Preface	xv
Organizing committee	xvii
Conference photograph	xviii
Conference participants	xxi

Session 1: Generation and Transport of Solar Magnetic Fields

Conveners: Martinez-Pillet & Callebaut

Session Chairs: Callebaut & Ossendrijver

Transport coefficients for solar and stellar dynamos	3
<i>M. Ossendrijver & P. J. Käpylä</i>	
Generation of sunspot and polar faculae butterflies using bipolar and quadripolar seed fields	9
<i>D. K. Callebaut & A. H. Khater</i>	
Simulating and predicting solar cycles using a flux-transport dynamo	17
<i>M. Dikpati</i>	
Small-Scale Surface Flows and their Implications for Solar Activity	25
<i>M. L. DeRosa</i>	
Magnetic flux emergence into the atmosphere	33
<i>F. Moreno-Insertis</i>	
Nonpotentiality and energy transport in NOAA AR 10720	41
<i>M. Zhao & J. Wang</i>	
Exploring a different geometry for the solar tachocline in a kinematic solar dynamo model	45
<i>G. A. Guerrero & E. M. de Gouveia Dal Pino</i>	
Kelvin-Helmholtz instability in magnetohydrodynamic flows	49
<i>A. H. Khater, D. K. Callebaut & A. R. Seadawy</i>	
Flux emergence and interaction with a coronal field: 3D MHD simulations	53
<i>V. Archontis, F. Moreno-Insertis, K. Galsgaard & A. W. Hood</i>	

Session 1: Posters

Large-scale unipolar regions generated from undep magnetic fields	57
<i>D. K. Callebaut, A. A. Hady, G. K. Karugila & A. H. Khater</i>	
Simulation of Global Solar Flares and their Effects on Space Weather by using a Laser - Produced Plasma Clouds	59
<i>A. G. Ponomarenko, Y. P. Zakharov, V. M. Antonov, E. L. Boyarintsev, A. V. Melekhov, V. G. Posukh & I. F. Shaikhislamov</i>	

Longitudinal structure of the photospheric magnetic field	61
<i>E. Gavryuseva</i>	
North-South asymmetry of the photospheric magnetic field.	63
<i>E. Gavryuseva</i>	
Variability of the differential rotation of the photospheric magnetic field through solar cycles	65
<i>E. Gavryuseva</i>	
Basic topology and dynamics of magnetic field leading activity the Sun	67
<i>E. Gavryuseva</i>	
Radio Behavior of Solar Post-Flare Loops	69
<i>M. Wang, R. X. Xie, H. D. Chen & Y. H. Yan</i>	
Axially symmetric large-scale transport of the magnetic flux during solar activity cycle.	71
<i>P. Ambrož</i>	
Free Magnetic Energy Changes in AR 8210.	73
<i>B. T. Welsch & G. H. Fisher</i>	
Comparison of subsurface sound-speed structures of three active regions	75
<i>S. Couvidat, A. C. Birch, S. P. Rajaguru & A. G. Kosovichev</i>	
Particle Acceleration at Reconnecting X points in Solar Flares by Electrostatic Waves	77
<i>D. Y. Wang, Q. M. Lu & H. G. Li</i>	
Solar cycle as a dissipative magnetic structure	79
<i>A. A. Soloviev & E. A. Kirichek</i>	
On forecasting the onset of Solar Proton Events	81
<i>M. Núñez, R. Fidalgo & R. Morales</i>	
Unipolar Moving Magnetic Features: An Observation	83
<i>X. B. Li, J. Zhang & J. X. Wang</i>	
Relationships between Supergranular horizontal flow velocity, cell size and cell lifetime	85
<i>U. Paniveni, V. Krishan, J. Singh & R. Srikanth</i>	
Session 2: Magnetic fields and coupling processes in the solar atmosphere	
<i>Conveners: Solanki & Wang</i>	
<i>Session Chairs: Wang & Vögler</i>	
Large Nonlinear periodic solutions for isothermal magnetostatic atmospheres	89
<i>A. H. Khater, D. K. Callebaut & E. S. Kamel</i>	
Magnetic field evolution in a quiet region and a coronal hole	96
<i>J. Zhang</i>	
Analysis of coronal magnetic fields in active regions based on detailed radio spectral data	100
<i>S. Tokhchukova, V. Bogod & V. Garairov</i>	

