

# Contents

Preface .....	V
List of Contributors .....	XV
<b>1 HDDR Process for the Production of High Performance Rare-Earth Magnets</b> .....	<b>1</b>
1.1 Introduction .....	1
1.2 HDDR Phenomena in Nd-Fe-B .....	3
1.2.1 Hydrogen Absorption .....	4
1.2.2 Disproportionation in $\text{Nd}_2\text{Fe}_{14}\text{B}$ .....	4
1.2.3 Recombination of Disproportionated $\text{Nd}_2\text{Fe}_{14}\text{B}$ .....	8
1.3 Anisotropy in HDDR Treated Nd-Fe-B Magnets .....	11
1.4 HDDR Phenomena in Other Rare-Earth Magnetic Materials .....	21
1.4.1 $\text{Sm}_2\text{Fe}_{17}\text{N}_x$ Compound .....	21
1.4.2 $\text{ThMn}_{12}$ -type Compound .....	23
1.4.3 $\text{Nd}_3(\text{Fe}, \text{Ti})_{29}$ -Type Compound .....	24
1.5 Summary .....	25
References .....	25
<b>2 Process and Magnetic Properties of Rare-Earth Bonded Magnets</b> .....	<b>32</b>
2.1 Introduction .....	32
2.2 Recent Progress on Rare-Earth Magnetic Powders for Bonded Magnets .....	34
2.2.1 Isotropic NdFeB Powders .....	34
2.2.2 Lean Neo Isotropic Powders .....	38
2.2.3 Anisotropic NdFeB Powders for Bonded Magnets .....	39
2.2.4 SmCo Powder for Bonded Magnet Applications .....	40
2.2.5 Other Magnetic Powders .....	43
2.3 Process and Magnetic Properties of Polymer Bonded Rare Earth Magnets .....	44
2.3.1 Bonded Magnets Produced by Compression Molding Process .....	44
2.3.2 Hot Compression Molding Process .....	49
2.3.3 Bonded Magnets Produced by Injection Molding Process .....	52
2.3.4 Bonded Magnets Produced by Extrusion Process .....	53

2.4	Polymers and Polymer Additives for Bonded Rare-Earth Magnets .....	55
2.5	Environmental Stability of Polymer Bonded Magnets .....	57
2.6	Summary .....	61
	References .....	65
<b>3</b>	<b>Laser Processing of Magnetic Materials .....</b>	<b>69</b>
3.1	Introduction .....	69
3.2	Laser Characteristics and Laser Facilities for Materials Processing .....	70
3.2.1	Laser Characteristics .....	70
3.2.2	Lasers Available for Materials Processing .....	71
3.2.3	Laser Materials Interaction .....	74
3.3	Laser Surface Treatment of Magnetic Thin Films .....	74
3.3.1	Precise Grain Size Control of Magnetic Thin Films .....	75
3.3.2	Alignment of Magnetic Grains by Laser Annealing .....	78
3.4	Interferometric Laser Lithography .....	79
3.4.1	Multi-Step ILL .....	80
3.4.2	Direct Patterning Using ILL .....	82
3.5	Concluding Remarks .....	85
	References .....	85
<b>4</b>	<b>Processing and Properties of Nanocomposite Nd<sub>2</sub>Fe<sub>14</sub>B-Based Permanent Magnets .....</b>	<b>88</b>
4.1	Introduction .....	88
4.2	Basic Considerations on Processing Techniques .....	88
4.3	Preparation of Amorphous or Nanostructured Precursors .....	91
4.4	Transformation of Amorphous or Nanostructured Precursors .....	97
4.5	Direct Preparation of Nanocomposite Permanent Magnets .....	99
4.6	Effects of Additive Elements on Crystallization Behavior .....	100
4.6.1	Fe <sub>3</sub> B/Nd <sub>2</sub> Fe <sub>14</sub> B .....	101
4.6.2	Advanced Nanocomposite Permanent Magnets Based on Fe <sub>3</sub> B/Nd <sub>2</sub> Fe <sub>14</sub> B .....	103
4.6.3	α-Fe/Nd <sub>2</sub> Fe <sub>14</sub> B .....	104
4.7	Practical Properties of Nanocomposite Nd <sub>2</sub> Fe <sub>14</sub> B-Based Magnets .....	106
4.7.1	Magnetic Properties .....	106
4.7.2	Corrosion Behaviors .....	107
4.7.3	Magnetizability .....	108
4.8	Application Examples .....	109
4.9	Future Subjects .....	110
	References .....	111

<b>5</b>	<b>Amorphous and Nanocrystalline Soft Magnetic Materials: Tailoring of Magnetic Properties, Magnetoelastic and Transport Properties .....</b>	<b>115</b>
5.1	Introduction .....	115
5.2	Magnetic Properties: Magnetization Process .....	120
5.2.1	Amorphous Ribbons: Effect of the Composition and Applied Stress .....	121
5.2.2	Amorphous Wires: Large Barkhausen Effect .....	123
5.2.3	Nanocrystalline Materials: Coercivity .....	128
5.3	Processing: Induced Magnetic Anisotropy .....	132
5.3.1	Amorphous Metallic Alloys .....	135
5.3.2	Nanocrystalline Alloys .....	139
5.3.3	Induced Magnetic Anisotropy in Glass-Coated Amorphous Microwires .....	142
5.4	Magnetostriction .....	145
5.4.1	Amorphous Materials .....	145
5.4.2	Nanocrystalline Materials .....	151
5.5	Giant Magneto Impedance Effect .....	154
5.6	Sensor Applications .....	165
5.6.1	Magnetometers Using Amorphous and Nanocrystalline Materials .....	166
5.6.2	Magnetoelastic Sensors: Sensors Based on Magnetic Bistability .....	167
5.6.3	Sensors Based on Giant Magneto-Impedance Effect .....	172
	References .....	174
<b>6</b>	<b>Nanogranular Layered Magnetic Films .....</b>	<b>182</b>
6.1	Introduction .....	182
6.2	Ion Beam Sputtering .....	184
6.3	Samples Preparation and Characterization .....	185
6.4	Structural Properties .....	187
6.5	Magnetic Properties .....	189
6.5.1	Nuclear Magnetic Resonance .....	189
6.5.2	Room Temperature Static Magnetization .....	193
6.5.3	dc and ac SQUID Measurements .....	194
6.5.4	Ferromagnetic Resonance .....	200
6.6	Transport and Magnetotransport Properties .....	202
6.6.1	Electric Conduction in Zero Magnetic Field .....	203
6.6.2	Room Temperature Magnetoresistance .....	205
6.6.3	Influence of the Number of Bilayers on Resistive and Magnetoresistive Properties .....	207
6.6.4	Temperature Dependence of Magnetoresistance .....	209
6.7	Conclusions .....	212
	References .....	213

