Table of Contents

Preface	xii
D. Vokrouhlický	
Organizing committee	xiii
PROLOGUE	
Address by the Scientific Organizing Committee: 236 years ago	xvii
G.B. Valsecchi	
A Tribute to the Life and Work of George W. Wetherill	xxi
D.O. ReVelle	
Part 1. POPULATION MODELS AND TRANSPORT MECHANISMS	
Mutual geometry of confocal keplerian orbits: uncertainty of the MOID and search for virtual PHAs	3
G. F. Gronchi, G. Tommei & A. Milani	
On the Lyapounov exponents of the asteroidal motion subject to resonances and encounters	15
I. I. Shevchenko	
Resonant trans-Neptunian objects as a source of Jupiter-family comets	31
E. L. Kiseleva & V. V. Emel'yanenko	
Orbital evolution of short-period comets with high values of Tisserand constant	35
N. Yu. Emel'yanenko	
Dynamical evolution of Oort cloud comets to near-Earth space	43
O. A. Mazeeva	
Migration of comets the terrestrial planets	55
S. Ipatov & J. Mather	
Search for small trans-Neptunian objects by the TAOS project	65
W. P. Chen & the TAOS team	
Some aspects of the statistics of near-Earth objects	69
J. R. Donnison	
On secular resonances of small bodies in the planetary systems	77
J. Ji, L. Liu & G. Y. Li	

Part 2. THE METEOR/ASTEROID IMPACT TRANSITION

(Mostly) dormant comets in the NEO population and the meteoroid streams that they crumble into	87
P. Jenniskens	
NEO fireball diversity: Entry modeling and analysis techniques	95
D. O. ReVelle	
Properties of meteoroids from different classes of parent bodies	107
J. Borovička	
Automation of the Czech part of the European fireball network: Equipment, methods and first results	121
P. Spurný, J. Borovička & L. Šrbený	
Ondřejov's double-station observation of faint meteors using TV technique (image intensifiers Dedal): 1998-2005	131
R. Štork	
Is the near-Earth asteroid 2000 PG ₃ an extinct comet?	135
P. B. Babadzhanov & I. P. Williams	

Part 3. ROTATION, SHAPES AND BINARIES

Radar reconnaissance of near-Earth asteroids	143
S. J. Ostro, J. D. Giorgini & L. A. M. Benner	
Inverse problems of NEO photometry: Imaging the NEO population	151
M. Kaasalainen & J. Ďurech	
NEA rotations and binaries	167
P. Pravec, A. W. Harris & B. D. Warner	
The dynamics of NEO binary asteroids	177
D. J. Scheeres	
Physical models of asteroids from sparse photometric data	191
J. Ďurech, P. Scheirich, M. Kaasalainen, T. Grav, R. Jedicke & L. Denneau	
Tidal disturbances of small cohesionless bodies: Limits on planetary close approach distances	201
P. Michel & K. A. Holsapple	
Earth's 2006 encounter with comet 73P/Schwassmann-Wachmann: Products of nucleus fragmentation seen in closeup	211
Z. Sekanina	

Part 4. SURFACES AND COMPOSITION

Collision and impact simulations including porosity	223
W. Benz & M. Jutzi	
Space weathering and tidal effects among near-Earth objects	233
S. Marchi, P. Paolicchi, D. Nesvorný, S. Magrin & M. Lazzarin	
Space weathering of asteroids: Similarities and discrepancies between Main Belt asteroids and NEOs	239
S. Marchi, P. Paolicchi, M. Lazzarin & S. Magrin	
X-ray fluorescence modelling for Solar system regoliths: Effects of viewing geometry, particle size and surface roughness	243
J. Näränen, H. Parviainen & K. Muinonen	
Near-Earth objects as principal impactors of the Earth: Physical properties and sources of origin	251
D. F. Lupishko, M. Di Martino & R. P. Binzel	
Itokawa: The power of ground-based mid-infrared observations	261
T. G. Müller, T. Sekiguchi, M. Kaasalainen, M. Abe & S. Hasegawa	

