CEC Awards	xxv
2005 CEC Board and Technical Editors	xxix
Acknowledgments	xxxii
The First Cryogenic Engineering Conference	xxxiii
R. H. Kropschot	

## PART A

### PULSE TUBE CRYOCOOLERS

Development of a Large-capacity, Stirling-type, Pulse-tube Refrigerator	3
S. A. Poiratz, G. F. Nellis, L R. Maddocks, A. Kashani, B. P. M. Helvensieijn, G. L. Rhoads, And B. Flake	
Performances Prediction and Experimental Investigations on Integral Pulse Tube Cryocooler for 15 W at 70 K Using Indigenously Developed Linear Compressor	11
B. S. Gawali and K. G. Narayankhedkar	
Performances of Stirling Type Pulse tube Cryocooler for Sub-cooled Nitrogen System	19
Y. Ohtani, T. Yazawa, T. Kuriyama, M. Urata, and K. Inoue	
Control of Secondary Flow in a Double-inlet Pulse Tube Refrigerator	27
M. Shiraishi, M. Murakami, A. Nakano, and T. Iida	
Novel Regenerator Material Improving the Performance of a Single Stage Pulse Tube Cooler	35
T. Koettig, R. Nawrodt, S. Moldenhauer, M. Thurk, and R Seidel	
Pulse Tube Refrigerator Based Cryogenic Cooling Circuit for NMR Cold Probes	41
M. D. Alley, A. Healey, T. Janaway, and A. McMahon	
The Development of a Pulse Tube Cooler with More than 1 W at 4.2 K	49
A. Hofmann, W. Stautner, H. Pan, D. Crowley, and G. Gilgrass	
Inertance Tube Optimization for Pulse Tube Refrigerators	59
R. Radebaugh, M. Lewis, E. Luo, J. M. Pfotenhauer, G. F. Nellis, and L. A. Schunk	

### LTS SUPERCONDUCTING MAGNET SYSTEM-I

Failure Scenarios and Mitigations for the BABAR Superconducting Solenoid	71
E. Thompson, A. Candia, W. W. Craddock, M. Racine, and J. G. Weisend II	
Thermal Performance of the LDX Floating Coil	78
A. Zhukovsky, D. T. Gamier, and A. L. Radovinsky	
Development and Test of Nb3Sn Cos-Theta Coils Made of High-Jc RRP Strands	86
R. Bossert, G. Ambrosio, N. Andreev, E. Barzi, R. Carcagno, S. Fehet, V. S. Kashikhin,	

V. V. Kashikhin, M. J. Lamm, I. Noviiski, Y. Pischalnikov, C. Sylvester, M. Tartaglia,  
D. Turrioni, R. Yamada, and A. V. Zlobin

### HELIUM II AND HELIUM U SYSTEMS-1

A Study on the Heat Transfer Properties of Pressurized He II through Fine Channels N. Kimura, H. Nakai, M. Murakami, A. Yamamoto, and T. Shintomi	97
Experimental and Numerical Studies on Thermal Hydraulic Characteristics of He II through Porous Media S. Hamaguchi, R. Maekawa, T. Okamura, and B. Baudouy	105
Design and Testing of a 2K Superfluid Helium Heat Station W. R. Hicks, E. F. Daly, J. Preble, M. Wiseman, and C. Rode	113
Transient Heat Transfer from a Flat Plate in Forced Flow of Pressurized He U J. Nishida, T. Okamura, M. Saeki, K. Hata, K. Hama, Y. Shirai, and M. Shiotsu	121
Transient Heat Transfer Measurements in Forced Flow of He II at High Velocities S. Fuzier and S. W. Van Sciver	129

### CRYOGENIC SYSTEMS AND DEVICES

Buoyancy-Driven Natural Convection of Liquid Helium in Electron Bubble Chamber Y. L. Ju, J. R. Dodd, and W. J. Willis	139
Helium Pot System for Maintaining Sample Temperature after Cryocooler Deactivation B. J. Haid	147
Sonic Helium Detectors in the Fermilab Tevatron R. J. Bossert	156
Numerical Analysis and Experimental Study on Natural Convection in the Sample Enclosure Cooled by a G-M Refrigerator Z. C. Fang, L. H. Gong, X. D. Xu, and L. F. Li	164
Design Optimization of Liquid Nitrogen Based IQF Tunnel A. B. Datye, K. G. Narayankhedkar, and G. K. Sharma	171
Automatic Transfer between Two Cryogenic Robots for the Laser Megajoule Facility G. Paquignon, J. Manzagol, V. Lamaison, D. Brisset, D. Chatain, P. Bonnay, E. Boureau, and J.-P. Perm	178

