

CONTENTS

Preface	ix
Symposium Organization	xi
Keynote Address	xiii

FUNDAMENTAL PROCESSES

Cross Section Data for Negative Ion Sources	3
M. Capitelli, R. Celiberto, F. Esposito, and A. Laricchiuta	
State-to-state and Charged Particle Kinetic Modeling of Time	
Filtering and Cs Addition	11
M. Capitelli, P. Diomede, C. Gorse, S. Longo, and D. Pagano	
Study of Volume and Surface Effects in Pure Hydrogen Discharges	20
F. Taccogna, R. Schneider, U. Fantz, S. Longo, and M. Capitelli	
Electron Temperature Control in Plasmas with Mesh Grid Bias and Its Application to Hydrogen Negative Ion Production	31
O. Fukumasa, D. Ito, and Y. Jyobira	
Numerical Analysis of the Hydrogen Atom Density in a Negative Ion Source	38
N. Takado, J. Hanatani, T. Mizuno, A. Hatayama, H. Tobari, M. Hanada, T. Inoue, M. Taniguchi, M. Dairaku, M. Kashiwagi, K. Watanabe, and K. Sakamoto	
Influence of Magnetic Fields and Biasing on the Plasma of a RF Driven Negative Ion Source	46
D. Wunderlich, R. Gutser, U. Fantz on behalf of the NNBI Team	
Research of the Negative Ion Source Based on Reflective Discharge with and without Addition of Cesium	58
V. P. Goretsky, A. V. Ryabtsev, I. A. Soloshenko, and A. I. Shchedrin	

ION SOURCES FOR ACCELERATORS

The ISIS Penning H⁻ SPS and Diagnostic Developments at RAL	71
D. C. Faircloth, A. P. Letchford, J. Pozimski, M. O. Whitehead, T. Wood, S. Jolly, P. Savage, M. Haigh, J. Morrison, I. Yew, and G. Doucas	
The HERA RF-driven Multicusp H⁻ Ion Source	79
J. Peters	
Ion Source Development at the SNS	87
R. F. Welton, M. P. Stockli, S. N. Murray, J. Carr, J. Carmichael, R. H. Goulding, and F. W. Baity	
Tripling the Total Charge per Pulse of the Polarized Light Ion Source at COSY/Julich	105
R. Gebel, O. Felden, R. Maier, and P. von Rossen	
ECRIN and Multicusp Sources at CEA Saclay	114
O. Tuske, G. Charruau, O. Delferrière, D. De Menezes, R. Gobin, Y. Gauthier, F. Harrault, and A. Madur	

Towards an H⁻ RF Source for Future CERN Accelerator Projects	121
D. Küchler, Th. Meinschad, J. Peters, and R. Scrivens	
Ion Source Choices—An H⁻ Source for the High Intensity Neutrino Source.....	130
D. P. Moehs, R. F. Welton, M. P. Stockli, J. Peters, and J. Alessi	
Multicusp Ion Source with External RF Antenna for Production of H⁻ Ions.....	136
T. Kalvas, S. K. Haato, J. H. Vainionpää, K. N. Leung, S. B. Wilde, and P. Mandrillon	
A Proposal for the Improvement of Non-cesiated H⁻ Sources.....	145
R. Becker	
Surface Plasma Sources with Helicon Plasma Generators	153
V. Dudnikov, G. Dudnikova, and J. P. Farrell	
Plasma and Beam Production Experiments with HYBRIS—A Microwave-assisted H⁻ Ion Source.....	164
R. Keller, J. Kwan, S. Haato, M. Regis, and J. Wallig	
Helicon Plasma Generator-assisted Negative Ion Source Project at Los Alamos Neutron Science Center	171
O. Tarvainen, M. Light, G. Rouleau, and R. Keller	

DIAGNOSTICS

Laser-based Beam Diagnostics for the RAL Front-end Test Stand (FETS)	183
C. Gabor, D. A. Lee, J. K. Pozimski, and A. Letchford	
Electron Energy Distribution Function Measurements by Langmuir Probe in ITER-like Negative Ion Sources.....	193
B. Crowley, D. Homfray, U. Fantz, D. Boilson, and R. S. Hemsworth	

ION SOURCES FOR FUSION

High-power Negative Ion Sources for Neutral Beam Injectors in Large Helical Devices.....	211
Y. Takeiri, O. Kaneko, K. Tsumori, U. Fantz, K. Ikeda, K. Nagaoka, M. Osakabe, Y. Oka, E. Asano, T. Kondo, M. Sato, M. Shibuya, and S. Komada	
RF Negative Ion Source Development at IPP Garching	224
W. Kraus, P. McNeely, M. Berger, S. Christ-Koch, H. D. Falter, U. Fantz, P. Franzen, M. Fröschle, B. Heinemann, S. Leyer, R. Riedl, E. Speth, and D. Wunderlich	
Power Transmission from the ITER Model Negative Ion Source	238
D. Boilson, H. P. L. de Esch, C. Grand, R. S. Hemsworth, and A. Krylov	

BEAM FORMATION, ACCELERATION, AND NEUTRALIZATION

Negative Ion Beam Extraction and Emittance.....	251
A. J. T. Holmes	
Physical Processes in Compensated Beams of Negative Ions Beams and Problems of Transport of the Beams	262
I. A. Soloshenko, V. N. Gorshkov, and A. M. Zavalov	
Space Charge Neutralization in the ITER Negative Ion Beams	278
E. Surrey	
Status of the Development of the SINGAP Accelerator for ITER.....	290
R. S. Hemsworth, H. P. L. de Esch, M. Kovari, L. Svensson, and F. Villegas	
A Particle-in-cell Gun Code for Surface-converter H⁻ Ion Source Modeling	306
E. Chacon-Golcher and K. J. Bowers	
Modeling of a High Current H⁻ LEBT with the Lorentz-EM 3D Ion Optics Code.....	318
S. K. Haato, D. G. Bilbrough, and R. Keller	
Separation of H- Ions and Co-extracted Electrons at Full Energy	324
J. Dietrich and R. Becker	

APPLICATIONS

Negative Decaborane Ion Beam from ITEP Bernas Ion Source	333
S. V. Petrenko, R. P. Kuibeda, T. V. Kulevoy, V. A. Batalin, V. I. Pershin, A. V. Koslov, Yu. B. Stasevich, V. A. Koshelev, A. Hershcovitch, B. M. Johnson, E. M. Oks, V. I. Gushenets, and H. J. Poole	
Searching for a Suitable Gas Ion Source for ¹⁴C Accelerator Mass Spectrometry	341
K. von Reden, M. Roberts, B. Han, R. Schneider, and J. Wills	
Isobar Suppression by Photodetachment in a RF Quadrupole Ion Guide	346
C. C. Havener, Y. Liu, J. F. Liang, H. Wollnik, and J. R. Beene	

SUMMARIES

Summary I—Accelerator Ion Sources, Fundamentals, and Diagnostics.....	361
D. P. Moehs	
Summary II—Fusion Ion Sources, Beam Formation, Acceleration, and Neutralization	366
T. T. C. Jones	
List of Participants.....	373
Author Index.....	377
