

## CONTENTS

Preface .....	xxi
CEC Awards .....	xxiii
2007 CEC Board and Technical Editors .....	xvii
Acknowledgments .....	xxix

## PART A

### JT, MAGNETIC, AND NON-AEROSPACE COOLERS

<b>Development of JT Coolers Operating at Cryogenic Temperatures with Nonflammable Mixed Refrigerants .....</b>	<b>3</b>
A. Khatri and M. Boiarski	
<b>Experimental Investigations on Mixed Refrigerant Joule-Thomson (MR J-T) Cryocooler .....</b>	<b>11</b>
N. S. Walimbe, K. G. Narayankhedkar, and M. D. Atrey	
<b>Scaling of Thermoacoustic Refrigerators .....</b>	<b>18</b>
Y. Li, J. C. H. Zeegers, and H. J. M. ter Brake	
<b>Performance Improvement of a Single Stage GM Cryocooler at 25 K .....</b>	<b>26</b>
C. Wang and P. E. Gifford	
<b>Experimental Study on the Double-evaporator Thermosiphon for Cooling HTS (High Temperature Superconductor) System .....</b>	<b>34</b>
J. Lee, Y. Kim, and S. Jeong	
<b>Stirling-Type Pulse Tube Cryocooler with 1kW of Refrigeration at 77 K .....</b>	<b>42</b>
S. A. Potratz, T. D. Abbott, M. C. Johnson, and K. B. Albaugh	

### FLUID MECHANICS—I

<b>PIV Measurement of Slush Nitrogen Flow in Pipe, Part II .....</b>	<b>51</b>
M. Maeda, M. Murakami, and T. Takakoshi	
<b>Natural Circulation Loop of Subcooled Liquid Nitrogen .....</b>	<b>59</b>
M. J. Kim and H. M. Chang	
<b>Pressure Drop Reduction of Slush Nitrogen in Turbulent Pipe Flows .....</b>	<b>67</b>
K. Ohira, M. Nozawa, J. Ishimoto, N. Koizumi, and T. Kamiya	
<b>A Numerical Analysis in LN<sub>2</sub> Channel for DC-SC Power Transmission Line .....</b>	<b>75</b>
A. Sasaki, M. Hamabe, T. Famakinwa, S. Yamaguchi, and A. Radovinsky	

### PULSE TUBE CRYOCOOLERS (NON-AEROSPACE)

<b>Experimental Studies on a Two Stage Pulse Tube Cryocooler Reaching 2.5 K .....</b>	<b>85</b>
S. Kasthuriengan, G. Srinivasa, G. S. Karthik, K. P. Ramesh, and K. A. Shafi	
<b>Buffered Rotary Valve System of GM-type Pulse Tube Refrigerator .....</b>	<b>93</b>
G. Hwang, J. Jung, and S. Jeong	

<b>Optimization of a Two Stage Pulse Tube Refrigerator for the Integrated Current Lead System</b>	101
R. Maekawa, Y. Matsubara, A. Okada, S. Takami, M. Konno, A. Tomioka, T. Imayoshi, H. Hayashi, and T. Mito	
<b>Damping of Intrinsic Temperature Oscillations in a 4 K Pulse Tube Cooler by Means of Rare Earth Plates</b>	109
K. Allweins, L. Qiu, and G. Thummes	
 SUPERCONDUCTING RF CAVITIES AND CRYOSYSTEMS—I	
<b>Compact He II Cooling System for Superconducting Cavities</b>	119
M. Takahashi, T. Yazawa, T. Tosaka, T. Kuriyama, N. Kakutani, T. Ota, K. Nakayama, and K. Saito	
<b>Superconducting Radio-frequency Modules Test Facility Operating Experience</b>	127
B. Soyars, R. Bossert, C. Darve, B. Degraff, A. Klebaner, A. Martinez, L. Pei, and J. Theilacker	
<b>Simulation of the Impact of the Kapitza Resistance at Grain-Grain Boundaries on Niobium Superconducting Cavities</b>	135
J. Amrit and Q. Li	
 THERMAL INSULATION SYSTEMS—I	
<b>Design Tool for Cryogenic Thermal Insulation Systems</b>	145
J. A. Demko, J. E. Fesmire, and S. D. Augustynowicz	
<b>Cryogenic Thermal Performance Testing of Bulk-fill and Aerogel Insulation Materials</b>	152
B. E. Scholtens, J. E. Fesmire, J. P. Sass, S. D. Augustynowicz, and K. W. Heckle	
<b>Testing of a Vacuum Insulated Flexible Line with Flowing Liquid Nitrogen during the Loss of Insulating Vacuum</b>	160
J. A. Demko, R. C. Duckworth, M. Roden, and M. Gouge	
<b>Radiation Heat Measurement on Thermally Isolated Double-pipe for DC Superconducting Power Transmission</b>	168
M. Hamabe, Y. Nasu, A. Ninomiya, Y. Ishiguro, S. Kusaka, and S. Yamaguchi	
<b>Low Temperature Heat Transfer Properties of Electrical Insulation for the Next European Dipole</b>	174
J. Polinski, S. Canfer, G. Ellwood, and B. Baudouy	
 HE II TRANSFER AND FLUID MECHANICS—I	
<b>PIV Measurement Result of Superfluid He II Thermal Counterflow Jet</b>	183
M. Murakami, T. Takakoshi, M. Maeda, and A. Nakano	
<b>Density Effect of Solidified Hydrogen Isotope Particles on Particle Image Velocimetry Measurements of He II Flow</b>	191
T. Xu and S. W. Van Sciver	
<b>Visualization Study of Phase Transition Caused by Heating of He II in Two-Dimensional Narrow Channel</b>	199
S. Takada, M. Murakami, N. Kimura, and H. Kobayashi	
<b>Investigation of Transient Heat Transfer in Porous Media in He II</b>	207
H. Allain and B. Baudouy	

