

CONTENTS

Preface	xxi
CEC Awards	xxiii
2009 CEC Board and Technical Editors	xxvii
Acknowledgments	xxix

PART A

LARGE SCALE SYSTEMS AND TEST FACILITIES—I

Commissioning of the CMS Cryogenic System after Final Installation in the Underground Caverns	3
T. Dupont, J.-C. Courty, and G. Perinić	
Operational Experience of the Upgraded Cryogenic Systems at the NSCL	11
A. H. McCartney, H. L. Laumer, and S. A. Jones	
Cryogenic Infrastructure Upgrade of the Fermilab Magnet and Vertical Cavity Test Facilities	18
R. Rabehl, R. Carcagno, Y. Huang, B. Norris, and C. Sylvester	
Jefferson Lab 12 GeV CEBAF Upgrade	26
C. H. Rode	

PULSE TUBE CRYOCOOLERS

Design Aspects of the Resonator for a Thermoacoustic Cryocooler	37
B. V. Kamble, B. T. Kuzhivel, S. Kasthurirengan, and U. Behera	
Investigation on the Oscillating Gas Flow along an Inertance Tube by Experimental and CFD Methods	45
H. Chen, M. Zhao, L. Yang, J. Cai, G. Hong, and J. Liang	
Experimental Studies on a Single Stage Stirling Type Pulse Tube Cryocooler Driven by Oil-Lubricated Compressor	52
J. Ren, J. Hu, E. Luo, and X. Wang	
Investigation on Two-Stage 300 Hz Pulse Tube Cryocooler	60
H. K. Cai, L. W. Yang, G. T. Hong, E. C. Luo, and Y. Zhou	
Investigation of Flow Nonuniformities in a Large 50 K Pulse Tube Cryocooler	68
M. A. Lewis, R. P. Taylor, R. Radebaugh, I. Garaway, and P. E. Bradley	
Experimental Validation of a Pulse Tube CFD Model	76
R. P. Taylor, G. F. Nellis, S. A. Klein, R. Radebaugh, M. A. Lewis, and P. E. Bradley	

JT AND MAGNETIC COOLERS

Investigation on the Room Temperature Active Magnetic Regenerative Refrigerator with Permanent Magnet Array	87
Y. Kim and S. Jeong	

Estimation of Freezing Point of Hydrocarbon and Hydrofluorocarbon Mixtures for Mixed Refrigerant JT Cryocooler	95
G. Hwang, J. Lee, and S. Jeong	
A Numerical Study on the Performance of the Miniature Joule-Thomson Refrigerator	103
Y. J. Hong, S. J. Park, and Y. D. Choi	

CRYOCOOLER COMPONENT AND SYSTEM MODELING

Thermodynamic Analysis and Optimization Based on Exergy Flow for a Two-Staged Pulse Tube Refrigerator	113
A. Razani, T. Fraser, C. Dodson, and T. Roberts	
Inertance Tube Modeling and the Effects of Temperature	121
C. Dodson, A. Razani, and T. Robert	
Investigation on the Inertance Tubes of Pulse Tube Cryocooler without Reservoir	128
Y. J. Liu, L. W. Yang, J. T. Liang, and G. T. Hong	
General Method for EstimatingCooldown Time	136
M. R. Squires	
A Non-Tube Inertance Device for Pulse Tube Cryocoolers	143
S. W. K. Yuan, D. G. T. Curran, and J. S. Cha	
Figures of Merit for Multi-Stage Cryocoolers	149
J. Delmas, A. M. Kadin, R. J. Webber, and E. K. Track	
Micro-Scale CFD Modeling of Oscillating Flow in a Regenerator	157
M. J. Cheadle, G. F. Nellis, and S. A. Klein	

HIGH FREQUENCY AND THERMOACOUSTIC PULSE TUBES

Diagnostics and Optimization of a Miniature High Frequency Pulse Tube Cryocooler	167
I. Garaway, A. Veprik, and R. Radebaugh	
Study on a Single-Stage 120 Hz Pulse Tube Cryocooler	175
Y. Z. Wu, Z. H. Gan, L. M. Qiu, J. Chen, and Z. P. Li	
Characterization of a 100 Hz Miniature Pulse Tube Cooler Driven by a Linear Compressor ..	183
X. Wang, W. Dai, E. Luo, Y. Zhou, and J. Ren	
A High Frequency Thermoacoustically-Driven Pulse Tube Cryocooler with Coaxial Resonator	191
G. Y. Yu, X. T. Wang, W. Dai, and E. C. Luo	

