

CONTENTS

Preface	xxi
CEC Awards	xxiii
2007 CEC Board and Technical Editors	xxvii
Acknowledgments	xxix

PART A

JT, MAGNETIC, AND NON-AEROSPACE COOLERS

Development of JT Coolers Operating at Cryogenic Temperatures with Nonflammable Mixed Refrigerants	3
A. Khatri and M. BoiarSKI	
Experimental Investigations on Mixed Refrigerant Joule-Thomson (MR J-T) Cryocooler	11
N. S. Walimbe, K. G. Narayankhedkar, and M. D. Atrey	
Scaling of Thermoacoustic Refrigerators	18
Y. Li, J. C. H. Zeegers, and H. J. M. ter Brake	
Performance Improvement of a Single Stage GM Cryocooler at 25 K	26
C. Wang and P. E. Gifford	
Experimental Study on the Double-evaporator Thermosiphon for Cooling HTS (High Temperature Superconductor) System	34
J. Lee, Y. Kim, and S. Jeong	
Stirling-Type Pulse Tube Cryocooler with 1kW of Refrigeration at 77 K	42
S. A. Potratz, T. D. Abbott, M. C. Johnson, and K. B. Albaugh	

FLUID MECHANICS—I

PIV Measurement of Slush Nitrogen Flow in Pipe, Part II	51
M. Maeda, M. Murakami, and T. Takakoshi	
Natural Circulation Loop of Subcooled Liquid Nitrogen	59
M. J. Kim and H. M. Chang	
Pressure Drop Reduction of Slush Nitrogen in Turbulent Pipe Flows	67
K. Ohira, M. Nozawa, J. Ishimoto, N. Koizumi, and T. Kamiya	
A Numerical Analysis in LN₂ Channel for DC-SC Power Transmission Line	75
A. Sasaki, M. Hamabe, T. Famakinwa, S. Yamaguchi, and A. Radovinsky	

PULSE TUBE CRYOCOOLERS (NON-AEROSPACE)

Experimental Studies on a Two Stage Pulse Tube Cryocooler Reaching 2.5 K	85
S. Kasthuriengan, G. Srinivasa, G. S. Karthik, K. P. Ramesh, and K. A. Shafi	
Buffered Rotary Valve System of GM-type Pulse Tube Refrigerator	93
G. Hwang, J. Jung, and S. Jeong	

Optimization of a Two Stage Pulse Tube Refrigerator for the Integrated Current Lead System	101
R. Maekawa, Y. Matsubara, A. Okada, S. Takami, M. Konnno, A. Tomioka, T. Imayoshi, H. Hayashi, and T. Mito	
Damping of Intrinsic Temperature Oscillations in a 4 K Pulse Tube Cooler by Means of Rare Earth Plates	109
K. Allweins, L. Qiu, and G. Thummels	
 SUPERCONDUCTING RF CAVITIES AND CRYOSYSTEMS—I	
Compact He II Cooling System for Superconducting Cavities	119
M. Takahashi, T. Yazawa, T. Tosaka, T. Kuriyama, N. Kakutani, T. Ota, K. Nakayama, and K. Saito	
Superconducting Radio-frequency Modules Test Facility Operating Experience	127
B. Soyars, R. Bossert, C. Darve, B. Degriff, A. Klebaner, A. Martinez, L. Pei, and J. Theilacker	
Simulation of the Impact of the Kapitza Resistance at Grain-Grain Boundaries on Niobium Superconducting Cavities	135
J. Amrit and Q. Li	
 THERMAL INSULATION SYSTEMS—I	
Design Tool for Cryogenic Thermal Insulation Systems	145
J. A. Demko, J. E. Fesmire, and S. D. Augustynowicz	
Cryogenic Thermal Performance Testing of Bulk-fill and Aerogel Insulation Materials	152
B. E. Scholtens, J. E. Fesmire, J. P. Sass, S. D. Augustynowicz, and K. W. Heckle	
Testing of a Vacuum Insulated Flexible Line with Flowing Liquid Nitrogen during the Loss of Insulating Vacuum	160
J. A. Demko, R. C. Duckworth, M. Roden, and M. Gouge	
Radiation Heat Measurement on Thermally Isolated Double-pipe for DC Superconducting Power Transmission	168
M. Hamabe, Y. Nasu, A. Ninomiya, Y. Ishiguro, S. Kusaka, and S. Yamaguchi	
Low Temperature Heat Transfer Properties of Electrical Insulation for the Next European Dipole	174
J. Polinski, S. Canfer, G. Ellwood, and B. Baudouy	
 HE II TRANSFER AND FLUID MECHANICS—I	
PIV Measurement Result of Superfluid He II Thermal Counterflow Jet	183
M. Murakami, T. Takakoshi, M. Maeda, and A. Nakano	
Density Effect of Solidified Hydrogen Isotope Particles on Particle Image Velocimetry Measurements of He II Flow	191
T. Xu and S. W. Van Sciver	
Visualization Study of Phase Transition Caused by Heating of He II in Two-Dimensional Narrow Channel	199
S. Takada, M. Murakami, N. Kimura, and H. Kobayashi	
Investigation of Transient Heat Transfer in Porous Media in He II	207
H. Allain and B. Baudouy	