Acoustic shock waves in the solar chromosphere from millimeter observations	104
<i>M. A. Loukitcheva, S. K. Solanki & S. White</i>	
Exact solutions for two-dimensional nonlinear force-free magnetic fields	108
<i>A. H. Khater, S. M. Moawad & D. K. Callebaut</i>	
Session 2: Posters	
Simultaneous measurement of magnetic and velocity fields in the layers of photosphere and chromosphere	112
<i>A. Adjabshirizadeh & E. Tavabi</i>	
Wave Propagation in the Magnetic Network on the Sun	116
<i>S. S. Hasan, G. Vigeesh & A. A. van Ballegooijen</i>	
Primary Analysis on the Temporal Behaviors of Electric Current in the Solar Flare Events	118
<i>B. Tan, H. Ji & G. Huang</i>	
The observational signature of quasi period reconnection	120
<i>G. P. Wu & G. L. Huang</i>	
The evolution of H α and CaII K emission before and during the solar M-class flare on 25th July 2004	122
<i>S. N. Chornogor, L. K. Kashapova & O. V. Andriyenko</i>	
Latitudinal Structure of the Photospheric Magnetic Field through solar cycles	124
<i>E. Gavryuseva</i>	
Upward velocities of the reconnection points and coronal magnetic field strengths in flaring regions derived from the GOES X-ray light curves	128
<i>T. T. Yamamoto & T. Sakurai</i>	
MHD Numerical Simulation of Interdependent Flares and CMEs	130
<i>Y. Z. Zhang, J. X. Wang & Y. Q. Hu</i>	
Diagnostics of local and global coronal magnetic field using global coronal waves	132
<i>I. Ballai</i>	
MHD waves in magnetically twisted solar atmospheric flux tubes	134
<i>R. Erdélyi & V. Fedun</i>	
On general transformations and variational principles of three-dimensional incompressible gravitating flows in ideal MHD	136
<i>A. H. Khater, D. K. Callebaut, T. N. Abdelhameed & A. Hady</i>	
Nonlinear periodic solutions for isothermal magnetostatic atmospheres	138
<i>A. H. Khater, D. K. Callebaut & E. S. Kamel</i>	

Session 3: Coronal heating and small-scale dynamics

Conveners: Priest, Fletcher & Shibata

Session Chairs: Priest & Shibata

3D Numerical Simulations of Coronal Tectonics	149
<i>I. De Moortel & K. Galsgaard</i>	
Small scale Alfvén waves and isotropization of energetic protons	157
<i>A. V. Stepanov & Y. T. Tsap</i>	
Expansion of the supergranular magnetic network through the solar atmosphere	161
<i>T. Aiouaz & M. P. Rast</i>	
Determination of flaring plasma characteristics from RESIK X-ray spectra	165
<i>B. Sylwester, J. Sylwester, A. Kępa & K. J. H. Phillips</i>	
Mechanism for electron acceleration due to propagation of jets in the solar corona	169
<i>R. Miteva, C. Vocks, G. Mann & H. Aurass</i>	
Chromospheric fine structure studies	173
<i>K. Tziotziou & G. Tsiropoula</i>	

Session 3: Posters

Altitude Dependence of Hard X-Ray Spectra in Solar Flares	177
<i>Q. R. Chen, M. D. Ding & P. F. Chen</i>	
Radiative cooling effects on oscillating loops	179
<i>C. A. Mendoza-Briceño & M. Luna-Cardozo</i>	
Investigation of pre-flare role of Ellerman bombs in solar active regions	181
<i>Yu. V. Papernaya & L. K. Kashapova</i>	
Line broadening of EUV lines across the solar limb observed by SUMER/SOHO	183
<i>G. Tsiropoula, J. Giannikakis, K. Tziotziou & E. Antonopoulou</i>	
How reliable are the large temperature anisotropies in polar coronal holes?	185
<i>N.-E. Raouafi & S. K. Solanki</i>	
Statistical analyses of Microwave type III bursts and CMEs	187
<i>Y. Ma, D. Y. Wang & Y. H. Yan</i>	
Evidence for coronal plasma oscillations over supergranular cells	189
<i>C. Gontikakis, H. Peter & H. C. Dara</i>	
Seismology of quiescent coronal loops	191
<i>Y. Taroyan & R. Erdélyi</i>	
Plasma dynamics in the polar coronal plumes	193
<i>N.-E. Raouafi, J. W. Harvey & S. K. Solanki</i>	

