

Preface	ix
Chapter 1. Introduction	1
1.1 An Overview of Thermodynamics	1
1.2 System Thermodynamics	11
1.3 A Brief Outline of the Monograph	14
Chapter 2. Dynamical System Theory	17
2.1 Notation, Definitions, and Mathematical Preliminaries	17
2.2 Stability Theory for Nonnegative Dynamical Systems	20
2.3 Reversibility, Irreversibility, Recoverability, and Irrecoverability	27
2.4 Reversible Dynamical Systems, Volume-Preserving Flows, and Poincaré Recurrence	34
Chapter 3. A Systems Foundation for Thermodynamics	45
3.1 Introduction	45
3.2 Conservation of Energy and the First Law of Thermodynamics	46
3.3 Entropy and the Second Law of Thermodynamics	55
3.4 Ectropy	72
3.5 Semistability, Energy Equipartition, Irreversibility, and the Arrow of Time	81
3.6 Entropy Increase and the Second Law of Thermodynamics	89
3.7 Interconnections of Thermodynamic Systems	91
3.8 Monotonicity of System Energies in Thermodynamic Processes	98
Chapter 4. Temperature Equipartition and the Kinetic Theory of Gases	103
4.1 Semistability and Temperature Equipartition	103
4.2 Boltzmann Thermodynamics	110
Chapter 5. Work, Heat, and the Carnot Cycle	115
5.1 On the Equivalence of Work and Heat: The First Law Revisited	115
5.2 The Carnot Cycle and the Second Law of Thermodynamics	126
Chapter 6. Thermodynamic Systems with Linear Energy Exchange	131
6.1 Linear Thermodynamic System Models	131
6.2 Semistability and Energy Equipartition in Linear Thermodynamic Models	136
Chapter 7. Continuum Thermodynamics	141
7.1 Conservation Laws in Continuum Thermodynamics	141
7.2 Entropy and Ectropy for Continuum Thermodynamics	148
7.3 Semistability and Energy Equipartition in Continuum Thermodynamics	160
Chapter 8. Conclusion	169
Bibliography	175
