
CONTENTS

Preface	xv
List of Contributors	xvii
I. OPTICAL MICROSCOPY, SCANNING PROBE MICROSCOPY, ION MICROSCOPY, AND NANOFABRICATION	1
1. Confocal Scanning Optical Microscopy and Nanotechnology <i>Peter J. Lu</i>	3
1. Introduction	5
2. The Confocal Microscope	3
3. Applications to Nanotechnology	15
4. Summary and Future Perspectives	20
Acknowledgements	21
References	21
2. Scanning Near Field Optical Microscopy in Nanosciences <i>Alexandre Bouhelier, Achim Hartschuh, and Lukas Novotny</i>	25
1. Scanning Near-Field Optical Microscopy and Nanotechnology	25
2. Basic Concepts	26
3. Instrumentation	27
4. Applications in Nanoscience	34
5. Perspectives	50
References	51

3. Scanning Tunneling Microscopy	55
<i>Jin-Feng Jia, Wei-Sheng Yang, and Qi-Kun Xue</i>	
1. Basic Principles of Scanning Tunneling Microscopy	55
2. Surface Structure Determination by Scanning Tunneling Microscopy	59
3. Scanning Tunneling Spectroscopies	81
4. STM-based Atomic Manipulation	92
5. Recent Developments	98
References	109
4. Visualization of Nanostructures with Atomic Force Microscopy	113
<i>Sergei N. Magonov and Natalya A. Yerina</i>	
Introductory Remarks	113
Basics of Atomic Force Microscopy	115
Imaging of Macromolecules and their Self-Assemblies	134
Studies of Heterogeneous Systems	146
Concluding Remarks	153
References	154
5. Scanning Probe Microscopy for Nanoscale Manipulation and Patterning	157
<i>Seunghun Hong, Jiwoon Im, Minbaek Lee and Narae Cho</i>	
1. Introduction	157
2. Nanoscale Pen Writing	162
3. Nanoscale Scratching	167
4. Nanoscale Manipulation	171
5. Nanoscale Chemistry	174
6. Nanoscale Light Exposure	178
7. Future Perspectives	179
References	180
6. Scanning Thermal and Thermoelectric Microscopy	183
<i>Li Shi</i>	
1. Introduction	183
2. Instrumentation of Scanning Thermal and Thermoelectric Microscopy	184
3. Theory of Scanning Thermal and Thermoelectric Microscopy	191
4. Applications of Scanning Thermal and Thermoelectric Microscopy in Nanotechnology	197
5. Summary and Future Aspects	203
Acknowledgements	204
References	204
7. Imaging Secondary Ion Mass Spectrometry	207
<i>William A. Lamberti</i>	
1. Secondary Ion Mass Spectrometry and Nanotechnology	207
2. Introduction to Secondary Ion Mass Spectrometry	208

3. Experimental Issues in Imaging SIMS	213
4. Applications in Nanotechnology	216
5. Summary and Future Perspectives	220
References	222
8. Atom Probe Tomography	227
<i>M. K. Miller</i>	
1. Atom Probe Tomography and Nanotechnology	227
2. Instrumentation of Atom Probe Tomography	228
3. Basic Information	237
4. Data Interpretation and Visualization	238
5. Sample Analysis of Nanomaterials: Multilayer Films	244
6. Summary and Future Perspectives	245
Acknowledgements	245
References	246
9. Focused Ion Beam Systems—A Multifunctional Tool for Nanotechnology	247
<i>Nan Yao</i>	
1. Introduction	247
2. Principles and Practice of the Focused Ion Beam System	250
3. Application of Focused Ion Beam Instrumentation	266
Acknowledgements	284
References	284
10. Electron Beam Lithography	287
<i>Zhiping (James) Zhou</i>	
1. Electron Beam Lithography and Nanotechnology	287
2. Instrumentation of Electron Beam Lithography	289
3. Electron-Solid Interactions	300
4. Pattern Transfer Process	306
5. Applications in Nanotechnology	310
6. Summary and Future Perspectives	318
References	319
II. ELECTRON MICROSCOPY	323
11. High Resolution Scanning Electron Microscopy	325
<i>Jingyue Liu</i>	
1. Introduction: Scanning Electron Microscopy and Nanotechnology	325
2. Electron-Specimen Interactions	329
3. Instrumentation of the Scanning Electron Microscope	334
4. The Resolution of Secondary and Backscattered Electron Images	342
5. Contrast Mechanisms of SE and BE Images of Nanoparticles and Other Systems	345
6. Applications to Characterizing Nanophase Materials	352
7. Summary and Perspectives	355
References	358

