Preface	ix
Acknowledgments	xi
1. Introduction to Microwaves	1
1.1 Microwaves and Electromagnetic Radiation	1
1.2 Development of Microwaves	2
1.3 Applications of Microwaves	4
1.3.1 Microwave Heating/Processing of Materials	4
1.3.2 Communications	5
1.3.3 Radio Detection and Ranging (Radar)	8
1.3.4 Electronic Warfare	9
1.3.5 Medical Applications	12
1.3.6 Scientific Applications	13
1.3.7 Industrial and Commercial Applications	14
1.3.8 Potential Applications	18
1.4 Frequency Allocation	19
1.5 Microwave Generators	20
1.6 Summary	22
References	22
2. Microwaves – Theory	25
2.1 Introduction	25
2.2 Fundamentals	25
2.2.1 Maxwell's Equations	25
2.2.2 Permittivity	26

2.2.3	Permeability	29
2.2.4	Power Dissipated	29
2.2.5	Penetration Depth	30
2.2.6	Rate of Increase in Temperature	34
2.3	Microwave–Material Interactions	35
2.3.1	Electronic Polarization	37
2.3.2	Orientation or Dipolar Polarization	37
2.3.3	Ionic or Atomic Polarization	37
2.3.4	Interfacial (Maxwell–Wagner) Polarization	37
2.3.5	Frequency Dependence of Polarization Mechanisms	38
2.3.6	Conduction Losses	39
2.3.7	Hysteresis Losses	39
2.4	Summary	39
	References	41
3.	Microwave Heating	43
3.1	Development of Microwave Heating	43
3.2	Characteristics of Microwave Heating	46
3.2.1	Penetrating Radiation	46
3.2.2	Rapid Heating	50
3.2.3	Controllable Field Distributions	50
3.2.4	Selective Heating of Materials	51
3.2.5	Self-limiting Characteristic	52
3.2.6	Microwave Effects	53
3.3	Types of Microwave Heating	56
3.4	Future Developments	57
3.5	Summary	59
	References	60
4.	Microwave Heating of Metal-Based Materials	65
4.1	Microwaves and Metals	65
4.2	Observations and Theories–Mechanisms Proposed for Microwave Heating of Metals	66
4.2.1	Size and Morphology of Starting Materials	67
4.2.2	Effect of Separate Electric and Magnetic Fields	70
4.2.3	Sintering Behavior and Mechanisms	73
4.2.4	Proposed Microwave Sintering Model by Luo <i>et al.</i>	76
4.2.5	Proposed Microwave Sintering Model by Rybakov <i>et al.</i>	79
4.2.6	Model for Microwave Heating of Metal Compacts	85
4.3	Microwave Sintering of Metals	90
4.3.1	Cermets	94
4.3.2	Ferrous Alloys	99
4.3.3	Copper Alloys	108
4.3.4	Aluminum and Composites	114
4.3.5	Magnesium and Composites	116

4.3.5.1	Microwave Sintering of Magnesium Composites	118
4.3.5.2	Effect of Microwave Heating Rate on Properties of Pure Magnesium	122
4.3.6	Tungsten Alloys	123
4.3.6.1	Effect of Particle Size Distribution and Phases on Densification	123
4.3.6.2	Effect of Sintering Atmosphere on Densification	125
4.3.6.3	Effect of Aspect Ratio of Samples on Densification	126
4.3.6.4	Comparison of Sintering Methods on Densification	126
4.3.6.5	Microwave Sintering of Nanocrystalline Tungsten Powders	126
4.3.7	Tin-Based Alloys (Electronic Solders)	128
4.3.8	Hybrid Composites	131
4.3.9	Layered Composites	131
4.4	Other Applications for Microwave Processing of Metals	133
4.4.1	Microwave Melting	133
4.4.2	Microwave Steel-making	135
4.4.3	Heat Treatment and Annealing	137
4.4.4	Diffusion Coating	137
4.4.4.1	Microwaves and Aluminization	141
4.4.4.2	Microwaves and Chromization	143
4.4.4.3	Microwaves and Boronization	143
4.4.5	Surface Treatment	144
4.4.6	Microwave Brazing and Bonding	146
4.4.7	Microwave Plasma Processing of Metals	148
4.4.8	Other Applications	150
4.5	Summary	150
	References	152
5.	Microwave Heating of Other Materials	159
5.1	Introduction	159
5.2	Food Processing	160
5.3	Ceramics Processing	163
5.4	Polymer Processing	166
5.5	Chemical and Pharmaceutical Processing	169
5.6	Waste Remediation and Recycling	172
5.7	Minerals Processing	172
5.8	Biomedical Applications	173
5.9	Other Applications	173
5.10	Summary	174
	References	175
Appendix A:	Experimental Techniques in Microwave Processing	183
A.1	Microwave Sintering of Cermets	183
A.2	Microwave Sintering of Ferrous Alloys (1)	185
A.3	Microwave Sintering of Ferrous Alloys (2)	187

A.4	Microwave Sintering of Copper (1)	188
A.5	Microwave Sintering of Copper (2)	189
A.6	Microwave Sintering of Copper Alloys	190
A.7	Microwave Sintering of Aluminum and Composites	191
A.8	Microwave Sintering of Aluminum, Magnesium, Electronic Solders and Composites	192
A.9	Microwave Sintering of Tungsten Alloys	194
A.10	Microwave Heating in Separate <i>E</i> and <i>H</i> Fields	195
Appendix B: List of Suppliers of Microwave Processing Equipment		199
B.1	Types of Microwave Furnaces Available	199
B.2	Manufacturers of Microwave Components and Thermal Insulation Materials	217
B.3	Microwave Plasma Equipment	218
B.4	Microwave Melting	220
Appendix C: List of Research Groups in Metal-Based Microwave Processing		221
C.1	Education and Research Institutes	221
Index		223