<b>Experimental Tests of the HVBK Equations for He II</b>	.....	215
H. A. Snyder		

## REGENERATOR PERFORMANCE

<b>Calculated Regenerator Performance at 4 K with Helium-4 and Helium-3</b>	.....	225
R. Radebaugh, Y. Huang, A. O'Gallagher, and J. Gary		
<b>Application of Novel Regenerator Material within a Coaxial Two-Stage Pulse Tube Refrigerator</b>	.....	235
T. Koettig, F. Richter, R. Nawrodt, A. Zimmer, C. Schwarz, D. Heinert, M. Thürk, and P. Seidel		
<b>The Impact of Uncertainties Associated with Regenerator Hydrodynamic Closure Parameters on the Performance of Inertance Tube Pulse Tube Cryocoolers</b>	.....	243
J. S. Cha, S. M. Ghiaasiaan, C. S. Kirkconnell, and W. M. Clearman		
<b>New Model and Measurement Principle of Flowing and Heat Transfer Characteristics of Regenerator</b>	.....	251
Y. Y. Chen, E. C. Luo, and W. Dai		
<b>Longitudinal Hydraulic Resistance Parameters of Cryocooler and Stirling Regenerators in Periodic Flow</b>	.....	259
J. S. Cha, S. M. Ghiaasiaan, and C. S. Kirkconnell		
<b>A New Correlation of Friction Factor for Oscillating Flow Regenerator Operating at High Frequencies</b>	.....	267
Q. Q. Shen and Y. L. Ju		

## CRYOGENIC COOLING OF HIGH TEMPERATURE SUPERCONDUCTING DEVICES

<b>High Temperature Superconducting Degaussing—Cooling Two HTS Coils with One Cryocooler for the Littoral Combat Ship</b>	.....	277
B. K. Fitzpatrick, E. M. Golda, and J. T. Kephart		
<b>Thermal Fatigue Test Apparatus for Large Superconducting Coils</b>	.....	284
J. T. Kephart, B. K. Fitzpatrick, J. Chen, J. Lopez, M. Millar, L. Wong, M. Zimmerman, J. Kostic, and C. Rakus		
<b>Flow Cooling of Superconducting Magnets for Spacecraft Applications</b>	.....	291
A. J. Dietz, W. E. Audette, M. D. Barton, J. K. Hilderbrand, W. S. Marshall, C. M. Rey, D. S. Winter, and A. J. Petro		
<b>Novel Cryogenic Engineering Solutions for the New Australian Research Reactor OPAL</b>	.....	299
S. R. Olsen, S. J. Kennedy, S. Kim, J. C. Schulz, R. Thiering, E. P. Gilbert, W. Lu, M. James, and R. A. Robinson		

## PUMPS AND COMPRESSORS

<b>Screw Compressor Characteristics for Helium Refrigeration Systems</b>	.....	309
V. Ganni, P. Knudsen, J. Creel, D. Arelius, F. Casagrande, and M. Howell		
<b>Experience with Dry Running Vacuum Pumps in Helium Service</b>	.....	316
R. Arztmann		

## LOW TEMPERATURE SUPERCONDUCTING MAGNET SYSTEMS—I

<b>Leak-tight Welding Experience from the Industrial Assembly of the LHC Cryostats at CERN . . . . .</b>	<b>325</b>
N. Bourcey, P. Campos, P. Chiggiato, P. Limon, A. Mongelluzzo, G. Musso, A. Poncet, and V. Parma	
<b>Heat Exchanger Design Studies for an LHC Inner Triplet Upgrade . . . . .</b>	<b>333</b>
R. J. Rabehl and Y. Huang	
<b>High Intensity Neutrino Source Superconducting Solenoid Cryostat Design . . . . .</b>	<b>341</b>
T. M. Page, T. H. Nicol, S. Feher, I. Terechkine, and J. Tompkins	
<b>Development of New Cooling System Using GM/JT Cryocoolers for the SKS Magnet . . . . .</b>	<b>349</b>
K. Aoki, T. Haruyama, Y. Makida, O. Araoka, K. Kasami, T. Takahashi, T. Nagae, Y. Kakiguchi, M. Sekimoto, T. Tosaka, H. Miyazaki, T. Kuriyama, M. Ono, T. Oriksa, T. Tsuchihashi, and Y. Hirata	

## LOW TEMPERATURE SUPERCONDUCTING MAGNET SYSTEMS—II

<b>Freely Oriented Portable Superconducting Magnet . . . . .</b>	<b>359</b>
E. N. Schmierer, B. Charles, R. Efferson, D. Hill, T. Jankowski, G. Laughon, and C. Prenger	
<b>Helium-Liquefaction by a Cryocooler in Closed-loop Cooling System for 21 T FT-ICR Magnets . . . . .</b>	<b>367</b>
Y. S. Choi, T. A. Painter, D. L. Kim, B. S. Lee, and H. S. Yang	
<b>Development of Cooling System for Cryogenic Preamplifier in FT-ICR Ion Trap . . . . .</b>	<b>375</b>
Y. S. Choi, D. L. Kim, T. A. Painter, M. C. Choi, H. S. Kim, and J. S. Yoo	
<b>Fiber Bragg Grating Sensors for Measuring Temperature and Strain Simultaneously at Cryogenic Temperature . . . . .</b>	<b>383</b>
R. Rajinikumar, M. Suesser, K. G. Narayankhedkar, G. Krieg, and M. D. Atrey	

## AEROSPACE CRYOGENICS

<b>Development of Cryogenic Loop Heat Pipe . . . . .</b>	<b>393</b>
R. Karunanithi, S. Jacob, G. S. V. L. Narasimham, D. S. Nadig, U. Behera, and D. Kumar	
<b>Analysis of Continuous Heat Exchangers for Cryogenic Boil-off Reduction . . . . .</b>	<b>401</b>
J. R. Feller, A. Kashani, B. P. M. Helvensteign, L. J. Salerno, P. Kittel, D. Plachta, R. Christie, and E. Carlberg	
<b>LOX Separation Studies Using Cryogenic Vortex Tube . . . . .</b>	<b>409</b>
S. Jacob, P. J. Paul, R. Karunanithi, and U. Behera	
<b>Development of a Cryogen-free Continuous ADR System for Milli-Gravity Experiments . . . . .</b>	<b>416</b>
K. Takahashi, K. Kamiya, H. Nakagome, T. Numazawa, P. Shirron, and D. Wegel	
<b>Development of a Cryogenic Gate Valve with Robust Sealing . . . . .</b>	<b>422</b>
W. H. Hatfield and J. P. Sass	
<b>Cryocooler Prognostic Health Management System . . . . .</b>	<b>427</b>
A. Shah, L. Penswick, C. Dodson, and T. Roberts	

