List of Abbreviations .....	XXI
Nomenclature .....	XXV

## Part A Experiments in Fluid Mechanics

<b>1 Experiment as a Boundary-Value Problem</b>	
<i>Ronald L. Panton, Saeid Kheirandish, Manfred H. Wagner</i> .....	3
1.1 Thermodynamic Equations.....	3
1.2 Kinematic Equations .....	5
1.3 Balance Laws and Local Governing Equations .....	6
1.4 Balance Laws and Global Governing Equations .....	8
1.5 Constitutive Equations .....	10
1.6 Navier–Stokes Equations .....	11
1.7 Discontinuities in Density .....	11
1.8 Constitutive Equations and Nonlinear Rheology of Polymer Melts ....	13
<b>References</b> .....	30
<b>2 Nondimensional Representation of the Boundary-Value Problem</b>	
<i>John F. Foss, Ronald L. Panton, Alexander L. Yarin</i> .....	33
2.1 Similitude, the Nondimensional Prototype and Model Flow Fields ...	34
2.2 Dimensional Analysis and Data Organization .....	42
2.3 Self-Similarity .....	57
<b>References</b> .....	82

## Part B Measurement of Primary Quantities

<b>3 Material Properties: Measurement and Data</b>	
<i>William A. Wakeham, Marc J. Assael, Abraham Marmur, Joël De Coninck, Terry D. Blake, Stephanus A. Theron, Eyal Zussman</i> .....	85
3.1 Density .....	85
3.2 Surface Tension and Interfacial Tension of Liquids .....	96
3.3 Contact Angle .....	106
3.4 Viscosity.....	119
3.5 Thermal Conductivity and Thermal Diffusivity .....	133
3.6 Diffusion .....	147
3.7 Electric and Magnetic Parameters of Liquids and Gases .....	158
<b>References</b> .....	169

<b>4 Pressure Measurement Systems</b>	
<i>Beverley J. McKeon, Rolf H. Engler</i> .....	179
4.1 Measurement of Pressure with Wall Tappings .....	180
4.2 Measurement of Pressure with Static Tubes .....	185
4.3 Hardware and Other Considerations .....	187
4.4 Pressure-Sensitive Paint (PSP) .....	188
<b>References</b> .....	209
<b>5 Velocity, Vorticity, and Mach Number</b>	
<i>Beverley J. McKeon, Geneviève Comte-Bellot, John F. Foss, Jerry Westerweel, Fulvio Scarano, Cameron Tropea, James F. Meyers, Joseph W. Lee, Angelo A. Cavone, Richard Schodl, Manoochehr M. Koochesfahani, Daniel G. Nocera, Yiannis Andreopoulos, Werner J.A. Dahm, John A. Mullin, James M. Wallace, Petar V. Vukoslavčević, Scott C. Morris, Eric R. Pardyjak, Alvaro Cuerva</i> .....	215
5.1 Pressure-Based Velocity Measurements .....	216
5.2 Thermal Anemometry .....	229
5.3 Particle-Based Techniques .....	287
5.4 Molecular Tagging Velocimetry (MTV) .....	362
5.5 Vorticity .....	382
5.6 Thermal Transient Anemometer (TTA) .....	434
5.7 Sonic Anemometry/Thermometry .....	436
<b>References</b> .....	446
<b>6 Density-Based Techniques</b>	
<i>Wolfgang Merzkirch</i> .....	473
6.1 Density, Refractive Index, and Optical Flow Visualization .....	473
6.2 Shadowgraphy .....	474
6.3 Schlieren Method .....	476
6.4 Moiré Deflectometry .....	478
6.5 Interferometry .....	480
6.6 Optical Tomography .....	485
<b>References</b> .....	485
<b>7 Temperature and Heat Flux</b>	
<i>Tomasz A. Kowalewski, Phillip Ligrani, Andreas Dreizler, Christof Schulz, Uwe Fey, Yasuhiro Egami</i> .....	487
7.1 Thermochromic Liquid Crystals .....	488
7.2 Measurements of Surface Heat Transfer Characteristics Using Infrared Imaging .....	500
7.3 Temperature Measurement via Absorption, Light Scattering and Laser-Induced Fluorescence .....	515
7.4 Transition Detection by Temperature-Sensitive Paint .....	537
<b>References</b> .....	553

