## Contents

<b>1</b>	<b>Introduction</b>	1
<b>2</b>	<b>Plasmas Involving Molecules</b>	5
2.1	Ionosphere	5
2.1.1	Energy Degradation of Photoelectrons	7
2.1.2	Optical Emission	7
2.1.3	Energy Balance and Transport Phenomena in Thermal Electrons	10
2.2	Interstellar Cloud	10
2.3	Gaseous Discharges	13
2.3.1	Production and Maintenance of Plasmas	13
2.3.2	Determination of Electron Energy Distribution Function	14
2.3.3	Production of Active Species	16
2.4	Fusion Plasma	17
<b>3</b>	<b>Collision Cross-Sections and Related Quantities</b>	21
3.1	Definitions and Fundamental Relations	21
3.2	Cross-Section in the Quantum Theory	25
3.3	Scattering from a Spherical Potential	26
3.4	One-Body vs. Two-Body Problems	28
3.5	Experimental Methods to Obtain Cross-Sections	33
3.5.1	Measurement of Energy Loss of Electrons	33
3.5.2	Detection of Collision Products	34
3.5.3	Beam Attenuation Method	35
3.5.4	Merged Beam Method	36
3.5.5	Swarm Experiment	37
<b>4</b>	<b>Molecule as a Collision Partner</b>	39
4.1	Molecular Structure and Energy Levels	39
4.2	Interaction of Charged Particles with Molecules	45
4.3	Electron Collision with a Diatomic Molecule	48

4.4	Remarks on the Collision with Polyatomic Molecules . . . . .	53
4.5	The Born Approximation . . . . .	54
<b>5</b>	<b>Electron Collisions with Molecules . . . . .</b>	<b>57</b>
5.1	Collision Processes . . . . .	57
5.2	Elastic Scattering . . . . .	59
5.3	Momentum-Transfer . . . . .	64
5.4	Rotational Transition . . . . .	69
5.5	Vibrational Transition . . . . .	77
5.6	Excitation of Electronic State . . . . .	85
5.7	Ionization . . . . .	91
5.8	Electron Attachment . . . . .	99
5.8.1	Dissociative Attachment . . . . .	100
5.8.2	Three-Body Attachment . . . . .	103
5.8.3	Metastable Negative Ion . . . . .	103
5.9	Emission . . . . .	104
5.10	Dissociation . . . . .	109
5.11	Total Scattering Cross-Section . . . . .	115
5.12	Stopping Cross-Section . . . . .	118
5.13	Collisions with Excited Molecules . . . . .	121
<b>6</b>	<b>Ion Collisions with Molecules . . . . .</b>	<b>127</b>
6.1	Characteristics of Ion Collisions Compared with Electron Collisions . . . . .	127
6.2	Momentum-Transfer . . . . .	130
6.3	Inelastic Scattering . . . . .	136
6.4	Reaction . . . . .	139
<b>7</b>	<b>Electron Collisions with Molecular Ions . . . . .</b>	<b>145</b>
7.1	General Remarks . . . . .	145
7.2	Electron-Ion Recombination . . . . .	148
7.2.1	Three-Body Recombination . . . . .	148
7.2.2	Dissociative Recombination . . . . .	150
<b>8</b>	<b>Summary of the Roles of the Molecular Processes in Plasmas . . . . .</b>	<b>155</b>
<b>A</b>	<b>Order of Magnitude of Macroscopic Quantities . . . . .</b>	<b>157</b>
<b>B</b>	<b>Molecular Properties . . . . .</b>	<b>161</b>
<b>C</b>	<b>Atomic Units and Evaluation of the Born Cross-Section . . . . .</b>	<b>167</b>
C.1	Definition of Atomic Units . . . . .	167
C.2	Example of the Calculation of the Born Cross-Section for Rotational Transitions . . . . .	168
C.3	Example of the Calculation of the Born Cross-Section for Vibrational Transitions . . . . .	169

<b>D</b>	<b>Cross-Section Sets for H<sub>2</sub>, N<sub>2</sub>, H<sub>2</sub>O, and CO<sub>2</sub> . . . . .</b>	<b>171</b>
<b>E</b>	<b>How to Find Cross-Section Data . . . . .</b>	<b>175</b>
E.1	Data Compilations in Printed Form . . . . .	175
E.2	Journals Exclusively Focused on Atomic and Molecular Data . . . . .	177
E.3	Online Database . . . . .	177
E.4	Review Papers . . . . .	177
E.5	Conference . . . . .	178
<b>F</b>	<b>Data Compilations for Electron-Molecule Collisions . . . . .</b>	<b>181</b>
<b>G</b>	<b>Data Compilations for Ion-Molecule Reactions and Related Processes . . . . .</b>	<b>185</b>
<b>References . . . . .</b>		<b>187</b>
<b>Index . . . . .</b>		<b>193</b>
