21st Symposium on Fusion Technology (SOFT-21) Madrid, Spain, September 11–15, 2000

Magnets and Power Supplies

Evaluation of critical current performance of 13 T–46 kA steel-jacketed Nb ₃ Al conductor, <i>N. Koizumi, K. Azuma, Y. Tsuchiya, K. Matsui, Y. Takahashi, H. Nakajima, G. Nishijima, Y. Nunoya, T. Ando, T. Isono, M. Sugimoto, T. Kato, K. Kawano, T. Hiyama, M. Oshikiri, H. Wakabayashi, K. Takano, S. Seki, Y. Uno, T. Nakamura, K. Sawada, T. Shinba, H. Hanawa, H. Tsuji, K. Kikuchi, A. Fuchs, P. Bruzzone, B. Blau, G. Vesey, A. Nyilas and K. Okuno</i>	1
Self-field effects in large superconducting cables for ITER, <i>A. Anghel</i>	7
Design of the toroidal field coil for A-SSTR2 using high T _c superconductor, <i>T. Ando, T. Kato, K. Ushigusa, T. Nishio, R. Kurihara, I. Aoki, K. Hamada, H. Tsuji, M. Hasegawa and H. Naito</i>	13
A new power supply scheme for the toroidal circuit of RFX, <i>R. Piovan, V. Toigo and L. Zanotto</i>	17
Design and tests of the 50 kA–18 kV thyristor making switches for the RFX experiment, <i>A. De Lorenzi, G. Taddia and V. Toigo</i>	23
The power supply of the radial field control system at the RFX equatorial gap, <i>E. Gaio, F. Milani and V. Toigo</i>	29
Stabilization of power system for large-scaled experimental fusion facility, <i>S. Yamada, S. Kitagawa, H. Chikaraishi, K. Murai, Y. Mizuno, F. Saito, A. Hayakawa, H. Sawamura, T. Ise, Y. Sato, O. Kaneko, Y. Nakamura, T. Satow and O. Motojima</i>	35
Paralleling of two large flywheel generators for the optimisation of the ASDEX Upgrade power supply, <i>C. Sihler, P. Fu, M. Huart, B. Streibl and W. Treutterer</i>	41
Design requirements for the plasma edge control system in WENDELSTEIN 7-X, <i>T. Rummel and I. Schoenewolf</i>	47
The power supply system of the Dynamic Ergodic Divertor at TEXTOR-94, <i>O. Neubauer and S. Nowak</i>	53
A deadbeat control method for a PWM converter applied to a superconducting magnet, <i>Y.M. Miura, M. Matsukawa and H. Nakano</i>	57
Application of parallel connected power-MOSFET elements to high current d.c. power supply, <i>T. Matsukawa, M. Shioyama, K. Shimada, T. Takaku, C. Neumeyer, S. Tsuji-Iio and R. Shimada</i>	63
Circuit analysis and control of the power supply system for the testing of ITER TF model coil, <i>V. Marchese, S.M. Darweschad, G. Nöther, A. Ulbricht and F. Wüchner</i>	69

The design of power supply system of HT-7U super-conductive Tokamak, Z.Z. Liu, J.Z. Xu, P. Fu, J.L. Wen, J. Tao, Q. Hwan, J. Li, G. Gao and R.C. Cheng	75
Power supply of the control coils of Wendelstein 7-X experiment, E. Jauregi, D. Ganuza, I. Garcia, J.M. Del Rio and T. Rummel	79
The ITER-FEAT power supply system and interface with the site HV power grid, A. Roshal, B. Bareyt, I. Benfatto, N. Britousov, D. Hrabal, K. Krueger, A. Maschio, P.L. Mondino and T. Shoji	87
Development of ITER-CS model coil terminal assembling by using indium wires, Y. Takahashi, T. Kato, Y. Nunoya, T. Ando, G. Nishijima, H. Nakajima, T. Hiyama, M. Sugimoto, T. Isono, N. Koizumi, K. Kawano and H. Tsuji	93
The JET high DC power test facility and the life testing of a high current ITER switch, S.R. Shaw, T. Bonicelli, M. Huart and C. Lescure	99
Development program of a 60 kA high temperature superconductor current lead for the ITER toroidal field coils, R. Heller, G. Friesinger, A.M. Fuchs, P. Komarek, T. Mito, S. Satoh, K. Takahata, M. Tasca, A. Ulbricht, G. Vécsey and M. Vogel	105
Behavior of a superconducting magnet, with the conductor built into plates, during quench and subsequent fast discharge, R. Meyder and R. Heller	111
NbTi superconducting busbars for the ITER TFMC, P. Libeyre, P. Decool, J.L. Duchateau, H. Cloez, A. Kienzler, A. Lingor, H. Fillunger, R. Maix, A. Bourquard and F. Beaudet	117
Joints for large superconducting conductors, P. Decool, D. Ciazynski, A. Nobili, S. Parodi, P. Pesenti, A. Bourquard and F. Beaudet	123
Risks and benefits of Incoloy 908, P. Libeyre, C. Brosset, P. Decool, M. Rubino, G. Bevilacqua, A. Laurenti, P. Pesenti, M. Ursuleac, N. Valle and A. Nyilas	129
