Table of Contents

Preface	xiii
Organizing committee	xv

Session A: Modelling convection and radiative transfer

Chair: Kwing L. Chan

INVITED REVIEWS

Theoretical modeling of convection I. Key physical processes	3
<i>V. M. Canuto</i>	
Theoretical modeling of convection II. Reynolds Stress Model	19
<i>V. M. Canuto</i>	
Challenges to the theory of solar convection	35
<i>F. Cattaneo</i>	

INVITED TALKS

Radiative hydrodynamics models of stellar convection	36
<i>M. Steffen</i>	
Radiative transfer modeling of the Hanle effect in convective atmospheres	44
<i>J. Trujillo Bueno</i>	

ORAL CONTRIBUTIONS

Dynamic models of the sun from the convection zone to the chromosphere	52
<i>S. Wedemeyer-Böhm</i>	
Theories of convection and the spectrum of turbulence in the solar photosphere	58
<i>F. Rincon</i>	

PANEL DISCUSSION

Round table discussion of session A: modelling convection and radiative transfer	64
<i>F. Kupka</i>	

POSTER PRESENTATIONS

3-D hydrodynamic simulations of convection in A stars	68
<i>O. Kochukhov, B. Freytag, N. Piskunov & M. Steffen</i>	
ATLAS 9 and ATLAS 12 under GNU-Linux	71
<i>L. Sbordone, P. Bonifacio & F. Castelli</i>	
Coherent structures in granulation convection and their importance for higher order closure models	74
<i>F. Kupka & F. J. Robinson</i>	

Reynolds stress models of convection in convective cores	77
<i>I. W. Roxburgh & F. Kupka</i>	
Probing Reynolds stress models of convection with numerical simulations: I. Overall properties: fluxes, mean profiles	80
<i>F. Kupka & H. J. Muthsam</i>	
Probing Reynolds stress models of convection with numerical simulations: II. Non-locality and third order moments	83
<i>F. Kupka & H. J. Muthsam</i>	
Probing Reynolds stress models of convection with numerical simulations: III. Compressibility modelling and dissipation	86
<i>F. Kupka & H. J. Muthsam</i>	
Modelling of solar granulation	89
<i>H. J. Muthsam, B. Löw-Baselli, Chr. Obertscheider, M. Langer, P. Lenz & F. Kupka</i>	
Some open questions concerning the modelling of non-locality in Reynolds stress type models of stellar convection	92
<i>F. Kupka</i>	
The impact of non grey atmospheric treatment and convective modelling on the solar structure	95
<i>V. Penza & P. Ventura</i>	
Mixing length model of convection in stellar cores	98
<i>I. W. Roxburgh & F. Kupka</i>	

Session B: Observational probes of convection

Chair: *T. Bedding*

INVITED REVIEWS

Observing convection in stellar atmospheres	103
<i>J. D. Landstreet</i>	

INVITED TALKS

Helioseismic inferences on subsurface solar convection	113
<i>A. G. Kosovichev</i>	
Convection and the solar abundances: Does the sun have a sub-solar metallicity?	122
<i>M. Asplund</i>	

ORAL CONTRIBUTIONS

What can we learn about convection from asteroseismology?	130
<i>H. Kjeldsen & T. R. Bedding</i>	
Comparison of spatially and spectrally resolved solar data with numerical simulations	138
<i>G. Cauzzi, A. Asensio Ramos, K. P. Reardon & K. Janssen</i>	

PANEL DISCUSSION

Round table discussion of session B: observational probes of convection	144
<i>B. Smalley</i>	

POSTER PRESENTATIONS

Stellar fluxes as probes of convection in stellar atmospheres	148
<i>B. Smalley</i>	
Magnetic fields in Herbig Ae stars	151
<i>R. V. Yudin, M. A. Pogodin, S. Hubrig & M. Schöller</i>	
On the relation between rotation, convection and activity in intermediate-mass giants	154
<i>P. Gondoin</i>	
Testing convection in stellar models using detached eclipsing binaries	157
<i>J. Southworth & H. Bruntt</i>	
Microturbulent velocities and abundances for A and F dwarfs in open clusters	160
<i>M. Gebran & R. Monier</i>	
Reversed granulation in mid-photosphere of the Sun	163
<i>K. Janssen & G. Cauzzi</i>	
Effect of the microturbulence parameter on the Color-Magnitude Diagram	166
<i>J. Montalbán, J. Nendwich, U. Heiter, F. Kupka, E. Paunzen & B. Smalley</i>	
Eclipsing binaries as a test for synthetic photometry	169
<i>U. Heiter, B. Smalley, Ch. Stütz, F. Kupka & O. Kochukhov</i>	
Revealing the onset of free convection in terrestrial planet atmospheres	172
<i>S. G. Els & K. Vogiatzis</i>	