## LARGE SCALE REFRIGERATORS AND LIQUEFIERS—I

<b>The On-site Status of the KSTAR Helium Refrigeration System</b> . . . . .	437
H.-S. Chang, D. S. Park, J. J. Joo, K. M. Moon, K. W. Cho, Y. S. Kim, J. S. Bak, H. M. Kim, M. C. Cho, I. K. Kwon, E. Fauve, J.-M. Bernhardt, P. Dauguet, J. Beauvisage, F. Andrieu, S.-H. Yang, and G. M. Gistau Baguer	
<b>The JT-60SA Cryoplant Current Design Status</b> . . . . .	445
D. Henry, F. Michel, P. Roussel, P. Reynaud, J. Y. Journeaux, J. L. Maréchal, D. Balaguer, C. Roux, M. Matsukawa, and K. Yoshida	
<b>Performance Study for Cryogenic System at NSRRC</b> . . . . .	453
H. H. Tsai, F. Z. Hsiao, H. C. Li, S. H. Chang, and W. S. Chiou	
<b>Preliminary Commissioning of Cryogenic System of BESIII</b> . . . . .	461
Z. G. Zong, L. Q. Liu, L. Zhang, S. P. Li, K. He, and L. Y. Xiong	
<b>Numerical Simulation of the Cryogenic System of BEPCII</b> . . . . .	467
Z. G. Zong, L. Q. Liu, L. Y. Xiong, and L. Zhang	
<b>Dynamic Simulation of a Helium Refrigerator</b> . . . . .	475
C. Deschildre, A. Barraud, P. Bonnay, P. Briand, A. Girard, J. M. Poncet, P. Roussel, and S. E. Sequeira	
<b>Understanding Dynamic Behavior of a Large Scale Cryogenic Plant</b> . . . . .	483
R. Maekawa, K. Ooba, M. Nobutoki, and T. Mito	

## STIRLING AND PULSE TUBE CAPABILITIES OVERVIEW (AEROSPACE)

<b>Heritage Overview: 20 Years of Commercial Production of Cryocoolers for Space</b> . . . . .	493
A. S. Gibson, J. Reed, T. W. Bradshaw, and M. Linder	
<b>Air Liquide Space Pulse Tube Cryocoolers</b> . . . . .	506
J. Tanchon, T. Trollier, J. Buquet, A. Ravex, and P. Crespi	
<b>High Performance Pulse Tube Cryocoolers</b> . . . . .	514
J. R. Olson, E. Roth, P. Champagne, B. Evtimov, and T. C. Nast	
<b>Ball Aerospace Hybrid Space Cryocoolers</b> . . . . .	522
W. Gully, D. S. Glaister, P. Hendershott, V. Kotsubo, J. S. Lock, and E. Marquardt	
<b>High Capacity Two-stage Coaxial Pulse Tube Cooler</b> . . . . .	530
C. Jaco, T. Nguyen, and M. Tward	
<b>Raytheon Dual-Use Cryocooler System Development</b> . . . . .	538
R. C. Hon, C. S. Kirkconnell, and T. Roberts	

## LARGE SCALE REFRIGERATORS AND LIQUEFIERS—II

<b>Large Scale Helium Liquefaction and Considerations for Site Services for a Plant Located in Algeria</b> . . . . .	549
P. Froehlich and J. J. Clausen	
<b>Air Liquide's Contribution to the CERN LHC Refrigeration System</b> . . . . .	557
P. Dauguet, G. M. Gistau-Baguer, P. Briand, B. Hilbert, E. Monneret, J. C. Villard, G. Marot, F. Delcarey, C. Mantilieri, F. Hamber, J. C. Courty, P. Hirel, A. Cohu, and H. Moussavi	
<b>Design and Manufacturing of the KSTAR Tokamak Helium Refrigeration System</b> . . . . .	564
P. Dauguet, P. Briand, I. Abe, E. Fauve, J. M. Bernhardt, F. Andrieu, and J. Beauvisage	

<b>Adopted Methodology for Cool-down of SST-1 Superconducting Magnet System: Operational Experience with the Helium Refrigerator</b>	570
A. K. Sahu, B. Sarkar, P. Panchal, J. Tank, R. Bhattacharya, R. Panchal, V. L. Tanna, R. Patel, P. Shukla, J. C. Patel, M. Singh, D. Sonara, R. Sharma, R. Duggar, and Y. C. Saxena	
<b>The Relativistic Heavy Ion Collider (RHIC) Cryogenic System at Brookhaven National Laboratory: Review of the Modifications and Upgrades Since 2002 and Planned Improvements</b>	578
R. Than, J. Tuozzolo, A. Sidi-Yekhlef, V. Ganni, P. Knudsen, and D. Arenius	
<b>An Overview of the Planned Jefferson Lab 12 GeV Helium Refrigerator Upgrade</b>	588
D. Arenius, J. Creel, K. Dixon, V. Ganni, P. Knudsen, A. Sidi-Yekhlef, and M. Wright	
<b>MEMS COOLERS</b>	
<b>Microminiature Refrigeration</b>	597
W. A. Little	
<b>Heat Transfer Efficiency of Kleemenko Cycle Heat Exchangers</b>	606
W. A. Little	
<b>Micromachined Joule-Thomson Coolers</b>	614
P. P. M. Lerou, H. J. M. ter Brake, H. V. Jansen, J. F. Burger, H. J. Holland, and H. Rogalla	
<b>Piezo-Hydraulic Actuation for Driving High Frequency Miniature Split-Stirling Pulse Tube Cryocoolers</b>	622
I. Garaway and G. Grossman	
<b>HE II HEAT TRANSFER AND FLUID MECHANICS—II</b>	
<b>TSF Experiment for Comparison of High Reynolds Number Turbulence in Both He I and He II: First Results</b>	633
B. Rousset, C. Baudet, M. Bon Mardion, B. Castaing, D. Communal, F. Daviaud, P. Diribarne, B. Dubrulle, A. Forgeas, Y. Gagne, A. Girard, B. Hébral, P.-E. Roche, P. Roussel, and P. Thibault	
<b>Extraction of Micron-sized Particles from a He II Bath</b>	641
M. Gnos, S. Fuzier, and S. W. Van Sciver	
<b>3-D Numerical Analysis for Heat Transfer from a Flat Plate in a Duct with Contractions Filled with Pressurized He II</b>	648
D. Doi, Y. Shirai, and M. Shiotsu	
<b>STIRLING AND PULSE TUBE COMPONENTS AND MODELING (AEROSPACE)</b>	
<b>10 K EM Pulse Tube Cooler</b>	659
C. Jaco, T. Nguyen, R. Colbert, and J. Raab	
<b>Forced Convection Heat Transfer of Subcooled Liquid Nitrogen in Horizontal Tube</b>	665
H. Tatsumoto, Y. Shirai, K. Hata, T. Kato, and M. Shiotsu	
<b>An Integrated Miniature Pulse Tube Cryocooler at 80 K</b>	673
H. L. Chen, L. W. Yang, J. H. Cai, J. T. Liang, L. Zhang, and Y. Zhou	
<b>A Two-Stage Stirling Cryocooler Driven by Opposed Piston Linear Compressor for Space Applications</b>	678
V. K. Bhojwani, M. D. Atrey, K. G. Narayankhedkar, and S. L. Bapat	

