Contents

Preface vii

1. Introduction 1

1.1 Soft Introduction to Quantum Mechanics 1
1.2 Hilbert Space 7
1.2.1 Quantum Hilbert Space 7
1.2.2 Formal Hilbert Space 8
1.3 Human Intelligence, Mind and Reason 11
1.3.0.1 Human Reason 13

2. Elements of Quantum Mechanics 19

2.1 Basics of Non–Relativistic Quantum Mechanics 19
2.1.1 Canonical Quantization 23
2.1.2 Quantum States and Operators 24
2.1.3 Quantum Pictures 30
2.1.4 Spectrum of a Quantum Operator 32
2.1.5 General Representation Model 35
2.1.6 Direct Product Space 36
2.1.7 State–Space for n Quantum Particles 37
2.2 Relativistic Quantum Mechanics and Electrodynamics . . . 40
2.2.1 Difficulties of the Relativistic Quantum Mechanics . 40
2.2.2 Particles of Half–Odd Integral Spin 43
2.2.3 Particles of Integral Spin 45
2.2.4 Dirac's Electrodynamics Action Principle 54
2.2.5 Dirac Equation and Formal QED in Brief 60
2.2.6 Lorentzian Space-Time and Gravity 62

2.2.7 Unification of Fundamental Interactions 63
2.2.7.1 First Unification 64

3. Feynman Path Integrals 67

3.1 Path Integrals: Sums Over Histories 67
3.1.1 Intuition Behind a Path Integral 68
3.1.1.1 Classical Probability Concept 68
3.1.1.2 Quantum Probability Concept 73
3.1.1.3 Quantum Coherent States 75
3.1.1.4 Dirac's $\langle bra \,|\, ket \rangle$ Transition Amplitude . . 76
3.1.1.5 Feynman's Sum–over–Histories 77
3.1.1.6 The Basic Form of a Path Integral 79
3.1.1.7 Adaptive Path Integral 80
3.1.2 Path Integral History 81
3.1.2.1 Extract from Feynman's Nobel Lecture . . . 81
3.1.2.2 Lagrangian Path Integral 85
3.1.2.3 Hamiltonian Path Integral 86
3.1.2.4 Feynman–Kac Formula 87
3.1.2.5 Itô Formula 89
3.1.3 Path–Integral Quantization 89
3.1.3.1 Canonical versus Path–Integral Quantization 89
3.1.3.2 Elementary Applications 94
3.1.3.3 Sources 94
3.1.3.4 Fields 95
3.1.3.5 Gauges 96
3.1.3.6 Riemannian–Symplectic Geometries 97
3.1.4 Statistical Mechanics via Path Integrals 98
3.1.5 Path–Integral Monte–Carlo Simulation 101
3.1.6 Sum over Geometries and Topologies 108
3.1.6.1 Simplicial Quantum Geometry 110
3.1.6.2 Discrete Gravitational Path Integrals 112
3.1.6.3 Regge Calculus 114
3.1.6.4 Lorentzian Path Integral 117
3.2 Dynamics of Quantum Fields 122
3.2.1 Path Integrals and Green's Functions 122
3.2.2 Topological Quantum Field Theory 128
3.2.3 TQFT and Seiberg–Witten Theory 133
3.2.3.1 SW Invariants and Monopole Equations . . 134
3.2.3.2 Topological Lagrangian 135

3.2.3.3 Quantum Field Theory 138
3.2.3.4 Dimensional Reduction and 3D Field Theory 142
3.2.3.5 Geometrical Interpretation 145
3.2.4 TQFTs Associated with SW–Monopoles 148
3.2.4.1 Dimensional Reduction 152
3.2.4.2 TQFTs of 3D Monopoles 154
3.2.4.3 Non–Abelian Case 165
3.3 Stringy Geometrodynamics 170
3.3.1 Stringy Actions and Amplitudes 170
3.3.1.1 Strings 170
3.3.1.2 Interactions 171
3.3.1.3 Loop Topology of Closed Surfaces 172
3.3.2 Transition Amplitudes for Strings 174
3.3.3 Weyl Invariance and Vertex Operator Formulation . 177
3.3.4 More General Stringy Actions 178
3.3.5 Transition Amplitude for a Single Point Particle . . . 178
3.3.6 Witten's Open String Field Theory 179
3.3.6.1 Operator Formulation of String Field Theory 180
3.3.6.2 Open Strings 182
3.3.6.3 Construction of Overlap Vertices 185
3.3.6.4 Transformation of String Fields 194
3.3.7 Topological Strings 199
3.3.8 Geometrical Transitions 216
3.3.9 Topological Strings and Black Hole Attractors 220
3.4 Non–Quantum Applications of Path Integrals 227
3.4.1 Stochastic Optimal Control 227
3.4.1.1 Path–Integral Formalism 228
3.4.1.2 Monte Carlo Sampling 230
3.4.2 Nonlinear Dynamics of Option Pricing 232
3.4.2.1 Theory and Simulations of Option Pricing . 233
3.4.2.2 Option Pricing via Path Integrals 236
3.4.2.3 Continuum Limit and American Options . . 242
3.4.3 Dynamics of Complex Networks 244
3.4.3.1 Continuum Limit of the Kuramoto Net . . . 244
3.4.3.2 Path–Integral for Complex Networks 245
3.4.4 Cerebellum as a Neural Path–Integral 246
3.4.4.1 Spinal Autogenetic Reflex Control 248
3.4.4.2 Cerebellum – The Comparator 250
3.4.4.3 Hamiltonian Action and Neural Path Integral 252