Irradiation and mechanical testing of ITER relevant magnet insulation, H. Fillunger, H. Gerstenberg, K. Humer, R.K. Maix, K. Okuno, P. Rosenkranz, H.W. Weber and N. Wiegner	135
ITER-FEAT central solenoid structural analysis and fatigue life assessment, M. Verrecchia, D. Bessette, N. Mitchell and Y. Krivchenkov	141
Test program preparations of the ITER toroidal field model coil (TFMC), J.L. Duchateau, H. Fillunger, S. Fink, R. Heller, P. Hertout, P. Libeyre, R. Maix, C. Marinucci, A. Martinez, R. Meyder, S. Nicollet, S. Raff, M. Ricci, L. Savoldi, A. Ulbricht, F. Wuechner, G. Zahn and R. Zanino	147
Key features of the ITER-FEAT magnet system, K. Okuno, D. Bessette, M. Ferrari, M. Huguet, C. Jong, K. Kitamura, Y. Krivchenkov, N. Mitchell, H. Takigami, K. Yoshida and E. Zapprettilina	153
Completion of the ITER toroidal field model coil, R.K. Maix, H. Fillunger, F. Hurd, E. Salpietro, N. Mitchell, P. Libeyre, P. Decool, A. Ulbricht, G. Zahn, A. Della Corte, M. Ricci, D. Bresson, A. Bourquard, F. Baudet, B. Schellong, E. Theisen and N. Valle	159
The ITER-FEAT toroidal field structures, C.T.J. Jong, N. Mitchell and C. Sborchia	165
ITER TF model coil assembly, commissioning and instrumentation, F.H. Hurd, H. Fillunger, G. Zahn, A. Ulbricht, P. Libeyre, E. Theisen and F. Beaudet	171
The thermal shields for the ITER magnet system: thermal, structural and assembly aspects, V. Bykov, A. Nishikawa, G. Dalle Carbonare, A. Alekseev, S. Grigoriev, Y. Krasikov, V. Krylov, A. Labusov and M. Nakahira	177
Electromagnetic analyses for the dynamic control of RFX equilibrium with a new shell, R. Cavazzana, G. Chitarin, L. Grando, G. Marchiori and G. Zollino	183
The error field correction coils on the JET machine, I. Barlow, M. Bigi, J. Bird, G. Bonizzoni, R. Buttery, R. Clay, M. De Benedetti, T. Dobbing, T. Gallagher, G. Gervasini, G. Gittini, T.C. Hender, S. Hotchin, J. Last, E. Lazzaro, M. Lennholm, S. Peruzzo, V. Riccardo, L. Rossi, A. Santagiustina, D. Starkey, A. Stevens, M. Tabellini, A. Tanga, A. Terrington, M. Vincent, P. Watkins, M. Way and M. Williams	189

The superconducting magnet system for the ATLAS detector at CERN, P. Miele, H.H.J. ten Kate and The ATLAS Collaboration	195
Design of the ITER-FEAT cryoplant to achieve stable operation over a wide range of experimental parameters and operation scenarios, G. Claudet, V. Kalinine, N. Mitchell, P. Roussel and N. Shatil	205
Pressure drop and helium inlet in ITER CS1 conductor, P. Bruzzone	211
The Tore Supra Cryoplant control system upgrade, R. Garbil, J.L. Maréchal, B. Gravil, D. Henry, J.Y. Journeaux, D. Balaguer, J. Baudet, A. Bocquillon, P. Fejoz, P. Prochet, C. Roux and J.P. Serries	217
Final design and construction of the Wendelstein7-X coils, L. Wegener, J.-H. Feist, J. Sapper, F. Kerl and F. Werner	225
Numerical simulation of welds of thick steel sheets for some experimental models towards ITER TF coil case, B. Carmignani, G. Toselli, S. Interlandi, F. Lucca and A. Marin	231
The layout of the WENDELSTEIN 7-X magnet, J. Sapper, W. Gardebrecht, F. Kerl and I. Schoenewolf	237
Classical and fracture mechanics analysis of the tails of the JET TF coils, V. Riccardo, J.R. Last and A.S. Kaye	241
Structural analysis and verification of the ITER TF model coil test conditions, S. Raff, P. Schanz, H. Fillunger and B. Glaßl	247
Stress and strain measurement of the large helical device during coil excitation, A. Nishimura, H. Tamura, S. Imagawa, T. Satow, S. Satoh, O. Motojima and a. LHD group	253
Final structural and mechanical evaluation of the W7-X magnet support system, N. Jaksic, J. Simon-Weidner and J. Sapper	259
Structural analysis of the Helias reactor coil system, E. Harmeyer, O. Jandl, J. Kießlinger and H. Wobig	265
Change of manufacturing technique for the W7-X nonplanar coil cases, M. Gehring, P. Schäfer, K.D. Herrmann and H. Scheller	271
Design of the poloidal field system and plasma equilibrium of HT-7U tokamak, W. Weiyue and L. Baozeng	277