Session C: Convection in planets and brown dwarfs

Chair: *F. Allard*

INVITED REVIEWS

Modeling convection and zonal winds in giant planets	177
<i>M. Evonuk & G. A. Glatzmaier</i>	

INVITED TALKS

Convection-driven planetary dynamos	188
<i>U. R. Christensen, J. Aubert & P. Olson</i>	
Observations of convection in the giant planets: results from space missions	196
<i>A. P. Ingersoll</i>	
Convection in brown dwarfs	197
<i>S. Mohanty, I. Baraffe & G. Chabrier</i>	

ORAL CONTRIBUTIONS

- Prospects of using simulations to study the photospheres of brown dwarfs 205
H.-G. Ludwig
- Convection during the formation of gaseous giants and stars. 211
G. Wuchterl

PANEL DISCUSSION

- Round table discussion of session C: convection in planets and brown dwarfs . . . 217
K. L. Chan

POSTER PRESENTATIONS

- Heat transport in 3D anelastic simulations of the internal dynamics of giant planets without cores 221
M. Evonuk & G. A. Glatzmaier
- Chemical composition of dust clouds in turbulent brown dwarf atmospheres. . . . 224
Ch. Helling
- The influence of convective energy transport on dust formation in brown dwarf atmospheres 227
M. Dehn, Ch. Helling, P. Woitke & P. Hauschildt
- A finite-difference convective model for Jupiter's equatorial jet. 230
K. L. Chan

Session D: Stellar evolution, nucleosynthesis and convective mixing

Chair: J. Kubát

INVITED REVIEWS

- Convection and mixing in stars: theory versus observations. 235
C. Chiosi
- Stellar convection with nuclear burning 247
D. Arnett, C. Meakin & P. A. Young

INVITED TALKS

- The role of convection in AGB modeling. 258
P. Ventura
- On supersonic convection in stellar atmospheres. 266
D. R. Xiong & L. Deng

ORAL CONTRIBUTIONS

- The DB gap of white dwarfs and semiconvection 274
H. Shibahashi

- Abundances in extremely metal-poor stars: comparison of the trends of abundance ratios in giants and turnoff stars. 280
M. Spite, P. Bonifacio, R. Cayrel, F. Spite, V. Hill, J. Andersen, B. Barbuy, T. Beers, E. Depagne, P. François, P. Molaro, B. Nordström, B. Plez & F. Primas

- The destruction of ^3He by Rayleigh-Taylor instability on the first giant branch . 286
P. P. Eggleton, D. S. P. Dearborn & J. C. Lattanzio

PANEL DISCUSSION

- Round table discussion on session D: stellar evolution, nucleosynthesis and convective mixing 294
A. Weiss

POSTER PRESENTATIONS

- Si, O, Ne, and C shell burning 296
C. Meakin & D. Arnett
- $^{12}\text{C}/^{13}\text{C}$ ratios in giants of open clusters 298
R. Smiljanic, R. Gauderon, P. North, B. Barbuy, C. Charbonnel & N. Mowlavi

- Abundances of C, N and O as probes of mixing in low-mass helium-core burning stars. 301
G. Tautvaišienė, B. Edvardsson, E. Puzeras & I. Ilyin

- CNO and Li abundances in Barium-enriched stars 304
N. A. Drake & C. B. Pereira

- Isotopic abundances of Carbon and Oxygen in Oxygen-rich giant stars 307
T. Tsuji

- Rotational properties of the Orion nebular cluster revised. 311
N. R. Landin, P. Ventura, F. D'Antona, L. T. S. Mendes & L. P. R. Vaz

- Inclusion of a time-dependent, non-local convection theory in a stellar evolution code. 314
A. Weiss & M. Flaskamp

- Numerical simulations of semiconvection 317
G. P. Bascoul

- Pre-main Sequence models with convection described by 2D-RHD numerical simulations 320
J. Montalbán & F. D'Antona

- Convective processes and hydromagnetic instabilities in core collapse supernova simulations 323
M. Obergaulinger, N. J. Hammer & E. Müller

- Toward three-dimensional simulations of stellar core collapse with magnetic fields 326
M. Liebendörfer, S. Whitehouse & T. Fischer

Session E: Oscillations, mass loss and convection*Chair: S. Höfner***INVITED REVIEWS**

- Application of convection simulations to oscillation excitation and local helioseismology 331
R. F. Stein, D. Benson, D. Georgobiani & Å. Nordlund

INVITED TALKS

- Convection and pulsation in red giant stars 343
P. R. Wood
- Solar-like oscillation amplitudes and line-widths as a probe for turbulent convection in stars 349
R. Samadi, K. Belkacem, M.-J. Goupil, F. Kupka & M.-A. Dupret