3.4.5 Topological Phase Transitions and Hamiltonian Chaos 253
3.4.5.1 Phase Transitions in Hamiltonian Systems . 253
3.4.5.2 Geometry of the Largest Lyapunov Exponent 256
3.4.5.3 Euler Characteristics of Hamiltonian Systems 260

4. Quantum Universe 265

4.1 Search for Quantum Gravity 265
4.1.1 What Is Quantum Gravity? 265
4.1.2 Main Approaches to Quantum Gravity 266
4.1.2.1 String Theory 266
4.1.2.2 Loop Quantum Gravity 269
4.1.3 Traditional Approaches to Quantum Gravity 273
4.1.3.1 Discrete Approaches 273
4.1.3.2 Hawking's Euclidean Quantum Gravity . . . 275
4.1.3.3 Effective Perturbative Quantum Gravity . . 276
4.1.3.4 QFT in Curved Space–Time 276
4.1.3.5 New Approaches to Quantum Gravity . . . 277
4.1.3.6 Hawking's Black Hole Entropy 283
4.2 Loop Quantum Gravity 284
4.2.1 Introduction to Loop Quantum Gravity 284
4.2.2 Formalism of Loop Quantum Gravity 291
4.2.3 Loop Algebra 292
4.2.4 Loop Quantum Gravity 293
4.2.5 Loop States and Spin Network States 295
4.2.6 Diagrammatic Representation of the States 298
4.2.7 Quantum Operators 299
4.2.8 Loop v.s. Connection Representation 300
4.3 Quantum Cosmology 301
4.3.1 Hawking's Cosmology in 'Plain English' 302
4.3.2 Theories of Everything, Anthropic Principle and Wave Function of the Universe 308
4.3.2.1 Quantum Mechanics 311
4.3.2.2 Scientific Reduction 312
4.3.2.3 Anthropic Reasoning in Quantum Cosmology 313
4.3.2.4 Quantum State of the Universe 320
4.3.2.5 From Quantum Mechanics to Quantum Gravity 325
4.3.3 Quantum Gravity and Black Holes 330
4.3.4 Generalized Quantum Mechanics 348

4.3.4.1 Quantum Mechanics Today 351
4.3.4.2 Spacetime and Quantum Theory 352
4.3.4.3 The Quantum Mechanics of Closed Systems 353
4.3.4.4 Quantum Theory in 3+1 Form 356
4.3.4.5 Generalized Quantum Theory 358
4.3.4.6 A Quantum Theory of Spacetime Geometry 359
4.3.4.7 Beyond Spacetime 362
4.3.4.8 Emergence/Excess Baggage 363
4.3.4.9 Emergence of Signature 364
4.3.4.10 Beyond Quantum Theory 366
4.3.5 Anthropic String Landscape 367
4.3.5.1 The Landscape 373
4.3.5.2 The Trouble with de Sitter Space 378
4.3.5.3 De Sitter Space is Unstable 381
4.3.5.4 Bubble Cosmology 382
4.3.5.5 Cosmology as a Resonance 384
4.3.6 Top–Down Cosmology 388
4.3.6.1 Trace Anomaly Driven Inflation 391
4.3.6.2 Instability of Anomaly–Induced Inflation . . 401
4.3.6.3 Origin of Inflation 405
4.3.7 Cosmology in the String Landscape 409
4.3.7.1 Quantum State 411
4.3.7.2 Prediction in Quantum Cosmology 413
4.3.7.3 Anthropic Reasoning 417
4.3.7.4 Models of Inflation 418
4.3.7.5 Prediction in a Potential Landscape 421
4.3.7.6 Alternative Proposals 422
4.3.7.7 Interpretations 423
4.3.8 Brane Cosmology 425
4.3.8.1 The Randall–Sundrum Brane World 428
4.3.8.2 Including a Bulk Scalar Field 441
4.3.8.3 Moving Branes in a Static Bulk 451
4.3.8.4 Cosmology of a Two–Brane System 456
4.3.8.5 Brane Collision 462
4.3.8.6 Open Questions 468
4.3.9 Hawking's Brane New World 469
4.3.9.1 RS Scenario from AdS/CFT 473
4.3.9.2 CFT on the Domain Wall 478
4.3.9.3 The Total Action 484

4.3.9.4 Comparison with 4D Gravity 487
4.3.9.5 Summary on Hawking's Brane New World . 494
4.3.10 Brane–World Quantum Cosmology 495