Manufacture of full scale models of the ITER Toroidal Field coil cases, G. Bevilacqua, L. Borin, G. Durix, F. Fusari, M. Huguet, R. Kind, G. Malavasi, N. Mitchell, A. Nyilas, G. Poltronieri, E. Salpietro, A. Scardua and C. Sborchia	281
Irradiation effects on the fatigue behaviour of an ITER candidate magnet insulation material in tension and interlaminar shear, P. Rosenkranz, K. Humer, H.W. Weber and E.R. Hodgson	289
Fuel Technologies	
Pellet injectors developed at the PELIN laboratory for international projects, I. Viniar, S. Sudo, A. Geraud, J.P. Perin, J. Manzagol, P. Ladd, G. Saksagansky, S. Skoblikov, A. Lukin, A. Umov, P. Reznichenko, K. Khlopenkov, I. Krasilnikov and I. Rukhlenko	295
New operational aspects of the ITER-FEAT primary vacuum pumping system, C. Day, H. Haas, A. Mack and D.K. Murdoch	301
On an Electric Pulsed Hydride Injector for gas puffing into tokamaks, Y.A. Kareev, U. Tamm, I.S. Glushkov, Y.G. Gendel, G. Mueller, R.-D. Penzhorn and V.P. Novikov	307
A mock-up of a tritium pellet injector for ITER, I. Viniar, G. Saksaganskii, S. Skoblikov, I. Krasilnikov and S. Pimanikhin	313
Pellet injection on START and MAST, C. Ribeiro, R. Akers, F. Alladio, K. Axon, L. Baylor, G.F. Counsell, J. Dowling, S. Fielding, L. Garzotti, M. Gryaznevich, W.E. Han, P. Innocente, I. Jenkins, J. deKloe, R. Martin, P. Micozzi, B. Sass, A. Sykes, D. Terranova, T.N. Todd, P. Twynam, M. Wakatani, M.J. Walsh, S. You and NBI Team	319

Design and implementation of a high speed guiding system for inboard pellet refuelling, <i>A. Lorenz, P. Cierpka, C. Dorn, P.T. Lang, R.S. Lang and W. Zeidner</i>	325
A repetitive pellet injection system for JT-60U, <i>K. Kizu, N. Hosogane, H. Hiratsuka, H. Ichige, T. Sasajima, K. Masaki, N. Miya, M. Honda, T. Iwahashi, N. Sasaki and P.T. Lang</i>	331
Test of an extruder feed system on the Tore Supra centrifugal pellet injector, <i>A. Géraud, J.F. Artaud, G. Gros, C. Pocheau, S.K. Combs and C.R. Foust</i>	337
ORNL mock-up tests of inside launch pellet injection on JET and LHD, <i>S.K. Combs, L.R. Baylor, P.W. Fisher, C.R. Foust, M.J. Gouge, D. Pavarin, R. Sakamoto, P. Twynam, M. Watson and H. Yamada</i>	343
The tritium fuel cycle of ITER-FEAT, <i>M. Glugla, A. Busigin, L. Dörr, R. Haange, T. Hayashi, O. Kveton, R. Lässer, D.K. Murdoch, M. Nishi, R.-D. Penzhorn and H. Yoshida</i>	349
Research into tritium impact on the models of cryosorption panels under conditions simulating operation of a vacuum pump of fusion reactors, <i>A.I. Vedeneev, M.V. Glagolev, N.T. Kazakovskiy, V.N. Lobanov, I.L. Malkov, S.A. Pimanikhin and G.L. Saksaganskiy</i>	355
Vacuum pumping developments on the JET tokamak, <i>R.J.H. Pearce, S. Bryan, R. Cerruti and N. Green</i>	359
First operation experiences with ITER-FEAT model pump, <i>A. Mack, C. Day, H. Haas, D.K. Murdoch, J.C. Boissin and P. Schummer</i>	365
Experimental validation of main components of the Tokamak exhaust process for ITER-FEAT, <i>R. Lässer, M. Glugla, K. Günther, T.L. Le, D. Niyongabo, R.-D. Penzhorn and K.H. Simon</i>	371
ITER vacuum pumping and leak detection systems, <i>P. Ladd, A. Antipenkov, G. Janeschitz and R. Marrs</i>	377
Tritium off-gassing trials on dust and flakes from the JET MKIIA divertor, <i>S.J. Knipe, A.C. Bell, P.D. Brennan, J.P. Coad, C.J. Manning and A.N. Perevezentsev</i>	383
Development of a micro gas chromatograph for the analysis of hydrogen isotope gas mixtures in the fusion fuel cycle, <i>Y. Kawamura, S. Konishi and M. Nishi</i>	389
Evaluation of an Omegatron mass spectrometer for use in the plasma exhaust processing of a fusion reactor, <i>C.J. Caldwell-Nichols, R.-D. Penzhorn, S. Grünhagen, M. Sirch and J. George</i>	395
Study of the high efficiency of ZrNi alloys for tritium gettering properties, <i>K. Tsuchiya, T. Kabutomori and H. Kawamura</i>	401
A high porous-matrix 2D-SiC _f /SiC as permeator for the efficient recovery of tritium solved in Pb-17Li with compact and efficient columns®, <i>L.A. Sedano</i>	407
Analytic of tritium-containing gaseous species at the Tritium Laboratory Karlsruhe, <i>R. Lässer, C. Caldwell-Nichols, L. Dörr, M. Glugla, S. Grünhagen, K. Günther and R.-D. Penzhorn</i>	411