Session 4: Large-scale coronal structure - Space and ground-based observations

Conveners: Bothmer & Pasachoff

Session Chairs: Webb & Gibson

A Review of White Light Streamers at the End of Cycle 23	197
<i>A. Vourlidas</i>	
Magnetic Fields and Large-Scale SXR and EUV Coronal Structures	205
<i>L. van Driel-Gesztelyi</i>	
Is the solar cycle still a puzzle?	215
<i>E. E. Benevolenskaya</i>	
On the stratified structure of solar active regions	222
<i>A.A. Galal</i>	
A New Way to look at Observations with EGSO	229
<i>J. Aboudarham, I. Scholl, N. Fuller, A. Csillaghy, R. D. Bentley, E. Antonucci, L. Ciminiera, A. Finkelstein, S. Ipson, M. Messerotti, D. Pike, J.C. Vial & V. Zharkova</i>	

3D Simulations of the Solar Corona using Octree Compression	236
<i>F. Saez, P. Lamy & A. Llebaria</i>	
Chromospheric Prolateness: Solar Cycle Variations	240
<i>J. Vilinga, S. Koutchmy, F. Auchere, F. Baudin, B. Filippov & J-C. Noens</i>	
Decrease of hot regions in the polar corona of the Sun during 1957-2002	247
<i>D. K. Callebaut, A. G. Tlatov & V. I. Makarov</i>	

Session 4: Posters

Structural changes in solar corona during total solar eclipses	251
<i>M. Bělák, E. Marková & M. Druckmüller</i>	
On the penetration of Alfvén waves from the chromosphere into the corona	253
<i>Y. T. Tsap</i>	
Polarization properties of the June 21, 2001 solar corona	255
<i>N. G. Kapanadze, V. I. Kuljanishvili & A. A. Hady</i>	

Session 5: Solar wind – origin and evolution

Conveners: Hady & Stepanov

Session Chairs: Hady & Stepanov

Origin and evolution of the solar wind	259
<i>E. Marsch</i>	
How does the solar wind blow? Some basic aspects	269
<i>N. Meyer-Vernet</i>	
On The Status Of Solar Wind During The Present – Era Of Weak Solar Cycles	277
<i>S. Yousef & A. A. Hady</i>	
The effect of solar wind structures on the storm-time magnetosphere	283
<i>M. Ashour-Abdalla, M. El-Alaoui, V. Peroomian & R. J. Walker</i>	

Studying the great solar proton events during the solar cycle 23.....	287
<i>S. W. Samwel, A. A. Hady, M. Ibrahim & Y. S. Hanna</i>	
Session 5: Posters	
Relationships between photospheric magnetic field, solar wind and geomagnetic perturbations over last 30 years.....	291
<i>E. Gavryuseva</i>	
Solar fundamental pulsation and the origin of the long period Alfvén waves observed in the solar wind.....	297
<i>T. V. Zaqrashvili & G. Belvedere</i>	
Effect of partial solar eclipse on the behaviour of solar cell parameters	299
<i>A. E.-S. Ghitas</i>	
On general transformations and variational Principles of an ideal three-dimensional compressible	304
<i>A. H. Khater, D. K. Callebaut & T. N. Abdelhameed</i>	
Exact solutions to the Grad-Shafranov equation for magnetically confined plasmas	307
<i>A. H. Khater & S. M. Moawad</i>	
Parameter study on Kelvin–Helmholtz instability in solar wind type flowing structures.....	309
<i>R. Miteva, S. Ivanovski & I. Zhelyazkov</i>	
The kinetic model of the solar wind influenced by the given magnetic field	311
<i>N. R. Minkova</i>	
Kelvin-Helmholtz instability in MHD flows.....	313
<i>A. H. Khater, D. K. Callebaut & A. R. Seadawy</i>	
Session 6: Eruptive processes and space weather consequences – Flares, CMEs and SEPs	
<i>Conveners: Webb & Dere</i>	
<i>Session Chairs: Webb & Bothmer</i>	
Partially-ejected flux ropes: implications for space weather	319
<i>S. E. Gibson & Y. Fan</i>	
RHESSI and TRACE Observations for the Impulsive Flare Loops	327
<i>W. Q. Gan & Y. P. Li</i>	
Microwave and Hard X-ray Imaging of Energetic Electrons in Solar Flares: Event of 2003 June 17.....	334
<i>M. R. Kundu, E. J. Schmahl & S. M. White</i>	
Causes of extremely fast CMEs	343
<i>J. Feynman & A. Ruzmaikin</i>	
Observations of Coronal Mass Ejections from the Solar Mass Ejection Imager and Space Weather Implications.....	347
<i>J. C. Johnston, D. F. Webb, G. Fry, J. B. Mozer, T. A. Kuchar, D. R. Mizuno & T. A. Howard</i>	

