Preface	xv
<i>K. G. Strassmeier, A. G. Kosovichev & J. E. Beckman</i>	
Organizing committee	xvi
Conference photograph	xvii
Conference participants	xviii
Session 1. Interstellar magnetic fields, star-forming regions, and the death valley	
<i>Chairs: Takahiro Kudoh & Elisabete de Gouveia Dal Pino</i>	
Measuring interstellar magnetic fields by radio synchrotron emission	3
<i>R. Beck</i>	
Measuring ISM fields using Pulsars	15
<i>A. Noutsos</i>	
Magnetic fields, stellar feedback, and the geometry of H II regions	25
<i>G. J. Ferland</i>	
Magnetic fields in Planetary Nebulae: paradigms and related MHD frontiers	35
<i>E. G. Blackman</i>	
Magnetic fields in AGB stars and (proto-) Planetary Nebulae.	47
<i>F. Herpin, A. Baudy, E. Josselin, C. Thum & H. Wiesemeyer</i>	
The magnetic field structure in the multi-source magnetized core NGC 2024 FIR 5	53
<i>F. O. Alves, J. M. Girart, S.-P. Lai, R. Rao & Q. Zhang</i>	
The source of magnetic fields in (neutron-) stars	61
<i>H. C. Spruit</i>	
Probing interstellar magnetic fields with Supernova remnants.	75
<i>R. Kothes & J.-A. Brown</i>	
A galaxy dynamo by Supernova-driven interstellar turbulence	81
<i>O. Gressel, U. Ziegler, D. Elstner & G. Rüdiger</i>	
Posters	
Dynamically dominant magnetic fields in the diffuse interstellar medium	87
<i>A. Fletcher, M. Korpi & A. Shukurov</i>	
GMIMS: the Global Magneto-Ionic Medium Survey.	89
<i>M. Wolleben, T. L. Landecker, E. Carretti, J. M. Dickey, A. Fletcher, B. M. Gaensler, J. L. Han, M. Havercorn, J. P. Leahy, N. M. McClure-Griffiths, D. McConnell, W. Reich & A. R. Taylor</i>	
The role of the random magnetic fields in the ISM: HVC numerical simulations.	91
<i>A. Santillán, J. Kim, F. J. Sánchez-Salcedo, J. Franco & L. Hernández-Cervantes</i>	

Relative distributions of cosmic ray electrons and magnetic fields in the ISM	93
<i>R. Stepanov, A. Fletcher, A. Shukurov, R. Beck, L. La Porta & F. S. Tabatabaei</i>	
Scattered OH Maser sources in the direction of W49N.	95
<i>J. E. Mendoza-Torres, W. M. Goss, S. Streb, A. A. Deshpande & R. Ramachandran</i>	
Magnetic fields in massive star forming regions: wide-field NIR polarimetry of M 42 and Mon R2.	97
<i>N. Kusakabe, M. Tamura & R. Kandori</i>	
Observations of magnetic fields toward the star forming region S88B.	99
<i>A. P. Sarma, C. L. Brogan, T. Bourke & M. Eftimova</i>	
Magnetic fields in the Pipe nebula region	101
<i>G. A. P. Franco, F. O. Alves & J. M. Girart</i>	
Radiative magneto-hydrodynamics in massive star formation and accretion disks	103
<i>R. Kuiper, M. Flock & H. Klahr</i>	
Local star formation triggered by SN shocks in magnetized diffuse neutral clouds	105
<i>M. R. M. Leão, E. M. de Gouveia Dal Pino, D. Falceta-Gonçalves, C. Melioli & F. G. Geraissate</i>	
Distortion of magnetic fields in the pre-stellar core Barnard 68.	107
<i>R. Kandori, M. Tamura, K.-I. Tatematsu, N. Kusakabe & Y. Nakajima</i>	
The magnetic field of the evolved star W43A	109
<i>N. Amiri, W. Vlemmings & H. J. van Langevelde</i>	
On global stability of thin ionized disks immersed in an external magnetic field .	111
<i>E. Liverts & M. Mond</i>	
Magnetic braking and ambipolar diffusion in metal-poor protostars	113
<i>H. Zinnecker</i>	
Three-dimensional MHD simulations of molecular cloud fragmentation regulated by gravity, ambipolar diffusion, and turbulence.	115
<i>T. Kudoh & S. Basu</i>	
3D global MHD simulations of a proto-planetary disk: dead zone and large-scale magnetic fields	117
<i>N. Dzyurkevich, M. Flock & H. Klahr</i>	
Dead zone formation and non-steady hyperaccretion in collapsar disks	119
<i>Y. Masada</i>	
Axisymmetric magneto-rotational instability in viscous accretion disks	121
<i>Y. Masada & T. Sano</i>	
Large solar-type magnetic reconnection model for magnetar giant flare	123
<i>Y. Masada</i>	
Off-equatorial circular orbits in magnetic fields of compact objects	125
<i>Z. Stuchlík, J. Kovář & V. Karas</i>	