Hydrogen isotopes separation by thermal cycling absorption process, <i>D. Ducret, A. Ballanger, J. Steimetz, C. Laquerbe, O. Baudouin and P. Sere Peyrigain</i>	417
Cold trapping of traces of tritiated water from the helium loops of a fusion breeder blanket, <i>N. Bekris, E. Hutter, H. Albrecht, R.-D. Penzhorn and D. Murdoch</i>	423
Bipolar electrolysis for tritium recovery from weakly active tritiated water, <i>S. Heinze, P. Giroux, D. Ducret, J.-C. Colson and B. Vuillemin</i>	429
A new type separation column for the water-hydrogen isotope catalytic exchange process, <i>O.A. Fedorchenko, I.A. Alekseev and V.D. Trenin</i>	433
Operating experience of the experimental industrial plant for reprocessing of tritiated water wastes, <i>I.A. Alekseev, S.D. Bondarenko, O.A. Fedorchenko, A.I. Grushko, S.P. Karpov, K.A. Konoplev, V.D. Trenin, E.A. Arkhipov, T.V. Vasyanina, T.V. Voronina and V.V. Uborsky</i>	439
New 80 K cryo-mechanical pump project, <i>J. Manzagol, J.P. Périn, J.J. Cordier, P. Garin and F. Samaille</i>	445

Remote Handling

The audio and visual communication systems for suited engineering activities on JET, <i>R.J.H. Pearce, J. Bruce, C. Callaghan, M. Hart, P. Martin, R. Middleton and J. Tait</i>	451
ITER-FEAT divertor maintenance and integration, <i>E. Martin, R. Tivey, G. Janeschitz, A. Antipenkov, B. Braun, T. Honda, H. Heidl, M. Kannamüller, D. Maisonnier, T. Matsunobu, M. Mills, P. Ladd, J. Palmer, N. Takeda, A. Tesini and C. Walker</i>	457
Performance and remote maintenance of attachment schemes for Plasma Facing Components, <i>J. Palmer, S. Chiocchio, C. Damiani, M. Irving, D. Maisonnier, E. Martin, A. Poggianti, M. Siuko and A. Turner</i>	463
ITER in-vessel components transfer using remotely controlled casks, <i>A. Tesini, T. Honda, J. Palmer, D. Maisonnier and K. Shibamura</i>	469
Tool prototypes for replacing plasma facing components, <i>M. Siuko, S. Chiocchio, C. Damiani, M. Irving, D. Maisonnier, J. Palmer, M. Pitkäaho, A. Poggianti, J. Poutanen, A. Raneda, A. Turner and M. Vilenius</i>	475
Overview of Bore Tools Systems for divertor remote maintenance of ITER, <i>J.-P. Friconneau, J.-P. Alfille, G. Cerdan, C. Damiani, O. David, D. Maisonnier, J. Palmer, Y. Perrot, A. Tesini and M. Wojtowicz</i>	481
New achievements of the Divertor Test Platform programme for the ITER divertor remote maintenance R&D, <i>C. Damiani, L. Baldi, L. Galbiati, M. Irving, L. Lorenzelli, G. Micciché, L. Muro, S. Nucci, G. Varocchi, A. Poggianti, G. Fermani, D. Maisonnier, J. Palmer, E. Martin, J.P. Friconneau, P. Gravez and N. Takeda</i>	487
Remote metrology, mapping, and motion sensing of plasma facing components using FM coherent laser radar, <i>M.M. Menon, R.E. Barry, A. Slotwinski, H.W. Kugel and C.H. Skinner</i>	495
A software environment to execute automatic operational sequences on the ITER-FEAT DTP facility, <i>G. Fermani and M. Zarfino</i>	499
Experimental results of laser in vessel viewing system (LIVVS) for JET, <i>L. Bartolini, A. Coletti, M. Ferri de Collibus, G. Fornetti, C. Neri, M. Riva, L. Semeraro and C. Talarico</i>	507
Modified ITER In-Vessel Viewing System, <i>H. Ahola, V. Heikkinen, K. Keränen and J. Suomela</i>	513
In situ characterization of a small sized motor under neutron irradiation, <i>E. Ishitsuka, S. Kan, H. Kawamura and H. Onozawa</i>	517
Blanket and Shield Technologies	
Further improvements of the water-cooled Pb-17Li blanket, <i>M.A. Fütterer, G. Benamati, I. Ricapito, L. Giancarli, G. Le Marois, A. Li Puma, Y. Poitevin, J. Reimann, J.-F. Salavy, J. Szczepanski, G. Vella and G. Ruvutuso</i>	523
Conceptual design of a hybrid HCPB blanket, <i>L.V. Boccaccini, U. Fischer, S. Gordeev and S. Malang</i>	529
High dose neutron irradiation damage in beryllium as blanket material, <i>V.P. Chakin, V.A. Kazakov, A.A. Teykovtsev, V.V. Pimenov, G.A. Shimansky, Z.E. Ostrovsky, D.N. Suslov, R.N. Latypov, S.V. Belozarov and I.B. Kupriyanov</i>	535
