Address by the Local Organizing Committee	xvii
<i>C.A. Mendoza-Briceño</i>	
Address by the Scientific Organizing Committee	xviii
<i>R. Erdélyi</i>	

Opening Keynote Lecture

Chair: Robert Erdélyi

Progress in coronal seismology	3
<i>B. Roberts</i>	

Session 1. Waves and oscillations in solar and stellar interior

Chair: Robert Erdélyi

Multilayered solar interface dynamos: from a Cartesian kinematic dynamo to a spherical dynamic dynamo.....	22
<i>K. H. Chan, X. Liao & K. Zhang</i>	
Global models of the magnetic Sun	33
<i>A. S. Brun & L. Jouve</i>	
On phase relation between toroidal and poloidal magnetic fields in the solar cycle 23.....	39
<i>S. I. Zharkov, E. Gavryuseva & V. V. Zharkova</i>	

Session 2. Coupling of global solar and stellar motions into the lower atmosphere

Chair: Bernard Roberts

A Bayesian analysis of MHD waves in the lower atmosphere.....	48
<i>M. S. Marsh, J. Ireland & T. Kucera</i>	
The nature of running penumbral waves revealed	55
<i>D. S. Bloomfield, A. Lagg & S. K. Solanki</i>	
The nature of seismic sources associated with a proton-reach solar flare	59
<i>V. V. Zharkova & S. I. Zharkov</i>	
Small-scale structure and dynamics of the lower solar atmosphere	66
<i>S. Wedemeyer-Böhm & F. Wöger</i>	

Session 2. Posters

P-mode leakage and Lyman- α intensity	77
<i>W. Finsterle, M. Haberreiter, S. Kosovichev & W. Schmutz</i>	
Inferring the chromospheric magnetic topology through waves	81
<i>S. S. Hasan, O. Steiner & A. van Ballegooijen</i>	
Wave propagation in multiple flux tubes and chromospheric heating	85
<i>S. S. Hasan, A. van Ballegooijen & O. Steiner</i>	
Resonant acoustic waves in a stratified atmosphere	89
<i>Y. Taroyan & R. Erdélyi</i>	

Session 3. Seismology of the lower solar atmosphere and stellar chromospheres*Chair: Siraj S. Hasan*

Heating and dynamics of the quiet solar chromosphere	95
<i>W. Kalkofen</i>	
Correlative study of the emission from flares associated with Sun quakes	101
<i>J. C. Martínez-Olivero, A.-C. Donea & P. S. Cally</i>	
Two modes of propagating waves in sunspots	107
<i>D. Y. Kolobov & N. I. Kobanov</i>	

Session 3. Poster

HXR photospheric footprints	112
<i>J. C. Martínez-Olivero, A.-C. Donea & P. S. Cally</i>	

Session 4. Seismology of open versus closed magnetic structures*Chair: Marcel Goossens*

Resonant absorption in multi-stranded loops.....	118
<i>J. Terradas, I. Arregui, R. Oliver & J. L. Ballester</i>	
Magneto-seismology: effect of inhomogeneous magnetic field on transversal coronal loop oscillations	125
<i>G. Verth</i>	
Damped oscillations of two interacting coronal loops	135
<i>I. Arregui, J. Terradas, R. Oliver & J. L. Ballester</i>	
Coronal loop seismology using multiple transverse loop oscillation harmonics ...	142
<i>T. Van Doorsselaere V. M. Nakariakov & E. Verwichte</i>	

Session 4. Posters

A search for oscillating loops in Solar-B XRT observations	149
<i>A. Savcheva & E. DeLuca</i>	

Session 5. Prominence seismology

Chair: Jose Luis Ballester

Observational aspects of prominence oscillations	154
<i>O. Engvold</i>	
Theoretical aspects of prominence oscillations.	160
<i>R. Oliver</i>	
Influence of longitudinal structure in the fast modes of prominence threads	169
<i>A. J. Díaz, R. Oliver & J. L. Ballester</i>	
Attenuation of non-adiabatic oscillations in a cartesian prominence fibril	175
<i>R. Soler, R. Oliver & J. L. Ballester</i>	