<b>A Model for the Parametric Analysis and Optimization of Inertance Tube Pulse Tube Refrigerators</b>	685
C. Dodson, A. Lopez, T. Roberts, and A. Razani	
<b>Reliability Growth of Stirling-Cycle Coolers at L-3 CE</b>	693
D. T. Kuo, A. S. Loc, and Q. K. Phan	
<b>Performance Optimization of L-3 CE 0.6-Watt Linear Cooler.</b>	700
D. T. Kuo, A. S. Loc, and Q. K. Phan	
 REGENERATORS	
<b>A Low Temperature Regenerator Test Facility</b>	707
A. Kashani, B. P. M. Helvensteijn, J. R. Feller, L. J. Salerno, and P. Kittel	
<b>Dynamic Characteristics of Oscillating Flow in Pulse Tube Coolers</b>	715
H. L. Chen, J. L. Yang, L. W. Yang, J. H. Cai, J. T. Liang, L. Zhang, and Y. Zhou	
<b>Second Law Analysis and Optimization of Regenerators Using REGEN 3.2</b>	720
A. Lopez, C. Dodson, and A. Razani	
<b>Longitudinal Hydraulic Resistance Parameters of Cryocooler and Stirling Regenerators in Steady Flow</b>	728
W. M. Clearman, S. M. Ghiaasiaan, J. S. Cha, C. S. Kirkconnell, and P. V. Desai	
 LOW TEMPERATURE SUPERCONDUCTING MAGNET SYSTEMS—III	
<b>Series Produced Helium II Cryostats for the LHC Magnets: Technical Choices, Industrialisation, Costs</b>	739
A. Poncet and V. Parma	
<b>Design, Production and First Commissioning Results of the Electrical Feedboxes of the LHC</b>	747
A. Perin, S. Atieh, V. Benda, A. Bertarelli, A. Bouillot, K. Brodzinski, R. Folch, J. Fydrych, M. Genet, S. Koczorowski, L. Metral, J. Miles, F. Millet, K. Polkovnikov, R. Rabehl, L. Serio, V. Sytchev, V. Sytnik, P. Trilhe, R. van Weelderen, and V. Zhabitskiy	
<b>Quench Performance of Nb<sub>3</sub>Sn COS-THETA Coils Made of 108/127 RRP Strands</b>	755
A. V. Zlobin, G. Ambrosio, N. Andreev, E. Barzi, R. Bossert, R. Carcagno, V. S. Kashikhin, V. V. Kashikhin, M. J. Lamm, F. Nobrega, I. Novitski, D. Orris, Yu. Pischalnikov, D. Shpakov, C. Sylvester, M. Tartaglia, J. C. Tompkins, D. Turroni, R. Yamada, and A. Yuan	
 HEAT TRANSFER—I	
<b>Thermal Conductivity of Subcooled Liquid Hydrogen</b>	765
T. Charignon, D. Celik, A. Hemmati, and S. W. Van Sciver	
<b>Viscous Energy Dissipation in Frozen Cryogens</b>	773
S. J. Meitner, J. M. Pfotenhauer, and M. R. Andraschko	
<b>Study on Thermal Diffusion in Artificial Air Near the Critical Point</b>	780
A. Nakano and T. Maeda	
<b>Thermal Conductivity of Powder Insulations Below 180 K</b>	788
M. N. Barrios, Y. S. Choi, and S. W. Van Sciver	

## AEROSPACE MISSION COOLING SYSTEMS

<b>The NICMOS Cooling System—Five Years of Successful On-orbit Operation .....</b>	<b>799</b>
W. L. Swift, F. X. Dolan, and M. V. Zagarola	
<b>Mid Infrared Instrument (MIRI) Cooler Subsystem Prototype Demonstration .....</b>	<b>807</b>
D. Durand, R. Colbert, C. Jaco, M. Michaelian, T. Nguyen, M. Petach, and J. Raab	
<b>WISE Cryogenic Support System Design Overview and Build Status .....</b>	<b>815</b>
L. Naes, B. Lloyd, and S. Schick	

## PART B

### LARGE SCALE REFRIGERATORS AND LIQUEFIERS—III

<b>Improvements of Helium Liquefaction/Refrigeration Plants and Applications .....</b>	<b>825</b>
K.-H. Berdais, H. Wilhelm, and Th. Ungricht	
<b>Evolution of the Standard Helium Liquefier and Refrigerator Range Designed by Air Liquide DTA, France .....</b>	<b>830</b>
A. Caillaud, S. Crispel, V. Grabié, F. Delcayre, and G. Aigouy	
<b>Cryocooler for Air Liquefaction Onboard Large Aircraft .....</b>	<b>838</b>
J. J. Breedlove, P. J. Magari, and G. W. Miller	
<b>Process Study of Nominal 2 K Refrigeration Recovery .....</b>	<b>846</b>
P. Knudsen and V. Ganni	
<b>Recent Progress in Dynamic Process Simulation of Cryogenic Refrigerators .....</b>	<b>859</b>
A. Kuendig	
<b>Design of Subcooled Pressurized Cryogenic Systems .....</b>	<b>865</b>
G. E. McIntosh	
<b>The Cost of Helium Refrigerators and Coolers for Superconducting Devices as a Function of Cooling Power at 4 K .....</b>	<b>872</b>
M. A. Green	

