

CONTRIBUTORS	xi
VOLUMES IN SERIES	xiii
PREFACE.	xvii
1. Introduction to Optical Radiometry by RAJU U. DATLA and ALBERT C. PARR	
1.1. Background	1
1.2. Basics of Radiometry and Important Milestones	3
1.3. Radiometric Terminology.	7
1.4. Radiometric Measurements	17
1.5. Radiometric Calibration and Uncertainties	23
References	32
2. Absolute Radiometers by NIGEL P. FOX and JOSEPH P. RICE	
2.1. Introduction	35
2.2. Predictable Quantum Efficiency Detectors	37
2.3. Absolute Thermal Detectors.	42
2.4. Applications of Cryogenic Radiometers.	64
2.5. Confirmation of Accuracy	80
2.6. New/Complimentary Technologies	82
References	92
3. Realization of Spectral Responsivity Scales by L. P. BOIVIN	
3.1. Introduction	97
3.2. Realization of Spectral Responsivity Scales	98
3.3. Dissemination of Spectral Responsivity Scales	147
References	148
4. Transfer Standard Filter Radiometers: Applications to Fundamental Scales by GEORGE P. EPPELDAUER, STEVEN W. BROWN, and KEITH R. LUKKE