REGENERATOR PERFORMANCE

Calculated Regenerator Performance at 4 K with Helium-4 and Helium-3	225
R. Radebaugh, Y. Huang, A. O'Gallagher, and J. Gary	
Application of Novel Regenerator Material within a Coaxial Two-Stage Pulse Tube Refrigerator	235
T. Koettig, F. Richter, R. Nawrodt, A. Zimmer, C. Schwarz, D. Heinert, M. Thürk, and P. Seidel	
The Impact of Uncertainties Associated with Regenerator Hydrodynamic Closure Parameters on the Performance of Inertance Tube Pulse Tube Cryocoolers	243
J. S. Cha, S. M. Ghiaasiaan, C. S. Kirkconnell, and W. M. Clearman	
New Model and Measurement Principle of Flowing and Heat Transfer Characteristics of Regenerator	251
Y. Y. Chen, E. C. Luo, and W. Dai	
Longitudinal Hydraulic Resistance Parameters of Cryocooler and Stirling Regenerators in Periodic Flow	259
J. S. Cha, S. M. Ghiaasiaan, and C. S. Kirkconnell	
A New Correlation of Friction Factor for Oscillating Flow Regenerator Operating at High Frequencies	267
Q. Q. Shen and Y. L. Ju	

CRYOGENIC COOLING OF HIGH TEMPERATURE SUPERCONDUCTING DEVICES

High Temperature Superconducting Degaussing—Cooling Two HTS Coils with One Cryocooler for the Littoral Combat Ship	277
B. K. Fitzpatrick, E. M. Golda, and J. T. Kephart	
Thermal Fatigue Test Apparatus for Large Superconducting Coils	284
J. T. Kephart, B. K. Fitzpatrick, J. Chen, J. Lopez, M. Millar, L. Wong, M. Zimmerman, J. Kostic, and C. Rakus	
Flow Cooling of Superconducting Magnets for Spacecraft Applications	291
A. J. Dietz, W. E. Audette, M. D. Barton, J. K. Hilderbrand, W. S. Marshall, C. M. Rey, D. S. Winter, and A. J. Petro	
Novel Cryogenic Engineering Solutions for the New Australian Research Reactor OPAL	299
S. R. Olsen, S. J. Kennedy, S. Kim, J. C. Schulz, R. Thiering, E. P. Gilbert, W. Lu, M. James, and R. A. Robinson	

PUMPS AND COMPRESSORS

Screw Compressor Characteristics for Helium Refrigeration Systems	309
V. Ganni, P. Knudsen, J. Creel, D. Arelius, F. Casagrande, and M. Howell	
Experience with Dry Running Vacuum Pumps in Helium Service	316
R. Arztmann	

LOW TEMPERATURE SUPERCONDUCTING MAGNET SYSTEMS—I

Leak-tight Welding Experience from the Industrial Assembly of the LHC Cryostats at CERN	325
N. Bourcey, P. Campos, P. Chiggiato, P. Limon, A. Mongelluzzo, G. Musso, A. Poncet, and V. Parma	
Heat Exchanger Design Studies for an LHC Inner Triplet Upgrade	333
R. J. Rabehl and Y. Huang	
High Intensity Neutrino Source Superconducting Solenoid Cryostat Design	341
T. M. Page, T. H. Nicol, S. Feher, I. Terechkine, and J. Tompkins	
Development of New Cooling System Using GM/JT Cryocoolers for the SKS Magnet	349
K. Aoki, T. Haruyama, Y. Makida, O. Araoka, K. Kasami, T. Takahashi, T. Nagae, Y. Kakiguchi, M. Sekimoto, T. Tosaka, H. Miyazaki, T. Kuriyama, M. Ono, T. Orikasa, T. Tsuchihashi, and Y. Hirata	