<b>8 Force and Moment Measurement</b>	
<i>Klaus Hufnagel, Günter Schewe</i> .....	563
8.1 Steady and Quasi-Steady Measurement .....	564
8.2 Force and Moment Measurements in Aerodynamics and Aeroelasticity Using Piezoelectric Transducers .....	596
<b>References</b> .....	615

## Part C Specific Experimental Environments and Techniques

<b>9 Non-Newtonian Flows</b>	
<i>Klaas te Nijenhuis, Gareth H. McKinley, Stephen Spiegelberg, Howard A. Barnes, Nuri Aksel, Lutz Heymann, Jeffrey A. Odell</i> .....	619
9.1 Viscoelastic Polymeric Fluids .....	619
9.2 Thixotropy, Rheopexy, Yield Stress .....	661
9.3 Rheology of Suspensions and Emulsions .....	680
9.4 Entrance Correction and Extrudate Swell .....	720
9.5 Birefringence in Non-Newtonian Flows .....	724
<b>References</b> .....	732
<b>10 Measurements of Turbulent Flows</b>	
<i>Giovanni Paolo Romano, Nicholas T. Ouellette, Haitao Xu, Eberhard Bodenschatz, Victor Steinberg, Charles Meneveau, Joseph Katz</i> ....	745
10.1 Statistical Eulerian Description of Turbulent Flows .....	746
10.2 Measuring Lagrangian Statistics in Intense Turbulence .....	789
10.3 Elastic Turbulence in Viscoelastic Flows .....	799
10.4 Measurements for Large-Eddy Simulations .....	830
<b>References</b> .....	849
<b>11 Flow Visualization</b>	
<i>Wolfgang Merzkirch</i> .....	857
11.1 Aims and Principles of Flow Visualization .....	857
11.2 Visualizations of Flow Structures and Flow Direction .....	859
11.3 Visualization of Free Surface Flows .....	868
<b>References</b> .....	869
<b>12 Wall-Bounded Flows</b>	
<i>Joseph C. Klewicki, William S. Saric, Ivan Marusic, John K. Eaton</i> .....	871
12.1 Introductory Concepts .....	871
12.2 Measurement of Wall Shear Stress .....	875
12.3 Boundary-Layer Stability and Transition .....	886
12.4 Measurements Considerations in Non-Canonical Flows .....	896
<b>References</b> .....	902

<b>13 Topological Considerations in Fluid Mechanics Measurements</b>	909
<i>John F. Foss</i> .....	909
13.1 A Companion Document .....	910
13.2 Utilization of Topological Considerations for Flow Field Analyses.....	918
<b>References</b> .....	
<b>14 Flow Measurement Techniques in Turbomachinery</b>	919
<i>Oğuz Uzol, Joseph Katz</i> .....	919
14.1 Background On Turbomachinery Flows .....	921
14.2 Non-Optical Measurement Techniques .....	933
14.3 Optical Measurement Techniques .....	950
14.4 Concluding Remarks .....	951
<b>References</b> .....	
<b>15 Hydraulics</b>	
<i>Roger E.A. Arndt, Damien Kawakami, Martin Wosnik, Marc Perlin, James H. Duncan, David M. Admiraal, Marcelo H. García</i> .....	959
15.1 Measurements in Cavitating Flows .....	1009
15.2 Wave Height and Slope .....	1020
15.3 Sediment Transport Measurements .....	1033
<b>References</b> .....	
<b>16 Aerodynamics</b>	
<i>Wolf-H. Hucho, Klaus Hannemann, Jan Martinez Schramm, Charles H.K. Williamson</i> .....	1043
16.1 Ground Vehicle Aerodynamics .....	1043
16.2 Short-Duration Testing of High Enthalpy, High Pressure, Hypersonic Flows .....	1081
16.3 Bluff Body Aerodynamics .....	1125
<b>References</b> .....	1146
<b>17 Atmospheric Measurements</b>	1157
<i>Harindra J.S. Fernando, Marko Princevac, Ronald J. Calhoun</i> .....	1159
17.1 Point Measurements.....	1167
17.2 Dispersion Measurements .....	1169
17.3 Remote Sensing .....	1175
17.4 Satellite Measurements .....	1178
<b>References</b> .....	
<b>18 Oceanographic Measurements</b>	1179
<i>Bruce Howe, Teresa K. Chereskin</i> .....	1179
18.1 Oceanography .....	1182
18.2 Point Measurements.....	1188
18.3 Lagrangian Techniques .....	1192
18.4 Remote Sensing .....	