ORAL CONTRIBUTIONS

- Comparing convection in the Sun with Procyon A 358
F. Robinson & P. Demarque
- Can we detect convection in the Sun? 364
S. M. Hanasoge, T. L. Duvall, Jr, M. L. Derosa & M. S. Miesch

PANEL DISCUSSION

- Round table discussion of session E: oscillations, mass loss and convection 370
M.-J. Goupil

POSTER PRESENTATIONS

- Testing Reynolds stress model in solar interior 373
J. Y. Yang & Y. Li
- A closure model for turbulent convection: application to the excitation of p modes 376
K. Belkacem, R. Samadi, M.-J. Goupil, F. Kupka & F. Baudin
- Small amplitude variable red giants 379
D. R. Xiong & L. Deng
- Monitoring of the cool ZZ Ceti star PG 2303+243 382
E. Pakštienė, J.-E. Solheim, G. Handler, B. Steininger, F. Rodler, M. Paparo, Z. Bognar, R. Patterson & M. Reed
- Effect of convection modeling on the non-adiabatic seismic observables of δ Scuti stars 385
J. Montalbán & M.-A. Dupret
- Probing turbulence with seismic observations of α Centauri 388
C. W. Straka, P. Demarque & F. J. Robinson

Session F: Convection and rotation*Chair: I. Tuominen***INVITED REVIEWS**

- Rotation of the solar convection zone from helioseismology 393
J. Christensen-Dalsgaard
- Thermal convection in accretion disks 405
H. Klahr

INVITED TALKS

- Turbulent compressible convection with rotation 417
N. H. Brummell

ORAL CONTRIBUTIONS

- Large-scale flows and convection at the base of solar convection zone 425
E. Tikhomolov
- On the interactions of turbulent convection and rotation in RGB stars 431
A. Palacios & A. S. Brun
- Effects of rotation and input energy flux on convective overshooting 437
P. J. Käpylä, M. J. Korpi, M. Stix & I. Tuominen

PANEL DISCUSSION

- Round table discussion of session F: convection and rotation 443
I. W. Roxburgh

POSTER PRESENTATIONS

- Theoretical estimates of the convective turnover time for low-mass, rotating pre-main sequence stars 446
L. T. S. Mendes, N. R. Landin & L. P. R. Vaz
- The redistribution of the regions in radiative and convective equilibrium of the stars of the main sequence with rotation 449
O. Kuzmanovska
- Differential rotation and angular momentum 451
G. J. J. Botha & E. A. Evangelidis

Session G: MHD convection and dynamos*Chair: K. G. Strassmeier***INVITED REVIEWS**

- Near-surface shear layer dynamics 457
A. Brandenburg

INVITED TALKS

- Dynamos of giant planets 467
F. H. Busse & R. D. Simitev
- Photospheric magnetoconvection 475
R. Cameron, A. Vögler & M. Schüssler

ORAL CONTRIBUTIONS

- Generation of coupled global and local magnetic fields by a cellular MHD dynamo 482
A. V. Getling, R. D. Simitev & F. H. Busse
- Challenges of magnetism in the turbulent Sun 488
A. S. Brun, M. S. Miesch & J. Toomre

PANEL DISCUSSION

- Round table discussion of session G: MHD convection and dynamos 494
J. Toomre

POSTER PRESENTATIONS

- Is solar convection responsible for the local amplification and structuring of magnetic fields (observational test of the hypothesis) 496
A. V. Getling & X. M. Bao
- Quasi-regular structures in the solar photosphere (trenching in the brightness relief): algorithmic treatment 499
A. V. Getling & A. A. Buchnev
- “Negative magnetic buoyancy” effects and reconstruction of toroidal field in the solar convection zone 502
V. N. Krivodubskij
- Magnetic activity in the atmospheres of F-type binaries: V963 Cyg, XZ CMi, V965 Cyg 505
R. G. Samec, S. M. Jones, T. Scott, J. Branning, J. Miller, H. Chamberlain, D. R. Faulkner & N. C. Hawkins
- Numerical simulations of sunspots 507
G. J. J. Botha, A. M. Rucklidge & N. E. Hurlburt
- Simulations of solar magnetic dynamo action in the convection zone and tachocline 510
M. K. Browning, M. S. Miesch, A. S. Brun & J. Toomre
- Spectral properties of magnetohydrodynamic convection with mean horizontal temperature gradient 513
D. Skandera & W.-Ch. Müller
- Super-equipartition fields in simulations of photospheric magnetoconvection. . . . 514
P. J. Bushby

Ending the Symposium

- Concluding remarks 517
J.-P. Zahn
- Author index 523