LOW TEMPERATURE SUPERCONDUCTING MAGNET SYSTEMS—II

Freely Oriented Portable Superconducting Magnet	359
E. N. Schmierer, B. Charles, R. Efferson, D. Hill, T. Jankowski, G. Laughon, and C. Prenger	
Helium-Liquefaction by a Cryocooler in Closed-loop Cooling System for 21 T FT-ICR Magnets	367
Y. S. Choi, T. A. Painter, D. L. Kim, B. S. Lee, and H. S. Yang	
Development of Cooling System for Cryogenic Preamplifier in FT-ICR Ion Trap	375
Y. S. Choi, D. L. Kim, T. A. Painter, M. C. Choi, H. S. Kim, and J. S. Yoo	
Fiber Bragg Grating Sensors for Measuring Temperature and Strain Simultaneously at Cryogenic Temperature	383
R. Rajinikumar, M. Suesser, K. G. Narayankhedkar, G. Krieg, and M. D. Atrey	

AEROSPACE CRYOGENICS

Development of Cryogenic Loop Heat Pipe	393
R. Karunanithi, S. Jacob, G. S. V. L. Narasimham, D. S. Nadig, U. Behera, and D. Kumar	
Analysis of Continuous Heat Exchangers for Cryogenic Boil-off Reduction	401
J. R. Feller, A. Kashani, B. P. M. Helvensteign, L. J. Salerno, P. Kittel, D. Plachta, R. Christie, and E. Carlberg	
LOX Separation Studies Using Cryogenic Vortex Tube	409
S. Jacob, P. J. Paul, R. Karunanithi, and U. Behera	
Development of a Cryogen-free Continuous ADR System for Milli-Gravity Experiments	416
K. Takahashi, K. Kamiya, H. Nakagome, T. Numazawa, P. Shirron, and D. Wegel	
Development of a Cryogenic Gate Valve with Robust Sealing	422
W. H. Hatfield and J. P. Sass	
Cryocooler Prognostic Health Management System	427
A. Shah, L. Penswick, C. Dodson, and T. Roberts	

LARGE SCALE REFRIGERATORS AND LIQUEFIERS—I

The On-site Status of the KSTAR Helium Refrigeration System	437
H.-S. Chang, D. S. Park, J. J. Joo, K. M. Moon, K. W. Cho, Y. S. Kim, J. S. Bak, H. M. Kim, M. C. Cho, I. K. Kwon, E. Fauve, J.-M. Bernhardt, P. Dauguet, J. Beauvisage, F. Andrieu, S.-H. Yang, and G. M. Gistau Baguer	
The JT-60SA Cryoplant Current Design Status	445
D. Henry, F. Michel, P. Roussel, P. Reynaud, J. Y. Journeaux, J. L. Maréchal, D. Balaguer, C. Roux, M. Matsukawa, and K. Yoshida	
Performance Study for Cryogenic System at NSRRC	453
H. H. Tsai, F. Z. Hsiao, H. C. Li, S. H. Chang, and W. S. Chiou	
Preliminary Commissioning of Cryogenic System of BESIII	461
Z. G. Zong, L. Q. Liu, L. Zhang, S. P. Li, K. He, and L. Y. Xiong	
Numerical Simulation of the Cryogenic System of BEPCII	467
Z. G. Zong, L. Q. Liu, L. Y. Xiong, and L. Zhang	
Dynamic Simulation of a Helium Refrigerator	475
C. Deschildre, A. Barraud, P. Bonnay, P. Briand, A. Girard, J. M. Poncet, P. Roussel, and S. E. Sequeira	
Understanding Dynamic Behavior of a Large Scale Cryogenic Plant	483
R. Maekawa, K. Ooba, M. Nobutoki, and T. Mito	

STIRLING AND PULSE TUBE CAPABILITIES OVERVIEW (AEROSPACE)

