A Probabilistic Damage Model of the Dynamic Fragmentation Process in Brittle Materials

Pascal Forquin and François Hild

Abstract	2
1. Introduction	2
2. Damage of brittle materials under impact or blast loadings	5
3. Weibull parameters and basic properties of six reference materials ..	11
4. Dynamic fragmentation in brittle materials	18
5. Modeling of the fragmentation process in brittle materials	23
6. Summary	63
Acknowledgments	66
References	66

Peridynamic Theory of Solid Mechanics

S. A. Silling and R. B. Lehoucq

1. Introduction	74
2. Balance Laws	83
3. Peridynamic States: Notation and Properties	97
4. Constitutive Modeling	100
5. Linear Theory	116
6. Relation to Other Theories	127

7. Discrete Particles as Peridynamic Bodies	135
8. Damage and Fracture	150
9. Discussion	162
Acknowledgments	164
References	164

Ductile Fracture by Void Growth to Coalescence

A. Amine Benzerga and Jean-Baptiste Leblond

1. Introduction	170
2. Experimental Facts	172
3. Computational Cell Models	188
4. Void Nucleation and Damage Initiation	205
5. Fundamentals for Porous Ductile Solids	211
6. Void Growth Models	221
7. Void-Coalescence Models	248
8. Top-Down Approach to Ductile Fracture	267
9. Crack Initiation and Growth	274
10. Discussion	289
Acknowledgments	294
A. GLD Criterion Parameters	294
B. Finite Element Formulation	295
References	297
SUBJECT INDEX	307