Electro-magnetic fields around a drifting Kerr black hole	127
<i>O. Kopáček & V. Karas</i>	
New global 3D MHD simulations of black hole disk accretion and outflows	129
<i>P. B. Dobbie, Z. Kuncic, G. V. Bicknell & R. Salmeron</i>	
Surface magnetic fields in pulsars	131
<i>G. I. Melikidze & J. Gil</i>	
Evidence of a magnetic sheath around a jet from NGC 6543	133
<i>A. B. Meinel & B. Meinel</i>	
Accretion and magnetic field submergence in neutron star surface	135
<i>C. G. Bernal, D. Page & W. Lee</i>	
The magnetic field in the X-ray binary Cyg X-1	137
<i>E. A. Karitskaya, N. G. Bochkarev, S. Hubrig, Yu.N. Gnedin, M. A. Pogodin, R. V. Yudin, M. I. Agafonov & O. I. Sharova</i>	
Two-dimensional numerical study for relativistic outflow from strongly magnetized neutron stars	139
<i>J. Matsumoto, Y. Masada, E. Asano & K. Shibata</i>	
Spectropolarimetry of supernova remnant G296.5+10.0	141
<i>L. Harvey-Smith, B. M. Gaensler, C.-Y. Ng & A. J. Green</i>	
 Session 2: Multi-scale magnetic fields of the Sun; their generation in the interior, and magnetic energy release	
<i>Chair: Nigel O. Weiss</i>	
Magnetic fields and dynamics in the Sun's interior	147
<i>A. G. Kosovichev</i>	
Paradigm shifts in solar dynamo modeling	159
<i>A. Brandenburg</i>	
Magnetic pinch-type instability in stellar radiative zones	167
<i>G. Rüdiger, L. L. Kitchatinov & M. Gellert</i>	
Impact of large-scale magnetic fields on stellar structure and evolution	177
<i>V. Duez, S. Mathis, A. S. Brun & S. Turck-Chiéze</i>	
On the relation between photospheric magnetic fields and chromospheric emission in the quiet Sun	185
<i>M. A. Loukitcheva, S. K. Solanki & S. M. White</i>	
Magnetic reconnections and energy release on the Sun and solar-like stars	191
<i>L. van Driel-Gesztelyi</i>	
Magnetic flux emergence and solar eruptions	201
<i>F. Moreno-Insertis</i>	
The second solar spectrum and the hidden magnetism	211
<i>J. Stenflo</i>	