LARGE SCALE SYSTEMS AND TEST FACILITIES—II

Refrigeration Recovery for Experiment Hall High Target Loads	201
P. Knudsen, V. Ganni, E. Yuksek, and J. Creel	
The Liquid Nitrogen System for Chamber A: A Change from Original Forced Flow Design to a Natural Flow (Thermo Siphon) System	207
J. Homan, M. Montz, V. Ganni, A. Sidi-Yekhlef, P. Knudsen, J. Creel, D. Arelius, and S. Garcia	
Helium Refrigerator Liquid Nitrogen Pre-Cooler Component Parameter Sensitivity Analysis ..	215
P. Knudsen and V. Ganni	

HIGH TEMPERATURE SUPERCONDUCTING MAGNET SYSTEMS

33.8 Tesla with a $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$ Superconducting Test Coil	225
W. D. Markiewicz, H. W. Weijers, P. D. Noyes, U. P. Trociewitz, K. W. Pickard, W. R. Sheppard, J. J. Jaroszynski, A. Xu, D. C. Larbalestier, and D. W. Hazelton	
A Study on Development of Joint between the Pancake Magnets Made of SS-Laminated Bi-2223/Ag HTS Tape	231
S. Kar, R. Kumar, P. Konduru, and T. S. Datta	
Experimental Investigation of MgB_2 Switching with Magnetic Pulses	238
S. A. Ishmael, J. Leveque, D. Netter, R. B. Meinke, and P. J. Masson	
Study of HTS Insert Coils for High Field Solenoids	246
V. Lombardo, E. Barzi, G. Norcia, M. Lamm, D. Turrioni, T. Van Raes, and A. V. Zlobin	
Applied HTS Bulks and Wires to Rotating Machines for Marine Propulsion	254
M. Miki, B. Felder, Y. Kimura, K. Tsuzuki, R. Taguchi, S. Yuan, Y. Xu, T. Ida, and M. Izumi	
The Levitation Characteristics of MgB_2 Plates on Tracks of Permanent Magnets	261
E. Perini, E. Bassani, and G. Giunchi	

INDUSTRIAL GASES AND LNG

Turnkey Helium Purification and Liquefaction Plant for Darwin, Australia	271
U. Lindemann, S. Boeck, L. Blum, and K. Kurtcuoglu	
Purification and Liquefaction of Neon Using a Helium Refrigeration Cycle Revised as Demanded	275
S. Boeck	
Integrated Cryogenic System for CO_2 Separation and LNG Production from Landfill Gas	278
H. M. Chang, M. J. Chung, and S. B. Park	

HYDROGEN SYSTEMS

Pressure Fluctuation Behavior in the Cryogenic Hydrogen System Caused by a 100 kW Proton Beam Injection	289
H. Tatsumoto, A. Tomokazu, K. Ohtsu, T. Uehara, H. Sakurayama, Y. Kawakami, T. Kato, S. Hasegawa, and M. Futakawa	
Development of the Cryogenic Hydrogen System for a Spallation Neutron Source in J-PARC	297
H. Tatsumoto, T. Aso, K. Ohtsu, T. Uehara, H. Sakurayama, Y. Kawakami, T. Kato, and M. Futakawa	
Construction of a Para-Ortho Hydrogen Test Cryostat	305
J. Essler and Ch. Haberstroh	
Liquid Hydrogen Experiment Facility with System Enabling Observation under Horizontal Vibration	311
M. Takeda, S. Yagi, Y. Matsuno, I. Kodama, S. Fujikawa, H. Kumakura, and T. Kuroda	

FLUID MECHANICS AND HEAT TRANSFER—I

Heat and Flow Characteristic of Natural Convection on Vertical Flat Plate Heater in Supercritical Helium	321
T. Okamura	

A Cryogenic Couette Viscometer to Measure Dissipation and Heat Transfer during Solidification	329
J. W. Leachman, J. M. Pfotenhauer, G. F. Nellis, and T. J. Steiner	
Preliminary Study on Heat Transfer Characteristics of Liquid Hydrogen for Coolant of HTC Superconductors	337
Y. Shirai, H. Tatsumoto, K. Hata, M. Shiotsu, Y. Naruo, H. Kobayashi, and Y. Inatani	
Performance of Heat Exchanger for Subcooling Liquid Nitrogen with a GM Cryocooler	345
H. M. Chang, S. H. Ryu, and M. J. Kim	

