Preface xvii

Part A **Vortex dynamics**

Clustering of intense structures in isotropic turbulence: numerical and experimental evidence

Frédéric Moisy & Javier Jiménez 3

Multi modes for the vortex sheet-tube transformation process and viscoelastic effect

Kiyosi Horiuti, Yohei Takagi & Syouji Abe 13

Dynamics of small-scale vorticity and strain-rate structures in the transition from isotropic to shear turbulence

James G. Brasseur & Winston Lin 19

Interaction between a columnar vortex and external turbulence

Naoya Takahashi & Takeshi Miyazaki 31

Vortex structures in a rough-wall channel flow and their influence on passive scalar

Paolo Orlandi, Stefano Leonardi & Robert Anthony Antonia 39

Part B **Coherent structures**

The near-wall structures of turbulent wall flows

Javier Jiménez, Genta Kawahara, Mark P. Simens & Juan C. del Álamo 53

Coherent fine scale eddies in the logarithmic region of turbulent channel flows

Toshio Miyauchi, Shin-Jeong Kang & Mamoru Tanahashi 71

On the possible existence of a co-supporting cycle of large-scale and near-wall structures in wall turbulence

Tomoaki Itano & Sadayoshi Toh 81

Periodic motion in high-symmetric flow

Lennaert van Veen, Shigeo Kida & Genta Kawahara 93

Vortex tubes in velocity fields of laboratory turbulence at high Reynolds numbers

Hideaki Mouri, Akihiro Hori & Yoshihide Kawashima 105

Local vortex identification criteria: inter-relationships and a unified outlook

Pinaki Chakraborty, S. Balachandar & Ronald J. Adrian 111

Part C **Chaotic advection and mixing**

Persistent multiple-scale stagnation point structure

J.C. Vassilicos, J. Davila, S. Goto, E. Hascoet, D. Osborne & L. Rossi 119

Streamlines, coherent vortices and pair diffusion in two-dimensional turbulence

Susumu Goto & J.C. Vassilicos 131

Self-similarity of ballistically separating motions in turbulent relative dispersion

Takeshi Ogasawara & Sadayoshi Toh 143

Two-particle diffusion and fine-scale structures of turbulence

Yasuhiko Sakai, Haruka Kuwahara, Kazuki Maeyama & Hiroyuki Tsunoda 149

Flow due to a point vortex in an oscillating and rotating straining flow

Konrad Bajer & Michal Branicki 155

Part D **Statistical properties of turbulence**

Statistical property of pressure fluctuation in fully developed Turbulence

Yoshiyuki Tsuji & Takashi Ishihara 163

Intermittency, field structures and accuracy of DNS in a passive scalar turbulence

Takeshi Watanabe & Toshiyuki Gotoh 171

Self-similarity of vorticity dynamics in decaying two-dimensional turbulence

Takahiro Iwayama & Theodore G. Shepherd 177

A grid-free redistribution model for a vortex method and turbulent flow analysis

Kota Fukuda & Kyoji Kamemoto 183

Part E **Rotating and stratified turbulence**

A new twist to rotating stratified turbulence

David G. Dritschel & William J. McKiver 191

Energy cascade processes in stratified turbulence <i>Yuji Kitamura & Yoshihisa Matsuda</i>	201
Asymmetrization of jet profiles in β -plane turbulence <i>Jitsuko Hasegawa, Keiichi Ishioka & Shigeo Yoden</i>	207
Dynamics of velocity field in developed thermal turbulence <i>Takashi Mashiko, Yoshiyuki Tsuji & Masaki Sano</i>	213
Instability of co-rotating vertical vortices in a stratified fluid <i>Pantxika Otheguy, Paul Billant & Jean-Marc Chomaz</i>	219
Action of coherent vortices in rotating duct flows <i>Yoshito Kaga & Shinichiro Yanase</i>	225
Part F Instability and transition	
Instability of low-speed streaks leading to wall turbulence <i>Masahito Asai & Yasufumi Konishi</i>	235
The turbulent energy cascade built by a vortex burst <i>Yannis Cuypers, Philippe Petitjeans & Agnes Maurel</i>	241
Mixing transition in supersonic streamwise vortices <i>Michio Nishioka, Shoji Sakaue, Kazuya Komada, Hiroyuki Sakoshi & Ikuhiro Furukawa</i>	249
Evolution of vortex structures in a model of the turbulent trailing vortex <i>J. M. Faddy & D. I. Pullin</i>	259
Helical modes in swirling jets <i>Jean-Marc Chomaz & Francois Gallaire</i>	265
Part G Dynamics of thin vortices	
Motion of three-dimensional vortex filament and particle transport <i>Yoshi Kimura</i>	275
Linear and nonlinear instability of a vortex ring <i>Yasuhide Fukumoto & Yuji Hattori</i>	283
Motion of unstable polygonal ring of vortex points on sphere with pole vortices <i>Takashi Sakajo</i>	295

Part H Finite-time singularity

Invariants, diffusion and topological change in incompressible Navier-Stokes equations

Peter Constantin & Koji Ohkitani 303

Evolution of complex singularities and Kolmogorov scaling in truncated three-dimensional Euler flows

Cyril Cichowlas, Fabrice Debbasch & Marc Brachet 319

Helicity generation in three-dimensional Euler and turbulence

Robert M. Kerr 329

Part I Superfluid turbulence

Superfluid turbulence and dynamics of quantized vortices

Makoto Tsubota 341

Decay of quantum turbulence by Kelvin wave cascade

Akira Mitani, Makoto Tsubota & W.F. Vinen 355

Flow phase diagram for the helium superfluids

Ladislav Skrbek 361