Heritage Overview: 20 Years of Commercial Production of Cryocoolers for Space	493
A. S. Gibson, J. Reed, T. W. Bradshaw, and M. Linder	
Air Liquide Space Pulse Tube Cryocoolers	506
J. Tanchon, T. Trollier, J. Buquet, A. Ravex, and P. Crespi	
High Performance Pulse Tube Cryocoolers	514
J. R. Olson, E. Roth, P. Champagne, B. Evtimov, and T. C. Nast	
Ball Aerospace Hybrid Space Cryocoolers	522
W. Gully, D. S. Glaister, P. Hendershott, V. Kotsubo, J. S. Lock, and E. Marquardt	
High Capacity Two-stage Coaxial Pulse Tube Cooler	530
C. Jaco, T. Nguyen, and M. Tward	
Raytheon Dual-Use Cryocooler System Development	538
R. C. Hon, C. S. Kirkconnell, and T. Roberts	

LARGE SCALE REFRIGERATORS AND LIQUEFIERS—II

Large Scale Helium Liquefaction and Considerations for Site Services for a Plant Located in Algeria	549
P. Froehlich and J. J. Clausen	
Air Liquide's Contribution to the CERN LHC Refrigeration System	557
P. Dauguet, G. M. Gistau-Baguer, P. Briand, B. Hilbert, E. Monneret, J. C. Villard, G. Marot, F. Delcayre, C. Mantilleri, F. Hamber, J. C. Courty, P. Hirel, A. Cohu, and H. Moussavi	
Design and Manufacturing of the KSTAR Tokamak Helium Refrigeration System	564
P. Dauguet, P. Briand, I. Abe, E. Fauve, J. M. Bernhardt, F. Andrieu, and J. Beauvisage	

Adopted Methodology for Cool-down of SST-1 Superconducting Magnet System: Operational Experience with the Helium Refrigerator	570
A. K. Sahu, B. Sarkar, P. Panchal, J. Tank, R. Bhattacharya, R. Panchal, V. L. Tanna, R. Patel, P. Shukla, J. C. Patel, M. Singh, D. Sonara, R. Sharma, R. Duggar, and Y. C. Saxena	
The Relativistic Heavy Ion Collider (RHIC) Cryogenic System at Brookhaven National Laboratory: Review of the Modifications and Upgrades Since 2002 and Planned Improvements	578
R. Than, J. Tuozzolo, A. Sidi-Yekhlef, V. Ganni, P. Knudsen, and D. Arenius	
An Overview of the Planned Jefferson Lab 12 GeV Helium Refrigerator Upgrade	588
D. Arenius, J. Creel, K. Dixon, V. Ganni, P. Knudsen, A. Sidi-Yekhlef, and M. Wright	

MEMS COOLERS

Microminiature Refrigeration	597
W. A. Little	
Heat Transfer Efficiency of Kleemenko Cycle Heat Exchangers	606
W. A. Little	
Micromachined Joule-Thomson Coolers	614
P. P. P. M. Lerou, H. J. M. ter Brake, H. V. Jansen, J. F. Burger, H. J. Holland, and H. Rogalla	
Piezo-Hydraulic Actuation for Driving High Frequency Miniature Split-Stirling Pulse Tube Cryocoolers	622
I. Garaway and G. Grossman	

HE II HEAT TRANSFER AND FLUID MECHANICS—II

TSF Experiment for Comparison of High Reynolds Number Turbulence in Both He I and He II: First Results	633
B. Rousset, C. Baudet, M. Bon Mardion, B. Castaing, D. Communal, F. Daviaud, P. Diribarne, B. Dubrulle, A. Forgeas, Y. Gagne, A. Girard, B. Hébral, P.-E. Roche, P. Roussel, and P. Thibault	
Extraction of Micron-sized Particles from a He II Bath	641
M. Gnos, S. Fuzier, and S. W. Van Sciver	
3-D Numerical Analysis for Heat Transfer from a Flat Plate in a Duct with Contractions Filled with Pressurized He II	648
D. Doi, Y. Shirai, and M. Shiotsu	

STIRLING AND PULSE TUBE COMPONENTS AND MODELING (AEROSPACE)

