gribov, D. Humphreys, A. Kavin, C. Kessel, R. Khayrutdinov, J.B. Lister, V.E. Lukash, Y. Mitrishkin, L.D. Pearlstein, A. Pironti, A. Portone, I. Senda, T. Shoji, P. Vyas, M.L. Walker</i> .....	595
<b>Application of HTSC coils for mitigation of VDE during a major disruption</b> <i>T. Yamada, T. Uchimoto, K. Miya, Y. Nakamura</i> .....	599

## Section D : Experimental Systems and Diagnostics

<b>Diagnostic neutral beam injector with RF plasma emitter</b> <i>I.V. Shikhovtsev, G.F. Abdrashitov, V.S. Belkin, A.I. Gorbovsky, V.I. Davydenko, P.P. Deichuli, A.N. Dranichnikov, A.A. Ivanov, V.A. Kapitonov, V.Ya. Kremyansky, V.V. Mishagin, A.A. Podminogin, V.Ya. Savkin, A.V. Sitnikov, R. Uhlemann</i> .....	605
<b>Characteristics of a large reversed field pinch machine, TPE-RX</b> <i>Y. Yagi, T. Shimada, Y. Hirano, S. Sekine, H. Sakakita, H. Koguchi, S. Kiyama, Y. Maejima, I. Hirota, K. Hayase, Y. Sato, K. Sugisaki, I. Oyabu, M. Hasegawa, M. Yamane, F. Sato, K. Kuno, T. Minato, A. Kiryu, S. Takagi, K. Sako, F. Kudough, K. Urata, J. Orita, H. Kaguchi, H. Sago, K. Ue</i> .....	609
<b>New instrumentation to characterize the electron velocity distribution in the TEXTOR tokamak</b> <i>B.S.Q. Elzendoorn, A.J.H. Donné, C.J. Barth, C. Domier, G. Van Dijk, J.C. van Gorkom, J.A. Hoekzema, C.A. Hugenholtz, O.G. Kruyt, H.J. Van der Meiden, T. Oyevaar, P.R. Prins</i> .....	613
<b>Design and manufacturing of vacuum vessel of TPE-RX</b> <i>H. Sago, H. Kaguchi, J. Orita, Y. Ishigami, K. Urata, M. Hasegawa, Y. Yagi, Y. Hirano, T. Shimada, S. Sekine, H. Sakakita</i> .....	617
<b>Feedthrough for the Actively cooled Dynamic Ergodic Divertor Coils at TEXTOR 94</b> <i>M. Poier, A. Charl, B. Giesen</i> .....	621
<b>Possible applications of powerful pulsed CO<sub>2</sub>-LASERS IN TOKAMAK REACTORS/FEASIB CO<sub>2</sub> -lasers in Tokamak reactors</b> <i>A.F. Nastoyashchii, I.N. Morozov, assanein A.</i> .....	625
<b>Plasma equilibrium diagnostics and control in TCABR Tokamak</b> <i>Yu. K. Kuznetsov, I.C. Nascimento, R.M.O. Galvao, L.F. Ruchko, A.G. Tuszel, R.P. Da Silva, A.M.M. Fonseca, A.P. Dos Reis, E.K. Sanada</i> .....	629
<b>Plasma boundary diagnostics in ITER:error analysis</b> <i>Yu.K. Kuznetsov, I.C. Nascimento, R.M.O. Galvao</i> .....	633
<b>Calorimetric measurement results on Tore Supra</b> <i>M. Chantant, A. Grosman, Ph. Ghendrih, F. Surle</i> .....	637
<b>The Tore Supra ergodic divertor from design to experiment</b> <i>Ph. Ghendrih, A. Grosman, J.J. Cordier, L. Gargiulo, G. Agarici, B. Bertrand, L. Doceul, M. Lipa, R. Mitteau</i> .....	641
<b>Tore Supra - a new conditioning procedure in the presence of the toroidal field</b> <i>C. Grisolia, G. Martin, F. Saint-Laurent</i> .....	645