### CRYOGENIC THERMAL INSULATION SYSTEMS-I

Experimental Investigation of Multilayer Insulation by Using Boil-off Calorimetry	189
---	-----

H. S. Yang, D. L. Kim, B. S. Lee, and S. D. Hwang	
The Outgassing Test of a HTS Power Cable Cryostat	195
H.-K. Yearn, D.-Y. Koh, I.-S. Kim, C.D. Kim, D.-H. Kim, and T.-B. Seo	

## CRYOGENICS FOR SPACE EXPLORATION

ZBO Cryogenic Propellant Storage Applied to a Mars Sample Return Mission Concept	205
D. W. Plachta, R. J. Christie, J. M. Jums, and P. Kittel	
Cryo-Itracker* Mass Gauging System Testing in a Launch Vehicle Simulation	213
D. J. Schieb, M. S. Haberbusch, and A. J. Yeckley	
Optical Gauging of Liquid and Solid Hydrogen in Zero-g Environments for Space Applications	224
F. M. Caimi, D. M. Kocak, and J. F. Justak	
Liquid Nitrogen (Oxygen Simulant) Thermodynamic Vent System Test Data Analysis	232
A. Hedayat, S. L. Nelson, L. J. Hastings, R. H. Flachbart, and S. P. Tucker	
Testing of a Spray-Bar Thermodynamic Vent System in Liquid Nitrogen	240
R. H. Flachbart, L. J. Hastings, A. Hedayai, S. L. Nelson, and S. P. Tucker	
Design and Analysis of a Scalable In-situ Cryogen Production Facility for Space Exploration	248
D. E. Petrick, S. J. Nicczkoski, M. B. Duke, and T. Q. Gardner	

## INSTRUMENTATION AND CONTROLS-I

Autotune of PID Temperature Control Based on Closed-loop Step Response Tests	259
D. C. Sheats, Z. S. Roth, and J. W. Snyder	
Cryogenic Fiber Optic Temperature Sensors Based on Fiber Bragg Gratings	267
C. J. Yeager, C. McGee, M. Maklad, and P. R. Swinehart	
Cryogenic Radio Frequency Two-phase Flowmeter	273
T. W. Lovell and N. T. Van Dresar	
A Cryogenic Mass Flow Sensor	281
D. M. Kocak, J. P. Justak, F. M. Caimi, and S. W. Van Sciver	

## CRYOFUELS

Cryo-delivery Systems for the Co-transmission of Chemical and Electrical Power	291
P. M. Grant	

## **CRYOGENIC SAFETY**

Diffusion of Gases in Air and Its Affect on Oxygen Deficiency Hazard Abatement	305
J. C. Theilacker and M. J. White	
Dewar Safety: Risks and Corrective Actions	313
R. F. Boyle and P. L. Whitehouse	
Hydrogen Safety Issues Compared to Safety Issues with Methane and Propane	319
M. A. Green	

## **CRYOCOOLER MODELING**

Design Model for a Two-stage Pulse Tube Cryocooler	329
J. L. Shi, J. M. Pfotenhauer, and G. F. Nellis	
Modelling of a 10 K Collins Type Cryocooler	337
G. Chaudhry, J. G. Brisson, J. L. Smith, Jr., C. L. Hannon, B. J. Crass, and J. Gerstmann	
Enthalpy, Entropy, and Exergy Flows—Real Gas Effects in Ideal Pulse	
Tube Cryocoolers	345
P. Kittel	
Thermoacoustic Analysis of Displacer Gap Loss in a Low temperature Stirling Cooler	353
V. Kotsubo and G. Swift	
Motor and Thermodynamic Losses in Linear Cryocooler Compressors	361
J. Reed, P. B. Bailey, M. W. Dadd, and T. Davis	