Session 5. Posters

Exploring short period oscillations in filaments.	180
<i>D. Y. Kolobov, N. I. Kobanov & S. A. Chupin</i>	

Session 6. Dynamical processes and coupling in the magnetic atmosphere of Sun and stars

Chair: Miguel Ibáñez

Integrated approach to the coronal heating problem	186
<i>Y. Taroyan</i>	
Nonlinear Alfvén wave model of spicules and coronal heating	197
<i>T. Kudoh</i>	
Evolution of Alfvén wave-driven solar winds to red giants	203
<i>T. K. Suzuki</i>	

Session 6. Posters

Gaussian pulse propagation in coronal loops.	210
<i>C. A. Mendoza-Briceño, L. D. G. Sigalotti & J. A. Guerra</i>	

Session 7. Wave-particle interactions in magnetized plasmas

Chair: César A. Mendoza-Briceño

A minimal model of parallel electric field generation in a transversely inhomogeneous plasma.	217
<i>D. Tsiklauri</i>	

Session 7. Posters

Multi-wavelength investigation of energy release and transport in the 16 August 2004 flare	224
<i>L. K. Kashapova, V. V. Zharkova, V. V. Grechnev & S. S. Ipson</i>	

Session 8. Solar and stellar global coronal seismology

Chair: Viggo Hansteen

Seismology of kink oscillations in coronal loops: Two decades of resonant damping M. Goossens	230
Coronal global EIT waves as tools for multiple diagnostics I. Ballai & M. Douglas	245

Session 8. Posters

MHD waves at a spherical interface modelling coronal global EIT waves M. Douglas & I. Ballai	253
---	-----

Session 9. Fundamental physical processes in coronae: waves, turbulence, reconnection

Chair: Saku Tsuneta

Fundamental physical processes in coronae: Waves, turbulence, reconnection, and particle acceleration M. Aschwanden	259
Turbulent heating of coronal active regions D. Gomez & P. Dmitruk	271
Predicting observational signatures of coronal heating by Alfvén waves and nanoflares P. Antolin, K. Shibata, T. Kudoh & D. Shiota	281
Solar feature tracking in both spatial and temporal domains D. B. Jess, M. Mathioudakis, R. Erdélyi, G. Verth, R. T. J. McAteer & F. P. Keenan	290
MHD mode conversion in a stratified atmosphere A. M. D. McDougall & A. W. Hood	298
Damping of standing slow waves in hot coronal loops L. D. G. Sigalotti, C. A. Mendoza-Briceño & M. Luna-Cardozo	305

Session 9. Posters

High frequency oscillations in the solar chromosphere and their connection with heating A. Andic, M. Mathioudakis, F. P. Keenan, D. B. Jess, & D. S. Bloomfield	314
Damping of non-isothermal hot coronal loops oscillations M. Luna-Cardozo, R. Erdélyi & C. A. Mendoza-Briceño	318
Thermally damped linear compressional waves in a 2D solar coronal model A. Marcu, I. Ballai & B. Orza	322

Session 10. Waves and instabilities in atmospheric plasmas

Chair: Arnold O. Benz

Overview of XRT performance and first results	328
<i>A. Savcheva & the XRT Team</i>	
Damping of hydromagnetic waves by bulk viscosity	339
<i>M. H. Ibáñez S.</i>	
Non-axisymmetric oscillations of thin twisted magnetic tubes.	346
<i>M. Ruderman</i>	

Session 10. Posters

Identification of linear slow sausage waves in magnetic pores	353
<i>I. Dorotovič, R. Erdélyi & V. Karlovský</i>	
Qualitative analysis of wave propagation in a 3-D magnetic flux tube	357
<i>C. Jaimes & V. Fedun</i>	
Twisting flux tubes as a cause of micro-flaring activity	362
<i>D. B. Jess, R. T. J. McAteer, M. Mathioudakis, F. P. Keenan, A. Andic & D. S. Bloomfield</i>	

Summary of meeting

Chair: César A. Mendoza-Briceño

Concluding remarks	368
<i>A. O. Benz</i>	

Late papers

Observational review on global waves.	371
<i>D. Banerjee</i>	
Author index	379
