

CONTENTS

Preface	vii
Editor's Foreword	ix
Group Photograph	xi
Drift Wave Turbulence	1
W. Horton, J.-H. Kim, E. Asp, T. Hoang, T.-H. Watanabe, and H. Sugama	
Introduction to Turbulence in Magnetized Plasmas	20
B. D. Scott	
Nonlinear Evolution of Pressure Gradient Driven Modes and Anomalous Transport in Plasmas	46
S. Hamaguchi	
Tearing Modes in Tokamaks	59
R. B. White	
Transport of Parallel Momentum by Collisionless Drift Wave Turbulence	76
P. H. Diamond, C. J. McDevitt, Ö. E. Gürçan, T. S. Hahm, and V. Naulin	
Physics of Zonal Flows	106
K. Itoh, S.-I. Itoh, P. H. Diamond, A. Fujisawa, Y. Nagashina, M. Yagi, A. Fukuyama, T. S. Hahm, K. Hallatschek, and G. R. Tynan	
High Energy Particles in Tokamaks	127
R. B. White	
Physics of and Achievements with the H-mode	143
F. Wagner	
Introduction to Turbulent Transport in Tokamak Core	166
T. S. Hahm	
Edge Localised Modes (ELMs): Experiments and Theory	174
J. W. Connor, A. Kirk, and H. R. Wilson	
Turbulent Impurity Transport	191
V. Naulin, J. J. Rasmussen, C. Angioni, C. Giroud, M. Valisa, M. E. Puiatti, and L. Carraro	
Nondiffusive Transport Modeling: Statistical Basis and Applications	207
D. del-Castillo-Negrete	
On the Physics of Plasma Rotation in Fusion Plasmas	240
C. Hidalgo	
Basic Principles of Stochastic Transport	250
K. H. Spatschek	
Kinetic Simulations of Turbulent Fusion Plasmas	270
Y. Idomura, T.-H. Watanabe, and H. Sugama	
Turbulence Scaling Laws and Transport Models	287
X. Garbet	
Electron Temperature Gradient Mode Transport	299
W. Horton, J.-H. Kim, G. T. Hoang, H. Park, S. M. Kaye, and B. P. LeBlanc	
Basics of Turbulence Computation for Magnetically Confined Plasmas	316
B. D. Scott	
List of Participants	335
Author Index	341