<b>The Tore Supra centralised control system</b> <i>J.Y. Journeaux, F. Parlange, G. Martin</i> .....	649
<b>Tore Supra : the real time plasma control system</b> <i>D. Moulin, B. Couturier, L. Ducobu, D. Elbèze, B. Guillerminet, M. Leluyer, F. Leroux, P. Pastor, P. Spuig</i> .....	653
<b>Real time measurement of the position, density profile and current profile at Tore Supra</b> <i>F. Saint-Laurent, C. Gil, P. Houy, E. Joffrin, G. Martin, D. Moulin</i> .....	657
<b>Evolution of hydraulic system for moving components on Tore Supra</b> <i>F. Samaille, J.Y. Journeaux, L. Doceul, G. Giraud, G. Pasquier</i> .....	661
<b>The Tore Supra cooling system : 10 years of operation</b> <i>F. Surle, G. Mayaux, M. Chantant, J. Malagoli, D. Monbrun, P. Patier, B. Thos</i> .....	665
<b>Networked remote control and data acquisition on the MANTIS test stand</b> <i>R. Trainham, C. Jacquot</i> .....	669
<b>The MAST Data Acquisition System</b> <i>J. Waterhouse, S.J. Manhood</i> .....	673
<b>Control and data acquisition on a laser in-vessel viewing system</b> <i>R.C. Pereira, N. Cruz, C. Correia, C. Neri, M. Riva, A. Coletti, C.A.F. Varandas</i> .....	675
<b>Laser beam transport system for LHD THOMSON scattering diagnostic</b> <i>K. Yamauchi, H. Hayashi, M. Kojima, K. Murai, K. Narihara, I. Yamada, H. Nakanishi, T. Minami</i> .....	679
<b>Acceptable manufacturing accuracy of components used to build up the stellarator W7-X</b> <i>B. Sombach, J.H. Feist, H. Schneider, J. Simon-Weidner</i> .....	683
<b>Amplitude - modulated laser in vessel viewing system (LIVVS) for ITER / JET</b> <i>L. Bartolini, A. Coletti, M. Ferri de Collibus, G. Fornetti, C. Neri, M. Riva, L. Semeraro, C. Talarico</i> .....	685
<b>JET reliability assessment for 4T operation and the DTE1 3.8T experience</b> <i>S. Papastergiou, E. Bertolini, M. Buzio, A. Kaye, J. Last, P. Miele, V. Riccardo</i> .....	689
<b>Diagnostic experience during Deuterium-Tritium experiments in JET, techniques and measurements</b> <i>A. Maas, P.A. Andrew, P. Coad, A. Edwards, J. Ehrenberg, A. Gibson, K. Günther, M.G. Von Hellermann, D. Hillis, A. Howman, O.N. Jarvis, J.F. Jünger, R.W.T. König, J. Lingertat, M.J. Loughlin, P.D. Morgan, J.C. Orchard, G.J. Sadler, M.F. Stamp, C. Wilson</i> .....	693

### Recent Results on ITER Plasma Equilibrium Diagnostics and Identification

<i>R. Albanese, E. Coccoresse, P.J. Mc Carthy, F.C. Morabito, A. Pironti, M. Versaci</i> .....	697
--	-----

### Commissioning and operation of the ground loops detection system of RFX

<i>N. Pomaro, F. Bellina</i> .....	701
------------------------------------	-----

## Section E : Magnets and Power Supplies

### Realization of fast reversal time for toroidal field in TPE-2M

<i>Y. Sato, S. Kiyama, K. Hayase</i> .....	707
--	-----

### New proposal to estimate the current distribution in the CICC cross-section

<i>V. Amoskov, E. Lamzin, S. Sytchevskij, M. Zhelamskij, S. Egorov</i> .....	711
--	-----

### The first experimental observation of the He mass exchange between cable space and central channel in CICC obtained by SHF method during QUELL

<i>N. Shatil, M. Zhelamskij, A. Anghel, G. Vecsey, Y. Takahashi, K. Hamada</i> .....	715
--	-----

### The coil system of a helias reactor

<i>E. Harmeyer, O. Jandl, H. Wobig</i> .....	719
--	-----

### Design of equilibrium field control coil system of TPE-RX

<i>F. Sato, M. Hasegawa, M. Yamane, I. Oyabu, K. Urata, F. Kudough, T. Minato, A. Kiryu, S. Takagi, K. Kuno, K. Sako, Y. Hirano, Y. Yagi, T. Shimada, S. Sekine, H. Sakakita</i> .....	723
--	-----