### STIRLING AND PULSE TUBE COOLERS, DEVELOPMENT AND TESTING (AEROSPACE)

<b>Development of a 4.5 K Pulse Tube Cryocooler for Superconducting Electronics .....</b>	<b>881</b>
T. Nast, J. Olson, P. Champagne, J. Mix, B. Evtimov, E. Roth, and A. Collaco	
<b>20 K Coaxial Pulse Tube Using Passive Precooling .....</b>	<b>887</b>
I. Charles, L. Golanski, A. Gauthier, A. Coynel, and J. M. Duval	
<b>ABI Lifetest Cooler System .....</b>	<b>895</b>
R. Colbert, G. Pruitt, T. Nguyen, and J. Raab	
<b>Ball Aerospace Advances in 35 K Cooling—The SB235E Cryocooler .....</b>	<b>903</b>
J. S. Lock, D. S. Glaister, W. Gully, P. Hendershott, and E. Marquardt	
<b>Raytheon Stirling/Pulse Tube Cryocooler Development .....</b>	<b>909</b>
C. S. Kirkconnell, R. C. Hon, C. H. Kesler, and T. Roberts	
<b>Multistage Pulse Tube Refrigeration Characterization of the Northrop Grumman High Capacity Cooler—An Update .....</b>	<b>917</b>
J. Sutliff and T. Roberts	

## INSTRUMENTATION

<b>Operation of Superconducting Digital Receiver Circuits on 2-Stage Gifford-McMahon Cryocooler</b> . . . . .	<b>927</b>
R. J. Webber, V. Dotsenko, A. Talalaevskii, R. Miller, J. Tang, D. E. Kirichenko, I. V. Vernik, P. Shevchenko, V. Borzenets, D. Gupta, and O. A. Mukhanov	
<b>Characteristics of MgB<sub>2</sub> Sensor for Detecting Level of Liquid Hydrogen</b> . . . . .	<b>933</b>
M. Takeda, Y. Matsuno, I. Kodama, and H. Kumakura	
<b>Cryogenic Fiber Optic Sensors Based on Fiber Bragg Gratings</b> . . . . .	<b>940</b>
P. R. Swinehart, M. Maklad and S. S. Courts	
<b>A Commercial Ruthenium Oxide Thermometer for Use to 20 MilliKelvin.</b> . . . . .	<b>947</b>
S. S. Courts and J. K. Krause	

## INSTRUMENTATION—LARGE SCALE SYSTEMS

<b>First Experience with the LHC Cryogenic Instrumentation</b> . . . . .	<b>957</b>
N. Vauthier, R. Avramidou, Ch. Balle, J. Casas-Cubillos, M. Ciechanowski, G. Fernandez-Penacoba, E. Fortescue-Beck, P. Gomes, N. Jeanmonod, A. Lopez-Lorente, and A. Suraci	
<b>Calibration of Cryogenic Thermometers for the LHC</b> . . . . .	<b>965</b>
Ch. Balle, J. Casas-Cubillos, N. Vauthier, and J. P. Thermeau	
<b>Radiation Requirements and Testing of Cryogenic Thermometers for the ILC</b> . . . . .	<b>973</b>
T. Barnett, Yu. P. Filippov, E. Yu. Filippov, N. V. Mokhov, N. Nakao, A. L. Klebaner, S. A. Korenev, J. C. Theilacker, J. Trenikhina, and K. Vaziri	
<b>Instrumentation, Data Acquisition and Controls for Temperature Measurement of Cold Surfaces at 4.5 K and 80 K of SST-1 Machine</b> . . . . .	<b>981</b>
P. Panchal, D. Sonara, B. Sarkar, R. Bhattacharya, R. Panchal, R. Patel, J. Tank, M. Singh, A. K. Sahu, and Y. C. Saxena	
<b>Cryogenic Controls for Fermilab's SRF Cavities and Test Facility</b> . . . . .	<b>989</b>
B. Norris, R. Bossert, A. Klebaner, S. Lackey, A. Martinez, L. Pei, B. Soyars, and V. Sirotenko	

## HIGH TEMPERATURE SUPERCONDUCTING DEVICES

<b>Numerical Simulation of Pulsed Field Magnetization of Cryocooler Cooled Bulk Superconductor</b> . . . . .	<b>999</b>
H. Ohsaki, S. Matsumura, S. Kawamoto, and R. Shiraishi	
<b>Persistent Magnetization of MgB<sub>2</sub> Cylinders Induced by a Pulsed Field</b> . . . . .	<b>1007</b>
G. Giunchi, E. Perini, T. Cavallin, R. Quarantiello, V. Cavaliere, and A. Matrone	
<b>Cryogenic Design of the ALUHEAT Project</b> . . . . .	<b>1015</b>
I. Hiltunen, A. Stenvall, A. Korpela, J. Lehtonen, R. Mikkonen, M. Runde, N. Magnusson, and G. Kalkowski	

## JT COOLERS (NON-AEROSPACE)

<b>Fast Cool-down J-T Cryocooler to 88 K</b> . . . . .	<b>1025</b>
N. Tzabar, I. Lifshiz, and A. Kaplansky	