Part 5. SURVEYS: ORBIT DETERMINATION AND DATA PROCESSING

Single and multiple solutions algorithms to scan asteroid databases for identifications	269
M. E. Sansatario & O. Arratia	
Near-Earth-object identification over apparitions using <i>n</i> -body ranging	281
M. Granvik & K. Muinonen	
Low solar elongations for NEOs: a deep sky test and its implications for survey strategies	291
A. Boattini, A. Milani, G. F. Gronchi, T. Spahr & G. B. Valsecchi	
Initial linking methods and their classification	301
L. K. Kristensen	
Spins, shapes, and orbits for potentially hazardous near-Earth objects by Nordic NEON	309
K. Muinonen, J. Torppa, J. Virtanen, J. Näränen, J. Niemelä, M. Granvik, T. Laakso, H. Parviainen, K. Aksnes, Z. Dai, C. Lagerkvist, H. Rickman, O. Karlsson, G. Hahn, R. Michelsen, T. Grav, P. Pravec & U. G. Jørgensen	

Part 6. SURVEYS: OBSERVATORIES AND THEIR PERFORMANCES

Current NEO surveys	323
S. Larson	
Spacewatch preparations for the era of deep all-sky surveys	329
R. S. McMillan & the Spacewatch Team	
The next decade of Solar System discovery with Pan-STARRS.	341
R. Jedicke, E. A. Magnier, N. Kaiser & K. C. Chambers	
LSST: Comprehensive NEO Detection, Characterization, and Orbits.	353
Ž. Ivezić, J. A. Tyson, M. Jurić, J. Kubica, A. Connolly, F. Pierfederici, A. W. Harris, E. Bowell & the LSST Collaboration	
Searching for near Earth objects using Lowell observatory's Discovery Channel Telescope (DCT)	363
E. L. G. Bowell, R. L. Millis, E. W. Dunham, B. W. Koehn & B. W. Smith	
NEO-related scientific and outreach activities at KLENOT.	371
J. Tichá, M. Tichý & M. Kočer	
Astrometry of small Solar System bodies at the Molétai observatory	377
K. Černis, J. Zdanavičius, K. Zdanavičius & G. Tautvaišienė	
NEO search telescope in China.	381
Y. Ma, H. Zhao & D. Yao	
Kharkiv study near-Earth asteroids	385
Yu. N. Krugly, N. M. Gaftonyuk, I. N. Belskaya, V. G. Chiorny, V. G. Shevchenko, F. P. Velichko, D. F. Lupishko, A. A. Konovalenko, I. S. Falkovich & I. E. Molotov	
The observations of near Earth objects by the automatic mirror astrograph ZA-320M in Pulkovo observatory	391
A. V. Devyatkin, A. P. Kulish, V. V. Kouprianov, D. L. Gorshanov, A. S. Bekhteva, O. V. Krakosevich, E. Y. Aleshkina, F. M. Ibragimov, V. N. L'vov, R. I. Smekhacheva & S. D. Tsekmeister	

Part 7. CURRENT AND FUTURE MISSIONS TO NEOS

The nature of asteroid Itokawa revealed by Hayabusa	401
M. Yoshikawa, A. Fujiwara, J. Kawaguchi & Hayabusa Mission and Science Team	

Keplerian consequences of an impact on an asteroid and their relevance for a deflection demonstration space mission	417
A. Rathke & D. Izzo	

A family of low-cost transfer orbits for rendezvous-type missions to NEAs	427
S. Berinde	

Asteroid mass determination with the Gaia mission	435
S. Mouret, D. Hestroffer & F. Mignard	

Part 8. IMPACT MONITORING AND RISK ESTIMATES

The cometary impactor flux at the Earth	441
P. R. Weissman	

Albedo and size of (99942) Apophis from polarimetric observations	451
A. Cellino, M. Delbò & E. F. Tedesco	

Admissible regions for too short arcs: nodal distances and elongations.	455
S. Valk & A. Lemaitre	

Part 9. IAU AND GOVERNMENTS ROLE IN THE NEO PROBLEM

The IAU role	467
O. Engvold	

The UK Near Earth Object Information Centre (NEOIC).	471
I. P. Williams	

Near Earth Object impact simulation tool for supporting the NEO mitigation decision making process	477
N. J. Bailey, G. G. Swinerd, A. D. Morley & H. G. Lewis	

EPILOGUE

Concluding remarks: 15 years ago, now and in the near future	489
A. Milani