### Magnetization and loss measurements of short samples of Nb3Sn round wires using hall probes and a standard magnetization technique

<i>M. Foitl, A. Kasztler, H. Kirchmayr, L. Krempasky, J. Kvitkovic, M. Polak</i> .....	727
--	-----

### Development, Design and Fabrication of Coil Casing and Embedding for the Wendelstein 7 - X Demo Coil

<i>H. Kronhardt, K.D. Herrmann, H. Klunker</i> .....	731
--	-----

### Design and Manufacturing of a Wendelstein 7-X Demonstration Coil

<i>H. Kronhardt, O. Dormicchi, J. Sapper</i> .....	735
--	-----

### The preparations for testing the ITER toroidal field model coil (TFMC)

<i>A. Ulbricht, M. Darweschad, J.L. Duchateau, H. Fillunger, S. Fink, G. Friesinger, R. Heller, P. Hertout, P. Libeyre, G. Noether, S. Raff, F. Wuechner, G. Zahn</i> .....	739
---	-----

<b>Development of an IGBT converter for a magnet power supply</b> <i>Y.M. Miura, M. Matsukawa, T. Kimura</i> .....	743
<b>Structural Analysis of the ITER Cryostat</b> <i>M. Verrecchia, P. Barabaschi, R. Haange, Y. Nagashima</i> .....	747
<b>10 kA range current lead for SST-1</b> <i>A. Amardas, B. Sarkar, L. Vipul, V.L. Tanna, Y.C. Saxena</i> .....	751
<b>Power Supply and Quench Protection for the WENDELSTEIN 7-X Magnet</b> <i>A. Nitsche, J. Sapper</i> .....	755
<b>Current control of superconducting coils of LHD</b> <i>H. Chikaraishi, S. Yamada, O. Motojima, T. Sato, K. Tomatsu, H. Niwa, T. Haga</i> .....	759
<b>New magnetic measurement of the Tore Supra toroidal field profile</b> <i>J.J. Cordier, P. Hertout, L. Gargiulo, V. Cantone, B. Soler</i> .....	763
<b>From conceptual to engineering design of the ITER TFMC</b> <i>P. Libeyre, B. Crepel, P. Decool, H. Fillunger, B. Glassl, U. Hoeck, R. Kreuzt, R. Maix, R. Meyer, R. Penco, S. Raff, E. Theisen, N. Valle</i> .....	767
<b>Hydraulics of the ITER toroidal field model coil cable-in-conduit conductors</b> <i>S. Nicollet, H. Cloez, J.L. Duchateau, J.P. Serries</i> .....	771
<b>Conductor fabrication for the HT-7U model coil</b> <i>B. Li, S.T. Wu, W.Y. Wu, Y.F. Bi, P.D. Weng, Z. Chen, Y.N. Pan, D. Wu, Y.H. Zhu</i> .....	775
<b>Design and construction of cryogenic supporting structures for LHD</b> <i>S. Imagawa, H. Tamura, A. Nishimura, T. Satow, S. Satoh, O. Motojima</i> .....	779
<b>ITER magnetic system candidates low friction materials tested under vacuum at cryogenic temperature</b> <i>L.F. Moreschi, S. Storai, A. Pizzuto, A. Orsini, P. Zbigniew, G. Malavasi</i> .....	783
<b>Design and construction of AC loss measuring system</b> <i>J. Li, G. Zhang, Y. Pan, Y. Zhu, B. Li, Z. Chen, S. Wu, W. Wu, X. Wu</i> .....	787
<b>Consideration of high T<sub>c</sub> superconductor application to magnets for tokamak fusion reactors</b> <i>T. Ando, T. Isono, H. Nakajima, M. Kikuchi, H. Tsuji</i> .....	791
<b>Optimization of the protective energy removal parameters for tokamak HT7-U superconducting magnets</b> <i>P.P. Khvostenko, Y.F. Bi, S.M. Cheng, A.N. Chudnovsky, Y.X. He, I.A. Posadsky</i> .....	795