<b>Vibration Characterization and Reduction of a Joule-Thomson Cryocooler for a SQUID-based Metal Detection System</b> .....	<b>1033</b>
G. J. J. B. de Groot, M. A. Santin, and T. Thijssen	
<b>Open Cycle Joule-Thomson Cryocooling with Prior Sequential Isentropic Expansion</b> .....	<b>1041</b>
B.-Z. Maytal	
 <b>SUPERCONDUCTING CABLES</b>	
<b>Albany HTS Cable Project Long Term In-grid Operation Status Update</b> .....	<b>1051</b>
H. Yumura, T. Masuda, M. Watanabe, H. Takigawa, Y. Ashibe, H. Ito, M. Hirose, and K. Sato	
<b>Design and Evaluation of YBCO Cable for the Albany HTS Cable Project</b> .....	<b>1059</b>
M. Ohya, H. Yumura, Y. Ashibe, H. Ito, T. Masuda, and K. Sato	
<b>Performance Test of Cooling System for KEPCO HTS Power Cable</b> .....	<b>1067</b>
H. S. Yang, D. L. Kim, B. S. Lee, Y. S. Choi, S. H. Sohn, J. H. Lim, H. S. Ryoo, and S. D. Hwang	
 <b>THERMOACOUSTICS</b>	
<b>Universal Scaling Law of Inertance Tube Phase Shifters</b> .....	<b>1075</b>
S. L. Zhu, E. C. Luo, Z. H. Wu, and W. Dai	
<b>Impedance Measurements of Inertance Tubes at High Frequency and Pressure</b> .....	<b>1083</b>
M. A. Lewis, R. Taylor, P. E. Bradley, R. Radebaugh, G. Grossman, and Z. Gan	
 <b>HIGH FREQUENCY PULSE TUBE PRESSURE WAVE GENERATORS</b>	
<b>Investigation on Dynamic Behavior of Linear Compressor in Stirling-Type Pulse Tube Refrigerator</b> .....	<b>1093</b>
J. Ko, S. Jeong, and Y. Kim	
<b>Development of a Compressor for a Miniature Pulse Tube Cryocooler of 2.5 W at 65 K for Telecommunication Applications</b> .....	<b>1100</b>
N. Matsumoto, Y. Yasukawa, K. Ohshima, T. Takeuchi, T. Matsushita, and Y. Mizoguchi	
<b>High Frequency Single-Stage Multi-bypass Pulse Tube Cryocooler for 23.8 K</b> .....	<b>1108</b>
J. Yang, X. Hou, L. Yang, Y. Zhou, and L. Zhang	
<b>Experimental Demonstration of a Novel Heat Exchange Loop Used for Oscillating Flow Systems</b> .....	<b>1114</b>
B. Gao, Z. H. Wu, E. C. Luo, and W. Dai	
<b>A Low Cost Pressure Wave Generator Using Diaphragms</b> .....	<b>1122</b>
A. J. Caughley, D. J. Haywood, and C. Wang	
 <b>HEAT TRANSFER—II</b>	
<b>Effect of Heated Perimeter on Forced Convection Heat Transfer of He I at a Supercritical Pressure</b> .....	<b>1133</b>
D. Doi, M. Shiotsu, Y. Shirai, and K. Hama	
<b>Heat Transfer Characteristics of Slush Nitrogen in Turbulent Pipe Flows</b> .....	<b>1141</b>
K. Ohira, J. Ishimoto, M. Nozawa, T. Kura, and N. Takahashi	

## CRYOFUEL SYSTEMS

<b>A MRC Method for Low Methane Sources in Small Scale CMM Liquefaction Plant . . . . .</b>	<b>1151</b>
H. Y. Li, L. X. Jia, Q. S. Yin, Q. H. Fan, G. D. Yang, X. K. Liu, W. Bai, F. Y. Xu, Z. M. Ji, and J. S. Cui	
<b>Economic Analysis of Mixed-refrigerant Cycle and Nitrogen Expander Cycle in Small Scale Natural Gas Liquefier . . . . .</b>	<b>1159</b>
Q. S. Yin, H. Y. Li, Q. H. Fan, and L. X. Jia	
<b>Design and Analysis on the Small Scale Biogas Liquefaction Cycle . . . . .</b>	<b>1166</b>
Q. H. Fan, H. Y. Li, Q. S. Yin, and L. X. Jai	
<b>Applicability of the Joule-Thomson Cryocooler Coupled with Membrane Based Purification System for Liquefaction of Natural Gas in Small Quantities . . . . .</b>	<b>1175</b>
A. Piotrowska and M. Chorowski	
<b>Development of a Magnetic Refrigerator for Hydrogen Liquefaction . . . . .</b>	<b>1183</b>
T. Numazawa, K. Kamiya, S. Yoshioka, H. Nakagome, and K. Matsumoto	

## LARGE SCALE SYSTEMS

<b>Performance of a Liquid Xenon Calorimeter Cryogenic System for the MEG Experiment . . . . .</b>	<b>1193</b>
T. Haruyama, K. Kasami, Y. Hisamitsu, T. Iwamoto, S. Miura, T. Mori, H. Nishiguchi, W. Otani, R. Sawada, Y. Uchiyama, and T. Nishitani	
<b>Cryogenic Supply for the GERDA Experiment . . . . .</b>	<b>1201</b>
Ch. Haberstroh	
<b>The Results of Cooling Test on HTS Power Cable of KEPCO . . . . .</b>	<b>1209</b>
J. H. Lim, S. H. Sohn, H. S. Yang, D. L. Kim, H. S. Ryoo, and S. D. Hwang	
<b>Experimental Studies on Cryogenic System for 22.9 kV HTS Cable System . . . . .</b>	<b>1217</b>
S. H. Sohn, J. H. Lim, H. S. Yang, D. L. Kim, H. S. Ryoo, C. D. Kim, D. H. Kim, S. K. Lee, and S. D. Hwang	
<b>Thermal Stress Analysis for a Transfer Line of Hydrogen Moderator in J-PARC . . . . .</b>	<b>1225</b>
H. Tatsumoto, M. Teshigawara, T. Aso, K. Ohtsu, F. Maekawa, and T. Kato	
<b>Cryogenic and Vacuum Technological Aspects of the Low Energy Electrostatic Cryogenic Storage Ring . . . . .</b>	<b>1233</b>
D. A. Orlov, M. Lange, M. Froese, R. von Hahn, M. Grieser, V. Mallinger, M. Rappaport, T. Sieber, T. Weber, and A. Wolf	

## HIGH TEMPERATURE SUPERCONDUCTING CURRENT LEADS

<b>Performance of Heat Exchanger Models in Upside Down Orientation for the Use in HTS Current Leads for W7-X . . . . .</b>	<b>1243</b>
R. Lietzow, R. Heller, and H. Neumann	
<b>Using High Temperature Superconducting Leads in a Magnetic Field . . . . .</b>	<b>1251</b>
M. A. Green and H. Witte	

## LOW TEMPERATURE SUPERCONDUCTING MAGNET SYSTEMS—IV

<b>CFD Modeling of ITER Cable-in-Conduit Superconductors. PART V: Combined Momentum and Heat Transfer in Rib-Roughened Pipes . . . . .</b>	<b>1261</b>
R. Zanino and S. Giors	
<b>Stability Analysis of the ITER TF Conductor . . . . .</b>	<b>1269</b>
L. S. Richard and R. Zanino	
<b>Cryogenic Design of the KATRIN Source Cryostat . . . . .</b>	<b>1277</b>
S. Grohmann, J. Bonn, B. Bornschein, R. Gehring, W. Gil, O. Kazachenko, H. Neumann, M. Noe, and C. Weiss	