Posters

Mini-filaments – small-scale analogues of solar eruptive events?	223
<i>C. Denker & A. Tritschler</i>	
The three-dimensional structure of the magnetic field of a sunspot	225
<i>H. Balthasar & P. Gömöry</i>	
Isolated quasi-axisymmetric sunspots.	227
<i>S. Koutchmy & V. Le Piouffle</i>	
The Sun as a magnetic star: on the manifestation of different surface structures in disk-integrated observations	229
<i>M. L. Demidov</i>	
On the dependence of magnetic line ratios on time and spatial scales	231
<i>M. L. Demidov</i>	
Near-surface stellar magneto-convection: simulations for the Sun and a metal-poor solar analog.	233
<i>M. Steffen, H.-G. Ludwig & O. Steiner</i>	
Prediction of solar magnetic cycles by a data assimilation method	235
<i>I. N. Kitashvili & A. G. Kosovichev</i>	
North-south asynchrony and long-term variations of sunspot latitudes.	237
<i>N. V. Zolotova & D. I. Ponyavin</i>	
3D reconstruction of solar magnetoacoustic waves	239
<i>A. S. Popescu</i>	
MHD remote numerical simulations: evolution of coronal mass ejections	241
<i>L. Hernández-Cervantes, A. Santillán & A. R. González-Ponce</i>	
Turbulent effects in flux-transport solar dynamos	243
<i>G. A. Guerrero, E. M. de Gouveia Dal Pino & M. Dikpati</i>	
Session 3: Planetary magnetic fields and the formation and evolution of planetary systems and planets; exoplanets	
<i>Chair: Karl-Heinz Glassmeier</i>	
The role of a magnetic fields for planetary formation	249
<i>A. Johansen</i>	
Planetary dynamos: from equipartition to asymptopia.	259
<i>P. H. Roberts</i>	
Electromagnetic interaction between Jupiter's ionosphere and the Io plasma torus	271
<i>Y.-J. Su</i>	
The role of intrinsic magnetic fields in the evolution and habitability of planets: planetary protection aspects	283
<i>M. Khodachenko, H. Lammer, H. I. M. Lichtenegger, J.-M. Grießmeier, M. Holmström & A. Ekenbäck</i>	
Effects of magnetic braking and tidal friction on hot Jupiters.	295
<i>A. J. Barker & G. I. Ogilvie</i>	

Posters

Magnetic and tidal interactions in spin evolution of exoplanets.....	303
<i>I. N. Kitiashvili</i>	
3D structures of steady flow of ideal compressible fluid in MHD: a new model of primordial solar nebula	305
<i>V. V. Salmin</i>	

Session 4: Stellar magnetic fields: cool and hot stars

Chair: Swetlana Hubrig

The basic role of magnetic fields in stellar evolution.....	311
<i>A. Maeder, G. Meynet, C. Georgy & S. Ekström</i>	
Stellar magnetic fields across the H-R diagram: observational evidence	323
<i>S. Berdyugina</i>	
The MiMeS project: magnetism in massive stars	333
<i>G. A. Wade, E. Alecian, D. A. Bohlander, J.-C. Bouret, J. H. Grunhut, H. Henrichs, C. Neiner, V. Petit, N. St. Louis, M. Aurière, O. Kochukhov, J. Silvester & A. ud-Doula et al.</i>	
Magnetic field observations of low-mass stars	339
<i>A. Reiners</i>	
Measuring T-Tauri star magnetic fields	345
<i>C. M. Johns-Krull</i>	
Magnetic coronae of active main-sequence stars	357
<i>M. Jardine & J.-F. Donati</i>	
Starspots - signatures of stellar magnetic activity.....	363
<i>K. G. Strassmeier</i>	
Magnetic fields in White Dwarfs and their direct progenitors	369
<i>S. Jordan</i>	

Posters

Analysis of the hydrogen-rich magnetic White Dwarfs in the SDSS	379
<i>B. Külebi, S. Jordan., F. Euchner & H. Hirsch</i>	
Magnetic fields in O-type stars measured with FORS 1 at the VLT	381
<i>S. Hubrig, M. Schöller, R. S. Schnerr, I. Ilyin, H. F. Henrichs, R. Ignace & J. F. González</i>	
Search for the magnetic field of the O7.5 III star ξ Persei	383
<i>H. F. Henrichs, R. S. Schnerr, J. A. de Jong, L. Kaper, J.-F. Donati & C. Catala</i>	
Is the wind of the Oe star HD 155806 magnetically confined?	385
<i>V. Petit, A. W. Fullerton, S. Bagnulo & G. A. Wade</i>	