<b>Toward less expensive conductors for the ITER magnets</b> <i>D. Bessette, N. Mitchell</i> .....	799
<b>ITER central solenoid model coil fabrication and implications for the full scale central solenoid</b> <i>R.J. Thome, K. Okuno, R. Vieira, D. Bessette, Z. Piec, R. Jayakumar, N. Martovetsky, J. Wohlwend, H. Tsuji, T. Ando, H. Nakajima, T. Kato</i> .....	803
<b>Electrical insulation design and monitoring of the ITER magnet system</b> <i>K. Yoshida, F. Iida, R. Gallix, S. Sadakov, R. Vieira, J. Stoner, C. Sborchia</i> .....	807
<b>Integrated protection for the ITER coils and power supplies</b> <i>P.L. Mondino, B. Bareyt, I. Benfatto, N. Britousov, C. Neumeyer, A. Roshal</i> .....	811
<b>Calculations for the optimization of the external connections of the Dynamic-Ergodic-Divertor of Textor-94</b> <i>D. Styhler, U. Braunsberger, B. Giesen, M. Lindmayer, O. Neubauer</i> .....	815
<b>Support system for the W7-X coil assembly</b> <i>N. Jaksic, J. Simon-Weidner, J. Sapper</i> .....	819
<b>Fast evaluation of W7-X components with aspects of safety based on FE-calculations</b> <i>J. Simon-Weidner, N. Jaksic</i> .....	823
<b>Manufacture of the MAST centre rod and ohmic heating solenoid</b> <i>J. McKenzie, G. Voss</i> .....	827
<b>The RTP chopper-regulated, voltage-smoothed power supplies</b> <i>J. Lok, A. Agterberg, B. De Groot, M. Kaay, A.B. Sterk, A. Verheul</i> .....	829
<b>Manufacture of the ITER TF model coil</b> <i>R. Maix, G. Di Bartolo, G. Bevilacqua, P. Libeyre, P. Decool, A. Ulbricht, B. Schellong, A. Bourquard, B. Crepel, N. Valle, P. Pesenti, E. Theisen</i> .....	833
<b>A new flywheel for the TCV turbo-generator</b> <i>A. Perez, E. Beaumont, P. Bey, R. Chavan, C.W. Hustad, D. Fasel, A. Favre, F. Picard, J.J. Simon, H. Sprysl</i> .....	837
<b>Successful completion of the conductor manufacture for the ITER TF model coil</b> <i>A. Della Corte, M. Ricci, M. Spadoni, G. Bevilacqua, R. Maix, E. Salpietro, S. Conti, R. Garrè, S. Rossi</i> .....	841
<b>Mechanical assessment of the JET TF coils for 4T upgrade : the new 3D hybrid model</b> <i>P. Miele, E. Bertolini, M. Buzio, A. Kaye, J. Last, S. Papastergiou, V. Riccardo</i> .....	845