Thermal-hydraulic design of direct superheated steam blanket for the compact reversed shear tokamak reactor (CREST), <i>Y. Nomoto, T. Ishida, H. Ise, S. Mori, Y. Asaoka, T. Yoshida, R. Hiwatari and K. Okano</i>	543
High performance blanket for ARIES-AT power plant, <i>A.R. Raffray, L. El-Guebaly, S. Gordeev, S. Malang, E. Mogahed, F. Najmabadi, I. Sviatoslavsky, D.K. Sze, M.S. Tillack, X. Wang and ARIES Team</i>	549

Vertical displacement event/disruption electromagnetic analysis for the ITER-FEAT vacuum vessel and in-vessel components, <i>N. Miki, M. Verrecchia, P. Barabaschi, A. Belov, S. Chiochio, F. Elio, K. Ioki, S. Kikuchi, V. Kokotkov, J. Ohmori, M. Roccella, P. Sonato, P. Testoni and Y. Utin</i>	555
Manufacture of an ITER primary wall module shield prototype by powder hiping, <i>P. Lorenzetto, W. Daenner, A. Lind, H. Eriksson, C.G. Hjorth, K. Lill and A. Cardella</i>	561
Assembly of ITER blanket module to vacuum vessel experimental investigations, <i>L.P. Jones, P. Alfilé, C. Antonucci, A. Cardella, C. Dupuy, W. Daenner, F. Elio, D. Maisonnier, A. Pizzuto and T. Schmeskal</i>	567
Design and fabrication methods of FW/blanket and vessel for ITER-FEAT, <i>K. Ioki, V. Barabash, A. Cardella, F. Elio, G. Kalinin, N. Miki, M. Onozuka, T. Osaki, V. Rozov, G. Sannazzaro, Y. Utin, M. Yamada and H. Yoshimura</i>	573
Design of blanket cooling manifold system for ITER-FEAT, <i>F. Elio, K. Ioki, M. Yamada and H. Yoshimura</i>	579
Experimental investigation of radioactivity induced in the fusion power plant structural material SiC and in the breeder material Li_4SiO_4 by 14-MeV neutrons, <i>K. Seidel, R.A. Forrest, H. Freiesleben, V.D. Kovalchuk, D.V. Markovskij, D. Richter, V.I. Tereshkin and S. Unholzer</i>	585
Experimental activation study of some Russian vanadium alloys with 14-MeV neutrons at SNEG-13 facility, <i>D.V. Markovskij, R.A. Forrest, V.D. Kovalchuk, V.V. Mostovoy, P.V. Romanov and V.I. Tereshkin</i>	591
Benchmark experiment on silicon carbide with D–T neutrons and validation of nuclear data libraries, <i>F. Maekawa, K. Ochiai, K. Shibata, Y. Kasugai, M. Wada, Y. Morimoto and H. Takeuchi</i>	595
Benchmark experiments on measurement of neutron and γ -ray leakage spectra and yields from three vanadium spheres, <i>S.N. Abramovich, Y.Y. Nefedov, V.I. Semenov, A.E. Shmarov, R.A. Orlov, A.V. Livke, M.V. Savin, A.M. Shvetsov, V.I. Nagorny and A.K. Zhitnik</i>	601
Neutronic analyses of PPA reactor blanket concepts, <i>U. Fischer, L.V. Boccaccini, S. Hermsmeyer and P. Norajitra</i>	607
Experimental validation of shut down dose rates calculations inside ITER cryostat, <i>P. Batistoni, M. Angelone, L. Petrizzi and M. Pillon</i>	613
Neutron–nuclear data benchmark for copper and tungsten by slab assembly transmission experiments with DT neutrons, <i>I. Murata, T. Nishio, T. Kondo, H. Takagi, Kokoo, A. Takahashi, F. Maekawa, Y. Ikeda and H. Takeuchi</i>	617
The first HEBLO experiments based on the EU HCPB blanket concept, <i>P. Norajitra, D. Piel, G. Reimann and R. Ruprecht</i>	623
The EU advanced lead lithium blanket concept using SiC_f/SiC flow channel inserts as electrical and thermal insulators, <i>P. Norajitra, L. Bühler, U. Fischer, K. Kleefeldt, S. Malang, G. Reimann, H. Schnauder, L. Giancarli, H. Golfier, Y. Poitevin and J.F. Salavy</i>	629
Modelling of the thermal-mechanical behaviour of a single size beryllium pebble bed, <i>G. Vella, P.A. Di Maio, E. Oliveri, M. Dalle Donne, G. Piazza and F. Scaffidi-Argentina</i>	635
Tritium and helium release from neutron irradiated beryllium pebbles from the EXOTIC-8 irradiation, <i>F. Scaffidi-Argentina</i>	641
Thermal creep of Li_4SiO_4 pebble beds, <i>J. Reimann and G. Wörner</i>	647
Behaviour of ceramic breeder materials in long time annealing experiments, <i>G. Piazza, J. Reimann, E. Günther, R. Knitter, N. Roux and J.D. Lulewicz</i>	653
Measurements of effective thermal conductivity of ceramic breeder pebble beds, <i>G. Piazza, M. Enoeda and A. Ying</i>	661

Chemical behavior of Li_2BeF_4 molten salt as a liquid tritium breeder, <i>H. Nishimura, A. Suzuki, T. Terai, M. Yamawaki, S. Tanaka, A. Sagara and O. Motojima</i>	667