The MiMeS project: first results	387
<i>J. H. Grunhut, E. Alecian, D. A. Bohlender, J.-C. Bouret, H. Henrichs, C. Neiner, V. Petit, N. St. Louis, M. Aurière, O. Kochukhov, J. Silvester, G. A. Wade & A. ud-Doula et al.</i>	
New magnetic field measurements of β Cephei stars and slowly pulsating B stars	389
<i>S. Hubrig, M. Briquet, P. De Cat, M. Schöller, T. Morel & I. Ilyin</i>	
Magnetic observations of pulsating B and Be stars with ESPaDOnS and Narval	391
<i>J. Silvester, C. Neiner, H. F. Henrichs, G. A. Wade, E. Alecian & V. Petit</i>	
The magnetic field of the B3V star 16 Pegasi	393
<i>H. F. Henrichs, C. Neiner, R. S. Schnerr, E. Verdugo, A. Alecian, C. Catala, F. Cochard, J. Gutiérrez, A.-L. Huat, J. Silvester & O. Thizy</i>	
Searching for a link between the magnetic nature and other observed properties of Herbig Ae/Be stars	395
<i>S. Hubrig, C. Grady, M. Schöller, O. Schütz, B. Stelzer, M. Pogodin, M. Cure & R. Yudin</i>	
Magnetic fields in classical Be stars	397
<i>R. Yudin, S. Hubrig, M. Pogodin, I. S. Savanov, M. Schöller, G. Peters & M. Cure</i>	
First magnetic stars	399
<i>I. I. Romanyuk & D. O. Kudryavtsev</i>	
Searching for a link between the presence of chemical spots on the surface of HgMn stars and their weak magnetic fields	401
<i>I. S. Savanov, S. Hubrig, J. F. González & M. Schöller</i>	
Cartography of the magnetic fields and chemical spots of Ap stars	403
<i>J. Silvester, O. Kochukhov, G. A. Wade, N. Piskunov, J. D. Landstreet & S. Bagnulo</i>	
Analysis of magnetic pressure effects in atmospheres of CP stars	405
<i>D. Shulyak, G. Valyavin, O. Kochukhov & T. Burlakova</i>	
Advanced model atmospheres with magnetic field effects included	407
<i>D. Shulyak, S. Khan & O. Kochukhov</i>	
Simulations of magneto-hydrodynamic waves in atmospheres of roAp stars	409
<i>E. Khomenko & O. Kochukhov</i>	
Gradient of the stellar magnetic field in measurements of hydrogen line cores	411
<i>D. O. Kudryavtsev & I. I. Romanyuk</i>	
Probing the size of a magnetosphere of a young solar-like star	413
<i>C. M. Hamilton, C. M. Johns-Krull, R. Mundt, W. Herbst & J. N. Winn</i>	
Numerical simulations of magnetized winds of solar-like stars	415
<i>A. A. Vidotto, M. Opher, V. Jatenco-Pereira & T. I. Gombosi</i>	
Stellar nonlinear dynamos: observations and modelling	417
<i>I. Tuominen, M. J. Korpi, P. J. Käpylä, M. Lindborg & I. Ilyin</i>	

Low-dimensional models of stellar and galactic dynamos	419
<i>D. Sokoloff & S. Nefyodov</i>	
On MHD rotational transport, instabilities and dynamo action in stellar radiation zones	421
<i>S. Mathis, A.-S. Brun & J.-P. Zahn</i>	
Angular momentum loss and stellar spin-down in magnetic massive stars	423
<i>A. ud-Doula, S. P. Owocki & R. H. D. Townsend</i>	
Radial differential rotation vs. surface differential rotation: investigation based on dynamo models	425
<i>H. Korhonen & D. Elstner</i>	
Time series Doppler imaging using STELLA	427
<i>M. Weber, K. G. Strassmeier & T. Granzer</i>	
Polarized hydrogen emission lines in Mira stars: a mystery behind the shock	429
<i>N. Fabas, A. Lèbre & D. Gillet</i>	
Direct detection of a magnetic field on the surface of slowly rotating giant stars	431
<i>M. Aurière, R. Konstantinova-Antova, P. Petit, G. Wade & T. Roudier</i>	
Dynamo-generated magnetic fields in fast rotating single giants	433
<i>R. Konstantinova-Antova, M. Aurière, K.-P. Schröder & P. Petit</i>	
HD 232862: a magnetic and Lithium-rich giant field star	435
<i>A. Lèbre, A. Palacios, J. D. do Nascimento Jr, J. R. De Medeiros, R. Konstantinova-Antova, D. Kolev & M. Aurière</i>	
Zeeman-Doppler imaging of II Peg	437
<i>T. A. Carroll, M. Kopf, K. G. Strassmeier, I. Ilyin & I. Tuominen</i>	
Magnetic Doppler Imaging of II Peg	439
<i>O. Kochukhov, N. Piskunov, I. Ilyin & I. Tuominen</i>	
Magnetic geometries of Sun-like stars: exploring the mass-rotation plane	441
<i>P. Petit, B. Dintrans, M. Aurière, C. Catala, J.-F. Donati, R. Fares, T. Gastine, F. Lignières, A. Morgenthaler, J. Morin, F. Paletou, J. Ramirez, S. K. Solanki & S. Théado</i>	
Fossil fields in early stellar evolution	443
<i>R. Arlt</i>	
Discovery of fossil magnetic fields in the intermediate-mass pre-main sequence stars	445
<i>E. Alecian, G. A. Wade & C. Catala</i>	
The surface magnetic fields of T Tauri stars	447
<i>G. A. J. Hussain, A. Collier Cameron, M. Jardine & J.-F. Donati</i>	
Magnetic fields, winds and X-rays of massive stars in the Orion Nebula Cluster	449
<i>V. Petit, G. A. Wade, L. Drissen, T. Montmerle & E. Alecian</i>	