<b>The upgrade of the JET toroidal field power supplies for the 4 tesla operation</b> <i>T. Bonicelli, D. Chiron, P. Doyle, M. Huart, A. Paynter, P. Smith</i> .....	849
<b>New power supply to generate a rotating toroidal field in RFX</b> <i>R. Piovan</i> .....	853
<b>Large coil modelling for fast transient simulations</b> <i>A. De Lorenzi, P. Bettini, G. Chitarin</i> .....	857
<b>Main technological aspects of the ITER AC/DC converter system</b> <i>E. Gaio, A. Maschio, R. Piovan, V. Toigo, G. Candela, A. Coletti, I. Benfatto, P.L. Mondino, A. Roshal, P. Bordignon, A. Galli, A. Piazzesi</i> .....	861
<b>Development of the KSTAR CS (central solenoid) model coil</b> <i>S.H. Kim, Y.H. Kim, Y.H. Kim, H.S. Kim, K.H. Chung</i> .....	865
<b>Mechanical deformation of the large helical device during cooling-down and excitation tests</b> <i>A. Nishimura, H. Tamura, S. Imagawa, S. Satoh, O. Motojima</i> .....	869
<b>Mechanical and welding test results for design of the large helical device</b> <i>A. Nishimura, H. Tamura, S. Imagawa, T. Satow, S. Satoh, O. Motojima</i> .....	873
<b>High voltage regulator for power modulation of a gyrotron with voltage depressed collector</b> <i>G.A. Müller, W. Förster, V. Erckmann</i> .....	877
<b>Effects of the Eddy current flowing in the cold structures of the ITER magnet system</b> <i>R. Albanese, E. Coccoresse, J.L. Duchateau, N. Mitchell, G. Reitano, G. Rubinacci, E. Zapretilina</i> .....	879
<b>Coil Designs for a Quasi-Axially Symmetric Stellarator</b> <i>M. Drevlak</i> .....	883
<b>Reactive Power Compensation for the Pulsed Power Supply of ASDEX Upgrade</b> <i>C. Sihler, B. Streibl, R. Klein, W. Schlüter, M. Krohn</i> .....	887
<b>The HT-7U superconducting tokamak model coils</b> <i>P.D. Weng, Y. Pan, S.T. Wu, Y.F. Bi, W.Y. Wu, B.Z. Li, B.Z. Chen, Y.H. Zhu, X. Wu, Y. Chao, J. Li, D. Wu, W.J. Pan, Q. Chen, D. Gao, J. Yu, W. Zhu, J. Wen, L.P. Cheng, Y. Tao</i> .....	891
<b>Concept and sensors for "extrinsic" diagnostic of superconducting magnet systems from the safety point of view</b> <i>M. Zhelamskij, N. Gorbachuk, A. Anghel</i> .....	895

**Structural assessment of the ITER magnet system**

<i>C. Sborchia, A. Alekseev, A. Arneman, R. Gallix, M. Huguet, C. Jong, Y. Krivchenkov, A. Malkov, N. Mitchell, A. Panin, B. Stepanov, R.J. Thome, P. Titus, F. Wong</i> .....	899
--	-----

**Stress analysis of the conductor and support structure for poloidal field coils of SST-1 tokamak**

<i>B. Biswas, V. Jain, K.J. Thomas, Y.C. Saxena</i> .....	903
---	-----

## VOLUME 2

## Section F : Fuel Technologies

**Performances of an hybrid vacuum pump prototype at low temperature**

<i>J.P. Perin, J. Manzagol, J.J. Cordier, P. Garin, F. Samaille</i> .....	909
---	-----

**PILATUS : A Test Facility for Tritium Extraction from a Solid Breeder Blanket**

<i>E. Hutter, H. Albrecht, G. Neffe</i> .....	913
---	-----

**Pellet injectors for a steady state fuelling**

<i>I.V. Viniar, S. Sudo, A. Umov, S. Skoblikov, P.V. Reznitchenko</i> .....	917
---	-----

**The experimental basis for the ITER cryopump regeneration concept**

<i>Chr. Day, A. Mack, D. Murdoch, D. Röhrig</i> .....	921
---	-----

**Dynamic compact mass-spectrometer for in-line mode analysis of ITER fuel mixture. Preliminary tritium testing & calibration experiments**

<i>G.L. Saksagansky, N.N. Aruev, I.L. Fedichkin, E.L. Koira, A.V. Kozlovsky, B.A. Mamyrin, S.N. Markovsky</i> .....	925
---	-----

**Investigation of the Deuterium Release rate in the Electric Pulsed Hydride Injector (EPHI)**

<i>Yu.A. Kareev, U. Tamm, I.S. Glushkov, E. Hutter, V.P. Novikov, R.-D. Penzhorn, V.V. Frunze</i> .....	929
---	-----

**Getter bed for tritium handling : temperature evolution during loading sequences**

<i>F. Ghezzi</i> .....	933
------------------------	-----

**Tritium inventories of catalyst beds used in torus exhaust clean-up processes**

<i>M. Glugla, R. Kraemer, T.L. Le, R.D. Penzhorn, K.H. Simon, J. Wendel</i> .....	937
---	-----

**Development status of high speed pellet injectors for fusion devices fuelling**

<i>A. Geraud, J.P. Perin, G. Gros</i> .....	941
---	-----