10 K EM Pulse Tube Cooler	659
C. Jaco, T. Nguyen, R. Colbert, and J. Raab	
Forced Convection Heat Transfer of Subcooled Liquid Nitrogen in Horizontal Tube	665
H. Tatsumoto, Y. Shirai, K. Hata, T. Kato, and M. Shiotsu	
An Integrated Miniature Pulse Tube Cryocooler at 80 K	673
H. L. Chen, L. W. Yang, J. H. Cai, J. T. Liang, L. Zhang, and Y. Zhou	
A Two-Stage Stirling Cryocooler Driven by Opposed Piston Linear Compressor for Space Applications	678
V. K. Bhojwani, M. D. Atrey, K. G. Narayankhedkar, and S. L. Bapat	

A Model for the Parametric Analysis and Optimization of Inertance Tube Pulse Tube Refrigerators	685
C. Dodson, A. Lopez, T. Roberts, and A. Razani	
Reliability Growth of Stirling-Cycle Coolers at L-3 CE	693
D. T. Kuo, A. S. Loc, and Q. K. Phan	
Performance Optimization of L-3 CE 0.6-Watt Linear Cooler.	700
D. T. Kuo, A. S. Loc, and Q. K. Phan	

REGENERATORS

A Low Temperature Regenerator Test Facility	707
A. Kashani, B. P. M. Helvensteijn, J. R. Feller, L. J. Salerno, and P. Kittel	
Dynamic Characteristics of Oscillating Flow in Pulse Tube Coolers	715
H. L. Chen, J. L. Yang, L. W. Yang, J. H. Cai, J. T. Liang, L. Zhang, and Y. Zhou	
Second Law Analysis and Optimization of Regenerators Using REGEN 3.2.	720
A. Lopez, C. Dodson, and A. Razani	
Longitudinal Hydraulic Resistance Parameters of Cryocooler and Stirling Regenerators in Steady Flow	728
W. M. Clearman, S. M. Ghiaasiaan, J. S. Cha, C. S. Kirkconnell, and P. V. Desai	

LOW TEMPERATURE SUPERCONDUCTING MAGNET SYSTEMS—III

Series Produced Helium II Cryostats for the LHC Magnets: Technical Choices, Industrialisation, Costs	739
A. Poncet and V. Parma	
Design, Production and First Commissioning Results of the Electrical Feedboxes of the LHC	747
A. Perin, S. Atieh, V. Benda, A. Bertarelli, A. Bouillot, K. Brodzinski, R. Folch, J. Fydrych, M. Genet, S. Koczorowski, L. Metral, J. Miles, F. Millet, K. Polkovnikov, R. Rabehl, L. Serio, V. Sytchev, V. Sytnik, P. Trilhe, R. van Weelderen, and V. Zhabitskiy	
Quench Performance of Nb₃Sn COS-THETA Coils Made of 108/127 RRP Strands	755
A. V. Zlobin, G. Ambrosio, N. Andreev, E. Barzi, R. Bossert, R. Carcagno, V. S. Kashikhin, V. V. Kashikhin, M. J. Lamm, F. Nobrega, I. Novitski, D. Orris, Yu. Pischalnikov, D. Shpakov, C. Sylvester, M. Tartaglia, J. C. Tompkins, D. Turroni, R. Yamada, and A. Yuan	

HEAT TRANSFER—I

Thermal Conductivity of Subcooled Liquid Hydrogen	765
T. Charignon, D. Celik, A. Hemmati, and S. W. Van Sciver	
Viscous Energy Dissipation in Frozen Cryogens	773
S. J. Meitner, J. M. Pfotenhauer, and M. R. Andraschko	
Study on Thermal Diffusion in Artificial Air Near the Critical Point	780
A. Nakano and T. Maeda	
Thermal Conductivity of Powder Insulations Below 180 K	788
M. N. Barrios, Y. S. Choi, and S. W. Van Sciver	

AEROSPACE MISSION COOLING SYSTEMS

The NICMOS Cooling System—Five Years of Successful On-orbit Operation	799
W. L. Swift, F. X. Dolan, and M. V. Zagarola	
Mid Infrared Instrument (MIRI) Cooler Subsystem Prototype Demonstration	807
D. Durand, R. Colbert, C. Jaco, M. Michaelian, T. Nguyen, M. Petach, and J. Raab	
WISE Cryogenic Support System Design Overview and Build Status	815
L. Naes, B. Lloyd, and S. Schick