Session 5: From stars to galaxies and the intergalactic space

Chairs: Dimitry Sokoloff and Bryan Gaensler

The magnetic structure of our galaxy: a review of observations	455
<i>J. L. Han</i>	
Galactic dynamo simulations	467
<i>D. Elstner, O. Gressel & G. Rüdiger</i>	
Cosmic-ray driven dynamo in galactic disks	479
<i>M. Hanasz, K. Otmianowska-Mazur, H. Lesch, G. Kowal, M. Soida, D. Wójtasiński, K. Kowalik, R. K. Pawłaszek & B. Kulesza-Żydzik</i>	
Pulsars & Magnetars	485
<i>M. Kramer</i>	
The magnetic field in luminous star-forming galaxies	493
<i>T. Robishaw & C. Heiles</i>	
Magnetic field transport from AGN cores to jets, lobes, and the IGM	499
<i>P. P. Kronberg</i>	
The magnetic field structure in NGC 253 in presence of a galactic wind	509
<i>V. Heesen, M. Krause, R. Beck & R.-J. Dettmar</i>	
What do we really know about the magnetic fields of the Milky Way?	515
<i>R. Wielebinski</i>	
Magnetic fields and cosmic rays in galaxy clusters and large scale structure	519
<i>K. Dolag, F. Stasyszyn, J. Donnert & R. Pakmor</i>	
Magnetic fields in the early Universe	529
<i>E. Battaner & E. Florido</i>	

Posters

The polarized emission from the galactic plane at arcminute angular resolution .	539
<i>T. L. Landecker, W. Reich, R. I. Reid, P. Reich, M. Wolleben, R. Kothes, D. Del Rizzo, B. Uyaniker, A. D. Gray, E. Fürst, A. R. Taylor & R. Wielebinski</i>	
Why we need to measure turbulent magnetic fields in HII regions	541
<i>J. E. Beckman & M. Relaño</i>	
The integrated polarization of spiral galaxies	543
<i>J. M. Stil, M. Krause, L. Mitchell, R. Beck & A. R. Taylor</i>	
Magnetism in the nearby galaxy M33	545
<i>F. S. Tabatabaei, M. Krause, R. Beck & A. Fletcher</i>	
Interplay of CR-driven galactic wind, magnetic field, and galactic dynamo in spiral galaxies	547
<i>M. Krause</i>	
Global simulations of a galactic dynamo driven by cosmic-rays and exploding magnetized stars	549
<i>M. Hanasz, D. Wójtasiński, K. Kowalik & R. Pawłaszek</i>	