## **HELIUM II AND HELIUM II SYSTEMS-H**

Influence of the Steady Background Turbulence Level on Second Sound Dynamics in He II	371
M. Dalban-Canassy, D. K. Hilton, and S. W. Van Sciver	
Heat Transport Near the Lambda Line in a Channel Containing He II	379
M. Maeda, A. Sato, T. Dantsuka, M. Yuyama, and Y. Kamioka	
Temperature Dependence of the Gorter-Mellink Exponent $m$ Measured in a Channel Containing He II	387
A. Sato, M. Maeda, T. Dantsuka, M. Yuyama, and Y. Kamioka	
Variation of Film Boiling Modes in He II from Strongly to Weakly Subcooled States	393

M. Nozawa, N. Kimura, M. Murakami, and S. Takada	
Heat Transfer Coefficient Measurement Study of Several Film Boiling Modes in Subcooled He II	401
S. Takada, M. Murakami, M. Nozawa, and N. Kimura	
Heat Transfer through Porous Media in Static Superfluid Helium	409
B. Baudouy, F.-P. Juster, H. Allain, E Prouzet, A. Larbot, and R. Maekawa	
Effect of Property Variations on the Operation of Superfluid Porous Plug Pumps	417
H. A. Snyder	

## NOVEL CONCEPTS AND NEW DEVICES

A Liquid Helium Circulation System for MEG	427
T. Takeda and H. Horinouchi	
Cryogenic Design and Operation of Liquid Helium in Electron Bubble Chamber	433
Y. L Ju, J. R. Dodd, W. J. Willis, and L. X. Jia	
Assessment of Commercial Fluorescent Paints on their Applicability to the Cryogenic Thermography System	441
K. Nara, N. Yamada, and H. Kato	

## FLUID MECHANICS, HEAT TRANSFER, AND PROPERTIES OF CRYOGENS-1

The Effect of the Variability in the Isotopic Composition of Gases on Top-accuracy Cryogenic Temperature Standards and Remedies	451
F. Pavcse	
Forced Convection Heat Transfer of He I and He II at Pressures up to Supercritical	459
M. Shiotsu, T. Okamura, Y. Shirai, K. Hata, and K. Hama	
Flare R&D for Ultra Pure Liquid Argon	467
B. J. Hansen and M. J. White	
Ortho and Para Hydrogen Concentration Determination Based on Vapor Pressure	475
S. R. Lydzinski, D. Celik, A. Hemmati, and S. W. Van Sciver	
Thermal Conductivity of Powder Insulations for Cryogenic Storage Vessels	480
Y. S. Choi, M. N. Barrios, H. M. Chang, and S. W. Van Sciver	
Thermal Diffusion of Heat Pulse in Subcooled Liquid Nitrogen	488
H. M. Chang, J. J. Byun, J. H. Choi, C. J. Ha, M. J. Kim, H. M. Kim, and T. K. Ko	
Experimental and Theoretical Study of a Two Phase Helium High Circulation Loop	496
P. Bredy, F.-P. Juster, B. Baudouy, L. Benkheira, and M. Cazanou	

## **CRYODISTRIBUTION SYSTEMS AND COMPONENTS**

Cryogenic Distribution for Beam Transfer Lines, Radioactive Secondary Beam Fragment Separator and Storage Ring of FAIR	507
Y. Xiang, M. Kauschke, C. Schroeder, G. Moritz, A. Kutzschbach, and H. Quack	
Helium Transfer System for the Superconducting Devices at NSRRC	515
H. C. Li, F. Z. Hsiao, S. H. Chang, and W. S. Chiou	
Performance Assessment of 239 Series Helium Sub-cooling Heat Exchangers for the Large Hadron Collider	523
N. Gilbert, P. Roussel, G. Riddone, R. Moracchioli, and L. Tavian	
Development of an Energy Efficient Cryogenic Transfer Line with Magnetic Suspension	531
Q. S. Shu, G. Cheng, J. T. Susta, J. R. Hull, J. A. Demko, C. P. Britcher, L. E. Fesmire, S. D. Augustynowicz, F. Werfel, and E. C. Bonnema	
Testing of Prototype Magnetic Suspension Cryogenic Transfer Line	539
J. E. Fesmire, S. D. Augustynowicz, Z. F. Nagy, S. J. Sojourner, Q. S. Shu, G. Cheng, and J. T. Susta	
Numerical Analysis of the Final Cooldown of a 33 km Sector of the Large Hadron Collider	547
L. Liu, G. Riddone, and L. Tavian	