## NON-AEROSPACE COOLERS

<b>Dry Dilution Refrigerator with High Cooling Power . . . . .</b>	<b>1287</b>
K. Uhlig	
<b>Cryogenic Testing of an Active Magnetic Regenerative Refrigerator . . . . .</b>	<b>1292</b>
A. Rowe and A. Tura	
<b>The Use of Small Coolers in a Magnetic Field . . . . .</b>	<b>1299</b>
M. A. Green and H. Witte	
<b>Design Parameters for Cryogenic Thermosyphons . . . . .</b>	<b>1307</b>
H. Timinger, B. David, R. Eckart, and J. Overweg	

## FLUID MECHANICS—II

<b>Pressure Drop of Cable-in-Conduit Conductors with Different Void Fraction . . . . .</b>	<b>1317</b>
M. Bagnasco, L. Bottura, P. Bruzzone, M. Lewandowska, C. Marinucci, and F. Staehli	
<b>Flow of Saturated Liquid Nitrogen through Micro-scale Orifices . . . . .</b>	<b>1325</b>
T. A. Jankowski, E. N. Schmierer, F. C. Prenger, and S. P. Ashworth	
<b>A Rotating Heat Pipe for Cooling of Superconducting Machines . . . . .</b>	<b>1333</b>
T. A. Jankowski, F. C. Prenger, E. N. Schmierer, and A. Razani	

## THERMAL INSULATION SYSTEMS—II

<b>Vacuum Insulated, Flexible Cryostats for Long HTS Cables: Requirements, Status, and Prospects . . . . .</b>	<b>1343</b>
M. J. Gouge, J. A. Demko, M. L. Roden, J. F. Maguire, and C. S. Weber	
<b>Heat Flow Measurement and Analysis of Thermal Vacuum Insulation . . . . .</b>	<b>1351</b>
C. Laa, C. Hirschl, and J. Stipsitz	
<b>Robust Multilayer Insulation for Cryogenic Systems . . . . .</b>	<b>1359</b>
J. E. Fesmire, S. D. Augustynowicz, and B. E. Scholtens	
<b>Synthesis of the Multilayer Cryogenic Insulation Modeling and Measurements . . . . .</b>	<b>1367</b>
J. Polinski, M. Chorowski, A. Choudhury, and T. S. Datta	
<b>Thermal Performance Comparison of Glass Microsphere and Perlite Insulation Systems for Liquid Hydrogen Storage Tanks . . . . .</b>	<b>1375</b>
J. P. Sass, J. E. Fesmire, Z. F. Nagy, S. J. Sojourner, D. L. Morris, and S. D. Augustynowicz	
<b>Cost-efficient Storage of Cryogens . . . . .</b>	<b>1383</b>
J. E. Fesmire, J. P. Sass, Z. Nagy, S. J. Sojourner, D. L. Morris, and S. D. Augustynowicz	

## ACCELERATOR CRYOGENICS

<b>Cool-down of the First Sector of the Large Hadron Collider: Comparison between Mathematical Model and Measurements</b> .....	<b>1395</b>
L. Liu, G. Riddone, L. Serio, and L. Tavian	
<b>Commissioning the Cryogenic System of the First LHC Sectors</b> .....	<b>1403</b>
F. Millet, S. Claudet, G. Ferlin, A. Perin, R. Rabehl, G. Riddone, L. Ronayette, L. Serio, M. Soubiran, and L. Tavian	
<b>Validation and Performance of the LHC Cryogenic System through Commissioning of the First Sector</b> .....	<b>1411</b>
L. Serio, A. Bouillot, J. Casas-Cubillos, A. Chakravarty, S. Claudet, F. Gicquel, P. Gomes, M. Kumar, P. K. Kush, F. Millet, A. Perin, R. Rabehl, M. R. Singh, M. Soubiran, and L. Tavian	

## PULSE TUBE THEORY AND MODELS

<b>Performance Limits of Pulse Tube Cryocoolers Using <math>^3\text{He}</math>.</b> .....	<b>1421</b>
P. Kittel	
<b>Modeling and Experiments on FastCooldown of a 120 Hz Pulse Tube Cryocooler</b> .....	<b>1429</b>
S. Vanapalli, M. Lewis, G. Grossman, Z. Gan, R. Radebaugh, and H. J. M. ter Brake	
<b>Approximate Design Method for Single Stage Pulse Tube Refrigerators</b> .....	<b>1437</b>
J. M. Pfotenhauer, Z. H. Gan, and R. Radebaugh	
<b>Optimal Pulse Tube Design Using Computational Fluid Dynamics</b> .....	<b>1445</b>
R. P. Taylor, G. F. Nellis, and S. A. Klein	

## AEROSPACE CRYOGEN STORAGE

<b>Cryogenic Propellant Boil-off Reduction System</b> .....	<b>1457</b>
D. W. Plachta, R. J. Christie, E. Carlberg, and J. R. Feller	
<b>Optimized Heat Interception for Cryogen Tank Support</b> .....	<b>1467</b>
E. R. Canavan and F. K. Miller	
<b>The Performance of Gas Filled Multilayer Insulation</b> .....	<b>1475</b>
G. L. Mills and C. M. Zeller	
<b>Testing the Effects of Helium Pressurant on Thermodynamic Vent System</b>	
<b>Performance with Liquid Hydrogen</b> .....	<b>1483</b>
R. H. Flachbart, L. J. Hastings, A. Hedayat, S. L. Nelson, and S. Tucker	
<b>Analyzing the Use of Gaseous Helium as a Pressurant with Cryogenic Propellants with Thermodynamic Venting System Modelling and Test Data</b> .....	<b>1491</b>
A. Hedayat, S. L. Nelson, L. J. Hastings, R. H. Flachbart, D. J. Vermilion, and S. P. Tucker	
<b>Bubble Point Measurements with Liquid Methane of a Screen Capillary Liquid Acquisition Device</b> .....	<b>1499</b>
J. M. Jurns and J. B. McQuillen	
<b>Numerical Modeling of Propellant Boil-off in a Cryogenic Storage Tank</b> .....	<b>1507</b>
A. K. Majumdar, T. E. Steadman, J. L. Maroney, J. P. Sass, and J. E. Fesmire	

