

Contents

Section I: Neutrinos in the Standard Model and Beyond

The Standard Model of Particle Physics	3
<i>Chris T. Sachrajda</i>	
Neutrino Oscillation Phenomenology	51
<i>Boris Kayser</i>	
Neutrino Interactions	65
<i>Kevin McFarland</i>	
Models of Neutrino Masses and Mixings	91
<i>Guido Altarelli</i>	

Section II: Neutrinos in Astrophysics

Standard Solar Models	119
<i>Aldo Serenelli</i>	
Solar Neutrino Experiments - Results and Prospects	147
<i>David Wark</i>	
Neutrinos and Stars	171
<i>Georg G. Raffelt</i>	

Section III: Experimental Neutrino Physics

Accelerator-Based Neutrino Oscillation Experiments	183
<i>Deborah A. Harris</i>	

Neutrino Oscillation Studies with Atmospheric Neutrinos	217
<i>Takaaki Kajita</i>	
Neutrino Experiments with Reactors	239
<i>Edwin Blucher</i>	
Absolute Neutrino Mass Measurements	261
<i>Beate Bornschein</i>	
Neutrinoless Double Beta Decay	287
<i>Kai Zuber</i>	
Superbeam, Beta Beam, and Neutrino Factory	301
<i>Yoshitaka Kuno</i>	
 Section IV: Neutrinos in Cosmology	
Leptogenesis: Standard Model and Alternatives	333
<i>Wilfried Buchmüller</i>	
Cosmological Aspects of Neutrino Physics	357
<i>Sergio Pastor</i>	
Index	383