## **J-T, MAGNETIC AND OTHER COOLERS-I**

A Unified Perspective of Cryocoolers	557
B.-Z. Maytal and J. M. Pfotenhauer	
The Behavior of the Mass Flow Rate of a Joule-Thomson Refrigerator	565
Y. J. Hong, S.-J. Park, H.-B. Kim, and Y.-D. Choi	
Nitrogen Separation and Liquefaction Apparatus for Medical Applications and its Thermodynamic Optimization	573
M. Chorowski, A. Piocrowka, and J. Polinski	

## **HYDROGEN AND LNG FACILITIES**

Cryosorption Pumps for a Neutral Beam Injector Test Facility	583
M. Dremel, A. Mack, C. Day, and H. Jensen	

Design and Build of Magnetic Refrigerator for Hydrogen Liquefaction	591
K. Kamiya, T. Numazawa, K. Matsumoto, H. Nozawa, and T. Yanagitani	
Numerical Simulation and Optimization of Small Scale LNG Plant	598
H. Y. Li, L. X. Jia, Q. H. Fan, and Q. S. Yin	

## ADVANCED CRYOCOOLER TECHNOLOGY DEVELOPMENT PROGRAM

NASA's Advanced Cryocooler Technology Development Program (ACTDP)	607
R. G. Ross, Jr. and D. L. Johnson	
NGST Advanced Cryocooler Technology Development Program (ACTDP)	
Cooler System	615
D. Durand, J. Raab, R. Colbert, M. Michaclian, T. Nguyen, M. Pctach, and E. Tward	
Development of a Space-type 4-stage Pulse Tube Cryocooler for Very	
Low Temperature	623
J. R. Olson, M. Moore, P. Champagne, E. Roth, B. Evtimov, J. Jensen, A. Collate and T. Nast	
Ball Aerospace 4–6 K Space Cryocooler	632
D. S. Glaister, W. Gully, R. Ross, P. Hendershott, E. Marquardt, and V. Kotsubo	

## CRYOCOOLERS FOR HTS APPLICATIONS

Development of a 25 K Pulse Tube Refrigerator for Future HTS-Series Products in	
Power Engineering	643
B. Gromoll, N. Huber, M. Dietrich, L. W. Yang, and G. Thummes	
Rotating Cryocooler for Superconducting Motor	653
J. Ko, S. Jeong, H. Kim, J. Jung, J. Choi, S. In, M. Sohn, and Y.-K. Kwon	
Design of a Very Large Pulse Tube Cryocooler for HTS Cable Application	661
J. Tanchon, E. Ercolani, T. Trollier, A. Ravex, and J. M. Poncet	
Closed Loop Cooling Systems for HTS Applications	669
D. Willems, F. Dioguardi, and R. Den Heijer	

## HYDROGEN LIQUEFACTION SYSTEMS AND COMPONENTS

A Superconductive MgB <sub>2</sub> Level Sensor for Liquid Hydrogen	679
C. Haberstroh and G. Zick	

## **CRYOCOOLERS AND REGENERATORS**

Gas Bearing Implementation of Small Cryocooler Compressor	687
D. T. Kuo, A. S. Loc, and M. Hanes	
Performance of a GM Cryocooler with Oil-free Linear Compressor	696
J. R. Maddocks, A. Kashani, B. P. M. Helvensteijn, D. W. Hoch, G. F. Nellis, J. A. Corey, E. R. James, and G. L. Rhoads	
4 Kelvin Cryogenic Probe for 500 MHZ NMR	704
F. Yoshimoto, M. Takahashi, T. Horiuchi, F. Hobo, K. Inoue, T. Miki, M. Hamada, T. Okamura, S. Yokoyama, and H. Maeda	
Performance of a Miniature Pulse Tube Cryocooler	712
N. Matsumoto, Y. Yasukawa, K. Ohshima, S. Minematsu, T. Takeuchi, K. Yoshizawa, T. Matsushita, and Y. Mizoguchi	
Investigation of the Characteristics for the Pulse Tube Refrigerator Using Active Phase Controller as a Phasor	720
Y H. Kim, S. Masuyama, S. J. Park, Y. J. Hong, H. B. Kim, D. Y. Koh, and S. H. Lee	