AEROSPACE COOLERS

USAF Space Sensing Cryogenic Considerations	355
F. Roush	
Micro-Miniature Split Stirling Linear Cryocooler	363
A. Veprik, S. Zehtzer, H. Vilenchik, and N. Pundak	
Raytheon RSP2 Cryocooler Low Temperature Testing and Design Enhancements	371
R. C. Hon, C. S. Kirkconnell, and J. A. Shrago	
ABI Cooler System Flight Module Performance	381
R. Colbert, G. Pruitt, T. Nguyen, and J. Raab	
Optimization of a Two-Stage ADR for the Soft X-Ray Spectrometer (SXS) Instrument on the Astro-H Mission	388
P. J. Shirron, M. O. Kimball, D. C. Wegel, and F. K. Miller	
Development of a 15 K Hydrogen-Based Sorption Cooler	396
J. F. Burger, H. J. Holland, R. J. Meijer, M. Linder, and H. J. M. ter Brake	
NGAS Multi-Stage Coaxial High Efficiency Cooler (HEC)	404
T. Nguyen, G. Toma, C. Jaco, and J. Raab	
Characterization of a Two-Stage Pulse Tube Cooler for Space Applications	410
R. Orsini, T. Nguyen, R. Colbert, and J. Raab	

SUPERCONDUCTING POWER CABLES—I

Superconducting Transformer for Superconducting Cable Tests in a Magnetic Field	421
E. Barzi, N. Andreev, J. Brandt, C. Carmignani, M. Danuso, V. S. Kashikhin, V. V. Kashikhin, S. Mintchev, D. Mitchell, D. Turroni, A. Rusy, and A. V. Zlobin	
Heat Transfer Experiments and Analysis of a Simulated HTS Cable	429
J. A. Demko, R. C. Duckworth, M. J. Gouge, and D. Knoll	
Operational Experience of the World's First Transmission Level Voltage HTS Power Cable ..	437
J. F. Maguire, J. Yuan, F. Schmidt, R. Soika, S. Bratt, C. King, J. McNamara, and T. E. Welsh	
Status and Progress of a Fault Current Limiting HTS Cable to be Installed in the Con Edison Grid	445
J. F. Maguire, D. Folts, J. Yuan, N. Henderson, D. Lindsay, D. Knoll, C. Rey, R. C. Duckworth, M. J. Gouge, Z. Wolff, and S. Kurtz	
Test Results for a 25 Meter Prototype Fault Current Limiting HTS Cable for Project Hydra ..	453
C. M. Rey, R. C. Duckworth, J. A. Demko, A. Ellis, D. R. James, M. J. Gouge, and E. Tuncer	

Cryogenic and Electrical Test Results of 30 m HTS Power Cable	461
V. E. Sytnikov, V. S. Vysotsky, S. S. Fetisov, A. A. Nosov, Yu. G. Shakaryan, V. I. Kochkin, A. N. Kiselev, Yu. A. Terentyev, V. M. Patrikeev, and V. V. Zubko	

LARGE SCALE SYSTEMS AND TEST FACILITIES—III

Thermo-Hydraulic Analyses Associated with the Design of JT-60SA TF Coils—Development and Validation of the TACOS/TEXT0 Tool	471
B. Lacroix, C. Portafaix, P. Hertout, S. Nicollet, L. Zani, P. Barabaschi, and R. Villari	
Preliminary Studies of the JT-60SA Cryogenic System	480
V. Lamaison, D. Balaguer, G. Gros, C. Hoa, J. L. Maréchal, F. Michel, P. Reynaud, P. Roussel, and M. Wanner	
Design and Testing of the New Muon Lab Cryogenic System at Fermilab	488
A. Martinez, A. L. Klebaner, J. C. Theilacker, B. D. DeGraff, and J. Leibfritz	