Neutronic and thermal estimation of blanket in-pile mockup with Li_2TiO_3 pebbles, <i>Y. Nagao, M. Nakamichi, K. Tsuchiya and H. Kawamura</i>	673
In-situ tritium release behavior from Li_2TiO_3 pebble-bed, <i>K. Tsuchiya, A. Kikukawa, D. Yamaki, M. Nakamichi, M. Enoeda and H. Kawamura</i>	679
Tritium release from catalytic breeder materials, <i>K. Munakata, Y. Yokoyama, A. Baba, T. Kawagoe, T. Takeishi, M. Nishikawa, R.D. Penzhorn, H. Moriyma, K. Kawamoto, Y. Morimoto and K. Okuno</i>	683
An improved European helium cooled pebble bed blanket, <i>S. Hermsmeyer, U. Fischer, M. Fütterer, K. Schleisiek, I. Schmuck and H. Schnauder</i>	689
Chemical reactivity of beryllium pebbles in air, <i>F. Druyts, J. Fays, P. Van Iseghem and F. Scaffidi-Argentina</i>	695
Effects of pre-treatments of Li_2TiO_3 pebbles on the release of tritium generated during short irradiations, <i>C. Alvani, P.L. Carconi, S. Casadio and N. Roux</i>	701
Non destructive three dimensional analysis of the packing of a binary beryllium pebble bed, <i>F. Scaffidi-Argentina, G. Piazza, A. Goraieb, E. Boller, A. Elmoutaouakkil, C. Ferrero and J. Baruchel</i>	707
Mechanical properties of hot isostatic pressed type 316LN steel after irradiation to 2.5 dpa, <i>A. Lind and U. Bergenlid</i>	713
Out-of-pile characterization of Al_2O_3 coating as electrical insulator, <i>M. Nakamichi and H. Kawamura</i>	719
Investigation on hot-dip aluminised and subsequent HIP'ped steel sheets, <i>H. Glasbrenner and J. Konys</i>	725
Self-healing electrical insulating coating processes for vanadium alloy–lithium systems, <i>A.V. Vertkov, V.A. Evtikhin and I.E. Lyublinski</i>	731
Hydrogen permeation through tritium permeation barrier in Pb–17Li, <i>A. Aiello, G. Benamati, M. Chini, C. Fazio, E. Serra and Z. Yao</i>	737
Chromium—a material for fusion technology, <i>R. Wadsack, R. Pippan and B. Schedler</i>	743
Characteristic evaluation of HIP bonded SS/DSCu joints for surface roughness, <i>S. Sato, M. Enoeda, T. Kuroda, Y. Ohara, K. Mohri and A. Cardella</i>	749
Mechanical characterisation of fusion materials by indentation test, <i>B. Riccardi, R. Montanari, L.F. Moreschi, A. Sili and S. Storai</i>	755
Development of the elaboration process and joining technologies of R.A.F.M. O.D.S. steels, <i>S. Revol, S. Launois, R. Baccino, G. Le Marois and B. Rigal</i>	761
Mechanical properties of two chromium alloys in as-received and heat-treated conditions, <i>E. Lucon, E. van Walle and M. Décréton</i>	767
Residual tensile strength of neutron irradiated Inconel 718 bolts, <i>P.G. de Heij, D. d'Hulst, J. van Hoepen, E.V. van Osch and J.G. van der Laan</i>	775
First results on the characterisation of the reduced-activation-ferritic-martensitic steel EUROFER, <i>R. Lindau and M. Schirra</i>	781
Metallurgical characterization of the reduced activation ferritic/martensitic steel Eurofer'97 on as-received condition, <i>P. Fernández, A.M. Lancha, J. Lapeña and M. Hernández-Mayoral</i>	787
System Engineering and Next Step Devices	
All-position reduced pressure electron beam welding for large fusion containment vessels, <i>M. Wykes, C. Punshon, L. Jones, K. Nightingale and A. Sanderson</i>	793
Engineering features of the fusion ignition research experiment (FIRE), <i>R.J. Thome and P.J. Heitzenroeder</i>	797

Project control of WENDELSTEIN 7-X, <i>R. Bünde, M. Gottschewsky and S. Heinrich</i>	803
Quality management for WENDELSTEIN 7-X, <i>J.-H. Feist, H.-J. Bramow, T. Bräuer, G. Gliege, U. Kamionka, B. Krause, M. Pieger-Frey and M. Wanner</i>	809
Engineering evolution of the ignitor machine, <i>G. Celentano, A. Capriccioli, A. Cucchiaro, M. Gasparotto, A. Bianchi, G. Ferrari, B. Parodi, G.P. Sanguinetti, F. Vivaldi, S. Orlandi and B. Coppi</i>	815
Vacuum vessel port structures for ITER-FEAT, <i>Y. Utin, K. Ioki, V. Komarov, V. Krylov, E. Kuzmin, I. Labusov, N. Miki, M. Onozuka, V. Rozov, G. Sannazzaro, A. Tesini, M. Yamada and T. Barthel</i>	821
The engineering design of the HT-7U tokamak, <i>P.D. Weng and T.H.T.U. Team</i>	827