## NOVEL CRYOSTATS

<b>Subcooled Liquid Oxygen Cryostat for Magneto-Archimedes Particle Separation by Density.....</b>	<b>1517</b>
D. K. Hilton, D. Celik, and S. W. Van Sciver	
<b>Novel Integration of a 6T Cryogen-free Magneto-optical System with a Variable Temperature Sample Using a Single Cryocooler.....</b>	<b>1523</b>
A. B. Berryhill, D. M. Coffey, R. W. McGhee, and E. E. Burkhardt	

## HIGH FREQUENCY PULSE TUBE COOLERS

<b>Numerical Simulation of a Three-Stage Stirling-Type Pulse Tube Cryocooler for 4 K Operation .....</b>	<b>1531</b>
J. Y. Hu, W. Dai, E. C. Luo, and Z. H. Wu	
<b>Development and Research of Pulse Tube Refrigerators.....</b>	<b>1539</b>
L. W. Yang, J. T. Liang, Y. Zhou, and L. Zhang	
<b>A Study of a High Frequency Miniature Reservoir-less Pulse Tube .....</b>	<b>1547</b>
I. Garaway and G. Grossman	
<b>Development of a Low Cost High Frequency Pulse Tube Cryocooler.....</b>	<b>1555</b>
C. Wang, A. J. Caughley, and D. J. Haywood	

## SUPERCONDUCTING RF CAVITIES AND CRYOSYSTEMS—II

<b>ILC Cryogenic Systems Reference Design .....</b>	<b>1565</b>
T. J. Peterson, M. Geynisman, A. Klebaner, V. Parma, L. Tavian, and J. Theilacker	
<b>Installation and Commissioning of the Superconducting RF Linac Cryomodules for the ERLP .....</b>	<b>1573</b>
A. R. Goulden, R. Bate, R. K. Buckley, and S. M. Pattalwar	
<b>Recent Operating Experience for the ISAC-II SC-Linac Cryogenic System at TRIUMF .....</b>	<b>1580</b>
I. Sekachev, W. Andersson, R. E. Laxdal, and G. Stanford	
<b>Operation of the Superconducting Linac at the Spallation Neutron Source .....</b>	<b>1586</b>
I. E. Campisi, F. Casagrande, M. Champion, M. Crofford, M. Howell, Y. Kang, S. H. Kim, Z. Kursun, P. Ladd, D. Stout, and W. Strong	
<b>Cryogenic Infrastructure for Fermilab's ILC Vertical Cavity Test Facility .....</b>	<b>1594</b>
R. Carcagno, C. Ginsburg, Y. Huang, B. Norris, J. Ozelis, T. Peterson, V. Polubotko, R. Rabehl, C. Sylvester, and M. Wong	
<b>European XFEL-Linac Two-Phase He II Flow Simulations .....</b>	<b>1602</b>
V. Gubarev, B. Petersen, D. Sellmann, and Y. Xiang	

## AEROSPACE COMPONENTS

<b>Vibration-free 4.5 K Sorption Cooler .....</b>	<b>1613</b>
J. F. Burger, H. J. Holland, R. J. Meijer, A. Sirbi, and H. J. M. ter Brake	
<b>Cryogenic Quad-Redundant Thermal Switch .....</b>	<b>1621</b>
B. C. Thompson, B. Lloyd, S. H. Schick, and L. Li	

<b>High Specific Power Motors in LN<sub>2</sub> and LH<sub>2</sub> . . . . .</b>	<b>1629</b>
G. Brown, R. Jansen, and J. Trudell	
<b>An Analysis of 50 mK and 300 mK Cryogenic Environments for Future ESA Science Missions. . . . .</b>	<b>1640</b>
J. Reed, M. C. Perkinson, P. D'Arrigo, K. Geelen, I. Hepburn, C. Brockley-Blatt, L. Duband, and T. Bradshaw	
<b>STIRLING AND PULSE TUBE PERFORMANCE ENHANCEMENT AND MODELING</b>	
<b>A New Mini Pulse Tube with a Heat Interceptor . . . . .</b>	<b>1651</b>
Ph. Gully, I. Charles, J. L. Durand, and R. Briet	
<b>A Thermoacoustically Driven Pulse Tube Cryocooler Operating around 300 Hz . . . . .</b>	<b>1659</b>
G. Y. Yu, S. L. Zhu, W. Dai, and E. C. Luo	
<b>Design and Optimization of a Coaxial Pulse Tube Cooler. . . . .</b>	<b>1667</b>
W. van de Groep, J. Mullié, T. Benschop, F. van Wordragen, and D. Willem	
<b>Fast Response Temperature Measurements in Stirling Cycle Cryocooler Components . . . . .</b>	<b>1675</b>
K. Kar, M. W. Dadd, P. B. Bailey, and C. R. Stone	
<b>Automatic Distributed Load Temperature Control Strategies for a Rectified Continuous Flow Loop Interfaced with a Pulse Tube Cryocooler . . . . .</b>	<b>1683</b>
H. M. Skye, G. F. Nellis, and S. A. Klein	
<b>Performance Prediction of PTR for Different Pressure Waveforms . . . . .</b>	<b>1691</b>
S. Desai, K. P. Desai, H. B. Naik, and M. D. Atrey	
<b>CRYOSYSTEMS FOR FUSION</b>	
<b>Cryogenics for Fusion . . . . .</b>	<b>1701</b>
P. Dauguet, G. M. Gistau-Baguer, M. Bonneton, J. C. Boissin, E. Fauve, J. M. Bernhardt, J. Beauvisage, and F. Andrieu	
<b>Investigation of a Test Loop for the Cooling System of the ITER TF Coil under Pulsed Heat Load . . . . .</b>	<b>1708</b>
B. Rousset, A. Girard, S. Maze, J. M. Poncet, P. Roussel, V. Kalinin, D. Murdoch, and M. Sanmarti	
<b>Design, Analysis and Test Concept for Prototype Cryoline of ITER . . . . .</b>	<b>1716</b>
B. Sarkar, S. Badgugar, H. Vaghela, N. Shah, R. Bhattacharya, and Ch. Chakrapani	
<b>Performance of Upgraded Cooling System for LHD Helical Coils . . . . .</b>	<b>1724</b>
S. Hamaguchi, S. Imagawa, T. Obana, N. Yanagi, S. Moriuchi, H. Sekiguchi, K. Oba, T. Mito, O. Motojima, T. Okamura, T. Semba, S. Yoshinaga, and H. Wakisaka	
<b>Author Index . . . . .</b>	<b>A1</b>