LOW TEMPERATURE SUPERCONDUCTING MAGNET SYSTEMS—I

Performance of Nb₃Sn Quadrupole Magnets under Localized Thermal Load	499
V. V. Kashikhin, R. Bossert, G. Chlachidze, M. Lamm, N. V. Mokhov, I. Novitski, and A. V. Zlobin	
Development and Test of Collaring Methods for Nb₃Sn Quadrupole Magnets	507
R. Bossert, G. Ambrosio, N. Andreev, G. Chlachidze, V. V. Kashikhin, M. Lamm, F. Nobrega, I. Novitski, M. Tartaglia, M. Yu, and A. V. Zlobin	
Mechanical Analysis and Test Results of 4-Coil Superconducting Helical Solenoid Model	515
M. Yu, N. Andreev, G. Chlachidze, R. P. Johnson, V. S. Kashikhin, V. V. Kashikhin, M. J. Lamm, M. L. Lopes, A. Makarov, M. Tartaglia, K. Yonehara, and A. V. Zlobin	
Construction and Test of a 500 MHz/200 mm RT Bore Solid Cryogen Cooled Nb₃Sn MRI Magnet	523
J. Bascuñán, S. Hahn, M. Ahn, and Y. Iwasa	
Cryogenic System for J-PARC Neutrino Superconducting Magnet Beam Line—Design, Construction and Performance Test	531
Y. Makida, H. Ohhata, T. Okamura, S. Suzuki, O. Araoka, T. Ogitsu, N. Kimura, T. Nakamoto, K. Sasaki, S. Kaneda, T. Takahashi, A. Ito, M. Nagami, T. Kumaki, and T. Nakashima	
Cryogenic Performance of a Superconducting Magnet System for the J-PARC Neutrino Beam Line	539
T. Okamura, N. Kimura, H. Ohhata, Y. Makida, T. Ogitsu, T. Nakamoto, K. Sasaki, T. Tomaru, O. Araoka, S. Suzuki, M. Iida, K. Tanaka, and A. Yamamoto	

SUPERCONDUCTING CURRENT LEADS

Development of Cryocooled Binary Current Lead in Low Temperature Superconducting Magnet System	553
Y. S. Choi, D. L. Kim, and H. S. Yang	
Evaluation of Thermoelectric Properties of BiTe Alloys for the Optimization of Gas-Cooled Peltier Current Lead	561
T. Fujii, S. Fukuda, T. Kawahara, M. Emoto, M. Sugino, J. Sun, M. Harnabe, H. Watanabe, and S. Yamaguchi	

Preliminary Design of 30 kA Current Leads for the ENEA CICC Upgraded Test Facility	569
G. M. Polli, L. Affinito, A. della Corte, A. Di Zenobio, L. Muzzi, G. Pasotti, and S. Turtù	
Current Lead Optimization for Cryogenic Operation at Intermediate Temperatures	577
L. Bromberg, P. C. Michael, J. V. Minervini, and C. J. Miles	

CEC/ICMC SESSION: SRF CRYOMODULE ENGINEERING—I

Development of a Cryogenic Mechanical Property Testing Station for Superconducting RF Cavity Material	587
C. Compton, S. K. Chandrasekaran, D. Baars, T. Bieler, P. Darbandi, and N. Wright	
COOL-IT: A Heat Exchanger System to Provide Gaseous Helium at Intermediate Temperatures for SRF LINAC	595
S. M. Pattalwar and R. Bate	
Superfluid Helium Testing of a Stainless Steel to Titanium Piping Transition Joint	601
W. Soyars, A. Basti, F. Bedeschi, J. Budagov, M. Foley, E. Harms, A. Klebaner, S. Nagaitsev, and B. Sabirov	
Measurement of SCRF Cavity Dynamic Heat Load in Horizontal Test System	609
B. D. DeGraff, R. J. Bossert, L. Pei, and W. M. Soyars	

LOW TEMPERATURE SYSTEMS AND INTERFACES

Interfacing Issues in Microcooling of Optical Detectors in Space Applications	617
J. H. Derking, H. J. M. ter Brake, M. Linder, and H. Rogalla	
300 mK Continuous Cooling, Sorption-ADR System	625
J. M. Duval, L. Duband, N. Luchier, and T. Tirolien	
The Adiabatic Demagnetization Refrigerator for the Micro-X Sounding Rocket Telescope	633
P. Wijkus, J. S. Adams, Y. Bagdasarova, S. R. Bandler, W. B. Doriese, M. E. Eckart, E. Figueiroa-Feliciano, R. L. Kelley, C. A. Kilbourne, S. W. Leman, D. McCammon, F. S. Porter, J. M. Rutherford, and S. N. Trowbridge	
Improved Design of the Intermediate Stage of a Dry Dilution Refrigerator	641
K. Uhlig	

CRYOGENICS FOR ITER

Challenges for Cryogenics at ITER	651
L. Serio	
The Cryoplant for the ITER Neutral Beam Test Facility to be Built at RFX in Padova, Italy	663
R. Pengo, F. Fellin, and P. Sonato	
Stability Analysis of the ITER CS Coil Conductors	668
L. Savoldi Richard, D. Bessette, and R. Zanino	
Process Flow and Functional Analysis of the ITER Cryogenic System	676
D. Henry, M. Chalifour, A. Forgeas, V. Kalinin, E. Monneret, L. Serio, G. Vincent, and T. Voigt	