12. High-Spatial Resolution Quantitative Electron Beam Microanalysis for Nanoscale Materials	361	4. Diffraction in STEM Instruments	469
<i>Dale E. Newbury, John Henry J. Scott, Scott Wight, and John A. Small</i>		5. Microanalysis in STEM	473
1. Introduction	361	6. Studies of Nanoparticles and Nanotubes	474
2. The Nanomaterials Characterization Challenge: Bulk Nanostructures and Discrete Nanoparticles	362	7. Studies of Crystal Defects and Interfaces	475
3. Physical Basis of the Electron-Excited Analytical Spectrometries	364	8. The Structure and Composition of Surfaces	477
4. Nanoscale Elemental Characterization with High Electron Beam Energy	366	9. Amorphous Materials	480
5. EELS Quantification	370	10. STEM Holography	482
6. Spatial Sampling of the Target with EELS	371	11. Ultra-High-Resolution STEM	484
7. Nanoscale Elemental Characterization with Low and Intermediate Electron Beam Energy	379	12. Conclusions	487
8. Examples of Applications to Nanoscale Materials	390	Acknowledgements	488
9. Conclusions	399	References	488
References	399		
13. Characterization of Nano-Crystalline Materials using Electron Backscatter Diffraction in the Scanning Electron Microscope	401	16. In-Situ Electron Microscopy for Nanomeasurements	493
<i>J. R. Michael</i>		<i>Zhong Lin Wang</i>	
1. Introduction	401	1. Introduction	493
2. Historical Development of EBSD	402	2. Thermal Induced Surface Dynamic Processes of Nanocrystals	495
3. Origin of EBSD Patterns	403	3. Measuring Dynamic Bending Modulus By Electric Field Induced Mechanical Resonance	496
4. Resolution of EBSD	408	4. Young's Modulus of Composite Nanowires	506
5. Sample Preparation of Nano-materials for EBSD	413	5. Bending Modulus of Oxide Nanobelts	508
6. Applications of EBSD to Nano-materials	415	6. Nanobelts as Nanocantilevers	512
7. Summary	424	7. In-situ Field Emission from Nanotube	513
Acknowledgements	424	8. Work Function at the Tips of Nanotubes and Nanobelts	513
References	424	9. Mapping the Electrostatic Potential at the Nanotube Tips	517
		10. Field Emission Induced Structural Damage	518
14. High-Resolution Transmission Electron Microscopy	427	11. Nanothermometer and Nanobearing	521
<i>David J. Smith</i>		12. In-situ Transport Measurement of Nanotubes	521
1. HRTEM and Nanotechnology	427	13. Summary	528
2. Principles and Practice of HRTEM	428	Acknowledgement	528
3. Applications of HRTEM	434	References	529
4. Current Trends	443		
5. Ongoing Problems	448	17. Environmental Transmission Electron Microscopy in Nanotechnology	531
6. Summary and Future Perspective	449	<i>Renu Sharma and Peter A. Crozier</i>	
References	450	1. Introduction	531
		2. History of ETEM	532
15. Scanning Transmission Electron Microscopy	455	3. Data Collection	538
<i>J. M. Cowley</i>		4. Experimental Design Strategies	541
1. Introduction	455	5. Applications to Nanomaterials	543
2. STEM Imaging	459	6. Conclusions	562
3. STEM Imaging of Crystals	465	References	563
		18. Electron Nanocrystallography	567
		<i>Jian-Min Zuo</i>	
		1. Introduction	567
		2. Electron Diffraction Modes and Geometry	568

3. Theory of Electron Diffraction	572
4. Experimental Analysis	584
5. Applications to Nanostructure Characterization	590
6. Conclusions and Future Perspectives	598
References	598
19. Tomography using Transmission Electron Microscope	601
<i>P. A. Midgley</i>	
1. Introduction	601
2. Tomography	603
3. Tomography in the Electron Microscope	609
4. STEM HAADF (Z-Contrast) Tomography	615
5. EFTEM Tomography	621
6. Conclusions	623
Acknowledgements	624
References	624
20. Off-Axis Electron Holography	629
<i>Martha R. McCartney, Rafal E. Dunin-Borkowski and David J. Smith</i>	
1. Electron Holography and Nanotechnology	629
2. Description of Off-Axis Electron Holography	630
3. Nanoscale Electrostatic Fields	638
4. Nanoscale Magnetic Fields	643
5. Future Perspectives	648
References	649
21. Sub-nm Spatially Resolved EELS (Electron Energy-Loss Spectroscopy): Methods, Theory and Applications	653
<i>Christian Colliex and Odile Stéphan</i>	
1. Introduction: EELS and Nanotechnology	653
2. Understanding the Information Contained in an EELS Spectrum	655
3. Spatially Resolved EELS	663
4. Elemental Mapping of Individual Nanoparticles using Core-Loss Signals	669
5. Mapping Bonding States and Electronic Structures with ELNES Features	674
6. Conclusion	678
References	679
22. Imaging Magnetic Structures using Transmission Electron Microscopy Methods	683
<i>Takayoshi Tanji</i>	
1. Introduction	683
2. Lorentz Microscopy	684

3. Electron Holography	697
4. Summary	713
References	714
Index	717