Assembly procedure of the HT-7U device, <i>S.T. Wu</i>	833
Design and structure analysis of the HT-7U vacuum vessel, <i>D.M. Yao, Y.T. Song, S.T. Wu, Y.X. He, W.Y. Wu and S.J. Du</i>	839
Eddy currents calculation in the TEXTOR 94 modified liner/vacuum vessel system during plasma disruption, <i>F.H. Bohn, G. Czymek, B. Giesen, E. Bondarchuk, N. Doinikov, B. Kitaev, V. Kotov, I. Maximova, A. Panin and T. Obidenko</i>	845
Thermohydraulic design of the KSTAR vacuum vessel, <i>S. Cho, K.H. Im, Y.C. Chang, J.B. Kim, B.J. Yoon, C.J. Do, N.I. Her, S.R. In, K.S. Kim, Y.C. Kim, M. Kwon and K.H. Lee</i>	851
Design and thermal/hydraulic characteristics of the ITER-FEAT vacuum vessel, <i>M. Onozuka, K. Ioki, G. Sannazzaro, Y. Utin and H. Yoshimura</i>	857
Critical issues of the structural integrity of the ITER-FEAT vacuum vessel, <i>G. Sannazzaro, P. Barabaschi, F. Elio, K. Ioki, N. Miki, M. Onozuka, Y. Utin, M. Verrecchia and H. Yoshimura</i>	863
Fatigue behavior on weldment of austenitic stainless steel for ITER vacuum vessel, <i>H. Nishi, M. Eto, K. Tachibana, K. Koizumi, M. Nakahira and H. Takahashi</i>	869
Elastic-plastic cyclic deformation of the TEXTOR 94 modified liner under conditions of heating and plasma disruption, <i>F.H. Bohn, G. Czymek, B. Giesen, E. Bondarchuk, N. Doinikov, N. Kozhukhovskaja and A. Panin</i>	875
Safety margins of the W7-X plasma vessel for the static case, <i>J. Simon-Weidner and N. Jaksic</i>	881
Conceptual tokamak design at high neutron fluence, <i>M. Araki, S. Sato, I. Senda, J. Ohmori and T. Shoji</i>	887
The ignitor radial electromagnetic press system (new concept), <i>A. Cucchiaro, A. Capriccioli, G. Celentano, C. Crescenzi, M. Gasparotto, C. Rita, M. Roccella, A. Bianchi, G. Ferrari, B. Parodi, G.P. Sanguinetti, G. Galasso and B. Coppi</i>	893
Toroidal field coil and central solenoid modernization for Globus-M tokamak, <i>V.A. Korotkov, V.A. Belyakov, S.E. Bender, Y.G. Krasikov, E.N. Rumyantsev, V.F. Soikin and V.A. Yagnov</i>	901
Physics basis for the fusion ignition research experiment plasma facing components, <i>M.A. Ulrickson, J.N. Brooks, D.E. Driemeyer, A. Hassenein, C.E. Kessel, T. Rognlien, J.C. Wesley and D.M. Meade</i>	907
The ITER-FEAT building layout—design considerations for the reduction in scale, <i>R. Hemmings, V. Baulo, Y. Gotoh, B. Green, V. Ivanov, M. Mills, E. Mochizuki and C. Woodward</i>	913
Status of lithium target system for international fusion materials irradiation facility (IFMIF), <i>H. Nakamura, M. Ida, M. Sugimoto, H. Takeuchi, T. Yutani and I.I.F.M.I.F. Team</i>	919
European Union ITER (EU-I) balance of plant design and cost reduction, <i>F.A. Zabalo and T. Fisher</i>	925
Safety and Environment, Power Plant and Socio-Economic Studies	
A water cooled lithium–lead blanket without tritium permeation barriers: feasibility and economical analysis, <i>O. Kveton, I. Ricapito, M.A. Futterer and G. Benamati</i>	933

Safety aspects of joints and coatings for plasma facing components with composite structures, <i>M. Zucchetti, M. Ferraris and M. Salvo</i>	939
Clearance and disposal of ITER radioactive waste components, <i>K. Brodén, E. Eriksson, M. Lindberg and G. Olsson</i>	945
Material activation assessment for waste analysis of the EU design of RC/RTO ITER, <i>G. Cambi, D.G. Cepraga and M. Frisoni</i>	949
Dose rate outside cryostat of the SEAFP-2 fusion plant, <i>D.G. Cepraga, G. Cambi, M. Frisoni and L. Di Pace</i>	955
DORT analyses of decay heat experiment on tungsten for ITER, <i>C. Konno, F. Maekawa, M. Wada, Y. Ikeda and H. Takeuchi</i>	961
Neutron activation studies on JET, <i>M.J. Loughlin, R.A. Forrest and J.E.G. Edwards</i>	967
Material activation observation on the Tore Supra Tokamak, <i>G. Martin, A. le Luyer and F. Saint-Laurent</i>	973
Achievement of clearance conditions for activated FW/blanket material, <i>P. Rocco and M. Zucchetti</i>	979
Study on decay heat removal of compact ITER, <i>D. Tsuru, Y. Neyatani, T. Araki, K. Nomoto, S. O'Hira, T. Maruo, M. Hashimoto, K. Hada and E. Tada</i>	985