PULSE TUBE CRYOCOOLER APPLICATIONS

A Helium Re-Liquefier for Recovery and Liquefying Helium Vapor from Cryostat	687
C. Wang	
Diaphragm Pressure Wave Generator Developments at Industrial Research Ltd.	695
A. J. Caughey, N. Emery, and N. D. Glasson	
Re-Condensation and Liquefaction of Helium and Hydrogen Using Coolers	703
M. A. Green	
Experimental Study on Cooling Performance of a Coaxial Pulse Tube Cryocooler for a Liquid Xenon Detector	711
T. Haruyama, K. Kasami, and T. Nishitani	
Increased Capacity Cryocoolers at Thales Cryogenics BV	719
D. Willems, J. Mullié, W. Van de Groep, and T. Benschop	
Reliability Test of a 1 kW Pulse Tube Cryocooler for HTS Cable Application	727
R.-L. Chen, G. W. Henzler, J. H. Royal, and J. F. Billingham	
Large Coaxial Coldfinger PTC for Process Gas Liquefaction and HTS Applications	736
P. S. Spoor and J. A. Corey	

CRYOGENIC THERMAL INSULATION SYSTEMS—I

Thermal Performance of Different Glass Microspheres in Comparison to Perlite between 77 and 300 K	747
H. Neumann	
Condensation-Evacuated Cryogenic Thermal Insulation Systems: Experimental Results of Effects of Deposited Filling Gases	755
M. Geisler, J. Wachtel, J. Hoffmann, and H.-P. Ebert	
Vacuum Studies of a Prototype Composite Coil Dewar for HTSC Tranformers	764
S. W. Schwenterly, Y. Zhang, E. F. Pleva, and M. Rufer	
Glass Bubbles Insulation for Liquid Hydrogen Storage Tanks	772
J. P. Sas, W. W. St. Cyr, T. M. Barrett, R. G. Baumgartner, J. W. Lott, and J. E. Fesmire	
Analysis and Testing of Multilayer and Aerogel Insulation Configurations	780
W. L. Johnson, J. A. Demko, and J. E. Fesmire	
Flexible Aerogel as a Superior Thermal Insulation for High Temperature Superconductor Cable Applications	788
S. White, J. Demko, and A. Tomich	
Venting and High Vacuum Performance of Low Density Multilayer Insulation	796
M. E. Riesco, C. H. McLean, G. L. Mills, S. Buerger, and M. L. Meyer	
Optimization of Layer Densities for Multilayered Insulation Systems	804
W. L. Johnson	

CEC/ICMC SESSION: SRF CRYOMODULE ENGINEERING—II

Assembly, Installation, and Commissioning of the ATLAS Upgrade Cryomodule	815
J. D. Fuerst, S. M. Gerbick, M. P. Kelly, M. Kedzie, S. MacDonald, P. N. Ostroumov, R. C. Pardo, S. Sharamentov, K. W. Shepard, and G. P. Zinkann	

ISAC SC-LINAC Phase-II Helium Refrigerator Commissioning and First Operational Experience at TRIUMF	823
I. Sekachev, D. Kishi, and R. E. Laxdal	
Injector Upgrade for the Superconducting Electron Accelerator S-DALINAC	831
T. Kuerzeder, J. Conrad, R. Eichhorn, J. D. Fuerst, B. Bravo Garcia, H.-D. Graef, C. Liebig, W. F. O. Mueller, A. Richter, F. Schlander, S. Sievers, and T. Weiland	
Pure Niobium as a Pressure Vessel Material	839
T. J. Peterson, H. F. Carter, M. H. Foley, A. L. Klebaner, T. H. Nicol, T. M. Page, J. C. Theilacker, R. H. Wands, M. L. Wong-Squires, and G. Wu	
Superconducting RF Cavity for Testing Materials and Fabrication Processes at 1.3 GHz at over Three Times the BCS Limit of Niobium	849
N. Pogue, P. McIntyre, A. Sattarov, R. Blackburn, R. Manus, F. Marhauser, and C. Reece	
Tensile Tests of Niobium Material for SRF Cavities	857
G. Wu, N. Dhanaraj, L. Cooley, D. Hicks, E. Hahn, D. Burke, W. Muranyi, M. Foley, H. Edwards, E. Harms, M. Champion, D. Baars, and C. Compton