<b>7 Monodisperse Ferromagnetic Metal Particles: Synthesis by Chemical Routes, Size Control and Magnetic Characterizations</b>	217
7.1 Introduction	217
7.2 Preparation of Monodisperse Fine Ferromagnetic Metal Particles by Chemical Routes	218
7.2.1 Mechanism of Particle Formation	219
7.2.2 Control of the Morphological Characteristics of the Particles	220
7.3 Characterization of Ferromagnetic Metal Particles Made by the Polyol Process	226
7.3.1 Morphological Characteristics	226
7.3.2 Crystal Structure	232
7.3.3 Chemical Composition	234
7.3.4 Core-Shell Microstructure	237
7.3.5 Static Magnetic Properties	242
7.4 Magnetic Resonance in Fine Particles	248
7.4.1 Theoretical Background	248
7.4.2 Magnetic Resonance in Polyol Made Particles	252
7.5 Conclusions and Perspectives	261
References	262
<b>8 Monocrystalline Half-Metallic NiMnSb Thin Films: Preparation and Characterization</b>	267
8.1 Introduction	267
8.2 The Half-Metallic Semi-Heusler NiMnSb	268
8.2.1 Heusler Alloys	268
8.2.2 The Half-Metals	270
8.2.3 The Case of NiMnSb	272
8.3 Growth and Structure of Epitaxial NiMnSb Thin Films	275
8.3.1 PtMnSb	275
8.3.2 PtMnSb/NiMnSb Multilayers	275
8.3.3 Polycrystalline NiMnSb Thin Films	276
8.3.4 Epitaxial Growth of NiMnSb	279
8.3.5 Surface Morphology of the Epitaxial Films	282
8.4 Magnetism and Transport Properties of NiMnSb Thin Films	286
8.4.1 Hysteresis Cycles	286
8.4.2 Magnetocrystalline Anisotropy	287
8.4.3 NiMnSb Thin Film Resistivity	289
8.5 Evidences of the Half-Metallic Character	290
8.5.1 Overview of Magnetic Excitations in Half-Metals	290
8.5.2 Electrical Resistivity	292
8.5.3 Magnetoresistance	293
8.5.4 Hall Effect	294
8.5.5 Magnetization	297

8.6 Conclusions	298
References	298
<b>9 Bulk Amorphous Magnetic Materials</b>	303
9.1 Introduction	303
9.2 Processing and Characterization of Bulk Amorphous Magnetic Alloys	306
9.2.1 Melt-Spinning Technique Used for the Preparation of "Bulk" Amorphous Ribbons	306
9.2.2 Preparation of Bulk Amorphous Magnetic Rods and Rings by Casting Techniques	308
9.2.3 Methods and Techniques Used for Structural and Magnetic Characterization of Bulk Amorphous Magnetic Alloys	308
9.3 Soft Magnetic Bulk Amorphous Alloys	313
9.3.1 Background	313
9.3.2 The Formation of the Amorphous Phase in (Fe, Co, Ni) <sub>70</sub> (Zr, Nb, M) <sub>10</sub> B <sub>20</sub> (M=Zr, Ti, Ta, Mo) Systems	314
9.3.3 Electric Resistivity of Fe-Based Bulk Amorphous Alloys	317
9.3.4 Magnetic Properties of (Fe, Co, Ni) <sub>70</sub> (Zr, Nb, M) <sub>10</sub> B <sub>20</sub> Bulk Amorphous Alloys in the As-quenched State	319
9.3.5 Magnetic Properties of Fe-Zr-B-Based Bulk Amorphous Alloys Versus Annealing	321
9.4 High-Coercivity Bulk Amorphous Alloys	324
9.4.1 Background	324
9.4.2 Glass-Forming Ability in Nd-Fe-(Al, Si) Systems	325
9.4.3 X-ray and Neutron Diffraction Experiments on Nd <sub>90-x</sub> Fe <sub>x</sub> Al <sub>10-y</sub> Si <sub>y</sub> Bulk Metallic Alloys	327
9.4.4 Magnetic Properties of Nd <sub>90-x</sub> Fe <sub>x</sub> Al <sub>10-y</sub> Si <sub>y</sub> Bulk Amorphous Alloys	332
9.4.5 Mössbauer Spectra	342
9.5 Relationship between Microstructure and Magnetic Properties in Bulk Amorphous Alloys	344
9.5.1 Soft Magnetic Bulk Amorphous Alloys	344
9.5.2 High-Coercivity Bulk Amorphous Alloys	345
9.6 Future Perspectives	349
References	349