## **HTS SUPERCONDUCTING MAGNET SYSTEMS-I**

A Closed Neon Liquefier System for Testing Superconducting Devices	729
M. Bianchetti, M. K. Al-Mosawi, Y. Yang, C. Beduz, and G. Giunchi	
High Te Superconducting Magnet Excited by a Semiconductor Thermoelectric Element	735
T. Kuriyama, M. Ono, S. Tabe, A. Oguchi, and T. Okamura	

## **SAFETY AND FAILURE MODES IN LARGE CRYOSYSTEMS**

Experimental Validation of the LHC Helium Relief System Flow Modeling	745
M. Chorowski, J. Fydrych, and G. Riddonc	
Pressure Rise Analysis When a Hydrogen Leak from a Cracked Pipe in the Cryogenic Hydrogen System in J-PARC	753
H. Tatsumoto, T. Aso, S. Hasegawa, I. Ushijima, T. Kato, K. Ohtsu, and Y. Ikeda	

## **HYDROGEN MODERATORS AND TARGETS**

Design Result of the Cryogenic Hydrogen Circulation System for 1MW Pulse Spallation Neutron Source (JSNS) in J-PARC	763
---	-----

T. Aso, H. Tatsumoto, S. Hasegawa, I. Ushijima, K. Ohtsu, T. Kaio, and Y. Ikeda

## COOLING SYSTEMS FOR POWER CABLES

Performance Testing of a Cryogenic Refrigeration System for HTS Cables	773
R. C. Lee, A. Dada, E. L Garcia, and S. M. Ringo	
A Cool-down and Fault Study of A Long Length HTS Power Transmission Cable	782
J. Yuan, J. Maguire, A. Allais, and F. Schmidt	
Testing of a Liquid Nitrogen Cooled 5-meter, 3000 A Tri-Axial High Temperature Superconducting Cable System	790
J. A. Demko, R. C. Duckworth, P. W. Fisher, M. J. Gouge, C. M. Rcy, M. A. Young, D. Lindsay, M. Roden, J. Tolbert, D. Willen, C Traeholt, and C. Thidemann	
Cryogenic System for 75M Three-phase AC HTS Cable	798
Y. F Fan, L. H. Gong, X. D. Xu, L. Zhang, L. F. Li, and L. Y. Xiao	
Cooling Characteristics in Long Channels with Sub-cooled Nitrogen	804
S. Fuchino, M. Furusc, N. Higuchi, M. Okano, and K. Agatsuma	
Thermomechanical Properties of 30M HTS Power Cable in DAPAS Project	811
D. H. Kim, C. D. Kim, I. S. Kim, I. S. Park, H. M. Jang, C. Y. Lee, and D. W. Kim	

## CRYOCOOLERS 4K

High-frequency Pulse-tube Refrigerator for 4 K	821
I. Tanaeva, C G. Klaasse Bos, and A. T. A. M. de Wade	
Small Helium Liquefiers Using 4 K Pulse Tube Cryocoolers	829
C. Wang	
Development of SHI 1.0 W 4 K Two-stage Pulse Tube Cryocoolers	837
M Y. Xu, J. L. Gao, E. Seitz, and R. C. Longsworth	
Development of a 4 K Separate Two-stage Pulse Tube Refrigerator with High Efficiency	845
L. M. Qiu, Y. L. He, Z. H. Gan, and G. B. Chen	
Tandem GM-type Pulse Tube Refrigerator with Novel Rotary Valve and Bypass Valve Mechanism	853
J. Jung, S. Jeong, Y. Kwon, and M. Sohn	