5. Quantum Biophysics in Human Body: Electro–Muscular Stimulation 499

5.1 Basics of Electrical Muscular Stimulation 499
5.2 EMS Functor 503
5.2.1 Global Macro–Level of EMS_{total} 504
5.2.2 Local Micro–Level of EMS_{total} 506
5.2.3 Micro–Level Adaptation and Muscular Training . . . 507
5.3 Electrical Stimulation Fields: EMS_{fields} 508
5.3.1 External Smooth Maxwell Electrodynamics 508
5.3.2 Internal Cellular Bio–Quantum Electrodynamics . . 510
5.4 Stimulated Muscular Contraction Paths: EMS_{paths} 511
5.4.1 External Anatomical Muscular Mechanics 511
5.4.2 Internal Myofibrillar Bio–Quantum Mechanics 512
5.5 Anatomical Geometry of the Face & Body Shape: EMS_{geom} 514
5.5.1 External Face & Body Geometry 514
5.5.1.1 Facial Curvatures and Their Deviations . . . 514
5.5.1.2 Facial Riemannian Patch–Manifold 518
5.5.2 Cellular Muscle–Fat Geometry 520

6. Quantum Games and Quantum Computers 523

6.1 Nash's Classical Game Theory 523
6.1.1 Basics of Classical Game Theory 524
6.1.2 Nash Equilibrium: The Focal Point of Game Theory 529
6.1.2.1 Background to Nash Equilibrium 529
6.1.2.2 The Rationalistic Interpretation 535
6.1.2.3 The Mass–Action Interpretation 536
6.2 Quantum Games 542
6.2.1 Quantum Strategies 544
6.2.2 Quantum Games 548
6.2.3 Two–Qubit Quantum Games 550
6.2.3.1 Prisoners' Dilemma 553
6.2.3.2 Chicken Game 561
6.2.4 Quantum Cryptography and Gambling 563
6.3 Formal Quantum Games 571

6.3.1 Formal Framework 572
6.3.2 Various Types of Formal Games 573
6.3.2.1 Strategic Games 574
6.3.2.2 Quantum Simultaneous Games 574
6.3.2.3 Quantum Sequential Games 576
6.3.3 Equivalence of Formal Games 577
6.3.4 Game Classes 582
6.3.5 Summary on Formal Quantum Games 582
6.4 Quantum Information and Computing 585
6.4.1 Entanglement, Teleportation and Information 585
6.4.2 Quantum Computing 588
6.4.2.1 Qubits and Quantum Parallelism 591
6.4.2.2 Quantum Computers 591
6.4.2.3 The Circuit Model for Quantum Computers 592
6.4.2.4 Elementary Quantum Algorithms 594
6.5 The Hardware for Quantum Computers 595
6.5.1 Josephson Effect and Pendulum Analog 599
6.5.1.1 Josephson Effect 599
6.5.1.2 Pendulum Analog 600
6.5.2 Dissipative Josephson Junction 602
6.5.2.1 Junction Hamiltonian and its Eigenstates . 604
6.5.2.2 Transition Rate 606
6.5.3 Josephson Junction Ladder (JJL) 608
6.5.3.1 Underdamped JJL 614
6.5.4 Synchronization in Arrays of Josephson Junctions . . 619
6.5.4.1 Phase Model for Underdamped JJL 622
6.5.4.2 Comparison of LKM2 and RCSJ Models . . 628
6.5.4.3 'Small–World' Connections in JJL Arrays . 630

7. Quantum Mind 635

7.1 Quantum Theory of Consciousness 635
7.1.1 Human Mind 635
7.1.1.1 The Mind–Body Problem 640
7.1.2 EPR Paradox and Bell's Theorem 655
7.1.2.1 EPR Paradox 655
7.1.2.2 Bell's Theorem 662
7.1.3 Orchestrated Reduction and Penrose Paradox 667
7.1.3.1 Orchestrated Objective Reduction 669
7.1.3.2 The Orch OR Model 671

7.1.4 Physical Science and Consciousness 673
7.1.4.1 Reducing the Consciousness to Its Elements 674
7.1.4.2 Manipulation of Consciousness 682
7.1.4.3 A Need for Paradigm–Shift 685
7.1.4.4 Quantum Synapses 686
7.1.4.5 Quantum Timing of Conscious Experience . 687
7.1.5 Quantum Brain 687
7.1.5.1 Biochemistry of Microtubules 687
7.1.5.2 Kink Soliton Model of MT–Dynamics 689
7.1.5.3 Liouville–Hamiltonian Neurodynamics . . . 692
7.1.5.4 Dissipative Quantum Brain Model 698
7.1.5.5 QED Brain 706
7.1.6 Theory of Mind and Matter 714
7.1.6.1 Matter 715
7.1.6.2 Mind 721
7.1.6.3 Unification 726
7.1.7 Quantum Consciousness 729
7.1.7.1 The Experiment 733
7.1.7.2 Bio–Active Peptides 736
7.1.7.3 Drugs 737
7.1.7.4 Evolutionary Advantage 738
7.1.8 Quantum–Like Psychodynamics 738
7.1.8.1 Life Space Foam 739
7.1.9 Joint Action Psychodynamics 755
7.1.10 Feynman–Finsler Approach to Adaptation 759

Bibliography 763