The safety, environmental and economic implications of the use of silicon carbide in fusion power plant blankets, <i>N.P. Taylor, I. Cook, R.A. Forrest, C.B.A. Forty, W.E. Han and D.J. Ward</i>	991
Advanced waste management techniques for fusion reactors With SiC/SiC structures, <i>M. Zucchetti, P. Rocco and R.A.H. Edwards</i>	997
Analysis of divertor cooling loop failures for the ITER-FEAT plant, <i>J. Eriksson and A. Sjöberg</i>	1001
LOFA analyses for the water and helium cooled SEAFP reactors, <i>L. Spontón, A. Sjöberg and S. Nordlinder</i>	1007
Validation of INTRA against the integrated ingress-of-coolant event tests, <i>L. Spontón and Z. Yitbarek</i>	1011
Intra model of ITER-FEAT and accident analysis for GSSR, <i>J. Andersson, H. Jahn and J. Eriksson</i>	1017
Sensitivity and uncertainty analyses in external cost assessments of fusion power, <i>K. Aquilonius, B. Hallberg, D. Hofman, U. Bergström, Y. Lechón, H. Cabal, R.M. Sáez, T. Schneider, S. Lepicard, D. Ward, T. Hamacher and R. Korhonen</i>	1021
Exploitation and improvement of the external costs assessment of fusion power, <i>Y. Lechón, H. Cabal, R.M. Sáez, D. Ward, B. Hallberg, K. Aquilonius, R. Korhonen, T. Hamacher, T. Schneider and S. Lepicard</i>	1027
Economically acceptable fusion power stations with safety and environmental advantages, <i>D.J. Ward, N.P. Taylor and I. Cook</i>	1033
Radiological impact of an intense fusion economy, <i>T. Hamacher, R. Korhonen, K. Aquilonius, H. Cabal, B. Hallberg, Y. Lechón, S. Lepicard, R.M. Sáez, T. Schneider and D. Ward</i>	1037
Safety-related plasma events for ITER-FEAT, <i>T. Honda, H.-W. Bartels, Y. Neyatani, M. Shimada and R. Sartori</i>	1043
Application of the integrated safety analysis code system (ISAS) for ITER, <i>E. Kajlert, T. Boubee de Gramont, W. Gulden and M.-T. Porfiri</i>	1047
Bounding analysis of temperature excursions in accidents using finite element analysis, <i>P.J. Karditsas and M.J. Loughlin</i>	1053
Results of experimental study on detritiation of atmosphere in large space, <i>K. Kobayashi, T. Hayashi, Y. Iwai and M. Nishi</i>	1059
Impact of plant incidents on worker radiation exposure for the SEAFP design, <i>A. Natalizio, T. Pinna and L. Di Pace</i>	1065

Accrued and expected radiation doses to personnel during manual access to the JET vessel, <i>B. Patel, P. Edwards, S. Popovichev and P. Schofield</i>	1071
Evaluation of radiological and economic consequences associated with an accident in a fusion power plant, <i>T. Schneider, S. Lepicard, R.M. Sáez, H. Cabal, Y. Lechón, D. Ward, T. Hamacher, K. Aquilonius, B. Hallberg and R. Korhonen</i>	1077
Energy, material and land requirement of a fusion plant, <i>L. Schleisner, T. Hamacher, H. Cabal, B. Hallberg, Y. Lechón, R. Korhonen and R.M. Sáez</i>	1081
Can fusion help to mitigate greenhouse gas emissions?, <i>T. Hamacher, P. Lako, J.R. Ybema, R. Korhonen, K. Aquilonius, H. Cabal, B. Hallberg, Y. Lechón, S. Lepicard, R.M. Sáez, T. Schneider and D. Ward</i>	1087
International power supply policy and the globalisation of research: the example of fusion research, <i>G. Bechmann, F. Gloede and E. Lessmann</i>	1091
Fusion solution to dispose of spent nuclear fuel, transuranic elements, and highly enriched uranium, <i>Y. Gohar</i>	1097
Use of fusion energy as a heat for various applications, <i>S. Konishi</i>	1103
Fusion power plant for water desalination and reuse, <i>A.A. Borisov, A.V. Desjatov, I.M. Izvolsky, A.G. Serikov, V.P. Smirnov, Y.N. Smirnov, G.E. Shatalov, S.V. Sheludjakov, N.N. Vasiliev and E.P. Velikhov</i>	1109
Fusion power plant availability study, <i>D. Ladra, G.P. Sanguinetti and E. Stube</i>	1117
Inertial Confinement and Technologies	
Tritium gas and tritiated water vapour behaviour in the environment from releases into the atmosphere from fusion reactors, <i>M. Velarde and M. Perlado</i>	1123
Proposal for a parametric conceptual CAD model of a mono-modular inertial fusion reactor, <i>M. Vezzani, N. Cerullo and S. Lanza</i>	1127
Author Index of Volume 58–59	1133