Structure of magnetic fields in spiral galaxies	551
<i>H. Kotarba, H. Lesch, K. Dolag, T. Naab, P. H. Johansson & F. A. Stasyszyn</i>	
3D MHD simulations of magnetic fields and radio polarization of barred galaxies	553
<i>B. Kulesza-Żydzik, K. Kulpa-Dybęł, K. Otmianowska-Mazur, G. Kowal & M. Soida</i>	
Magnetic fields in irregular galaxies	555
<i>A. Kepley, E. Wilcots, E. Zweibel, S. Mühle, J. Everett, T. Robishaw, C. Heiles & U. Klein</i>	
Cosmic-ray driven dynamo in the medium of irregular galaxy	557
<i>H. Siejkowski, M. Soida, K. Otmianowska-Mazur, M. Hanasz & D. Bomans</i>	
DRAO deep polarization study at 1.4 GHz	559
<i>J. K. Grant, A. R. Taylor, J. M. Stil, R. Ricci, S. P. O'Sullivan, T. Landecker, R. Kothes & R. R. Ransom</i>	
Deriving AGN properties from circular and linear radio polarimetry	561
<i>E. Cenacchi, A. Kraus & K.-H. Mack</i>	
Evolution of magnetic fields in the IGM: kinetic MHD turbulence	563
<i>R. S. de Lima, E. M. de Gouveia Dal Pino, A. Lazarian & D. Falceta-Gonçalves</i>	
MHD simulations of cool core clusters	565
<i>F. Stasyszyn & K. Dolag</i>	
MHD numerical simulations of Perseus A: formation of filaments and magnetic loops	567
<i>D. Falceta-Gonçalves, E. M. de Gouveia dal Pino, J. Gallagher III & A. Lazarian</i>	
Cosmic magnetic fields in galaxies, groups and clusters	569
<i>J. Geisbuesch & P. Alexander</i>	
Cosmic magnetic fields in clusters of galaxies and their analysis	571
<i>J. Geisbuesch & P. Alexander</i>	
A study of the regular structure of the galactic magnetic field using WMAP5 polarization data at 22 GHz	573
<i>B. Ruiz-Granados, J. A. Rubiño-Martín & E. Battaner</i>	
Session 6: Advances in methods and instrumentation for measuring magnetic fields across all wavelengths and targets	
<i>Chairs: Tom Landecker & Klaus G. Strassmeier</i>	
Zeeman splitting in the diffuse interstellar medium—The Milky Way and beyond	579
<i>C. Heiles & T. Robishaw</i>	
The Faraday rotation measure synthesis technique	591
<i>G. Heald</i>	
Measuring and calibrating galactic synchrotron emission	603
<i>W. Reich & P. Reich</i>	

Imaging polarimetry as a diagnostic tool	613
<i>T. M. Gledhill</i>	
Diagnostic methods based on scattering polarization and the joint action of the Hanle and Zeeman effects	623
<i>J. Trujillo Bueno</i>	
Zeeman-Doppler imaging: old problems and new methods.	633
<i>T. A. Carroll, M. Kopf, K. G. Strassmeier & I. Ilyin</i>	
Cosmic magnetism with the Square Kilometer Array and its pathfinders.	645
<i>B. Gaensler</i>	
Measuring cosmic magnetic fields with very large telescopes	653
<i>O. Kochukhov & N. Piskunov</i>	
Posters	
Spectropolarimetry with PEPSI at the LBT: accuracy vs. precision in magnetic field measurements	663
<i>I. Ilyin, K. G. Strassmeier, M. Woche & A. Hofmann</i>	
A full-Stokes polarimeter for the GREGOR Fabry-Perot interferometer	665
<i>H. Balthasar, N. Bello González, M. Collados, C. Denker, A. Hofmann, F. Kneer & K. G. Puschmann</i>	
Testing the cosmological evolution of magnetic fields in galaxies with the SKA .	667
<i>T. G. Arshakian, R. Beck, M. Krause & D. Sokoloff</i>	
Detecting magnetic fields in large-scale structure with radio polarization	669
<i>S. Brown, L. Rudnick & D. Farnsworth</i>	
Effects of turbulence on magnetic reconnection: 3D numerical simulations	671
<i>K. Otmianowska-Mazur, G. Kowal, A. Lazarian & E. Vishniac</i>	
Author index	675
Object index	679
Subject index	684