In-situ and remote observations of CMEs	351
<i>L. Rodriguez, A. N. Zhukov, J. Woch, N. Krupp, R. von Steiger & R. Forsyth</i>	
Large-Scale Magnetic Connectivity in CMEs.....	357
<i>Y. Zhang, J. Wang, G. Attrill & L. K. Harra</i>	
Photometric study of EUV dimmings in powerful eruptive events observed with CORONAS-F/SPIRIT and SOHO/EIT.....	361
<i>V. A. Slemzin, V. V. Grechnev & S. V. Kuzin</i>	
Helioseismic observations of magnetic flux emergence and flare effects.....	365
<i>A. G. Kosovichev & T. L. Duvall, Jr</i>	
Differential topology method of identifying 3D null points in solar vector magnetic fields	369
<i>H. Zhao, J. Wang, J. Zhang & C. Xiao</i>	
Interaction Between CME and Magnetosphere Observed by Cluster on Nov. 6, 2001: (1) Waves Excitation	373
<i>C. J. Xiao, L. T. Song, Z. Y. Pu, J. X. Wang, Z. X. Liu, K.-H. Glassmeier, A. Balogh & H. Reme</i>	
Session 6: Posters	
Ion acceleration and positron production and annihilation in solar flares.....	377
<i>N. Guessoum</i>	
Photospheric physical conditions before a two-ribbon solar flare.....	381
<i>S. N. Chornogor & N. N. Kondrashova</i>	
The signatures of magnetic reconnection according to the microwave drifting bursts observations	383
<i>N. S. Meshalkina, A. T. Altyntsev, V. V. Grechnev & Y. Yihua</i>	
Seismic Radiation from M-class Solar Flares	385
<i>D. Besliu-Ionescu, A. Donea, P. Cally & C. Lindsey</i>	
Coronal and H_{α} dimmings associated with an CME on 2001 September 28	387
<i>Y. C. Jiang, L. H. Yang, L. P. Li, H. D. Chen & S. L. Ma</i>	
Laboratory simulation of very strong magnetosphere's compression by giant Solar flare's plasma, supplying a SEP's trapping and other world - wide effects ..	389
<i>A. G. Ponomarenko, Yu. P. Zakharov, V. M. Antonov, E. L. Boyarintsev, A. V. Melekhov, V. G. Posukh, I. F. Shaikhislamov & K. V. Vchivkov</i>	
Decimetric fine structures associated with the 6th June, 2000 solar flare	391
<i>F. C. R. Fernandes, J. R. Cecatto, M. C. Andrade, R. R. Rosa & H. S. Sawant</i>	
RHESSI X-ray loop and coronal sources of an occulted flare.....	393
<i>Y. P. Li & W. Q. Gan</i>	
The CME dynamics associated to the prominence eruption of December 2, 2003	395
<i>V. A. Slemzin, S. Koutchmy, J.-C. Noens & D. Romeuf</i>	