## **FLUID MECHANICS, HEAT TRANSFER AND PROPERTIES OF CRYOGENS-D**

100th Anniversary of the Discovery of Helium in Natural Gas	863
R. C. Longsworth	
Heat and Mass Transfer in Nucleate Boiling Regime of He I in a Natural Circulation Loop	871
L. Benkheira, M. Souhar, and B. Baudouy	
Debye Equation of State for 3He from 0.01 to 20 K	879
Y. H. Huang, G. B. Chen, and V. D. Arp	
A New 3He Vapor-pressure Equation on ITS-90 Scale	887
Y. H. Huang and G. B. Chen	
Numerical Analysis on Shields and Struts Cooling Using Cold Helium Gas in MECO Magnets	895
H. M. Tang, L. X. Jia, H. P. Du, L. Wang, B. Smith, and A. Zhukovsky	

## **SUPERCONDUCTING RF SYSTEMS-I**

Status of the ISAC-H Cryogenic System	905
G. Stanford, I. Sekachev, W. Andersson, R. E. Laxdal, and C. Marshall	
Cold Tests of the ISAC-H Medium Beta Cryomodule	913
I. Sekachev, R. E. Laxdal, and G. Stanford	
Results from the Juelich Accelerator Module Based on Super-Conducting Half-wave Resonators	920
R. Eichhom, F. Esser, B. Laatsch, M. Lennart, G. Schug, and R. Stassen	
Single Crystal Piezoelectric Actuators for Tunable HTS Filters	928
X. N. Jiang, P. W. Rehrig, W. S. Hackenberger, S. Perini, M. Lanagan, X. Xi, E. Furman, E. Prophet, B. Willemsen, and B. Hammond	

## **J-T, MAGNETIC AND OTHER COOLERS-II**

Cryogen-free Dilution Refrigerator Precooled by a Pulse-tube Refrigerator with Non-magnetic Regenerator	939
K. Uhlig and C. Wang	
The Experimental Evaluation of a Proof of Principle Superfluid Joule-Thomson Refrigerator	946

F. K. Miller and J. G. Brisson	
A Rapid Turnaround Two-Stage Adiabatic Demagnetization Refrigerator for Cooling to 50 mK	954
P. J. Shirron, M. J. DiPirro, J. S. Panek, J. J. Francis, B. A. Warner, and M. L. Jackson	
Adiabatic Demagnetization Refrigerator Field Mapping and Shielding Models for a 70 mK Superconducting Transition-edge Sensor Array and Associated Electronics	960
D. R. Ladner, D. S. Martinez-Galarce, and D. McCammon	
Progress on a 4K to 10K Continuously Operating Adiabatic Demagnetization Refrigerator	969
M. DtPirro, J. Tuttle, M. Jackson, E. Canavan, B. Warner, and P. Shirron	
Microcooling Developments at the University of Twente	977
P. P. P. M. Lerou, S. Vanapalli, H. V. Jansen, J. F. Burger, T. T. Veenstra, G. C. F. Venhorst, H. J. Holland, M. Elwenspoek, H. J. M. ter Brake, and H. Rogalla	
Cryogenic Active Magnetic Regenerator	985
A. Tura, J. Roszmann, J. Dikeos, and A. Rowe	
Numerical Analysis of an Active Magnetic Regenerator (AMR) Refrigeration Cycle	993
J. Dikeos, A. Rowe, and A. Tura	

## **FLUID MECHANICS, HEAT TRANSFER, AND PROPERTIES OF CRYOGENS-111**

Convection Design of Cryogenic Piping and Components	1003
G. E. McIntosh	
CFD Modeling of ITER Cable-in-Conduit Superconductors Part I: Friction in the Central Channel	1009
R. Zanino, S. Giors, and R. Mondino	
CFD Analysis on Two-phase Pipe Flow of Slush Nitrogen	1017
J. Ishimoto	
PIV Measurement of Slush Nitrogen Flow in Pipe	1025
T. Takakoshi, M. Murakami, M. Ikeuchi, K. Matsuo, and R. Tsukahara	
Fundamental Study of Pipe Flow and Heat Transfer Characteristics of Slush Nitrogen	1033
K. Matsuo, M. Ikeuchi, A. Machida, and K. Yasuda
