<i>Preface to the First Edition</i>	<i>page</i> vii
<i>Preface to the Second Edition</i>	xi
<i>Acknowledgments</i>	xiii
1 Introduction	1
1.1 The solar corona	4
1.2 Solar magnetism and the corona	7
1.3 Coronae of stars	13
2 Brief history of coronal studies	21
2.1 Early history	21
2.2 The rise and fall of coronium*	35
2.3 Early solar photography	38
2.4 Spectroscopic observations*	41
3 The coronal spectrum	47
3.1 Observations	48
3.2 Basic principles of spectroscopy	51
3.3 Radiation from hot plasmas*	64
4 The solar cycle	86
4.1 The corona in the solar cycle	86
4.2 Coronal structure	93
4.3 Magnetic field generation	104
5 Ground-based observations	116
5.1 Eclipse observations	116
5.2 Observatories and coronagraphs	135
5.3 Radio wavelength observations	141
5.4 Plasma properties*	144
5.5 The solar corona at radio wavelengths	153

6	Observations from space: I. The first four decades	165
6.1	Introduction	165
6.2	The early days	166
6.3	The <i>Skylab</i> mission	173
6.4	Active-Sun missions	185
7	Activity of the inner corona	197
7.1	Observations of structure and variability	198
7.2	The MHD approximation	215
7.3	Loop model atmospheres	229
7.4	Mechanisms of coronal heating	235
8	Observations from space: II. Recent missions	246
8.1	International cooperation	246
8.2	The Transition Region and Coronal Explorer	252
8.3	Techniques for soft x-ray imaging*	255
8.4	The <i>Hinode</i> mission	266
8.5	The <i>Solar Dynamics Observatory</i>	271
9	The solar wind	274
9.1	Coronal holes and the solar wind	274
9.2	How the corona affects the Earth	293
10	Solar flares and coronal mass ejections	297
10.1	Solar flares	298
10.2	The standard model	302
10.3	Flare observations	310
10.4	Stellar flares*	326
10.5	Coronal mass ejections	331
	<i>Notes</i>	346
	<i>References</i>	353
	<i>Further reading</i>	379