18.5 Measurement Systems .....	1203
18.6 Experiment Case Studies .....	1208
<b>References</b> .....	1214

<b>19 Microfluidics: The No-Slip Boundary Condition</b>	
<i>Eric Lauga, Michael P. Brenner, Howard A. Stone</i> .....	1219
19.1 History of the No-Slip Condition.....	1220
19.2 Experimental Methods.....	1222
19.3 Molecular Dynamics Simulations .....	1226
19.4 Discussion: Dependence on Physical Parameters .....	1228
19.5 Perspective .....	1234
<b>References</b> .....	1235
<b>20 Combustion Diagnostics</b>	
<i>Christof Schulz, Andreas Dreizler, Volker Ebert, Jürgen Wolfrum</i> .....	1241
20.1 Basics .....	1242
20.2 Laser-Based Combustion Diagnostics.....	1243
20.3 Experimental Data Devoted to Validation of Numerical Simulations and Modeling .....	1244
20.4 Application of Laser-Based Techniques .....	1247
20.5 Conclusions.....	1299
<b>References</b> .....	1300

<b>21 Electrohydrodynamic Systems</b>	
<i>Antonio Castellanos, Alberto T. Pérez</i> .....	1317
21.1 Equations .....	1318
21.2 Fluid Statics and Dynamics in EHD .....	1320
21.3 Experimental Methods in EHD .....	1322
21.4 Conductivity.....	1323
21.5 Mobility .....	1327
21.6 Electric Field Measurement: Kerr Effect .....	1328
21.7 Velocity.....	1329
21.8 Visualization .....	1330
<b>References</b> .....	1331

## Part D Analysis and Post-Processing of Data

<b>22 Review of Some Fundamentals of Data Processing</b>	
<i>Holger Nobach, Cameron Tropea, Laurent Cordier, Jean-Paul Bonnet, Joël Delville, Jacques Lewalle, Marie Farge, Kai Schneider, Ronald J. Adrian</i> .....	1337
22.1 Fourier Transform .....	1337
22.2 Correlation Function .....	1342
22.3 Hilbert Transform .....	1344
22.4 Proper Orthogonal Decomposition: POD .....	1346

22.5	Conditional Averages and Stochastic Estimation.....	1370
22.6	Wavelet Transforms .....	1378
	<b>References</b> .....	1395
<b>23</b>	<b>Fundamentals of Data Processing</b>	
	<i>Holger Nobach, Cameron Tropea</i> .....	1399
23.1	Statistical Principles .....	1399
23.2	Stationary Random Processes.....	1401
23.3	Estimator Expectation and Variance .....	1402
23.4	Signal Noise .....	1406
23.5	Cramér–Rao Lower Bound (CRLB).....	1408
23.6	Propagation of Errors.....	1416
	<b>References</b> .....	1417
<b>24</b>	<b>Data Acquisition by Imaging Detectors</b>	
	<i>Bernd Jähne</i> .....	1419
24.1	Definitions.....	1419
24.2	Types of Detectors .....	1420
24.3	Imaging Detectors .....	1421
24.4	Performance of Imaging Sensors .....	1426
24.5	Camera Selection.....	1435
	<b>References</b> .....	1436
<b>25</b>	<b>Data Analysis</b>	
	<i>Bernd Jähne, Michael Klar, Markus Jehle</i> .....	1437
25.1	Image Processing .....	1437
25.2	Motion Analysis.....	1464
	<b>References</b> .....	1488
	<b>Acknowledgements</b> .....	1493
	<b>About the Authors</b> .....	1495
	<b>Detailed Contents</b> .....	1513
	<b>Subject Index</b> .....	1531