Diagnostics of thermal and non-thermal processes in solar flares using chromospheric lines	397
<i>M. D. Ding, J. X. Cheng & J. P. Li</i>	
Magnetic Topology before a 3B/X1.2 Flare and the Associated CME	399
<i>H. Li, B. Schmieder, G. Aulanier & A. Berlicki</i>	
Solar cycles in global temperatures.	401
<i>T. V. Kuznetsova & L. B. Tsirulnik</i>	
Coronal Magnetic Field Topology over CME Productive Quiescent Filaments . .	403
<i>Y. Li & J. Luhmann</i>	
CMEs driven by an eruptive prominence	405
<i>G. P. Zhou, J. X. Wang, J. Zhang, P. F. Chen, H. S. Ji & K. Dere</i>	
Contribution of geometry of interaction between interplanetary and terrestrial magnetic fields into geomagnetic activity	407
<i>T. V. Kuznetsova, A. I. Laptukhov & V. D. Kuznetsov</i>	
A statistical study of shear motion of EUV footpoints in two-ribbon flares	409
<i>Y. N. Su, L. Golub, A. A. Van Ballegooijen & G. L. Huang</i>	
The Formation and Evolution of a Ring-filament Associated with Newly-emerging Flux	411
<i>S. Ma, Y. Jiang & H. Chen</i>	
Preliminary Prediction of the Strength of the 24th 11-Year Solar Cycle	413
<i>R.H. Hamid & A.A. Galal</i>	
Onset Time of Solar Cycle 23 GLEs	417
<i>Y. H. Tang, C. Li & Y. Dai</i>	
On rotation of solar filaments	419
<i>A. I. Khlystova</i>	
Periodicities in microwave radio bursts of solar flares	421
<i>Z. Ning & M. D. Ding</i>	
Spatial and temporal scales of coronal magnetic restructuring in CME initiation	423
<i>Y. Wen, J. Wang, D. J. F. Maia, Y. Zhang & H. Zhao</i>	

Session 7: New instrumentation and missions for the sun and heliosphere

*Conveners: Fleck & Bothmer
Session Chairs: Bothmer & Dame*

Prospects of Solar Physics from the Ground	427
<i>R. Schlichenmaier</i>	
SOLARNET & LAIME: Imaging & Spectroscopy in the Far Ultraviolet	435
<i>L. Damé & S. Koutchmy</i>	

Session 7: Posters

Initial solar observations with Prototype Brazilian Decimetric Array	445
<i>F. C. R. Fernandes, R. Ramesh, J. R. Cecatto, C. Faria, M. C. Andrade, K. R. Subramanian, M. S. S. Rajan & H. S. Sawant</i>	

Different modes for spectropolarimetric measurements	447
<i>D. Y. Kolobov & N. I. Kobanov</i>	
TESIS experiment on XUV imaging spectroscopy of the Sun onboard the CORONAS-PHOTON satellite	449
<i>S. V. Kuzin, I. A. Zhitnik, S. A. Bogachev, S. V. Shestov, O. I. Bugaenko, N. K. Suhodrev, A. A. Pertsov, A. V. Mitrofanov, A. P. Ignat'ev & V. A. Slemzin</i>	

Session 8: Training courses for young (inter)national astronomers

*Conveners: Koutchmy, Hady & Mahmoud
Session Chairs: Koutchmy, Hady & Mahmoud*

Observations of Coronal Mass Ejections	455
<i>L. K. Harra & J. Wang</i>	
Coronal waves and oscillations	464
<i>V. M. Nakariakov</i>	
Multi-wavelength Observations of the solar eruptive activity	472
<i>B. Schmieder</i>	
Lattice models for solar flares and coronal heating	481
<i>O. Podladchikova & B. Lefebvre</i>	
Solar wind and solar energetic particles: origins and effects	489
<i>I. S. Veselovsky</i>	
Predictions for Total Solar Eclipses of 2008, 2009 and 2010	495
<i>F. Espenak & J. Anderson</i>	
Earth-Moon-Sun System: Eclipses Models	503
<i>R. M. Ros</i>	

Session 8: Posters

Does the Nile reflect solar variability?	511
<i>A. Ruzmaikin, J. Feynman & Y. Yung</i>	
Solar radius in 2005 and 2006 eclipses	519
<i>C. Sigismonti</i>	
Pinhole Solar Monitor tests in the Basilica of Santa Maria degli Angeli in Rome	521
<i>C. Sigismonti</i>	
The stability and eigen oscillations of sunspots	523
<i>A. A. Soloviev & E. A. Kirichek</i>	
Author index	525
